BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cokes if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING,
CHICAGO, ILL., March 13, 1884.

Trade of late has improved but little. At present the town is besieged with Eastern drummers. While calling on a prominent card house your correspondent met Mr. Shearer, representing the W. W. Whiting Company, of Pittsfield, and Mr. Wolff, of Wolff Brothers, Philadelphia, both of whom report a good trade.

The weather here has been unfavorable for business, much snow having fallen during the month, with cold weather and every indication at present of it holding out for quite awhile.

Rand, McNally & Co. have just issued a new series of indexed pocket-maps of the States of Iowa, Indiana, Illinois, Kansas, Nebraska, Missouri and Arkansas. These maps are the most complete of any published by this firm, the special features of them being that they locate the branch or particular division of railroad upon which each station is situated; the nearest mailing point of all local places; designates money-order post-offices, telegraph stations, and names the express company doing business at the points where the several companies have offices. They are, in fact, a complete shipper's guide.

A slight disagreement between Keen & Snell, stationers, doing business at 160 La Salle street, has caused a change in the firm. Mr. Keen has associated with himself F. C. De Lang, of writing-ink fame, and has opened up at 130 La Salle street, under the firm-name of Keen & De Lang. Mr. Snell continues at the old stand, under the name of E. A. Snell & Co.

Geo. E. Marshall & Co., located for so long at 167 Madison street, have found their old quarters too small for them, and have moved to 144 and 146 Monroe street, a prettier or more tastefully fitted up store would be hard to find.

The Novelty Card and Advertising Company, 115 and 117 Monroe street, reports an excellent trade. It claims to have the largest stock of cards and novelties in the West. It has recently gone into the scrap picture business, the line which it carries is of its own direct importation, and is very fine and extensive.

The Western agency of the Crump Label Company has removed from 51 to 60 and 62 Wabash avenue.

The Friend & Fox Paper Company, of Cincinnati, has started up a branch here at 135

Wabash avenue, under the management of J. White and J. E. Wright.

E. W. Carr & Co., 16 Calhoun Place, are now making a specialty of printed trade lists for which they inform me they are now having a large demand.

H. McAllaster & Co., 196 and 198 Clark street, have just gotten out a new catalogue of twenty-four pages of their cards and shape novelties. They inform me that they have made arrangements with a European house to handle their line of Christmas cards in the United States, also their valentines for 1885. Their Mr. Lyman has just returned from the East.

I notice that Chicago is rapidly advancing in art matters. Sypher & Co., of your city seem to appreciate this fact and have started up a branch house here at 163 Wabash avenue under the efficient management of Mrs. H. C. Ayer, a lady of recognized artistic ability.

The Pauline Art Pottery Company, whose salesroom at 175 Wabash avenue, I lately visited, stated that the demand for its ware was far ahead of the supply. It contemplates building some new kilns in the spring. It has got out quite a novelty in the way of pottery which is what may be called marbled clay, and consists in the molding of different colored clays so that when finished the article has the appearance of clouded marble, the effect produced being very pretty.

GARDEN CITY.

LOUISVILLE LIGHTS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., March 15, 1884.

Retail trade is just emerging from a most depressing period of stagnation—which brings us again to a discussion of the weather. January was a month of blizzard and polar waves, compelling people to keep indoors and devote themselves to keeping up fires; February came in with unremitting rains and unprecedented floods; March followed with gloom and sleet and slush. An observant merchant expresses the opinion that the first nine weeks of 1884 offered fewer opportunities for shopping than any similar epoch in many years' experience. Not only have sidewalks and streets been in such a condition as to discourage travel, but overhead, too, the sullen clouds and murky atmosphere lent effective aid in putting a damper on trade. However, the turning-point was reached early this week, for, wonderful to relate, we have had three or four successive days of fair weather, and to-day there are faint signs of dust flying in the streets, showing that there must be a dry spot somewhere. So the embargo on business is about removed, and the shopkeeper will en-

deavor to make up for lost time. Another restriction was the scarcity of money with the working classes, who, after all, furnish the sinews of business; the flooding of manufactories and the unfavorable weather for outdoor work kept a large proportion of the laboring population in enforced idleness for several weeks. But everything is quickly righting itself now, general building interests and public improvements are rapidly absorbing the unemployed labor, and the factories in the late flooded districts have almost without exception resumed active operations.

The jobbing trade has not manifested any serious depression, though, of course, influenced somewhat by the abnormal weather conditions. Southern orders are coming in satisfactorily in the staple lines, and in the past week quite a good number of country buyers have appeared in the market. Collections are irregular and rather slow, the Cotton States showing up about as usual, with Kentucky, Indiana and Illinois behind the average, and debtors almost uniformly attributing their slowness to bad roads or the flood. *Bradstreets* report a slight increase in the number of mercantile failures in this city and tributary sections, though the character of the houses involved is insignificant. The banks report the money market easy and comfortable, but in anticipation of large demands from the whiskey interests, rates are firm at 7 per cent.

In the stationery trade matters are quiet and steady, with a better degree of activity in the manufacturing departments than in regular stock. The valentine season proved satisfactory to a few houses, but disappointing to others; it is noted, however, that the finer grades were generally well sold off. The Easter-card business is just being opened up and the prospects are regarded as favorable. In fact, there seems to be no limit to the card business.

The Louisville Press Company is the name of a new corporation consisting of B. Du Pont, R. M. Kelly, A. E. Willson, W. S. Wilson and I. Dinkelspiel. The authorized capital stock is \$150,000, and the company is empowered to publish one or more daily papers and to do a general job-printing business. The incorporators are at present mostly identified with the *Commercial*.

Jno. D. Woods, late in the newspaper business at Bowling Green and Glasgow, Ky., has been elected public printer by the Legislature. It is rumored that he will establish a new journal at Frankfort, to be called *The Capital*.

C. C. Cline & Co., printers, will, on Monday next, transfer their entire business to a new corporation, the Guide Publishing Company, of

which J. R. Marrs will be president, and Chas. Francis, secretary, and whose authorized capital stock is fixed at \$50,000.

The stock of toys and fancy goods of Theo. Faulwetter, West Market street, who enjoys the notoriety of having failed three times in three successive years, is being closed out at daily auction and the wares are selling at nominal prices.

Caron's City Directory for 1884 has just been issued, and contains, in addition to the regular matter, a directory of householders and business concerns arranged by streets and numbers, thus taking the streets in alphabetic order, taking the numbers for each building on each street and giving opposite and in numerical order the name of the occupant. The publisher frankly says: "The great cities of London and Paris publish their directories on this plan, and it is not therefore claimed as a new idea." The directory shows that the city has a grand total of 27,631 buildings, of which 24,366 are dwellings and shelter 30,849 families. The population, at a conservative estimate, is placed at 155,600, an increase of 4,500 for the year.

The General Assembly of the Commonwealth has just contracted with John P. Morton & Co. for 650 copies of Barbour's Digest of Kentucky Reports at \$12 per volume.

The ubiquitous traveling man has been active and numerous in this latitude of late. Among the visitors the past week were the following—named from New York: L. Maynz, for Edward Posen & Co.; A. C. Veiller and Frank Raudnitz, for Henry Levy & Son; Chas. G. Loderberg, for the Whitmore and Nicoll Company, and James Ferguson, for the Goodyear Rubber Company. BOURBON.

WASHINGTON WAFTINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., March 18, 1884.

'Tis often said that the "City of Magnificent Distances" is a great political centre. The truth of this statement can be very readily seen when we remember that here yearly are gathered together our most astute politicians and those who come nearest in filling the places made vacant by the demise of such noted statesmen as Clay, Calhoun and Webster. Here in the Capitol may be seen on any day some of the shrewdest men who live by their skill in manipulating the wires which set up or pull down Presidents, and also here do we find the article out of which the President is made; therefore, it goes without saying that the city of Washington is a great, if not the greatest, political centre in the United States. While this has been true of Washington in a political sense for a long time, it is but recently that close observers have begun to note the fact that the Capital of the nation is fast becoming one of the great literary centres of the country, and that here are gathering as residents and yearly visitors some of the most noted of those who wield that implement which Mr. Bulwer saw fit to say was mightier than the sword. Each year Washington is becoming more and more a literary centre, where the keen-witted novelist may find the many sides of life which he weaves into romance, where the students of political economy may talk with the makers of laws, and where the historian meets face to face the men who were participants in the many acts of peace and war which have made this wonderful country a power in the world. There is nothing in this which should excite our special wonder, for it is but a repetition of history. We are a young nation, our Capital is just beginning to grow,

and like the seats of government in the older countries across the seas, as it widens and beautifies in topography it also fills up with the most noted of citizens, because they find here that which is most suited to their intellectual growth and a great deal of that most powerful of factors in the making of the somewhat indefinable article of life called "happiness," namely, pleasant associations. People of refinement and wealth come here, because here they find a beautiful, healthy city, containing the best people of all of the States. In the light of these facts, it is not strange then that Washington has some of the best book stores in the country, and that the trade of the bookseller and stationer is a lively one at most seasons of the year. There is always a demand for books, and for the best books, too; none of your yellow-back trash about "Mad Mike, the Indian Slayer," but something by a master hand.

Along with the book trade there very naturally follows a demand for the best things which the stationers' art and fancy can produce. The people are always ready and willing to purchase the best novelties, if they show any degree of artistic skill in their design and finish. The lovers of art everywhere will appreciate almost any sort of a subject, whether on paste-board or on canvas, provided it has the evidences of culture and skill in its conception or execution, and this being the case here in Washington, where there are so many intelligent art critics, the better class of souvenir novelties are much sought after and readily purchased. Those regularly in this sort of trade, and I mean by this the jobbers who always carry with their large stock of books the best things and the latest styles in the fancy goods trade, are brought into very close competition by a certain class of dealers who, by hook or crook, manage to secure their stock in such a manner and on such terms as will enable them to greatly undersell the legitimate jobber. How this is all accomplished is a mystery to those who, with a feeling of outraged justice, ask for some explanation from the large manufacturers of this class of goods. During the holidays a stationer said to me: "Just look at this, here are a pair of pretty bisque figures which I purchased in New York for what I supposed was a fair price, and in order to realize a just profit I sold them to my customers at \$3 a pair, and they are returned to me by a discontented buyer with the remark that he does not want them, as he can purchase the very same thing at a place (a dry-goods store) on — street for the sum of \$1, and greatly to my astonishment, upon investigation, I find that he is telling the truth."

And thus it is in all branches of the stationers' business. Why will the manufacturer sell a china dog, a galvanized monkey or a nickel-plated elephant to the stationer for a dollar each and then when the dry-goods man comes along sell the same menagerie at fifty cents a head less? Answer, ye mighty monopolists and give peace to the souls of the suffering booksellers and stationers who are the manufacturers' best friends in pushing to the front their wares at all times.

Trade at present is quite brisk and there is much activity on the part of buyers, most of whom at this season are to be found among the wealthier class of citizens who entertain almost daily and for the purpose of correspondence lay in a large supply of the more fashionable stationery. Senators, Congressmen and many prominent employes in the departmental service of the Government entertain large numbers of people during the winter season and this, of course, makes the trade in the sta-

tionery line lively, as it entails the purchase and use of a great deal of paper in sending and accepting of invitations. The stationery furnished to the various departments is of course very great in quantity and very varied in quality. The contract for such is generally let to the lowest bidder and in this way all have an equal chance at Uncle Sam's patronage. The Post-office and Treasury Departments probably use the greatest amount of stationery while the Department of State and the Executive Mansion vie with each other in an extensive use of the best qualities. Every year, with much amusement to the public and with no little excitement to the Congressmen and Senators, the newspapers "hereabouts" publish a long list of the things which have been drawn by the worthy statesmen and boldly charged to the innocent little item of "stationery." The articles embrace almost everything from a trade dollar to a fifty dollar album or the finest-fashioned smelling bottle. The gentlemen who keep the laws in working order are allowed \$125 per year for stationery which they are at liberty to draw in cash or take in stationery as they see proper; hence this pretty little programme every year.

Strolling into the very handsome new quarters of G. A. Whitaker yesterday, I was told that the signs were very favorable for a lively trade during the Easter holidays, and that his stock was already fast disappearing, much to his gratification, as he, anticipating a good trade, had supplied himself with a large and varied assortment of cards and novelties, prominent among which are the artistic works of L. Prang, J. D. Whitmore & Co., Evans & Plummer, and of the imported goods of Hildesheimer and Tuck.

Strolling down the avenue, which daily presents an appearance of Broadway, New York, I noticed some beautiful designs of stationery in Dempsey's show-window, which seemed to be attracting the notice of passers-by. Continuing the walk toward the capitol, Robert Beall's store was reached, and from him I learned that already his stock of Easter goods was moving very satisfactorily.

Mr. Morrison, his neighbor, although having a large law-book trade, deals quite largely in the fancy goods, and has also a well-selected stock of Easter goods. BEN.

BOSTON BILLETS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., BOSTON, March 19, 1884.

During the past two months I have had frequent occasion to comment upon the weather, and it might be possible that there are some people who tire of this thing. Well, I am tired of it myself, and so are the tradespeople who are forced to do business under such disagreeable conditions. Complaints have been numerous and frequent, and not without some reason. Just look at the facts as officially presented by our Weather Bureau; eight fair days in the month of January, only one during the whole twenty-nine days of February, and so far in March we have enjoyed four more. Out of a possible ninety, thirteen days have been pleasant, while the remainder were given to rain or snow. Not such a bad showing for bad weather. And I doubt if any locality outside of New England can equal it.

And, notwithstanding this, business has been quite good. Some houses report even a larger

(Continued on page 360.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.
In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.
All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 358.)

volume of trade for the past month than for the same time last year. In fancy stationery, staple goods, specialties and Easter novelties, the same encouraging report is made by the leading jobbers in these varied lines. The outlook for the spring trade is very good.

In Easter souvenirs, H. H. Carter is displaying a very extensive line. Some are imported and some the work of home artists. Among the imported novelties for Easter are some very unique and original designs. One is a beautiful cross made entirely of mother-of-pearl, mounted upon a black enameled card, and fastened thereto with round, gilt-headed buttons. The card is furnished with an easel-back. The beveled edges are gilded and a gilt inscription upon the cross heightens the effect, producing a most agreeable impression upon the eye. These pearl crosses are from London. Each one is inclosed in a pretty folder and neatly boxed. Mr. Carter supplies the trade. Another novelty found here is ivory slabs intended for hand-painting. These slabs are round, about six inches in diameter and an inch thick. The edges are rough, just as they come from the tusks, while the surfaces are highly polished. Hand-painted Easter cards, presenting floral designs and comic scenes, are also among the novelties displayed by this enterprising jobber. One feature about Mr. Carter's salesroom is that we can always find here the leading novelties of the season. People become weary of a continued sameness in these home ornaments and are ever on the watch for something new and original. Successful dealers must cater to these changing whims, and none study the signs of the times more keenly than Mr. Carter.

Manifold letter books are becoming quite popular among commercial men, and the growing demands from the trade have kept the Boston manufacturers running full time. Just what the daily output is I can't say, but it will be slightly curtailed for the next few weeks, owing to the destruction by fire of the largest establishment of the kind in the city. The factory destroyed was located at 418 Harrison avenue, and owned by Samuel Hano. The loss is placed in the thousands, and only partially insured. Mr. Hano is favorably known to the trade, and was doing a large business with his manifold books. Other quarters will be secured and the business will suffer as little interruption as possible.

Carter, Rice & Co. report that the trade in envelopes and writing papers shows considerable activity. The reduction in letter postage is beginning to have its effect in the increased consumption of writing material. The use of postal cards is considered in bad taste, and their use is on the decline. It is noticed, also, that the trade are calling for a better class of goods than in former years, an evidence that the people at large are showing more taste in their epistolary correspondence.

The trade of this house is steadily increasing, and to accommodate its needs an upper floor of the building has been secured for storage-room. The firm proposes to partition off a spacious room on this floor for the use of its patrons. This room is to be known as the "Stationers and Printers' Exchange," and will be fitted up in first-class style, with desks, chairs, tables, &c. Pens, ink, paper and envelopes will be furnished in such quantities as the demands of the exchange shall call for. Checking facilities will be provided; the daily papers will be kept on file, and an attendant will be placed in charge. Stationers, printers, paper-dealers and

others interested in kindred branches of trade who may visit the city, will be cordially invited to make their business headquarters at the exchange. Visiting tradesmen can have their mail addressed care of the exchange, and any purchases made while in the city—small packages, bundles, &c., can be ordered to the exchange subject to their orders. There has been a long-felt want for just such a rendezvous, and it is reserved for the enterprising house of Carter, Rice & Co. to inaugurate this exchange. No straight-laced "rules and regulations" will be enforced. In fact, such freedom of speech and action as is consistent with good morals will be permitted. And all this convenience is without cost to visitors. Visitors may come and go, enjoy the many facilities of the exchange and discuss trade, without money and without price. Score one for Carter, Rice & Co.

Whittemore Brothers & Co., manufacturers of the "Triumph mucilage," report that the spring trade for this line of goods has opened up, and that numerous orders are being filled. It is claimed for this mucilage that it never moulds or sours in hot weather; it has no odor and sticks with great tenacity. Dealers can rely on its never spoiling on their hands. This mucilage is not competing with the cheap article, but for quality it is strongly recommended. This house does such a large business in mucilage that it has always carried heavy stocks of raw gum and so the "troubles in Egypt" have caused the manufacturers no uneasiness as yet. Card rates still hold good with the trade.

A. L. D.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, March 18, 1884.

Business has halted again. Clerks and salesmen wear long faces. Novices look blue. Older men laugh in their sleeves and enjoy the fun. There has been quite a brisk season, and now it is anything but brisk. The weather has been gloomy and unsettled. One day of wintry rain and sleet and another of high winds and chilling mists have not put people in a mood for buying and selling. But they are using up stocks on hand all the while and consumers never cease their work of consumption. Nature abhors a vacuum, as everybody knows, and empty shelves, whether in the merchant's store or the consumer's wardrobe, will be filled. Emptiness is a beggar that must be satisfied. One might as well cut a long story short by saying, without more ado, that there is nothing the

matter with the times. The trouble is wholly with the men who growl. Those who have learned as well as lived are cheerful enough. They know that the good time is here and that the man who knows how to improve it has found the philosopher's stone.

Among the good resolutions made this year by business men, stationers and paper-trade men particularly, in this diluvian anti-diluvian and past-diluvian city, was one to make no more bad debts. There is business for you. The man who discovers that art will have a fortune at command. Another "resolve" was 'not to cut margins so as to annihilate profits. How very wise this last business principle is! Its discoverer deserves a title. This principle is death to cut-throat competition. Well, these two resolutions have actually been taken by several individuals and firms here. They are enthusiastic on the subject, and desire to disseminate this "new" creed. If it could be made infectious like smallpox or measles nothing would please them better than to learn that the entire atmosphere of the whole country was so filled with the infection that no one could escape.

A wholesome conservatism pervades all business. By some people Cincinnati conservatism is regarded a trifle excessive. But, excessive or sufficient, it is in full force just now. Men are cautious about venturing, cautious about giving credit, cautious about asking credit, very cautious about indorsing paper, and very reluctant to ask indorsers to their own paper. There is no lack of evidence that merchants mean to make their business pay—that is, they intend to secure fair prices for the commodities they sell, so as to leave a profit after paying for capital, brains, risk and other items of the cost of running a business. Now, if everybody will hold out as he has set out in this new path, the world will witness an increase of thrift in Cincinnati.

Do you want something in the way of incident? Sorry that nothing of the kind can be given worth the penning. Stationers who manufacture mercantile blanks are finding employment for all their facilities.

Printers who turn off circulars, cards, pamphlets, posters, and all such like, are busy as nailers. These instances of business activity and of general faith in the immediate prospect for good trade are not the only contradictions to the croakers and growlers who complain that the times are dull because they are not kept running their legs off, day and night, waiting on customers.

- No. 294,732. Thermometer.—Henry Guth, New York, Y. N.

MEMORANDUM-BOOK AND PAD.

A new memorandum-book and pad is designed to provide an improvement in merchants' self-copying memorandum-books and pads.

The book is a plain memorandum-book, of ordinary size—preferably of a size adapted to be carried in the coat-pocket. A slip pad or tablet is attached, by any suitable means, to the cover of the book, outside, so that the book and pad are as one. The cover of the book is formed or provided with a carbon-paper attachment. This attachment is composed of a heavy paper flap, that is attached to the cover of the book by rivets or eyelets, a leaf that is a trifle wider than the leaves of the memorandum-book, and a frame that holds the sheet of carbon-paper. The frame is adapted to fold back upon the leaf, which is adapted to be folded in between the leaves of the book, so that when the book is closed the leaf, with frame and carbon-paper, serve as a book-mark, enabling the memorandum-book always to be opened at the right place, and the leaf serves also to always hold the sheet of carbon-paper in its proper place, so that when the book is opened for making a memorandum it is only necessary to tip the frame over upon the right-hand side of the book, to bring the carbon-paper into position for use. The book being open and the sheet of carbon-paper turned upon the right-hand side of the book, in making the memorandum a slip taken from the pad will simply be placed upon the sheet of carbon-paper and the memorandum written upon the slip with an ordinary lead-pencil. The memorandum will be impressed or written through the carbon-paper upon the leaf of the book in exact fac-simile of the memorandum on the slip. The frame and leaf will then be raised off from the leaves of the book sufficiently to permit the sheet having the memorandum just written upon it to be turned. Then the book will be closed upon the leaf, carbon-sheet and frame, and placed in the pocket ready for the next entry.

This book is said to be very convenient and easily used, and by the use of the frame the carbon-paper is always held in the flat position and prevented from folding.

The frame may be made of metal, hinged and attached to the leaf by the rivets or eyelets; or it may be made of leather or of paper, or of any other suitable material. If made of heavy paper, or of the same material as the leaf, it may be made a part of the leaf; and if the frame and leaf are both made of the same material as the cover of the book, the cover, leaf and frame are all made in one piece.

The carbon-paper is attached to the frame with cement or in any other suitable manner.

A NEW DISCOVERY.—Waterproof paper and pasteboard as strong as parchment are now made by treating the sheets with a solution of oxide of copper in ammonia, so as to partially dissolve a thin film of the paper, which is then dried.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

SEND FOR CIRCULAR AND PRICE LIST

PERFORATED PAPER TABLET.

This is a device in which several distinct and separate tablets or blocks of different sizes are embraced in one article, so as to enable the user to take only the amount necessary for his use at one time without the trouble or cost of keeping on hand a variety of different sized tablets, as is usually the case with accounts and others.

The invention consists in providing the several sheets of paper composing a tablet with lines of perforations arranged in such a manner as to divide the same into several distinct parts of different sizes.

The several sheets of paper composing the tablet are perforated vertically and horizontally, so as to divide the sheets into several distinct parts, each of these several parts being of a size larger or smaller than the others, to suit the user's convenience, and when the sheets are put together to form a single tablet or block, the lines of perforations divide the same into minor tablets or blocks of various sizes, thus doing away with the usual necessary practice of keeping on hand a variously-sized lot of such articles. Should only a small piece of paper be required for use, it can be detached from the sub-tablet or block, leaving the remainder of the sheet intact, and should it be desirable to use both sides of the paper, this detached portion of the sheet may be folded over upon an adjoining section, this operation being similarly performed with any of the several sections, as convenience may require; by a tablet or block constructed in this manner memorandums may be kept upon a portion of the same without detachment, while the other portions may be used and torn off at pleasure.

PAPER-HANGERS' PASTE.

Beat up 4 pounds of good white wheaten flour in cold water—enough to form a stiff batter—sifting the flour first, and beat it well to take out all the lumps. Then add about 2 ounces of well-powdered alum. Have a quantity of boiling water ready at hand, take it boiling from the fire and pour it gently and quickly over the batter, stirring it rapidly at the same time; and when it is observed to swell and lose the white color of the flour it is cooked and finished. The quantities here indicated should make about three-fourths of a pail of solid paste. It is recommended not to use it while hot, as when cool it adheres better and goes further.

A little cold water poured over the top of the mass will prevent the formation of a skin from the drying out of the paste. When about to use, a small additional quantity of cold water should be added so that the paste will spread easily and quickly under the brush. In warm weather this paste must be used quickly as it cannot be kept for many days without fermenting and souring, when it becomes thin, watery and useless. If it be desired to avoid this, the addition of a few drops of carbolic acid to the mass when it is prepared will enable it to be kept almost indefinitely.

When brass is soldered with soft solder, the difference in color is so marked as to direct attention to the spot mended. The following method of coloring soft solder is given by the *Metallarbeiter*: First prepare a saturated solution of sulphate of copper (bluestone) in water, and apply some of this on the end of a stick to the solder. On touching with a steel or iron wire it becomes coppered, and by repeating the experiment the deposit of copper may be made thicker and darker. To give the solder a yellower color, mix one part of a saturated solution of sulphate of zinc with two of sulphate of copper, apply this to the coppered spot, and rub it with a zinc rod. The color can be still further improved by applying gilt powder and polishing.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

James A. Pickard, printer, Huntsville, Ala., is dead.

Louie & Tucker, publishers, Odell, Neb., have sold out.

John Tucker, paper-stock dealer, New York city, is dead.

D. O. Bell, printer, Lockwood, Mo., has sold out his business.

E. T. Miller, dealer in wall-paper, Rochester, N. Y., has assigned.

Riddle & Connors, printers, Lancaster, S. C., have been damaged by fire.

Maynard, Gough & Co., printers, Worcester, Mass., have been burned out.

J. Jones, dealer in wall-paper, South Pueblo, Cal., has sold out to A. P. Maple.

George Hartley, bookseller, &c., Palmerston, Ont., has sold out to Edward Woolbridge.

E. McCallum, dealer in stationery and fancy goods, Ridgeway, Ont., has been burned out.

Charles A. Davis, of the firm of Davis & Davis, booksellers and stationers, Fenton, Mich., is dead.

Mansell & Blume, importers of sponges, &c., New York city, continue the business of Mansell, Birnbaum & Co.

Edward T. Miller, dealer in wall-paper at Rochester, N. Y., has made an assignment to S. V. Pryor. His liabilities are reported at \$20,000 and assets, \$15,000.

A. H. Andrews & Co., manufacturers of school furniture, Chicago, Ill., have dissolved partnership, A. H. & H. L. Andrews succeed to the business under the same style.

C. C. Cline & Co., publishers, Louisville, Ky., have sold out to the Guide Publishing Company.

C. H. Adams, bookseller and stationer, Allegan, Mich., has lost \$1,500 by fire. Not insured.

A new lawn game, called "Enchantment," is about being put on the market by the Milton Bradley Company. This house was the first in this country to make a specialty of croquet, and, for a long time, its patented implements were the most popular in the market. Changes in the condition of the market induced it to sell its patents to a leading Western house some years ago, and it has, since that time, given its attention to less bulky goods. The new game has been the subject of much experimenting during the past year and will be brought out with great care and in the style of workmanship and finish for which this old house is celebrated. The game is played with hoops and a peculiar guarded wand, and is entirely unique in its methods.

D. L. Wilcox, of Pawtucket, R. I., has resigned the presidency of the R. Bliss Manufacturing Company of that city and organized a stock company, with a capital of \$25,000, with a factory at Milford, N. H., and an office in Boston. The company will manufacture toys, &c., for which it owns several patents, also writing-desks, work-boxes, cabinets, &c.

J. H. Bufford's Sons have been very busy during the past few days in attending to orders for their line of satin art prints, which were but first introduced this season. The firm's line has been so popularly received by the trade in all sections that other novelties will be added to it from time to time.

A fire on Saturday night, March 15, in Reed's block, on Albany street, Boston, caused a loss to Samuel Hano & Co., manufacturers of manifold paper, on stock and machinery of \$30,000. About \$7,000 damage was done to other occupants by water.

Samuel C. Tatum & Co. have purchased the right and will in future manufacture the Bartlett presses at their shop at Cincinnati, Ohio, to supply the Western trade.

The House Committee on Post Offices and Post Roads on Friday ordered adverse reports on all bills providing for the establishment of postal savings banks.

J. F. Handley, newsdealer, stationer, &c., San José, Cal., has been succeeded by F. A. Taylor.

The Horse Shoe Publishing Company, Hot Springs, Ark., has failed.

Shaw & Swartz, booksellers and stationers, Providence, R. I., have failed.

C. W. Collins, stationer, &c., Georgetown, Col., has been succeeded by S. D. Blair.

M. E. Haskell, bookseller and stationer, Traverse City, Mich., has sold out to Beecher & Hymer.

Property, consisting of real estate, belonging to the Fibre Ware Company, Portland, Me., has been attached for \$350.

Stidham & Bunch, booksellers and stationers, Jewell, Kan., have dissolved partnership. William H. Bunch succeeds to the business.

Thomas H. Cotter, printer, Omaha, Neb., and William F. Sweezy, publisher of the *Despatch*, of the same place, have consolidated their business.

C. F. Bump, Philadelphia, is receiving some large orders for leather goods from his travelers. E. C. Ripka is doing very well in the East, and C. B. Moore reports a good trade in the West.

John Jacobson, Jr., of the firm of White & Jacobson, paper-box manufacturers, 203 State street, New York city, is dead. He was twenty-three of age and a member of the Produce Exchange gratuity fund.

Spalding's "Official Base-ball Guide for 1884" has just been issued by A. G. Spalding & Brothers, Chicago. It is very full, so much so, indeed, that the publishers have been compelled to publish the "League Book" separately.

An employe at the factory of the Art Album Company, at Battle Creek, Mich., was using a can of benzine, when a gas-jet several feet distant puffed out, ignited the fluid, causing a flame which soon spread to the chemicals and caused a damage, mostly to stock, of about \$5,000; insured.

The Powers Paper Company has a very large line of papeteries this season. Its stock includes over 600 varieties. Its line of illuminated goods is especially very attractive. It is put up in very handsome style, and the stock is the very best manufactured. Buyers of papeteries and fine writing papers should examine

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

HENRY BAINBRIDGE & CO.,
99 & 101 William Street, New York.

the full line at the New York office, 62 Duane street.

The St. Louis *Tribune* Company, St. Louis, Mo., has increased its capital stock to \$50,000.

Charles F. and W. F. Baldwin have succeeded the firm of Baldwin & Taylor, publishers of the Mount Vernon *Republican*, Mount Vernon, Ohio.

J. O. Blakely & Co., publishers of the *Visalia County Journal*, Visalia, Cal., have dissolved partnership. The business will be continued by J. O. Blakely.

McNabb, Donner & Co., publishers and printers, Petaluma, Cal., have dissolved partnership. Hart A. Donner retires from the firm and S. P. Weston has been admitted to membership.

W. S. Gilman, publisher of the *Aroostook Pioneer*, Houlton, Me., has admitted George H. Gilman to partnership, and the firm will do business under the style of W. S. Gilman & Son.

Hastings & Todd have some new and taking designs in folding cards, embossed in bronze colors, and also etched. The embossed cards are quite fanciful and are likely to be in demand. The etched line is also very neat and attractive. The cards come in various tints.

A fire broke out at 2:30 A. M. on Wednesday in the Rock Island Paper Mill at Little Falls, N. Y. The building burned rapidly, and was soon a mass of smoldering ruins. It had been idle for the past month, but prior to that time was operated by William Kingston. The flames were undoubtedly of incendiary origin. The loss on the building and machinery is estimated at \$8,000; insurance, \$3,000.

White & Schermerhorn are having a brisk run on their line of toilet papers. These come in special brands of any size and count made to order, or otherwise. The firm manufactures tar papers with disinfecting and deodorizing cover, perforated and unperforated roll papers, the "Brighton," "Meadow," "Witch Hazeline" and other brands of medicated toilet papers, besides a full line of tissue, tea, straw, news, book, manilla and wrapping, and bogus papers in sheets and rolls, also a full line of twines, &c. These goods are kept constantly on hand or made to order.

One of the most attractive show-windows down-town is that of James D. Whitmore & Co. The window has this week been filled with new attractions, embracing a complete line of plush goods in a great variety of designs appropriate for Easter. The arrangement is very tasteful, and, altogether, the display is so fine that passers-by invariably stop to admire it. Among the elegant designs of plush and other goods noticed by a reporter of THE STATIONER were a line of plush novelties with Neapolitan heads, a fine line of Easter tiles which although not new this season are still very popular, some very handsome papeterie boxes in shaggy plush and having appropriate greetings for Easter; also several pretty designs in crosses with floral decorations, a fine line of albums in shaggy plush with assorted mezzotypes representing some of the most popular paintings of the old masters. Some of the novelties which attracted special notice were a triangular-shaped card made up in white satin with a group of birds in the centre set in a background of shaggy plush, a square panel card decorated with apple-blossoms, and a Neapolitan head set in a frame of blue plush, and several hand-painted pictures on ivory, gotten up especially for Easter. The latter may be mounted on easels and are really very handsome.

Langfeld, Turner & Andrews are offering a great variety of new goods in purses, pocket-books, ladies' shopping bags, card and letter cases, bill books, cigar cases, calf and sheepskin wallets, &c. These goods come in all kinds of fancy leathers, including embossed Japanese leathers, imitation and real alligator, genuine and imitation seal leather, russia, calf and sheepskin, &c. The firm has some 300 patterns of bill books in all styles and leathers, and its general line of goods is the largest in the country. Being their own manufacturers also, Langfeld, Turner & Andrews are able to offer to the trade some genuine bargains in their line of goods.

The novelty for card players which has lately been introduced to the trade by George W. Hyatt is proving very popular, a large number having already been sold, although it was only recently introduced. The article consists of a "patent improved game register and trump indicator." It is made of fine card-board of good weight, to which are eyeleted three disks, which revolve by touching the edges at the indentation in the edge of the card. One disk scores the games to ten, another the points to ten, or the two unitedly 99 points. The third disk shows the trump suit, thus avoiding the vexatious inquiry, What's trumps?

Edward Todd & Co. have applied for patents for two new designs in gold pens and a new style of gold pencil. One style of pen will be called the "Professional." It is a stub pen with a rounded point, thus enabling it to be held at all angles. While it is extremely flexible, it is at the same time strong and durable. The "Professional" will be made in two sizes, the larger size being intended for engrossing work and those writing a round, bold hand. The company is not ready to announce the design of the gold pencil, but this will be ready for the trade in a short time.

It is asserted that the trade who have sold the National Publishing Company's family bibles containing the contrasted testaments say that, when placed side by side with other editions, the preference is always given to the "National," which has the King James and revised Testaments in parallel columns on the same page.

The work of making up the schedule of assets and liabilities of Lyman & Curtis has not been completed. Mr. Sheldon, the assignee, states that the liabilities amount to about \$165,000, and that the assets are about \$70,000. As soon as the schedule is filled there will be a meeting of the creditors.

Two warehouses of the Appleton Manufacturing Company, in Appleton, Wis., were burned on Tuesday night; loss, \$30,000 on the buildings and contents, which consisted of toys and agricultural implements; insurance \$10,000.

The Cincinnati Paper Novelty Company has got out a series of reversible sample envelopes patterned after its document envelopes. C. M. Ward, 28 Bond street, is the New York agent.

Gies & Co., lithographers and engravers, Buffalo, N. Y., have dissolved partnership and a new company has been incorporated under the same style with a capital stock of \$200,000.

F. H. Loss, Jr., will have ready for the trade his new line of Swiss carvings and other novelties in about a month. These goods will all be fresh and attractive, and as Mr. Loss buys from first hands he can afford to sell at bottom prices.

H. S. Raymond, dealer in books and stationery at Bay City, Mich., has made an assignment to Oscar Harnet.

The stock of Mortimer, blank-book manufacturer, Ottawa, Ont., is advertised for sale by tender.

Purcell & Bastable, newsdealers, &c., Clarksburg, W. Va., have dissolved partnership. George Purcell succeeds to the business.

J. B. Lippincott & Co., publishers, booksellers, stationers, &c., Philadelphia, Pa., have admitted J. Bertram Lippincott as a member of the firm.

The Palmer Art Company will remove from its present location, No. 36 Bond street, on the first of May, to the lower floor of the building occupied by L. Prang & Co.

French & Choate have recently added to their very complete line of stationers' specialties, the Cleave drawing, writing and study table. This article is provided with a student's lamp and a "Gem" book-rest by means of which a book can be brought into any desired position.

INKING-PAD.

An improved inking-pad for inking canceling and other hand-stamps has a body cast of elastic material, such as printers' roller composition or rubber, or any other flexible material suitable for the purpose. This has preferably a flat base, and it has an ink-recess, containing a number of concentric or other ribs, walls or pillars, whose upper edges are all level with the side of the recess. Channels are made in the walls to give passage for the ink to all parts of the recess. The ink is fed to the recess through a mouth, consisting of a metal or other close-bottomed tube, with an orifice at the side on a level with the recess. It is preferred to make the mouth with a socket, screw-threaded, as shown, so that a cap or cork may be screwed fast with it.

The pad proper or cover of the recess consists of porous material, such as felt or printers' blanketing, or any suitable substance that will permit the passage of ink and will insure an even application of it to the surface of the letters of the stamp. The marginal connection of the pad is made water-tight so that there will be no escape of ink on the impingement of the stamp on the pad. The felt cover is attached to the body after the latter has been taken from the mold, the top of the body being softened by heat or spread with cement and the felt pressed upon it, and the walls are thus stiffened.

The filling-mouth is not an essential feature, because the ink-recess may be filled once for all when first made, and the apparatus be thrown away when the ink is exhausted or refilled by the removal of the cover. In this form of pad, or when the ink is thin, the ink-space may be loosely filled with wool or equivalent material, to retard the flow of very liquid ink and prevent too much being fed to the felt top.

The pad can be filled from a tank placed at any distance required, the filling-mouth being placed upon the side of the pad and the connection made with suitable tubing and the flow of ink controlled by a faucet.

Forty years ago a Frenchman, with the usual practical views of the nationality, conceived the happy idea for easily creating intricate designs upon plush. This happy idea was simply the application of a hot iron to the surface of the goods. The discovery was made in an accidental way, and cost him the good looks of a velvet dressing-gown, which his over-zealous wife had attempted to iron. His experience, however, suggested what was afterward, and is still, called embossed plush.

H. H. CARTER, 3 Beacon St., Boston.**VALUE OF SKILL AT WHIST.**

Turning to the element of personal skill, it is difficult to get at statistics that are to be relied on. "A little whist school" undertook, as a part of their scientific investigations, an experiment of a very novel and interesting kind to test the value of skill.

Two rubbers were formed in two adjoining rooms; two very good players (good in both system and personal skill) being partners against two indifferent partners in each room. The cards were dealt in one room, and note being taken of each hand, the same cards were reversed in the other room (those held by the good players being now given to the bad ones, and vice versa, the order of the hands being preserved), and the hands were played again. At the end of each hand the result was noted for comparison.

In room A six rubbers were played comprising 33 hands, the good players in this room holding very good cards, and they won four rubbers out of the six; in points of balance of 18. In room B the good players had, of course, the bad cards; the 33 hands in this room made up seven rubbers, and the good players won 3 out of the seven, losing 7 points on the balance. The difference, therefore, was 11 points in favor of skill, or nearly one point per rubber.

A comparison of tricks only, excluding honors, showed some curious results. In 7 out of 33 the score by cards in each room was the same—that is, the same hand being played over twice, the result was the same at both tables. In 18 hands the score by cards was in favor of superior players; in eight hand in favor of the inferior. In one of these hands one of the bad players won two by cards at one table and three by cards at the other, having changed cards, be it remembered, showing that bad play sometimes succeeds.

The grand result was this: That at both tables the superior players gained the majority of tricks. In room A the good players with the good cards won 19 by card; in room B the good players with the bad cards won 2 by tricks. The above result corresponds fairly with the maximum amount previously estimated; but the conditions assumed in both cases are so exceptional that such a high advantage cannot be expected to obtain in practice, and it is perhaps more useful to inquire what results are given by actual experience in ordinary play.

The total number of different ways in which the 52 cards may be distributed among four players amounts to 53,644,737,765,488,792,839,237,440,000. This number does not, however, represent quite accurately all the varieties of hands that might occur in whist. It would be increased by considering the trump card, as in the same distribution of the hands, a different card being turned up and a different person being dealer, would give rise to a different variety again.—William Pole, in "The Philosophy of Whist."

James S. Oakley, business manager for the New York branch of L. Frang & Co., has lately returned from a visit to Chicago. He reports a good outlook for a brisk Western and Southern trade.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, MARCH 20, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

We print an article on the "Merits and Demerits of Speculation," taken from one of the daily papers. THE STATIONER has never gone so far as to denounce speculation to the extent of declaring it unjustifiable in any case. On the contrary, it has been a part of its policy to encourage an intelligent prevision of the markets and of the circumstances likely to influence trade, and to urge readers to attain such advantages as cool judgment and an intelligent study of circumstances and probabilities may justify them in seeking. But we have denounced the reckless spirit which has been shown in taking chances without any consideration of probable effect. We agree with the journal which says that "speculation has some very beneficial indirect results," and we go further by saying, that it has many that are very direct; but the trouble is, that it is more liable to be overdone, and that the craze for speculation, like that created in the excitement of gambling, carries men further than they ought to go or would go if they paused before taking a hazard. The paper to which reference had been made further says: "When the present excesses and excrescences of speculation have disappeared through a process of self-cure, and the new methods have fallen more into the hands of men of judgment and adequate means, it will be found that the change which has been scouted as a mere demoralizing craze is really the introduction of an improved way of conducting the world's commerce." Exactly! But when the millennium comes we shall have the same story of hope and despair, joy and regret. These excesses can scarcely be overcome. The weak, the careless and the imprudent, perceiving the results which follow the exercise of good judgment and the investment of "adequate means," will try to work out like results on weaker premises, and, finding always someone to take advantage of their extravagance, will continue to heap up the pile of fleeces shorn from the "lambs" of speculation. We can scarcely avoid demoralization with some people. A part of the world is very brave in the face of fair weather or open country, but cannot weather the storm nor withstand the missiles of outraged fortune. They will go forth to conquer and come back whipped. For such, speculation is a bane. But, for all that, speculation is not an evil. It is its abuse that is dangerous and destructive.

DESPITE all of the obstructions which trade has encountered during a season of unusual inconvenience and atmospheric depression, it is remarkable that a very cheerful tone pervades the business world, and that a feeling widely different from the despondency which marked seasons not yet gone out of memory is apparent. There is an underlying confidence, justified perhaps by a knowledge of our resources, and by the experience of the changes which have occurred within the decade under conditions which justified alarm, and were of

the greatest moment in their bearing upon all of our interests, industrial and commercial. The political bearing upon the country is scarcely of moment, inasmuch as intelligence and common sense, combined with the independent spirit of the people, have a rectifying effect which does not long endure abuse or errors, if they become so palpable as to demand intervention. The mistakes of trade—and they are many—result from carelessness and indifference, and their gradual growth is the one thing most to be feared, inasmuch as when the urgency of a remedy becomes apparent, the cure must be effected at the cost of suffering and trouble. For this reason THE STATIONER, in common with other journals which have trade interests at heart, has not forbore to give warning and to point out the tendencies of the times and the drift of error. We should fail in our duty to those whom we represent and whom we earnestly try to serve if we did not constantly recur to the demoralizing influences which subvert trade, and ask our readers to keep them in mind and resist them. What these influences are has been told over and over again, and we now refer to them to quicken the minds of our readers and to ask if anything has been done to overcome them. That some merchants have taken pains to pursue the right direction we have had proof, and we believe that the disposition is quite general. The confidence which seems to obtain is rather indicative of this, for it must be founded upon substantial and reassuring grounds. May it be justified in the event!

ROUNABOUTS.

BY THE TRADE LOUNGER.

The annual imports of Central America are valued at \$11,000,000, of which the United States supply \$2,000,000 worth; of South America, \$256,000,000, of which we supply \$26,000,000, and of the West Indies, \$115,000,000, of which this country sends out \$30,000,000. But we buy more than we sell. This isn't a neighborly way of doing business. Just look up these markets, study them and be wise.

Now, there is a chance with Mexico, if Congress will only undertake needed legislation. I didn't know that any further law-making was necessary, but probably there is, as the grave and reverend signiors of the United States Senate have made it conditional upon giving the new Mexican treaty effect. Well, patience is the motto for the present. "Wait and see."

The daily papers contained an account this week of the death of a boy from a wound received by sitting down on a sharpened slate-pencil, which one of his schoolmates had placed in position. This is one of the instances of practical joking taking a fatal turn. Schoolboys cannot be expected to do without slate-pencils, but it is best to circulate the item to convey, if possible, a warning to all frolicsome schoolboys that practical jokes, even if innocently intended, are liable to do harm.

THE STATIONER had an interesting little article on baby carriages in a late issue. I have

rather studied these useful articles since then, not with a view to my own requirements, but as being useful to know something about, and I have been attracted by a design which is quite novel. It is the "canoe" carriage, having a canoe-shaped body made of willow. The canopy top is attached to a new patent ball and socket rod and is very nicely geared with hard wood cross-pieces, steel springs and braces.

The gold pen manufacturers don't seem to think that they have attained the limit of inventive resources or changes in the designs of their goods. One of them has brought out a stub pen having a rounded point. This is said to write well in any position and is peculiarly adapted to people who write a bold, round hand.

Many of the stationery trade are reckoning on considerable activity as the result of the approaching presidential contest. If I should write all that I would like to say about candidates and measures the trade would be lively indeed. Probably we shall see quite an enlarged demand for paper and envelopes, but much depends upon the character of the excitement. A "still hunt" will be of most advantage to the trade.

A new daily paper has appeared in New York. It is called the *Dial*, and appears every evening. This is rather out of order. It ought to be a noon-day journal. How long will it take for it to be upset? Let us hope that it will live long and prosper, for it will thus help to consume paper and other things.

I don't know whether it is high-toned or not to have a slugging-match conducted according to P. R. rules, in places of business, but I don't think that it is very elevating or conducive to moral improvement. I say this because there was a boxing-match on Tuesday between two members of the Petroleum Exchange—Henry Fredericks and Joseph H. Halk. Bloody noses and black eyes resulted, and all for fun. Business was suspended while three rounds were fought, Fredericks being declared the winner. Now, the Petroleum Exchange managers ought to "bounce" these men and all who abetted their pugilistic effort.

Smashing hats, rude jokes and horseplay have become too much matters of common amusement in some of our exchanges; but until now we have not had prize-ring accomplishments placed on record as being exhibited in public places by men of commercial standing. I hope that no one will be emulous of the oil men, although I shouldn't be surprised to note something of the same kind of amusement between a couple of deacons at the next church festival. Nasal enlargements and eyes in mourning may become concomitants of missionary work, and converts may be made by such means, but business men had better "sit down" on this kind of work.

ANSWERS TO CORRESPONDENTS.

P. U. & Co. want names of manufacturers of rubber rulers, penholders, &c.

Ans.—Butler Hard Rubber Company, 33 Mercer street, New York; Eastern Rubber Company, 29 Milk street, Boston; Goodyear's Rubber Manufacturing Company, 205 Broadway, New York; Hodgman & Co., 27 Maiden lane, New York.

E. R. D. wants to know where he can get extra staples for the Novelty paper fastener.

Ans.—Philadelphia Novelty Manufacturing

Company, 821 Cherry street, Philadelphia, or Holmes, Booth & Haydens, 49 Chambers street, New York. The American News Company can supply you.

W. H. H. wants addresses of manufacturers of: 1. "Charter Oak" and, 2. "Banker's" brands of writing-papers.

Ans.—1. Platner & Porter Manufacturing Company, Unionville, Conn. 2. Holyoke Paper Company, Holyoke, Mass.

W. D. B. inquires: Who makes a business of supplying electrotype illustrations to publishers, having seen advertisement of such for sale.

Ans.—Shoppell's Press Engraving Company, 24 Beekman street, New York, and Central Bureau of Engraving, 505 Chestnut street, St. Louis, Mo.

J. B. I. states that he has been a competitor for a cash prize in the disposal of certain publications, and asks if we can tell him who gained the prize.

Ans.—Your inquiry received as we are about going to press. We don't know to whom the prize has been awarded, but will try to find out.

A subscriber informs us that the Argyle linen paper inquired for last week is made by the Whiting Paper Company. Also, that eye-shades are made by W. B. White, Boston.

OBITUARY.

DR. ALFRED L. ELWIN.

Dr. Alfred L. Elwin died suddenly at his residence in Philadelphia on Saturday last. He was born in Portsmouth, N. H., and was the grandson of John Langdon, the first Continental Governor of New Hampshire, who gave his private means to General Stark to fight the battle of Bennington. He was the author of the first dictionary of Americanisms and also of a number of reviews published in the *North American Review*, and was a remarkable classical scholar.

ART FRAUDS IN PARIS.

A well-known Paris picture dealer has published an interesting and useful pamphlet on "Sham Old Masters." He says that the commonest mode of counterfeiting an old picture is to cover a new one—painted, of course, for the purpose—with a certain transparent paste, which, when exposed to slight artificial heat, cracks and becomes brown. If a sufficiently venerable tint has not been produced, the canvas is washed with a mixture of lamp-black and licorice-juice. The picture is next exposed for some hours to the smoke of a wood-fire and the loose soot having been brushed away, is rubbed here and there with a rag which has been dipped in very dilute sulphuric acid. This operation gives a moldy appearance to those parts which have been touched. The work is finally sprinkled by means of a tooth-brush and a hair-pin with minute spots of a solution of sepia of gum water, to imitate fly-specks, and it is then ready for the market. Signatures are imitated by experts who are known as monogrammists, and who devote their exclusive attention to such matters, and one of these men, who died recently and was known to the author of this pamphlet, confessed to the forgery of no fewer than 11,000 signatures of the Italian masters alone, and said that he had for years made a large income by the exercise of his art.—*St. James's Gazette*.

THE "HARVARD" PEN.—During the last half-dozen years or so, probably two score of different kinds of stylographic and other fountain

pens have been placed upon the market, and in many cases a very large amount of popularity has been won. Probably one of the best is the "Harvard" fountain pen, made by the Harvard Pen Company, 104 Broadway, New York. The "Harvard" is a flexible gold pen, affixed to a fountain or reservoir holder, having no air tubes, wires, springs, &c., to act as obstacles to the efficient working of the pen. These objections have been overcome in this pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for. The firm is offering it as one in which this result has been accomplished to the highest degree possible.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, MARCH 19, 1884. }

THE MONEY MARKET.—The monetary situation is still characterized by continued ease, and the rates for call loans are stereotyped at $1\frac{1}{4}$ to 2 per cent. Time loans are quoted $3\frac{1}{2}$ to 5 per cent. and prime commercial discounts at $4\frac{1}{2}$ to 6 per cent. The stock market continues in a dull and for the most part uninteresting condition, with frequent alterations between depression and firmness. The situation as a whole, however, may be said to be unchanged, and while everybody is hoping for a material improvement very soon, nobody is perfectly confident that it is coming. Railway bonds are generally firm and the leading issues in fair demand for investment. Governments continue firm but quiet. Sterling exchange has advanced with a moderate demand at the improvement. Continental bills are unchanged.

THE PAPER MARKET.—The paper market is without any new or interesting feature, the demand continuing about the same as noted a week ago. Notwithstanding the disturbing elements of the past few weeks, bad weather, tariff legislation and the floods in the West, there are indications that the general business situation is gradually working into a healthier position, which gives reason to hope for material improvement. The great desideratum for a revival of business is seasonable spring weather, and this, it is thought, cannot be much longer delayed. Notwithstanding that the reports from the leading business centres are almost all unsatisfactory, it is gratifying to note that from all quarters it is reported that the outlook for spring trade is hopeful. Stocks in dealers' hands at interior distributive points are not said to be excessive, and the situation with manufacturers remains pretty much the same as it has been since the beginning of the year, most of them finding steady employment for their mills, although at very low figures. Prices throughout rule about the same as quoted for the past month or more.

THE STATIONERY MARKET.—There is no decided improvement in trade yet, but the indications are better than last week. The local trade is quite fair and there is a slight improvement in general trade, which is coming around slowly. Orders are quite numerous, but small and a great proportion of them are new business. Dealers generally are very cautious and it is difficult to get them to buy more than they absolutely need to supply their present wants. The trade in fine stationery and envelopes is about the same, but dealers are hopeful that this will be a good season owing to the presidential election and the consequent increased consumption of stationery. There is nothing doing in plush goods outside of Easter novelties, and this being the dull season for these goods manufacturers are busy in making new goods for the fall trade. There is a steady movement in gold pens, but dealers do not buy as freely as might be expected and the run is principally in a cheaper class of goods. The ink trade is picking up gradually and is quite fair for the season. The season opens rather dull in the book trade and it is doubtful if as many new books will be made this year as last. This is particularly true in the line of juvenile books.

**25c. A GENUINE STYLOGRAPHIC.**

This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

A new trade journal has lately appeared. It hails from Atlanta, Ga., and the title is the *Industrial Southern Review*. It claims to be "an aggressive advocate of every project tending toward the development of the material resources of the South." The first number sets a high standard, which if maintained in subsequent issues, must surely gain for the publication a foothold in trade literature. The editor is John W. Ryckman.

ELECTRO-PLATING WITH NICKEL.

BY WILLIAM H. WAHL.*

(Continued.)

The next important contribution to the art of depositing nickel by galvanic means is made by Mr. George Gore, who, in 1855, employed the double salts of nickel and ammonium, i. e., the double chloride. In the edition of his work on Electro-Metallurgy, published in 1860 (Griffin & Co., London, 1860), he describes a method for the electro-deposition of nickel by means of double chloride of nickel and ammonium.

In 1862, M. Becquerel, *père et fils*, read before the French Academy a paper on the "Electro-Chemical Reduction of Nickel, &c.," from which I quote as follows: "Nickel, we operate with a solution of sulphate of nickel to which has been added caustic potassa, soda, or ammonia, preferably the latter alkali, to saturate the excess of acid. Sulphuric acid becoming free is saturated by oxide of nickel placed on the bottom of the vessel, or by adding alkali to the solution, ammonia by preference. At the end of a certain time we obtain a brilliant, white deposit with a slightly yellow tint. According to the molds employed it may be obtained in cylinders, bars, or medals. They possess, like cobalt, magnetic polarity when taken out of the solution. The ammoniacal solution of the double sulphate of nickel and ammonium, and even that which is not ammoniacal, likewise furnish metallic nickel."

In 1869, Isaac Adams, Jr., of Boston, obtained a patent in the United States for an "Improvement in the Electro-Deposition of Nickel," in which he describes a method of preparing the double salts of nickel—the double sulphate of nickel and ammonium, and double chloride of nickel and ammonium—by which the same are obtained free from certain impurities, to the presence of which, he claimed, the difficulties in the way of obtaining a satisfactory deposit of this metal by galvanic means were ascribable. He describes in his patent specification a method of preparing these two compounds in such a manner as to be free from the presence of potash, soda, lime, alumina and nitric acid, and directs that the electro-deposition of nickel by means of either of these double salts must be done from a solution that is free from acid or alkaline reaction. He likewise claims as his invention a method of preparing the nickel plates to be used as anodes in the depositing cells, which consists in melting the nickel and combining it with iron, for the purpose of avoiding the bad effects produced by copper and arsenic when these are present as impurities in commercial nickel. The effect of the addition of iron to the nickel (the amount being the chemical equivalent of the copper and arsenic present), Mr. Adams affirms, is to prevent the deposition of the above-named impurities with the nickel. Quoting from the specification, "the iron itself is almost wholly precipitated as a peroxide, and is not deposited with the nickel to a sufficient extent to injure the character of the deposit. Neither does it injuriously affect the solution. The effect of the iron upon the copper is either to prevent it from being dissolved, or, if dissolved, to immediately reduce it upon the anode, where it forms a coating which may be reduced from time to time by scraping. The arsenic forms an insoluble precipitate with the persalt of iron."

Mr. Adams continues:

"Having prepared the solution and anodes, as

* A paper read before the Chemical Section of the Franklin Institute.

herein described, nickel may be readily deposited; but, in order to carry on the deposition continuously, it is necessary to observe certain precautions: First, the use of a battery of too high an intensity must be avoided. An intensity of two Smee cells is sufficient. A high intensity decomposes the solution and liberates free ammonia, thus rendering the solution alkaline and impairing its value. Whenever the smell of free ammonia arises from the decomposing cell the operator may be certain that the solution is being injured. It is important that the depositing shall not be forced by the use of too strong a current. Second, it is important that great precaution should be used to prevent the introduction into the solution of even minute quantities of potash, soda, or nitric acid. When an article to be coated is cleaned in acid or alkaline water, or is introduced into it for any purpose, the greatest care must be taken to remove all traces of these substances before the article is introduced to the nickel solution, as the introduction of the most minute quantities of acids or alkalis will surely be injurious. It is important that the solution be kept free from all foreign substances, but its purity from those above named is especially important. Third, the anode of the depositing cell should present a surface to the action of the solution somewhat larger than the surface upon which the deposit is being made, particularly in the double sulphate solution. The reason is that nickel dissolves so slowly that, if the exposed surface is not larger than the surface on which the deposit is made, the solution will not keep saturated. On the other hand, if the anode is very much larger than the positive pole it tends to give a deposit of black powder. Fourth, if zinc is to be coated, it should first be coated with copper, as it is

difficult to make nickel adhere to zinc, and there is danger that the zinc may be acted on and injure the solution.

"With solutions and anodes thus prepared and used, the deposition of nickel can be carried on continuously and almost as surely and certainly as the deposition of copper from the common sulphate solution, though the limits of the battery-power which may be used are narrower. The metal deposited is compact, cohesive and tenacious. It may be deposited of nearly uniform thickness over any surface, however large. The deposited metal is capable of being annealed by a heat below a low-red heat. It then becomes flexible, malleable and ductile. The deposit may be made of any required thickness, either to furnish effectual protection to the

metal on which it is deposited, or to be removed and used separately from the surface on which it may be deposited."

In the same year, but a few months earlier than the date of the patent above referred to, a patent had been granted to the same inventor for the use of a solution of the sulphite of nickel in a solution of sulphite or bisulphite of ammonium. This solution is identical, apparently, with that which M. Roseleur claims to have used as early as 1849, with excellent results, in the establishment of M. Kraitz, at Grenelle, but which, as I glean from a *Notice supplémentaire sur le Nickelage*, which he has lately issued, he has discarded in favor of the double sulphate.

Send for Illustrated Catalogue and Prices.**HOW CANES ARE MADE.**

Comparatively few understand how and where the material is gathered or the process of its manufacture into canes and umbrella handles. The Chicago Times furnishes some information on these points. According to that paper, many of the canes are of imported woods, some from the tropics, China and the East Indies. The celebrated Whongee canes are from China, where they are well-known and celebrated for the regularity of their joints, which are the points from which the leaves are given off, and the stems of a species of phyllosiachys—a gigantic grass, closely allied to the bamboo. The orange and lemon are highly prized and are imported chiefly from the West Indies, and perfect specimens bring enormous prices. The orange stick is known by its beautiful green bark, with fine white longitudinal markings, and the lemon by the symmetry of its proportions and both prominence and regularity of its knots.

Myrtle sticks possess also a value, since their appearance is so peculiar that their owner would seldom fail to recognize them. They are imported from Algeria. The rajah stick is an importation. It is the stem of a palm, and a species of calamus. It is grown in Borneo, and takes its name from the fact that the rajah will not allow any to go out of the country unless a heavy duty is paid. These canes, known as palm canes, are distinguished by an angular and more or less flat appearance. Their color is brownish, spotted, and they are quite straight, with neither knob nor curl. They are the petioles of leaf-stalks of the date palm. Perhaps the most celebrated of the foreign canes are the Malacca, being the stems of the *Calamus sceptonum*, a slender climbing palm, and not growing about Malacca, as the name would seem to indicate, but imported from Stak, on the opposite coast of Sumatra. Other foreign canes are of ebony, rosewood, partridge, or hairwood, and cactus, which, when the pith is cut out, present a most novel appearance—hol-

low, and full of holes.

The manufacture of canes is by no means the simple process of cutting the sticks in the woods, peeling off the bark, whittling down the knots and sandpapering the rough surface and adding a touch of varnish, a curiously carved handle or head, and tipping the end with a ferrule. In the sand flats of New Jersey, whole families support themselves by gathering nanneberry sticks, which they gather in the swamps, straighten with an old vise, steam over an old kettle, and perhaps scrape down or whittle into size. These are packed in large bundles to New York city and sold to the cane factories. Many imported sticks, however, have to go through a process of straightening by mechanical means which are a mystery to the uninitiated. They are buried in hot sand until they become pliable. In front of the heap of hot sand in which the sticks are plunged is a stout board, from 5 to 6 feet long, fixed at an angle inclined to the workman, and having two or more notches cut in the edge. When the stick has become perfectly pliable the workman places it on one of the notches, and, bending it in the opposite direction to which it is naturally bent, straightens it. Thus sticks, apparently crooked, bent, warped and worthless, are, by this simple process, straightened; but the most curious part of the work is observed in the formation of the crook or curl for the handles, which are not naturally supplied with a hook or knob. The workman places one end of the knob firmly in a vise and pours a continuous stream of fire from a gas-pipe on a part which is to be bent. When sufficient heat has been applied, the cane is pulled slowly and gradually round till the hook is completely formed, and then secured with a string. An additional application of heat serves to bake and permanently fix the curl. The under part of the handle is frequently charred by the action of the gas, and is then rubbed down with sandpaper until smoothness is attained.—*Ec.*

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
" $6\frac{1}{4} \times 3\frac{1}{4}$ " \$1.00 "
Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

Price, \$1.00; per dozen, \$8.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

SARONY WINS THE SUIT.

The United States Supreme Court gave a decision on Monday in the case of the Burrows-Giles Lithographic Company, plaintiff in error, against Sarony, the photographer, of New York city. Sarony brought suit against the lithographic company for alleged infringement of a copyright upon a photograph of Oscar Wilde. The question raised by the case was whether Congress has the constitutional right to protect photographs and negatives by copyright. The court holds that the constitution is broad enough to cover any act authorizing the copyright of photographs, so far as they are representations or original intellectual conceptions of their authors.

The facts show that this photograph of Oscar Wilde was an original work of art which was the product of the plaintiff's intellectual invention, and of which the plaintiff was the author, and that it belonged to a class of inventions for which the Constitution intended that Congress should secure to him the exclusive right to use, publish and sell. The court expresses no opinion as to whether this protection would extend to a mere mechanical reproduction by photographic process of the physical features or outlines of an animate or inanimate object, where there was no originality of thought or novelty in the intellectual operations connected with its visible reproduction in the shape of a picture. The judgment of the Circuit Court in favor of Sarony is affirmed.

WRITING-TABLET.

This invention relates to an artificial slate or writing-tablet, and it consists in a tablet or sheet of pasteboard, wood or equivalent material, having a layer of white cement applied to its opposite sides.

The white cement is prepared by moistening pulverized magnesia with a solution of chloride of magnesium, and of this moistened mass a thin layer is placed in a mold of the desired size, and then place upon said layer a piece of thin wood, pasteboard, muslin or equivalent material, and on this intermediate layer a layer of the moistened mass or cement is placed and the whole is then submitted to pressure. Instead of magnesia cement other white cement may be used—such as a cement prepared from lime, sand and pulverized flint.

The slate or writing-tablet prepared as described can be provided with lines or copies, such as numbers, letters, or sentences, to facilitate the operation of writing properly and neatly; and, if desired, suitable pigments may be added to the cement before forming slates or tablets, so as to impart any desired color.

The lines, letters, or copies are produced by printing upon the surface of the slate or tablet in a color contrasting to that of the slate or tablet. The printing can be combined with the operation of pressing the slates or tablets, or may be performed after the same have been pressed.

PAPER MAKING IN CHINA.

There can be no question as to the success of paper manufacture in Shanghai. All requisites are to be obtained without the least difficulty—a plentiful supply of water, an abundance of raw material to work with, cheap manual labor, cheap motive power and a more than sufficient market. Nine years ago Mr. Doyle introduced the enterprise into Japan, and we believe there are nearly a dozen in full operation there. Those mills that were properly constructed at the outset, and were placed under efficient and skilled management, have been exceptionally successful, and, if we remember rightly, the mill at Osaka cleared itself in three years, while the one at Oji paid a dividend last year of 17 per cent. on stock amounting to \$365,000. The other mills were less successful, but none have proved failures; and we believe we are right in making the statement that the entire enterprise of paper manufacture in the land of the rising sun is now in the hands of the Japanese, who have so advanced in the art as to think themselves justified in dispensing with foreign supervision. Another interesting feature in connection with the paper trade of Japan is that while nine or ten mills have been working successfully, the importations of foreign-made paper have considerably increased—more than doubled—during the last few years.—*Overland China Mail.*

ELECTRICAL FIREFLIES.—"The endless diversity of uses to which electricity may be put," says a recent English weekly, "received another illustration on Tuesday night at the Court Opera at Vienna, where, by the simple expedient of suspending tiny incandescent lamps by fine swinging wires, the effect was produced of swarms of fireflies flitting about a tropical forest. By switches the current is turned off and on at the pleasure of the operator, and the effect, as the artificial fireflies flash and dance in mid-air, is said to have been electrical in other than a literal sense."

WHITE'S TAR,

Size 5x7,

\$11 per Case,

shown in the cut, which we claim to be the most perfect FORM or STYLE of package ever devised. It is superior to the ordinary Package of Sheets, because all litter of scraps is avoided; and it is superior to Rolls, because it is certain where the sheet will detach from the package, and this avoids waste. The disinfecting cover is as thorough a deodorizer as any costly apparatus, while the artistic design and printing gives the book a very neat appearance.

PRODUCTION OF CERAMIC COLORS.

The revival of taste for art in connection with industry has caused renewed attention to be given to the question of coloring, and this has been the case as regards the ceramic industry in a relatively important degree. The application of colors to majolica has been on an extensive scale; but, with reference to this subject, it is remarked that by majolica are usually understood all kinds of glazed ware in various colors, whether the color be produced by colored glazes, by a colored substance, by colored decoration under the glaze, or upon faience glaze and stoneware glaze, &c. Still the authorities upon the technicalities of the ceramic industry prefer to confine the name majolica to those porous products which are covered with a colored glaze of one or more colors. These last-named manufacturers might, according to Dr. Schumacher, be called modern majolica, in contrast to the colored faïences, for which, in various circles, the designations of majolica and Italian majolica have been retained. Faïence he understands to be the product of oxide of tin-enamel glazes.

In an able review of the progress of ceramic coloring, in the *Thonindustrie Zeitung*, Dr. Schumacher remarks that the majolica productions now offered for sale give evidence of considerable progress. He adds that many German and Austrian manufacturers produce very effective work, as far as a command of color and glaze is concerned; but there is, in many cases, a want of brilliancy in the glaze, while the scale of colors is often of limited compass. He attributes the last-named appearances to an unsuitable composition of the material itself, together with deficient knowledge of the effects of various coloring substances, as well as to the use of the decorative methods of stoneware manufacture under inappropriate circumstances.

He suggests that, for the general spread of a rational system of majolica production, it is necessary to study the coloring metallic oxides, and in a particular manner the ceramic chromogenes, or color-producing substances, in their relations to the glass fluxes used as glazes. The object of his remarks is the diffusion of information on this subject; the facts quoted resulting from practical work, and not being merely the outcome of special technical investigations.

The color and tints which a color-producing substance gives in glass fluxes are practically dependent upon various circumstances: 1. Upon the composition of the glass flux itself; 2. Upon various special component parts of the glass flux; 3. Upon the temperature; 4. Upon the color of the body.

As to the first point, a distinction may be made of glass fluxes containing alkali in relatively large proportion, silicate glass fluxes in which alkali silicates preponderate over oxide of lead silicates, or where the latter are absent; (2) glass fluxes containing lead or oxide of lead, with an excess of those substances as compared with alkalies, or the latter being absent; (3) glass fluxes containing alumina, in which, besides other glass-forming substances, silicate of alumina exists in such quantity as to alter the effects of the alkali or lead; (4) boracic acid glass fluxes, into which a considerable proportion of boracic acid or borax acid has entered. It is remarked that lime, as a component part of a glaze, appears to be neutral against the effects of chromogenes—that is to say, it is not affected by alkali and lead, though it is said to be partially influenced by baryta.

Among the special component parts of glass fluxes capable of affecting chromogenes are

oxide of tin, oxide of antimony, phosphate of lime, oxide of zinc, and also alumina, which does not attain a silicate formation, or, at least, a high degree of silicic acid combination. The three first-named substances specially affect the glass fluxes by giving them an opaqueness which bleaches most colors.

The influence exercised by the temperature may be readily observed if a copper-azure glaze be placed in a muffle-furnace (at perhaps 1600° to 1800° Fahrenheit), and another time in a stoneware glazing furnace. In the former it acquires a beautiful azure-blue, and in the latter a poor shade of green. Chromic acid gives yellow in majolica glass fluxes, but in a stoneware glaze fire it produces green. The effects in the latter case are attributed to the change in the constitution of the glaze, brought about by the dissolving of the substance of the body.

As to the color of the body, this has, of course, an effect in the instance of transparent glass fluxes, a mixed color being thus produced by the co-operation of the glaze color.

The subsequent remarks of Dr. Schumacher deal with the particular effects of oxide of lead, oxide of iron, oxide of manganese, oxide of chromium, chromic acid, oxide of uranium, protoxides of nickel, cobalt, and copper, oxide of copper, &c.

He remarks that the precious metals are scarcely ever used for glaze coloring, their use being limited to vitrifiable pigments—gold producing purple, silver an uncertain yellow, platinum a beautiful gray and iridium an effective black.—*Pottery Gazette.*

WANTED—A SITUATION IN THE WHOLESALE Stationery Trade by a young man of four years' experience. Address **CANADIAN**, Box 389, Toronto, Ont.

THE MERITS AND DEMERITS OF SPECULATION.

Speculation in produce, in its present organized form, is largely a growth of the last ten years. Within that brief period, all the commercial exchanges of this city have recognized transactions of this character by making formal regulations for their accommodation and control; and now by far the larger portion of the business of these organizations is of a speculative character. It is not to be supposed that the several branches of the mercantile community would simultaneously forget all that experience had taught them as to the best methods of business, and by common consent abandon legitimate trade for naked gambling. It may very safely be taken for granted that these men of experience well understood what they were doing in resorting to the new methods; and the unanimity with which the change has been adopted suggests a strong probability that it has been brought about by commercial reasons much more important than might be inferred from the feeling with which speculation is very generally regarded.

It cannot be denied that some unfortunate results and some unmitigated evils have thus far attended this great expansion of speculative transactions. One of these consequences has been to drive out of business, in some cases with disastrous losses, a class of long established and much respected firms, who could not readily exchange the methods which they had followed through long years of success for others which they naturally regarded as more or less revolutionary and possibly unsafe. These wrecked fortunes excite the more sympathy because the losers are generally men respected for their honor and conservatism and because their losses have struck them so late in life that recovery is almost hopeless. This, however, is an illustration of the anomaly that the very qualities that merchants most depend upon to protect themselves may make them insensible to the dangers that accompany great commercial changes.

Another very serious evil has been the creation of a speculative craze among a class of people who have no sort of qualification for engaging in such transactions. This class are known as the "outside public," who ordinarily know nothing whatever of the position of the articles in which they take ventures, nor of the speculative situation they have to encounter, nor of any of the points on which their success must depend. These people are drawn into the speculative currents simply by the inherent spirit of gambling, and with about as much chance of success as they would have in challenging a professional poker player; for they are staking their money against men with whom speculation is a carefully-conducted business and who possess the knowledge and the means necessary to success. This class become demoralized by the free indulgence of the gambling passion, and very serious social mischiefs result. They ordinarily lose their "margins," and then are tempted to replace the loss in illegitimate ways. Merchants stake assets that belong to their creditors; trustees pledge funds sacredly committed to their keeping; public officials put the public money into grain, petroleum or stock "margins;" bank and mercantile clerks misappropriate the money of their employers; retired men of fortune lose the money on which their families are dependent; and even women are tempted to risk the all on which they are dependent for support. This catalogue of evils is so painful and so impressive

in its effects that it is not surprising that the public should have learned to condemn speculation with such indiscriminate vehemence.

The tricks and expedients to which professional speculators frequently resort have also contributed in no small degree to the popular feeling against this class of operations. At present, speculation recognizes no code of morals and has its own peculiar ideas about honor. It suppresses the truth and exaggerates it; it invents rumors and circulates them as facts; it perverts and prevaricates and intentionally utters egregious falsehoods; it knows nothing of compunctions or conscience; it is ruthless in its methods of warfare; it will exact every advantage within its power; and it slaughters its enemy with as little mercy as an Arab. Little marvel then is there that, in these days, such a method of conducting business should be regarded by many as a monstrosity.

And yet the fact remains that merchants, including our best and most reputable citizens, find it necessary to conduct their business upon methods attended with these unqualified evils. This fact implies that there are some imperative reasons for adhering to this system; and it is wise, therefore, to discriminate as to the just limits of our condemnation. Speculation is in the untamed wildness of its youth, and its excesses have in them a tendency to self-correction. The "outside public" who take such reckless ventures will gradually learn from bitter experience the folly of risking their puny stakes against overwhelming odds; and, as the novelty of the excitement passes away, people of ordinary caution will as carefully avoid the centres of commercial speculation as they do the gambling hells. This result may require time; but it may be calculated upon as an inevitable outcome of experience and of the instinctive indisposition of men to be twice bitten. And with a neutralization of the temptation will come an abatement of the serious social consequences that are now chargeable to speculation. We may therefore anticipate a time when these incipient excrescences of speculative business will disappear, and the transactions will be mainly confined to those whose time and capital are legitimately devoted to it.

So far as respects the commercial branches of speculation, the chief cause of its large expansion during late years appears to have been connected with the enlarged use of the railroad and the telegraph, and the exercise of a broader and closer scrutiny into the conditions, prospects and results of the crops—and that not only in this country but in all others. These agencies have afforded much earlier and more trustworthy data as to the prospective supply and demand for the leading staples than was formerly obtainable; and hence, instead of waiting until the harvest, its products begin to be estimated with considerable positiveness three or four months in advance. In the same way, the ocean cables inform us in detail of the foreign crops and markets from one to four months earlier than we were accustomed to get such knowledge. This anticipatory information, extending over an interval of some months and constantly varying with incidents of weather, &c., during that interval, affords scope for a wide diversity of estimate as to the ultimate outcome of incipient conditions. These differences of estimate lead to a corresponding diversity of valuations; and that again affects the prospective value of commodities during the intervening months. The diversity of opinion as to the value of products during several months to come necessarily gives rise to en-

gagements to receive or deliver in specified future months. Here, briefly, lies the basis of speculation; and so long as merchants are in a position to estimate the future of crops and values with what appears to them a reasonable probability, and so long as human nature remains what it is, no power can stop these transactions in "futures," as they are called. Nor is it easy to see why they should be prohibited. It is in the nature of business to discount probabilities; intelligent merchanting cannot be done without it; and the only question is, what is a safe limit to such operations? which must be left to each individual to determine for himself.

Speculation has some very beneficial indirect results. It acts as a direct regulator of production. It announces to producers the earliest indications of an over-supply or of a deficient yield, and thereby helps them to an intelligent regulation of their preparations for future supply, as well as to a better judgment of what may be the value of their present stock at any time during the next few months—information which, from their isolation, they greatly need. It leads to a closer scrutiny into the conditions affecting values, and so far contributes to a more intelligent management of business. The sharp outlook on commercial movements thus maintained, and the constant conflict of opinion on future values have the very important effect of producing a steadier course of prices. Sometimes extreme fluctuations arise at the crisis of a sharp contest; but those are only momentary, while the general effect is to produce an even mean than would exist under other conditions. Strange as it may seem, the very operations that feed upon fluctuations tend to check oscillations. The regulation alike of production and of prices which results from these anticipatory operations are of vastly more advantage to business at large than is generally understood. The absence of extreme oscillations in prices and the non-appearance of a commercial crisis during the last eleven years may perhaps be attributed to this vigorous speculative regulation of the markets more than to any other cause. The course of values has been so closely scrutinized and checked by the speculative interest that, instead of prices being permitted to fluctuate between the wide extremes that have been the chief causes of our panics, those extremes have been obviated; and it would not be surprising should it prove that this new element has the effect of materially extending the interval between our commercial crises. When the present excesses and excrescences of speculation have disappeared through a process of self-cure, and the new methods have fallen more into the hands of men of judgment and adequate means, it will be found that the change which has been scouted as a mere demoralizing craze is really the introduction of an improved way of conducting the world's commerce.—*Bulletin.*

Over 34,000 of the 4,440,822 pieces of mail matter that were sent to the dead-letter office last year contained checks, money, &c., to the amount of about \$1,030,000.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot

Correspondence.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, March 26, 1884.

Let "Old Probs." be praised! We have been favored during the past week with a few pleasant days. Business is already beginning to feel the effects of agreeable weather. Buyers are becoming more numerous and the spring novelties so attractively displayed are commanding attention. Some of the Easter goods presented this season are really artistic gems, and no little ingenuity is displayed in the many unique designs. The large jobbers here report that the Easter trade has been very good for the past two weeks. Some days yet remain before jobbers will shelve these goods, and a very light stock will be carried over.

The "free text-book" bill has received the Governor's signature, and now becomes a law, to take effect in August. By this bill the children of the public schools of this State will be supplied without cost with everything needed in the school-room. Books, slates, stationery, pens, pencils, ink and all school supplies are now free to all children, rich or poor. Now this is a big scheme. It's good for the children; it's good for book publishers and manufacturers of school specialties; but what is to become of the hundreds of small stationers located throughout the State, whose trade depends upon the local demands of school children? Will not many of them be forced into other fields? Will not the several city jobbers of school specialties find their trade considerably reduced? The same quantity of supplies will be consumed by the State, and possibly more, but the trade will pass through other channels. For the city of Boston alone it is estimated that, for the first year, \$100,000 and over will be expended. The city of Lynn will require \$15,000 worth of supplies. When all the cities and towns are figured up, the amount of trade that is taken out of the small dealer's hands is something enormous. Each county of the State is forced to levy a special tax for the purpose of furnishing these free-school supplies. A traveling salesman of a leading city jobbing house, who just returned from a business trip through the western part of the State, reports that the small dealers are demoralized, and in consequence of this change in the law no sales were made.

Charles H. Whiting has added to his list of publishers the names of A. D. F. Randolph & Co. and William S. Gotteberger, of New York,

whose publications can henceforth be found upon the counters of this house. Mr. Whiting's extensive connections with the several prominent publishers of the country enable him to fill all orders readily, and so caters for miscellaneous book orders as well as stationery and blank-book trade. This house is also doing quite a business in Shannon files.

J. Baird was found in good cheer as usual and reports that the Easter trade has been above the average. The coming week will clean out his stock in this line completely. Staple goods, such as birthday cards and embossed novelties, are being displayed in lavish profusion, and I doubt if a more extensive line can be found anywhere. Among the many new designs in embossed cards I noticed the "Picnic party," representing a group upon the top of an English "Tally-ho!" coach, drawn by four spirited steppers. Racing teams, with St. Julian and Jay-eye-see in harness, is another pretty picture. A third presents a dozen life size tropical birds, whose gay colored plumage is well brought out. These embossed goods are very fine.

Ward & Gay are fully prepared for the increasing trade of the season. Notwithstanding the bad weather of the past two months, this house has done even a larger volume of business than for the same period of last year. In staple goods and stationers' specialties some special bargains are being offered. The large stock of Easter novelties carried by this house is growing beautifully less every day. In another week its sample room will display a fresh stock of birthday cards and other art souvenirs.

Trade in blotting-paper has opened up well and the demand still continues. The Russell Paper Company, whose blottings are so extensively handled by the trade, is forcing its Lawrence Mill to its fullest capacity and every sheet of blotting made finds ready sale. The hardest test to which an article can be subjected is trade competition, and this test the Russell blotting-paper has stood for years. When a first-class article in blotting is wanted the Russell brand goes to the front.

Geo. S. Perry, 73 Fulton street, is supplying the trade with the Sibley pencil sharpener. This is a Boston invention, and is found to be quite useful in school-rooms, where a number of the sharpeners are now in use. In this device a sandpaper belt, revolving upon two pulleys, bears upon the point of a pencil which is held in position by a revolving clamp. The pencil makes fifteen revolutions to one of the belt, and is sharpened very quickly and with a superior finish. It is worked with a geared crank by hand, and sharpens lead or slate pencils equally well. One belt will outwear the points of a

thousand pencils, and a number is furnished with each sharpener. A school-room supplied with a Sibley pencil sharpener gives pleasure to the children.

Winkley, Thorp & Dresser will present to the trade some time in May a new line of autograph and scrap albums. The publications of this house, as the trade must acknowledge, have been far in advance of the many accepted styles. These new designs for the fall trade, upon which their artists are now engaged, will even surpass their former productions in originality of conception and artistic finish. Those of the trade desiring prices should address the firm.

John T. Robinson & Co., Hyde Park, Mass., manufacturers of paper-box and card-cutting machinery, are filling numerous orders for special machinery in this line. Competition is so great among box makers that the most improved machinery is needed to realize much of a profit on the day's output, and the most prosperous box makers are those who use the latest devised labor-saving machinery. John T. Robinson & Co. are constantly adding such improvements to their machinery as ingenuity can devise, and for this reason the firm is one of the foremost in its line. A scoring and cutting machine, only patented last March, has already found its way into several box factories. A new rotary stripping machine is another valuable piece of mechanism for box makers. Illustrated circulars giving full description of machines are furnished on application.

A. J. L. D.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING,
CHICAGO, ILL., March 22, 1884.

The weather has at last assumed a spring-like aspect, and with it rumors of removals and changes of firms are floating around.

Rubel, Ettlinger & Co., printers and stationers at 173 Monroe street, have dissolved partnership. Rubel continues the printing business at the same address, and S. E. Ulinger continues the stationery business also at the same address.

I am pleased to find the familiar face of my old friend, W. H. Maclear, in the employ of the Skeen & Stuart Stationery Company, 77 Madison street. Mr. Maclear was well known with the late firm of Culver, Page Hoyne, & Co. I wish him every success in his new departure.

Mr. Lester, manager of the Western branch of Bufford's Sons, told me that the business for this month was far ahead of the same month

last year. I suppose that this is no doubt due to Mr. Lester's increasing popularity with the Western trade.

Cushing, Thomas & Co., printers, at 163 and 165 Dearborn street, have decided to remove on May 1 to the corner of Dearborn and Jackson streets.

Belford, Clark & Co., publishers, corner of Wabash avenue and Jackson street, have filed an application for an increase of capital stock from \$50,000 to \$250,000.

The National Printing Company's quarters, at 119 Monroe street, are rapidly refurnished and will soon be ready for occupancy again.

Brown & Besly, manufacturers of Brown's letter files, at 114 Monroe street, are having quite a run on their "Every Day" letter file, which they are making to retail at 75 cents. I shall have more to say of these files later on.

GARDEN CITY.

WASHINGTON WHISPERS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., March 24, 1884.

Like the timid and beautiful maidens in the "Pirates of Penzance," the people everywhere are talking about the weather. At home, in the shop and on the street, the subject of discussion is the firmament above and the waters beneath. With no desire to stir up the wrath of other correspondents or to excite the envy of the readers of *THE STATIONER* in other localities, I follow the prevailing custom and softly impart the information that the nation's capital has been favored with some peculiar weather for the past week, the kind of article which Mark Twain was pleased to say belonged exclusively to the New England States. Old Sol crossed the line on schedule time, and in the goodness of his spirit showed his radiant face for one day and chased away the leaden skies, sombre clouds and cold pelting rains; but alas! for the inhabitants of this part of the world, the golden sunshine gilded tree top and church-tower for "one evening only" (last Saturday), since which beautiful day we have been in the midst of the deluge. The days of bluebirds and blossoms seem to be as far away as when the icy snow and sleet made the earth a precarious foothold.

Of course, trade is affected by weather, as every retail dealer well knows. We enjoy the good things of life when we are feeling best ourselves and the world of nature is in its handsomest attire. One cannot appreciate the most beautiful Easter card if he has a raging toothache, nor will the gentle maiden and her mamma be tempted by the grandest display of fine stationery to go out if the heavens be hung with black and the pitiless rain is beating wayfarers in every quarter. *Ergo*, trade for the past week has been dull; but the heart of the merchant is looking joyfully to the days of spring, which surely cannot be much longer delayed, and he well knows that the gently-kissing zephyrs and the balmy air of early spring-time is sure to bring out the people. As the brass band, the monkey and the painted wagon of the "greatest show on earth" bring out the small boy and the colored brother, so do the fine days of spring lure the old folks and the young folks from their homes in search of the useful and the beautiful in the byways and the highways of the capital.

I am sure that no city in the Union can present such a charming sight as the broad concrete walks of Pennsylvania avenue on a lovely day in spring when the people are out. Between the hours of 4 and 6 in the afternoon all classes

of human kind, without regard to race, color or previous condition of servitude, smiling and chattering, promenade this noted thoroughfare from the Capitol building in the east to the Executive mansion in the west, as happy and contented as the most frolicsome Parisians flirting under the shadow of the Grand Opera House in the gayest city of the world. Such a scene is not a bad one for observation and perhaps instruction for those interested in the fancy-goods trade, for here can be noted many shades and shapes of all styles of art which adorn the bodies of the matrons and maids, and occasionally one may be treated to a rare old work of art in the shape of a battered beaver on the cranium of a ward of the nation or an antique relic of the past, in the form of an ante-bellum slat-bonnet, gracing the occiput of a female granger from the sacred soil of the Old Dominion. This being the fact, who knows but that some live drummer for a big commercial house or the head-man of some large manufacturing establishment might find something in this mass of color, shade and shape, which he might fashion into an article of *vertu*, which would please a multitude and bring the ducats to the concern making it!

There is nothing new or startling in the trade here. Washington not being a commercial city in any sense, things of business interest move along very smoothly and without any friction or any of those exciting denouements such as occur every week in the great centres of commercial life. I understand that Brentano has disposed of part of his interest in the concern here of which he is the head, and that he expects to take up his tent and move into the big and wicked city of Chicago some time during the present spring. The store here will be managed by two of the gentlemen now employed there, and, as I understand, Brentano will not entirely let go his hold on the machine in this part of the country, that is, he will have a sort of fatherly care and more than a brotherly interest in its prosperity and financial welfare. Brentano's has gotten to be one of the most popular places of resort in the city, and the name is fast becoming a household word among the lovers of good books and the very best things in the stationer's line. One feature of this establishment which has in a great measure added to its popularity here, if not to its success is, that you can always find on its shelves the latest editions of the leading papers, daily and weekly, printed in this country, and the best of the more noted ones of foreign lands. For a Washington merchant in the stationer's line, Brentano keeps late hours, his store being kept open each night in the week till ten o'clock, while the others, adhering to the philosophy of Ben Franklin (who, by the way, was himself a stationer), shut up shop early and go home to the bosom of their families. Whether Brentano is wise in working out his commercial salvation in this city by this "early to bed, early to rise" rule, is yet an unsolved problem. Some say it is a mistake; Brentano thinks and acts otherwise. If it is not the true way to wealth, and ease, no one will find it out quicker than the distinguished citizen from New York, and at present the store is still open and the folks are all well.

I hear no little talk here about the enterprise of the merchants of Baltimore—of the large houses, I mean. They are working energetically to take away the New York trade, and, if all I hear is true, they are to some extent doing effectual work in this direction. The citizens of Washington are very close to the Monumental City in these days of telephones, railroads, electric lights, and such; therefore it is but natural

that they should look quite often at the inducements of Baltimore in preference to New York. Nowadays, a man can step up to his cash-desk here in Washington and hold conversation through the telephone with the manufacturer or importer in Baltimore and close a sale in twenty minutes, whereas, if he was dealing with New York he might have to make a trip of two or three days to purchase the same line of goods. New York must keep a sharp look-out, or Baltimore will capture all the business.

A generous paper manufacturer, C. C. Woolworth, of the firm of Woolworth & Graham, opened his heart and his pocket-book the other day and gave 1,200 volumes of standard books to a temperance organization in this city, to be used in a public library for the benefit of the people; thus the paper man helps to knock the props from under the drinking man. James S. Earle & Sons, of Philadelphia, have on exhibition here a lot of paintings, which the public is cordially invited to inspect and gently reminded that they may purchase the same on a certain day and night of the week. The printed list contains such names as Moran, Muller, Lasalle and others. BEN.

CINCINNATI CIRCUMSTANCES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, March 25, 1884.

Reports on the state of trade as to transactions vary. Judgments upon the condition of trade in the country as to healthfulness agree. A prominent banker said to *THE STATIONER* correspondent yesterday: "I believe the business condition of the whole country is healthful. There has been disproportionate production, or as it is more frequently termed, overproduction. The country has been working its surplus off instead of buying new right along. You see in the meantime liquidation has been going on. People everywhere are terribly conservative. They are not spending a cent except as they are obliged to for actual necessities. This conservatism will continue till the country is bare of manufactured products and then the turn will come and new men will rush into business and competent men will make money. It is the same old story over and over. The laws of trade, had we but the power to read and comprehend them, are as constant and uniform in their operations as the laws governing the motions of the planets. No, there is nothing now but a halt in business caused by the universal prevalence of extreme caution. How soon the wheels of commerce will begin to move briskly would be presumptuous in any man to predict. It may be next fall after the election—it is not likely to be sooner."

Stationers almost universally report sales good, especially of mercantile stationery.

Sales of Easter cards are not setting out with much promise, but there is time for them yet, and there never before was so much beauty, real, genuine beauty, in the Easter luxuries displayed in shop windows. In fact, they fairly glow with color. It requires real artistic taste and skill to produce them. The designs are fine, the drawing is perfect and the coloring brilliant. There is no glaring of pigments. One sees that modesty in the most dazzling coloring, and that mysterious balancing, harmonizing and subordinating of tints and tones, which only the true artist can produce by feeling his way. Easels bearing palettes are predominant forms for these Easter ornaments in the way of novelties, but there are also little sparrows skillfully stuffed

(Continued on page 392.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 390.)

and cunningly mounted over nests filled with eggs. Every scene and situation of delight in the life of man or of the lower animals most common and pleasing to man and appropriate to the occasion, have been seized upon by the imaginative artist and turned to account in symbolizing the season that commemorates the advent of joy on earth and good will to men. It is flattering to our pride and our patriotism that a demand exists for these pure little beauties—that this demand is greater now than it used to be—that it is more critical in that it requires for its satisfaction a higher order of art than ever before.

The trade does not abound in incidents. The Globe Files Company, at its annual meeting very recently held, elected as its officers W. B. Carpenter, president; H. C. Yeiser, secretary and treasurer, and Messrs. Robert F. Leaman, Harry T. Ambrose, George V. Nauert, James J. Hooker, Frank R. Ellis, W. B. Carpenter and H. C. Yeiser, members of the Board of Directors.

Trade visitors have not been numerous, but what there was of them have been good. Here are samples: Charles H. Iehle, of Whitmore, Nicoll & Co.; N. Frank, of Charles Zinn & Co.; "Our Mr. Dinsmore," of Carter, Dinsmore & Co.; I. Aikenhead, of John Gibson; Wm. M. Miller, of John Forcheimer & Co.; L. Silberman, of Bernard Dreyfus—all of New York; J. B. Bayes, of J. G. Ditman & Co., Philadelphia; T. D. Van Syckel, of Newark, N. J.; H. S. Townley, of Farley, Paul & Baker, Philadelphia; "Our Mr. Closson," of the Plimpton Manufacturing Company, Hartford, Conn.; J. B. Gunn, of E. Faber, New York. Also Marks, of New York, and Stafford, of Stafford's inks.

PRINCE WILLIAM.

OUR LONDON LETTER.

(FROM OUR REGULAR CORRESPONDENT.)

5 LUDGATE CIRCUS BUILDINGS.
LONDON, E. C., March 8, 1884.

Columbia is in the ascendant. Never within the memory of the "oldest inhabitant" has there been such a rage for things American as at the present time. In almost every department of industry and art Americans are having a very decided innings. In literature, the works of Henry James, Jr., Howells, Mrs. Burnett, and to say nothing of sundry anonymous authors, are running very hard the productions of our own literary favorites, while the popularity of *Harper*, the *Century* and *Atlantic* makes English publishers tear their hair in dismay or seek to steal a march by far-off imitations.

Again, in pictorial art of a more popular character than that which constitutes one of the chief attractions of the American magazines, in chromos and oleographs we are growing familiar with the products of the United States, and in the matter of large color work the boardings in our streets testify to the high estimation in which American lithographers are held by the shrewd theatrical managers, one of the most striking and effective of the posters now exhibiting being that illustrating a scene from "In the Ranks," now acting at the Adelphi Theatre, which bears the imprint of the Strobbridge Lithographic Company, Cincinnati.

All of this is quite in keeping with the fact that three American actresses are now before the London public, one of whom, at least, has excited the enthusiastic admiration of the most critical playgoers. I mean, of course, the lovely

Mary Anderson. Nor are the piquant eccentricities of Lotta without hosts of admirers.

Nor is this all, for the biggest success as a popular lecturer since the era of the corn-law repeal agitation has most certainly been achieved by Henry George, whose "Progress and Poverty," by the way, I should have mentioned among American literature popular here, but that the man and the book have achieved an entirely unique position in this country, no English writer on economic questions having reached the hearts and brains of all men and classes in this country, even of those who, like the writer, disagree with his views, as has the "Californian Philosopher," who has come to show us how to put our house in order without first pulling it down, as most of our home-grown agitators recommend.

I have in previous letters referred to the growing popularity of American goods, so need not say much on that branch of the subject, but may here remark that I have heard more than once, from the heads and managers of big houses of perfectly unquestionable soundness, that, but for the apparent reluctance of American manufacturers to open business, except upon almost prohibitive terms, a greatly increased trade might be done. Of course, I give this for what it may be worth. I cannot help thinking there is something in it. It certainly is unfortunate if mere punctilio stands in the way of increased trade between the two countries.

As regards new inventions, or, in fact, any-

thing new, I am pretty much in the position of our well worn—perhaps threadbare—friend Canning's "Needy Knife-Grinder" story: "Bless you, sir, I've none to tell." Next week I shall hie me to the north in search of discoveries, from whence I may report progress. My last provincial run was not encouraging, but I mean to try again. I ought not to forget, however, that some very nice chromo works are being turned out by S. Hildesheimer in their new three-fold stove-screens. One design, the "Laburnum Gatherers," is a really perfect specimen of delicate color-printing.

Messrs. Alberton, of Milton street, have also some very pretty things in this line—shield, four-fold, &c. The work in all these is irreproachable.

Those who are interested in the struggle in which the English forces are engaged in the Soudan may be glad to know that Letts, Son & Co, of King William street, E. C., have published an excellent map of that country marked by that accuracy of detail and excellence of printing for which that firm is famous. The illustrated export price list of this house would be found of great service to many who handle the numerous and various articles such as Messrs. Letts, Son & Co. deal in. In reference to this firm, it may be fair to remark that a source of consolation to patriotic Englishmen is to be found in the fact that they have been doing a lot of color work for Continental houses of late, the colored plates for the *Figaro Illustré* being some of their productions.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 294,756. Lead and Crayon Holder.—Charles W. Brown, Philadelphia, Pa.

A lead or crayon holder consisting of a casing provided with a piece of elastic material, so arranged that by reason of its elasticity it will hold the lead or crayon in any position to which it may be moved, and means by which the lead or crayon can be moved against the resistance of the elastic material.

No. 294,775. Temporary Binder.—Wm. Erwin Elam, Americus, Ga.

A temporary binder for letters or other papers, consisting of a base provided with projecting stubs, in combination with hollow receiving-standards, constructed to fit over and upon said stubs, and provided with right-angular projections fitting in a mortise in the base, a pivoted plate or plates for holding the standards upon said base, confining-uprights terminating in spring ends impinging against the standards, and an adjustable guard for retaining the papers in place.

No. 294,803. Perforated Paper Tablet.—William O'Shea, Lincoln, Neb.

As an improved article of manufacture, a tablet divided into blocks or sheets of different sizes by lines of perforations.

No. 294,856. Inking Pad.—Charles W. Crutsinger, St. Louis, Mo.

In a pad, the combination of a body having a base and elastic walls forming recesses, and a porous cover to rest on the body and tops of the walls, the walls forming a firm support.

No. 294,858. Paper Wrapper.—Dundas Dick, New York, N. Y.

No. 294,868. Toy Doll.—Henry A. Goffe, Albany, N. Y.

No. 294,870. Ruler.—Monroe Green, Brooklyn, N. Y.

The combination, with a ruler provided with a longitudinal frame forming ways, of a pen held in said ways and free to slide back and forth therein.

No. 294,886. Writing-Tablet.—Marshall E. Lenril, Homestead, Pa.

A writing-table provided with a transparent glass plate in its leaf and a drawer underneath containing a mirror that, when the drawer is drawn out to its full capacity, stands at an angle of forty-five degrees under the glass plate.

No. 294,920. Memorandum-Book and Pad.—Samuel J. Silberman, New York, N. Y.

No. 294,931. Tag Holder.—Edward H. Tannehill, Malvern Junction, Ark.

A tag or label holder having a hook made integral therewith and adapted to receive a snap-spring, an internal groove closed at one end, and a recessed portion.

No. 294,941. Easel.—Emil Werner, Philadelphia, Pa.

In an easel, laterally-movable legs, a stationary piece between the upper ends thereof, and a hinged prop, in combination with a hinge, one butt of which is formed with laterally-extending wings, which are attached to the legs by pivotal screws or bolts, and connected at the top with said stationary piece, the other butt being connected at the bottom with the hinged prop.

No. 294,959. Plate Holder.—Thomas Henry Blair, Boston, Mass., assignor to the Blair Tourograph Company, same place.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.

$6\frac{1}{4} \times 3\frac{1}{4}$ " \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN, Sole Prop'r & Mfr.
60 WILLIAM STREET, NEW YORK CITY.

Contains 300 letters, figures, &c., 11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$8.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. If requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

STATIONERS' STAMPING PRESSES.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

DAVIDSON PURE RUBBER BANDS,

BY WEIGHT.

WE CALL ATTENTION TO OUR RUBBER
Bands, put up in cartons, containing one
pound, and sub-divided into eight 2 ounce boxes.

We SELL ALL SIZES AT ONE UNIFORM
PRICE, which is a great convenience, and will be
appreciated.

These goods are of the VERY BEST QUALITY,
and, being put up under our name, are fully
GUARANTEED, as are those which we sell in
gross, and great gross packages.

MANY OF THE GOVERNMENT DEPART-
ments have had so much trouble with poor,
worthless Rubber Bands, that they now call for
"DAVIDSON BANDS" in making proposals
for stationery, &c., &c., which is a sufficient guaran-
tee for their quality.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Mrs. Sarah Simpson, stationer, Philadelphia, Pa., is dead.

P. J. Ryan, stationer, &c., Springfield, Mass., has been attached.

H. S. Raymond, stationer, &c., Bay City, Mich., has assigned.

James P. Davis, bookseller and stationer, Clarksburg, W. Va., is dead.

St. Claire Newkirk & Co., booksellers, &c., Colorado, Tex., have dissolved.

W. J. Ford, publisher of the *Leader*, Burton, Ohio, has sold out to Peter Hitchcock.

The firm of M. B. & G. A. Huestis, booksellers, &c., Windsor, N. S., has been dissolved.

W. E. Hannah, bookseller, &c., Moberly, Mo., was burned out recently. Partly insured.

McVay Brothers, newsdealers, &c., South Chicago, Ill., have been damaged \$200 by fire.

John Booth, publisher of the *Reveille*, Austin, Nev., has been succeeded by John Woodruff & Co.

N. B. Bassett & Co., manufacturers of picture frames, Chicago, Ill., have lost \$15,000 by fire. Insured.

The estate of George W. Gleason, bookseller and stationer, Cleveland, Ohio, has sold out to George H. Teviss.

Hunter Brothers, stationers, &c., Chester, Pa., have lost a member of their firm by the death of Thomas Hunter.

Edward T. Miller, wall-paper dealer, Rochester, N. Y., has assigned to S. V. Pryor. Liabilities, \$20,000; assets, \$15,000.

Reports from New Orleans say that G. T. Lathrop, dealer in books and stationery, has asked an extension. His liabilities are \$12,616, and nominal assets, \$24,513.

W. H. Hasbrouck, owing to increasing business, will remove from his present quarters, No. 91 Liberty street, to Nos. 536 and 538 Pearl street. Mr. Hasbrouck expects to be located at the latter number on April 1. Mr. Hasbrouck started the manufacture of blotter-tablets about three years ago, running then only fifteen different kinds. His business increased so largely that up to the present time he is manufacturing over 150 varieties of blotter-tablets. In addition to these goods he makes a large line of pencil-tablets and a variety of other tablets. By keeping his productions up to the highest standard and selling at the lowest prices, and allowing large discounts in special cases, he has secured a list of customers as large as that of any other house dealing in tablets, and he has not only a large domestic trade, but an increasing export demand for his goods. Dealers should not fail to call on him in his new quarters.

The Palmer Art Company has not positively decided yet whether to remove from its present quarters at No. 36 Bond street. It will depend on whether the place it now occupies can be rented to other parties. At present it seems probable that it will not be, owing to the lateness of the season.

A new corporation has been organized at Kenosha, Wis., under the name of the Northwestern Paper Cast Company, the object of which is to manufacture papier-maché goods, wares and decoration works. The process to be employed is said to be entirely new in this country.

James Dwyer, dealer in books and stationery at Salt Lake City, Utah, has made an assignment. The liabilities are about \$15,700, of which \$11,000 is due to Eastern creditors, and assets about the same figure. He has been in business about fifteen years.

The receiver of the Ohio Law Publishing Company, Columbus, Ohio, has sold the property of the concern to George M. Brand and others.

Thomas D. Duryer, printer, at Alexandria, Va., who has made an assignment, owes about \$4,000; assets, \$1,000.

W. R. De La Martyr, publisher of the *Alma Bulletin*, Alma, Cal., has sold out to Hawkins & Cleghorn.

Edward Barry, newsdealer, &c., Blackstone, Mass., has sold out.

Money & Co., printers, San Francisco, Cal., have been attached.

Roy H. Hume, photographer, Lima, Ohio, has sold out to J. W. Mock.

S. C. Marlow, bookseller and stationer, Sheldon, Ohio, has sold out.

Twomey & Vreeland, printers, New York city, have been damaged by fire.

William Smith, bookseller, Marshfield, Mo., has been burned out. Insured.

R. R. McCabe & Co., printers, Chicago, Ill., have confessed judgment in the sum of \$1,068.

W. H. Hewson, bookseller and stationer, St. Catharines, Ont., has been succeeded by Hewson & Tait.

Mrs. W. R. Cranna, publisher of the *Contra Costa News*, Martinez, Cal., has been succeeded by Frank L. Blair.

H. D. Hansen & Co., printers, Chicago, Ill., have dissolved partnership. M. Hansen & Co. continue the business.

N. Barnum, dealer in books and pictures, and J. G. Hamlin, bookseller and stationer, Danbury, Conn., were burnt out recently. The former was insured, the latter not insured.

The affairs of Sibell & Co., whose failure occurred some time ago, have not been settled as yet. Of the \$2,950 in outstanding claims only a small portion has been collected by the assignee. A great deal of difficulty has been met with in making these collections, especially the smaller claims, which in a great many cases are disputed. There will probably not be a meeting of the creditors for some time.

The storage rooms of the United States Twine and Net Company at 210 Fulton street, New York, caught fire at 7:30 o'clock Wednesday evening. The fire was confined to that story, but the lower floors were greatly damaged by water. The loss of the company is \$25,000. Gertrude Knowles, the forewoman, escaped with her hair and clothing singed. The largest knitting machine in the country was destroyed. Lowe & Co., printers, on the third and fourth floors, lose about \$20,000, and other occupants

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c. &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

ALSO FOR SALE BY
HENRY BAINBRIDGE & CO.,
99 & 101 William Street, New York.

about \$3,000, all by water. The damage to the building was \$1,500.

Crampton & Co., booksellers, &c., Rock Island, Ill., have sold out their interest to Porter & Skinner.

Mrs. James Johnson, bookseller, &c., Vassar, Mich., has taken a partner and the firm is now Johnson & Williamson.

Nounnan & McCusker, booksellers and stationers, San Francisco, Cal., have been burnt out. Estimated loss, \$1,500.

D. W. Lapham, stylographer pen manufacturer, 3 John street, New York, has been succeeded by Lapham & Bogart.

Price & Burtnell, booksellers, &c., Florence, Ala., have dissolved partnership. James Burtnell will continue the business.

Rubel, Ettlinger & Co., printers, &c., Chicago, Ill., have dissolved partnership. Rubel Brothers succeed to the business.

W. B. Carpenter has been elected president and H. C. Yeiser, secretary of the Globe Files Company, manufacturer of letter files, Cincinnati, Ohio.

A dissolution has taken place in the firm of Key & Illedge, publishers, Montgomery, Ala., each of the partners continuing business on his own account.

L. H. Mace is preparing to introduce to the trade in a few days in connection with his present line of goods at No. 117 East Houston street, a large line of toys, including spring games, &c.

George F. Connor, bookseller, &c., Bridgeport, Conn., has bought out the stationery business of Adrian S. Godfrey, which will shortly be removed to Mr. Connor's old stand, at 404 Main street.

Grant, Faires & Rodgers, printers, Philadelphia, Pa., have dissolved partnership. The James B. Rodgers Printing Company has succeeded to the business. Grant & Faires also continue business.

L. H. Rogers, manufacturer of ornamental paper, 75 Maiden lane, New York, has sold out his machinery and patents to Chadwick & Miller, who will continue the manufacture of shelf, lace paper, &c., at 323 Pearl street.

G. Henry Whitcomb & Co., envelope manufacturers, Worcester, Mass., have been succeeded by the Whitcomb Envelope Company, a corporation organized under the Massachusetts law, having a capital of \$150,000.

Phil. Hake will make some needed improvements in his establishment in a few days. His wholesale and printers' departments will occupy the ground floor, the latter the front. The cutting-room will be in the basement. The show and salesroom on the ground floor will be arranged in the most tasteful manner, and will be as fine a salesroom as there is in the city.

William Crawford, a bluestone dealer at 630 West Fiftieth street, New York, had Louis E. Adams, publisher of a paper called *Capital and Fact*, arrested on Wednesday last. Crawford said, at the Tombs, that Adams obtained \$1 from him in February as a subscription. He had not received the paper since. Adams said he had been sick, and had lacked proper financial support. He said that W. E. Conner and James R. Keene each gave him \$500, and that Brick Pomeroy agreed to take 100,000 copies of the paper. It took a good deal of money to publish his paper, but he hoped to get it out again some day, and Mr. Crawford would then receive it. He was held for trial for getting money under false pretences.

The Fowler & Wells Company has been incorporated as a joint stock company, and succeeds the old firm of Fowler & Wells, New York. This publishing house was established by the Fowlers, the well-known phrenologists, in 1835, and since the death of her husband, which occurred 1835, it has been conducted by Charlotte Fowler Wells, the widow of Samuel R. Wells, who was at the time of his death the proprietor of the business. Mrs. Wells is a sister of the Fowlers, and has been actively connected with the business since the office was first opened in New York, and makes the present change to relieve herself from care, and to insure the continuance of the business in its present form. At the election of officers Charlotte F. Wells was elected president; Nelson Sizer, who has been connected with the office as examiner for thirty years or more was elected vice-president, and has charge of the professional department; H. S. Drayton, who has been the editor of the *Phrenological Journal* for many years, was elected secretary, and continues in the same position as editor; and Albert Turner, who has been connected with the house for twenty years, and is well and favorably known to the trade, was elected treasurer of the company and business manager, and there will be no change in the nature or management of the business, which is continued at 753 Broadway.

The suspension of William Butler & Co., paper manufacturers, whose mills are at No. 4230 Woodlawn avenue, West Philadelphia, was announced on Wednesday morning. The firm consists of William Butler and his nephew, John Butler, and their liabilities are estimated at somewhere between \$15,000 and \$20,000, although the exact amount cannot be ascertained until the books have been thoroughly overhauled. The principal creditors are the New York firms of Wilkinson Brothers & Co. and J. W. Lyons, while small amounts are due to Patrick Hays and William Hemingway, stock dealers, of this city. Samuel L. Thompson, attorney for the Butlers, said that the failure was precipitated about three days ago, when a note to one of the Philadelphia creditors went to protest. The trouble is attributed to the general depression existing in the trade. It is said that the firm has outstanding credits sufficient to meet its indebtedness, and that at a meeting of the creditors to be held on Monday at Mr. Thompson's office an extension will be granted. The mills were formerly conducted by the firm of Butler & Morehouse, the head of which was a brother of William Butler, who, with his present partner was then employed in the establishment, and succeeded to the business about two years ago. The mill property occupies a frontage of 176 feet on Woodland avenue, and consists of several buildings.

Henry Levy & Son have reduced the price of Le Counts' patent crib boards, so as to place it within the reach of any cribbage player, and it is thought that at its present price it will out-sell any board in the market. It is compact and will hold two packs of cards, will score for three or six players, and keep tally of the game. The trade are now handling this board in much larger quantities than heretofore.

The "Travelers' Official Guide," issued by the National Railway Publication Company, 46 Bond street, is out for March. This is the recognized organ of the General National Ticket Agents Association, and contains all of the current time tables and other requisite information for travelers.

Lawrence & Baxter, 39 Dey street, are the sole agents in the United States for the "J. A. P." striped wrapping paper. This paper is a good imitation of striped silk and comes in five different colors. It is being used extensively for general advertising purposes and is made into paper bags for confectionery, gentlemen's furnishing goods, millinery and the notion trade. It is also made up very largely for pads for wrapping up druggists' sundries. The wholesale trade are said to have taken up this article in a very liberal spirit. This firm is also the agent in America for the new "Perfection" glazed copying paper and carries a stock of all sizes.

There was a meeting of the creditors of Lyman & Curtis, at the place of business of the firm, on Tuesday of this week. A rough statement of the assets and liabilities was presented and the meeting resulted in the appointment of a committee, composed of Mr. Cowles, of New Haven, Conn.; Mr. Spaulding, of Chicago, Ill.; Mr. Dresser, of Leominster, Mass., and Mr. Patrick, of the American Tool Company, of New York. The committee will confer with the creditors in respect to closing up the business, and to offer for recommendation or otherwise any proposition which may be made by the firm or either of its members in the nature of a compromise. The schedule of assets and liabilities, which is not quite completed, will be filed in a few days. The liabilities foot up to \$172,000; nominal assets, \$147,000; actual assets, about \$100,000.

The Mackinnon Pen Company, manufacturers of fountain and stylographic pens, late of No. 192 Broadway, has been placed in the hands of Wm. H. Ricketts, as receiver, on application of S. A. Whitney, a judgment creditor for \$2,493. The company had virtually ceased to do business, its trade having gradually dwindled down for some time past. The annual statement, filed January 17, showed liabilities amounting to \$34,000. The company was incorporated January 12, 1880, with a capital stock of \$48,000, and was reorganized in September, 1881, at which time George W. Carleton became president. The business of the Mackinnon Pen Company, it seems, was absorbed by A. Q. French & Co., of this city, and John Holland, of Cincinnati, Ohio, some time ago. The former company formerly had an office in the Western Union building at the corner of Dey street and Broadway, but a short time ago removed to 89 Nassau street. A reporter of THE STATIONER called at the latter place and found parties who were doing business under the style of the Fountograph Pen Company. He was told that A. Q. French had no interest whatever in the concern, and that the Fountograph Company had not been connected with the Mackinnon Pen Company, although it had something to do with the manufacture of the Mackinnon pen. In other words, the iridium points and mechanism of the pen were made by John Holland and sent to the Fountograph Company to be cased and finished. Mr. Appel, counsel for S. A. Whitney, stated to a reporter of THE STATIONER that an interlocutory judgment had been taken in behalf of his client and execution having been issued and returned unsatisfied, a referee had been appointed by the court to ascertain the fair and honest creditors of the Mackinnon Pen Company, where its property is, what it consists of, its value, and to report in what proportion the creditors are to be paid. An injunction had also been obtained restraining the defunct corporation, its officers, trustees or employes from disposing of any of its property or effects, until the filing of the referee's report and the obtaining of a final judgment.

ANTIQUITY OF LUMINOUS PAINTS.

The luminous paints of which so much was written a few years ago, and for which a great future was prophesied, appear to have been known many centuries ago to the Chinese. The North China *Herald* has an article on the subject, stating the Emperor Tai Tsung, who flourished toward the tenth century of the Christian era, received a picture which was luminous at night. The picture represented by night a cow lying within a fence; while by day the cow appeared as browsing outside the inclosure. His majesty asked for an explanation from his ministers, but they were not better informed than he. At length someone explained that the effect was produced by mixing South Sea pearl paste with a pigment which at night became luminous, and that the day picture was attributed to the genii, while some denied its existence altogether. The author of the article shows by extracts from Chinese writers of three centuries ago that the tradition of the art had not died out.

SOFT ALLOY.

A soft alloy which attaches itself so firmly to the surface of metals, glass and porcelain that it can be employed to solder articles that will not bear high temperature can, as the *Pharmaceutical Record* asserts, be made as follows: Copper dust obtained by precipitation from a solution of the sulphate by means of zinc is put in a cast-iron or porcelain-lined mortar and mixed with strong sulphuric acid, specific gravity, 1.85. From 20 to 30 or 36 parts of the dust are taken, according to the hardness desired. To the cake formed of acid and copper there is added, under constant stirring, 70 parts of mercury. When well mixed the amalgam is carefully rinsed with warm water to remove all the acid, and then set aside to cool. In 10 or 12 hours it is hard enough to scratch tin. If it is to be used now it is to be heated so hot that when worked over and brayed in a mortar it becomes as soft as wax. In this ductile form it can be spread out on any surface, to which it adheres with great tenacity when it gets cold and hard.

TITLE TO LITHO STONES.

A case brought by Vere Foster against Marcus Ward & Co. came up before the Irish Master of the Rolls on an application to assess damages, decision having been rendered in the matter, which involved the important question of the right of customers to litho stones containing fine art work. It appeared that only one of the sets ordered to be given up by the defendants to the plaintiff had been handed over, the others having been broken up. For the defendants it was urged that there was a custom of the trade that when designs on stones were obliterated, the stones might be broken up. The Master of the Rolls said that he did not see that custom had anything to do with the present application. The point was that a certain number of stones containing valuable artistic designs had not been given up, and that was in contravention of the decree of the court. It was open to the defendants to show that the obliterations of the designs on the stones occurred during the legitimate and fair use of the stones. The onus of that lay on the defendants. He would require evidence of the clearest character as to why the stones were not delivered. He would hold the inquiry himself.

Man must become wise by his own experience.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, MARCH 27, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

AND now approaches the season of expositions, fairs and the like. THE STATIONER has already invited attention to the most important projected, which is that to be held at New Orleans, and which will be international and immense. The usual preparations are going on in other directions. Cincinnati has just made her twelfth announcement, Chicago will soon follow, to be succeeded in turn by Boston and New York. Some people claim that there is an everlasting sameness in these exhibitions. To some there may be, but the careful investigator will always drop on something which is new to him. Then again the cry of sameness does not apply to the crowds which visit the exhibitions. Of course, to the "round-er," that individual who makes it a miserable duty, or an indifferent means of dispelling ennui, the sameness is very impressive, but there are many people who visit rarely and always go to derive information and amusement. Encourage these expositions, by all means.

OUR Eastern correspondent, mentioning the fact that the State of Massachusetts has determined that stationery supplies shall be afforded to the public schools at public cost, puts in a sympathetic word for the smaller stationery trade, who have heretofore met the demands of the small boy and girl of the period. It is evident that our correspondent has not read the New York papers, which for several days have had a great deal to say about school supplies, presumably furnished by the city, but largely by the parents of scholars, nor has he fully considered the wants and capacities of the rising generation. Speaking from a personal experience, we know that never were there so many pencils, rulers, pads, writing-books, slates and other requirements consumed per capita as now, and the disbursement from the parental pocket on this account, so far as New York experience goes is something extraordinary. In our younger days, a slate or lead pencil went its length with us; but now the public-school teacher proscribes as well as prescribes a pencil of certain limits. There will be or may be some difference in the demand for text-books, but even these are bought in many instances, and where there is a falling off of sales in one direction, there is likely to be an increase in another. There probably will be changes affecting to some extent the smaller trade, but these must be met by an intelligent appreciation of substitutes, of which, we think, there are likely to be enough.

ONE of the statisticians has been putting together figures which are interesting enough for us to reproduce. These indicate the extraordinary growth of our manufacturing interests, and show that in thirty-four years they have increased in value more than 100 per cent. Thus, in 1850 our manufactures were valued at \$1,060,000,000; in 1860, \$1,970,000,000; in

1870, \$4,230,000,000; in 1880, \$5,560,000,000. In 1860 the value of manufactures per inhabitant was \$61.75; in 1880, \$110. In 1850 the number of persons employed in manufactures of all kinds was 957,000; in 1860, 1,311,000; in 1870, 2,054,000; in 1880, 2,739,000. In 1850 the wages paid were \$245,000,000; in 1860, \$400,000,000; in 1870, \$305,000,000; in 1880, \$990,000,000. In 1850 the capital invested in manufactures was \$550,000,000; in 1860, \$1,040,000,000; in 1870, \$2,205,000,000; in 1880, \$2,405,000,000. These statistics are taken from the census reports, and are approximately correct. At the present time the United States turns out more manufactured products than any other nation in the world—the total in 1880, as above given, being \$5,560,000,000, while those of Great Britain were valued at \$4,091,500,000 in 1882. By the same authority the total industries of the United States in 1880 were worth \$11,405,000,000; those of Great Britain, \$9,200,000,000; those of France, \$6,840,000,000; those of Germany, \$6,650,000,000, and those of Russia, 4,650,000,000. We are glad to note that our own manufactures are supplanting foreign goods. There still remains a small and contracted circle of individuals who affect everything that is foreign, good or bad, but we have abundant evidence of the strong common sense and patriotism which dictates the purchases of the unalloyed American. When you contrast our industrial growth with that of other countries, there is much that is remarkable which calls for reflection. American industries are advancing in strength, character and proportion. In England the converse appears to be the rule. Some of Great Britain's important industries have fallen into decay or have become so indifferent as to no longer deserve consideration. The economic principles which bring about these results we leave for our readers to ponder over and discover. What are they?

ROUNDABOUTS.

BY THE TRADE LOUNGER.

An illustration of the possibilities of the export trade is given by an exporter who made a trial shipment abroad of six dozen plated pencils at a valuation of \$4.25 per dozen, only a year ago. He has brought up his exports of these goods to \$25,000 worth within the year.

The same exporter says that as far back as 1868 he advocated an attempt to export manufactures not previously exported, believing that by energy and the use of improved machinery American manufacturers could compete with the cheap hand labor of Europe, particularly of England and France. His experience has justified his expectations.

A new thing in copying ink-pencils has an action "entirely original and distinct" from any mechanism yet applied to a pencil case. It is said to have all of the facilities of the "Eagle" action, combined with the spiral movement for the lead.

"That 'ere critter has gone and done it." I heard that remark once upon a time when I was a small boy, *i. e.*, smaller than I am now, and it has stayed by me. Perhaps you would like to be informed why I have resurrected and rejuvenated it, so to speak. Well, it is because a certain well-known gentleman in the stationery trade has become a paper maker.

What will not his ambition aspire to? To be a paper maker some people think is to be a king, and even an impoverished king is something. I think that the W. K. G. has his eye on the presidential nomination, and when the Saratoga convention meets we may perhaps find him on hand there. No brass bands will be allowed, and no special delegations and chartered trains or hotels "scooped" in advance will be permitted.

I observe that that active promoter of American trade, P. Lawrence, is in town. In running over the columns of your English contemporaries I find frequent reference to the latest novelties from this side, and introduced by Mr. Lawrence. His efforts in this behalf seem to be appreciated in England, for a great deal of compliment and much commendation are given to his efforts and their presentations. I believe that he is now looking out for new captures to be taken right over and piled before the insular trade.

What a talk people are making in one of the daily papers about buying school supplies, which the authorities allege are supplied gratuitously to the children who attend the public schools. The people have the handle end of the story. Why, I know of a little stationery store on one of the avenues which just lives by the trade of the children. Of course, it sells goods to people of larger growth, but if it depended on their trade for existence, we should very soon have that tattler who runs your gossip column saying that so and so "has failed."

Going along past the place of business of a well-known firm of paper dealers the other day, I observed some new signs all done up in red and white. My companion remarked them and said that they sort of appealed to his sympathy. I asked why, and he said that they represented the Confederate colors. I objected, and said that, all in all, the signs recalled to me the national colors—the red, white and blue. He didn't see it and wanted to know "how." I told him to go inside and the firm would be blue enough for the purpose. He "tumbled," and we immediately proceeded to take something reviving. It will be inferred that my friend and I are of differing opinions. We are, but we get along "just so good as never was."

A police judge in San Francisco holds that "drummers" must pay for a license to do business. This was done in a test case, in which Max Friedlander is the willing victim. Mr. Friedlander is the vice president of the Northwestern Commercial Travelers' Association. He was fined and, refusing to pay the fine, locked up and now goes before the Appellate Courts on a writ of "have his carcass."

There were 3,481 books, exclusive of Government publications, brought out in the book trade last year. This is just nine more than appeared in 1882. Many of these were reprints, and cheap ones at that.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinion of correspondents attaches to this paper.]

Explanatory.

PEORIA, Ill., March 19, 1884.

To the Editor of The Stationer:

In THE STATIONER of the 13th inst. there is a matter that needs some explanation. In the list of mortgages, &c., given by the different firms, Adair & Brown, of this city, are represented as giving a "bill of sale" for \$32,000.

In the first place, since January 1 there has been no such firm in existence—the original members of the firm, A. A. Adair and David S. Brown having sold out, and the new firm was and is now composed of Delos S. Brown, S. S. Page and E. B. Hillman. The successors of the old firm have undertaken to incorporate a stock company under the style of Adair & Brown Company without my knowledge or consent; and by inflating the stocks to said amount have issued a bill of sale purporting to come from Adair & Brown to Adair & Brown Company in order to make it appear properly upon the records. As soon as the matter became known to me, I immediately took steps to prevent them using my name in connection with their business which they have attempted to do, and for a period of fifty years, as their articles of incorporation show.

Now, as the firm of Adair & Brown never had a lien of any kind on their stock, and I consider their business reputation above reproach, I think an explanation is due them, and the trade also—the majority of which still think the old firm is yet in existence, nothing having been published by our successors to make it appear otherwise, or that a dissolution had taken place.

A. A. ADAIR.

ANSWERS TO CORRESPONDENTS.

Subscriber asks: 1. Who makes or controls the glass mullage pot with brush and glass cap or cover, similar to the "Ring" stand? 2. Where is Garfield's paper mill? 3. Where to get little oilers for rubber-stamp inks?

Ans.—1. It is made in Bohemia, and can be had of Henry Bainbridge & Co. or Edward Kimpton, New York. 2. Harrison Garfield, Lee, Mass. You will find it noted in Lockwood's Directory. 3. New York Stencil Works, 100 Nassau street, New York.

H. L. S. wants to know where to get black letters (imitation jet), such as are used on glass show cases, windows, &c.

Ans.—Otto Steiz, 49 Chambers street, New York.

A. B. asks: Who makes the Rowley pen?

Ans.—C. B. Rowley, 64 Nassau street, New York.

M. M. & Co. ask: 1. Where are headquarters for spiral penracks? 2. What is the address of P. Lawrence, patentee of spiral penracks?

Ans.—1. B. Lawrence Stationery Company, 39 Barclay street, New York, controls the patent and can supply you. 2. P. Lawrence is located in London, dealing in American goods, but is now in New York, his house in this city being Lawrence & Baxter, 39 Dey street.

J. E. C. wants the names of firms which sell to jobbing houses in the stationery and fancy-goods lines on commission, as he has a specialty that he has to introduce.

Ans.—You are looking for a broker, and we don't know of any brokers in the stationery trade. If you have a good thing get some capable manufacturer to take it up.

A. L. W. wants to know what firm or mill makes paper suitable for paper boats.

Ans.—There are several. A good, tough manilla is what you want. Consult Lockwood's Directory.

W. H. H., who last week asked for "Charter Oak" and "Bankers'" linen, is informed that the East Hartford Manufacturing Company, Burnside, Conn., claims the first-named, and the Southworth Company, of Mittineaque, Mass., also makes a "Bankers'" linen paper.

Friends of Charles O. Brown, of the Carson & Brown Company, paper manufacturers, of Dalton, are talking of him as the Berkshire delegate to the Chicago Republican convention. He favors the nomination of Geo. F. Edmunds.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, March 26, 1884. }

THE MONEY MARKET.—The rates for call loans were $1\frac{1}{2}$ @ 2 per cent. Prime mercantile paper passes readily at $4\frac{1}{2}$ @ $\frac{1}{2}$ per cent., according to the date of maturity. The stock market is exceedingly dull and bearish in temper. The recent cut in the rates of freight by the trunk lines is held to be indicative of a dearth of business by the roads, and it has been used by the "bears" to depress the stock market. Government bonds were dull and unchanged in prices. The market for railroad bonds was active and irregular. Sterling and continental exchange is exceedingly quiet, and rates remain as at the date of our last.

THE PAPER MARKET.—Although the prices of paper continue about as low as noted for some time past, the country appears to be taking about all of the paper that is being made, and while there is not much marketed at a loss, the margin of profit is very small. It is commonly supposed that a Presidential year is unfavorable to business generally, yet the paper industry may be said to be an exception, as the campaign stimulates the consumption, and good judges say that they will be disappointed if the present depression is not steadily removed. It is fair to assume that prices have reached their minimum, as in so large a country as this, even when trade is confined to the smallest possible requirements, there must always be a very large volume of business in the aggregate. The demands of fifty-five million of people are to be met, and this of itself is sufficient to prevent anything approaching protracted stagnation, to say nothing of supplying a steadily increasing export trade, while the consumptive capacity of the country is steadily being augmented through the natural growth of population and immigration. There is apparently a growing confidence that the advance of the season will give an impulse to all branches of business, prices being low, and stocks of goods in the hands of distributors being generally moderate.

THE STATIONERY MARKET.—The fine spring weather of the past few days has had a wholesome effect on trade, particularly on the movement in spring toys. The improvement is not so marked in other lines, although there is a little more business doing, and a better feeling prevails among dealers. The trade in fine stationery is hardly up to the average for this season of the year, but dealers show more activity than they did a week or two ago. This remark does not apply to fine writing-pads and tablets, for which there has been and is a brisk demand. There still continues to be a good business in Easter cards, particularly in those of new and fresh designs. The trade, however, is mostly local, there being a falling off in out-of-town orders. There is a very good demand for inks, dealers being kept busy in filling orders received some time ago. Notwithstanding prices have advanced in mullage, on account of scarcity of gum, trade shows some activity in this line. There is no marked improvement in the envelope trade, although business is better than it was a week or two ago.

We will deliver one case to any part of the U. S., as sample, paying all charges.

WHITE'S TAR,

SIZE 5x7,

\$11 per Case,

shown in the cut, which we claim to be the most perfect FORM or STYLE of package ever devised. It is superior to the ordinary Package of Sheets, because all litter of scraps is avoided; and it is superior to Rolls, because it is certain where the sheet will detach from the package, and this avoids waste. The disinfecting cover is as thorough a deodorizer as any costly apparatus, while the artistic design and printing gives the box a very neat appearance.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its never spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

CANFIELD "DIVIDED" (Formerly "Acme") ERASER, of Rubber as pure as can be profitably used, with brush-like ends: has surprising erasive quality; never soils paper or abrades its surface; improves by use.

Postpaid, 15c. The trade supplied. CANFIELD RUBBER CO., Middletown, Conn.

A VALUABLE PATENT FOR SALE.

Patent 239,217, and dated June 6, 1882, gives broad claims, which absolutely cover the invention, a copy of which can be obtained through any Patent Attorney for 25 cents.

No person can produce a Checker with Knob or Socket that is not an infringement. The players can move more conveniently and intelligently; Kings cannot fall down.

"Barker," of the Boston Globe (Champion Checker Player of the United States), says: "They are the best checker-men I ever saw."

One boy with a Weymouth Lathe can produce 25,000 to 35,000 per day. Will furnish free samples to any probable purchaser. I will accept the highest bid above \$750.00 made within 30 days from date of this paper. Call or address

F. SANDERSON, Room 14, 76 Fifth Avenue, Chicago, Ill.

OBITUARY.

CLARENCE B. KILMER.

Clarence B. Kilmer, son of Chauncey Kilmer, of this city, paper-manufacturer, Rock City Falls, Saratoga County, N. Y., died at his home on Monday morning, of congestion of the brain. Mr. Kilmer was about thirty-eight years old, and had been engaged with his father in paper-making for a number of years under the firm name of Chauncey Kilmer & Son. About eighteen months ago his father withdrew from the firm, and, retiring from active business, took up his residence in this city, his son Clarence continuing to run the mill on his own account. The Kilmers, father and son, have supplied a portion of the quantity of paper used by the *Sun* for the best part of the time this paper has been in existence, and consumed their entire product. Mr. Kilmer's health has been failing for some time. He leaves a widow and two children.

INK PLANT.

There is in New Granada a plant, *Coryaria thymifolia*, which is known under the name of the ink plant. Its juice, called *chanchi*, can be used in writing without any previous preparation. The letters traced with it are of a reddish color at first, but turn a deep black in a few hours. This juice also spoils steel pens less than common ink. The qualities of the plant seem to have been discovered under the Spanish administration. Some writings intended for the mother country were wet through with seawater on the voyage; while the papers written with common ink were almost illegible, those with the juice of that plant were quite unscathed. Orders were given in consequence that this vegetable ink was to be used for all public documents.

TRADE ITEMS

H. S. Crocker, of the firm of H. S. Crocker & Co., of San Francisco, Cal., will sail for Europe on the steamship Oregon on the 29th inst. He goes on business connected with his firm.

P. Lawrence, of Lawrence & Baxter, 39 Dey street, New York, and Lawrence Brothers, London, has recently arrived here to purchase fall stock for export to Great Britain, and will be glad to see manufacturers of novelties.

The children will welcome the April number of "Our Little Ones." From "Little Blossom," the frontispiece and poem, to the song, "Welcome Robin," at the close of the number, this attractive little magazine is full of meat for the little ones.

V. Heilbrunn, commercial traveler for French & Choate, left for the West this week. He will take orders for the large line of stationers' specialties of his firm, especially the Lambie dictionary holder and Cleaves' drawing, writing and study table.

Those having a demand for a cheap letter-file should order the new file of that character which is being introduced by the Globe Files Company. It is called the I X L file, and is well constructed, strong and durable. It can be retailed for fifty cents.

To meet a demand for a cheaper grade of filing envelopes where continued use is not intended, the Globe Files Company has added to its line a plain but substantial and durable file envelope with the latest improvements. It is made of heavy manilla paper with rubber cord in the centre, and all of the features of the regular style, only it is made to meet the demand for a cheap filing envelope. The envelope

comes in two sizes. Orders will be promptly attended to at the New York agency, No. 28 Boud street. The envelope is especially suitable for stationers, being adapted to the mailing of samples of paper.

EARLY TOOLS.

A writer says: "The first boring tool may be assumed to be an awl of some kind. Pliny states that Dædalus invented the gimblet in 1240 B. C. It was destitute of a screw point, but it may have had a hollow pod, and a cross-head forming a handle. Awls are shown in Egyptian tombs of 1706 and 1490 B. C. The screw point was added to the gimblet in course of time, and within our own recollection the twisted shank, which makes it self-discharging. The hint was taken from the auger proper, which may be called a magnified gimblet, now that their specific features have become so closely assimilated in form and function. The auger (*terebra*) was a Greek tool. From the early descriptions, the auger seems to have been considered a shipwright's tool. It formerly had a curved, sharpened end, and a concavity to hold the chips; this was a pod auger. To this a lip was subsequently added for some kinds of boring, and in course of time the depression grew into a spiral, which allows the chips to escape while the boring proceeds, instead of withdrawing the tool as the pod becomes filled. The twisted auger is the American invention, and was made by Lilley, of Mansfield, Conn., about the beginning of the present century, and afterward by Gurley, of the same place. Augers may be classified as augers, annular augers, taper augers, augers with secondary bores, reamers or countersinks, or having expansive cutters."

THE FASCINATOR A SPRING GAME OF MARBLES.

Good for the Garden Walk, the Veranda, the Floor or the Table.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers', and Paper-Box Makers' Machinery,
No. 51 BEEKMAN STREET, NEW YORK.

Manufacturers of First-Class

LINEN LEDGER AND RECORD PAPERS

WHICH WILL STAND THE SEVEREST TESTS OF ERASURE AND RE-WRITING

being double Sized and Loft Dried. These Papers possess unusual strength and beauty, and contain a sizing that resists the severest erasure and re-writing tests. Every ream is Water-Marked with Name, and put up with Binders' Boards, trimmed perfectly square, and ready for Ruling Machine.

"OTTO" GAS ENGINE.

OVER 10,000
IN USE.

Working without Boiler, Steam, Coal,
Ashes or Attendance.

STARTED INSTANTLY BY A MATCH; IT GIVES
FULL POWER IMMEDIATELY.

WHEN STOPPED, ALL EXPENSE CEASES.

No explosions; no fires nor cinders; no gauges; no pumps; no engineer or other attendant while running. Unsurpassed in every respect for hoisting in ware-houses, printing, ventilating and running small shops.
SIZES: 1, 2, 4, 7, 10, 15 and 25 horse-power.

SCHLEICHER, SCHUMM & CO.
PHILADELPHIA, PA.

SONGS OF THE DAY.

The music-publishing business is in the hands of a very few men who have profited handsomely by the monopoly. Only one song in a thousand ever reaches a sale of one thousand copies, and a composer who averages five hundred copies is lucky. The song-writers of America who have made the business pay are very few and they may be classed thus: Hays, of Louisville; Thomas, of New York; Danks, of New York; Henry Tucker, of New York; W. H. Brockway and Harrison Millard, of New York; W. J. Scanlan, of New York; C. A. White and J. T. Ordway, of Boston, and Root, of Chicago. Having mentioned these the list is exhausted.

George Cooper is the man who writes more songs than all others put together, and he needs to write a great many to make the business a paying one, for his remuneration is beggarly, being only \$5 to \$10 a piece. This sum appears even more insignificant when compared with the handsome profits made by the music-writers. Mr. Cooper has written many pieces of merit, such as "Dear Little Heart," "When the Tide Comes In," "Learning to Walk," &c.

The representative of a well-known music-publishing house said:

"There are at present only about 1,200 good selling songs, and many of these have only just begun to attain popularity. Some of them were sold years ago by their authors at nominal prices, and have since become a fruitful source of revenue to the publishers. Others leaped into favor with the first edition, and have netted their authors a handsome profit. Take, for instance, Dank's 'Silver Threads Among the Gold,' which was originally sold for \$40, and has since reached a sale of between 300,000 and 400 000 copies, and is still selling. Then there's Scanlan's 'Peek-a-Boo's' big run of 300,000, out of which its author has already netted \$15,000. Payne's 'Home, Sweet Home' continues to sell pretty well, the circulation of which doubtless reaches into the millions, as it is the one song of all others which strikes a responsive chord in the hearts of people the world over.

"Music writers like Hays, Danks and Millard get from \$50 to \$100 for a song if sold outright, or a commission of 10 per cent. on the total sales. Millard's 'Vive l'America' sold over 50,000 copies, and realized about \$2,500; his 'When the Tide Comes In' used to bring him about \$1,000 a year; his 'Waiting' averaged 6,000 copies a year, and his 'Under the Daisies' 7,000 copies a year. Hays's 'Mollie Darling' and Hoffman's 'Mocking Bird' have both had large sales, the first about 500,000 and the second not quite half so many.

"J. A. Barry's 'Little Footsteps' originally sold for \$5, had a sale of 75,000 copies. 'Belle Mahone,' 100,000; J. P. Ordway, 'Dreaming of Home,' 100,000; 50,000; Eastburn's 'How the Gates Came Ajar,' 100,000; Hays' 'We Parted by the River Side,' 100,000; White's 'Come, Birdie, Come,' 100,000; Brockway's 'Little Sweetheart, Come and Kiss Me,' originally sold for \$25, had a sale of 25,000 copies; S. G. Foster's 'Old Folks at Home,' 400,000; Joe Skelley's 'Pretty Red Rose,' 100,000; 'Wait till the Clouds Roll By,' 100,000; 'Grandfather's Clock,' \$300,000; of Covert's famous song, 'The Sword of Bunker Hill,' 100,000 copies have been sold; of Wallace's 'Sweet Spirit, Hear My Prayer,' nearly 500,000 copies, and of Work's famous temperance song, 'Father, Come Home,' 250,000.

"Of the popular American comic songs, Howard's 'Shoo Fly' sold 200,000 copies; C. A.

White's 'Put me in my Little Bed,' 300,000; Harrigan & Hart's 'Mulligan Guards,' originally sold by the authors for \$50, 100,000; Harrigan & Hart's idiotic 'Hildebrand Montrose,' originally sold for \$25, 200,000 copies."

England has sent us many popular songs, or rather we have taken them, as there is no international copyright law. Among the English songs thus naturalized are: Sullivan's "Let me Dream Again," which sold 100,000 copies; "Champagne Charlie," 75,000; "Good-Bye, Charlie," 50,000; "What are the Wild Waves Saying?" and "Won't You Tell Me Why, Robin?" 100,000 each, and "Five o'Clock in the Morning," 250,000.—*Ex.*

SCRAP-BOOKS.

A writer alluding to scrap-books says:

"In my experience nothing is as convenient as a good scrap-book. I prefer a size wide enough to paste two columns of common newspaper width, having a margin on the inside, which would make a book six inches wide. If an old book is used, at least one-half of the leaves must be taken out, or the book will be too bulky. I use common paste made of a tablespoonful of flour, a teaspoonful of salt, adding sufficient cold water to stir up well. Put these in a pint cup and then fill up with hot water. It should be allowed to cook until it thickens and turns a bluish color. I prefer this to mucilage. The leaves, of course, must be thoroughly dried after pasting in the articles before closing up tight. This drying can be hastened by putting two or three small sticks between the leaves where the articles have been pasted in, and will also prevent the leaves sticking together before they become well dried. By having different books so divided that any department can be found at a minute's notice, the greatest part of the index work can be avoided (is done away with altogether), while if the articles are cut out and pasted in indiscriminately, an index becomes a necessity, as it would be almost as serious a task to find an article in the scrap-book as it would be in the paper. A scrap-book can be made with little trouble and is a constant source of pleasure and valuable information."

In constructing his photo-electric battery, Dr. Borgmann places a number of U tubes in a black box having removable sides, and fills the tubes with a 2 per cent. solution of sulphuric acid, the light being carefully excluded. Silver plates iodized on the surface by electrolytic means are immersed in the acid. On exposure to light an electric current is set up.

RETREE.

Since our article in which *retree* was shown to be an important item for the consideration of contractors several correspondents have asked us to give the origin of this word. We cannot trace its existence farther back than during the reign of the Great Napoleon of France, prior to the Peninsular war. In the art of war there is little doubt that Napoleon Bonaparte was the greatest general of modern centuries. He desired that the soldiers in every regiment should be of uniform height, and also of uniform physical formation, so that each man should appear equal to his fellow in the proportions of manhood. The words *trier de soldats* were first used, which meant "Pick of the soldiers." A subordinate officer first arranged those in line who, according to his judgment, were of equal height and physical proportions. Next, the colonel of the regiment inspected and further picked out those unsuitable for the crack regiments. Then Napoleon himself would pass down the lines, and further weed out those he considered not quite up to the mark. The weeded men were called *Retrié*, but the French pronunciation allows of the Anglicized *retree*, as we now spell the word; the absolute meaning being "thrice picked."

The word *retree* was considered by French commercial men suitable for several branches of trade, and its first use was in forming opinion upon the designers' art or the best combination of colors, for which prizes were given at an early period in Paris. Red mixed with blue, for instance was a difficult task, unless the shades were harmonious, and the first inspector would cast out a few; a second inspector would cast out others, and the judges would decide upon the best design after the wheat had been separated from the chaff. The rejected designs were called *retree*, but were often, notwithstanding their rejection, accepted by the commercial world.

We now come to that which affects the paper trade. The rag merchants of Paris had a wide-world celebrity at an early period. The paper merchants could not do without them. They were dependent upon rags. But rag pickers and rag merchants were two different fraternities. The rag pickers wallowed in the mire and picked up anything in the way of fibrous matter. The rag merchants took, at a certain price, the *omnium gatherum*; their subordinates sorted them and found a market for the material. The pure linen rag was a marketable commodity at any paper mill, and paper mills at that time existed that manufactured none other than the finest paper, and would use none other than the finest rags. The conflict between the rag merchant and the paper maker was on the question, "What are fine rags?" and a special class of men were appointed to select the coarser from the finer material. This was called *Trier de Chiffon*, or as we may Anglicize, "trial of paper materials." The French designation of their duties was given in the following words: "*Le séparer en différentes classes selon la beauté et la gresse de toile.*" Meaning in rough, English translation, "To separate rag materials into different classes in accordance with their beauty and fineness for manufacture."

In the days we refer to there were Rothschilds who have often been denominated "Rag pickers." They were not: as Jews, they had capital, and paid the rag pickers for their labor and made the best out of their purchase. The rags thus purchased were submitted to the paper makers, who, on their part, had a

"*Trier de Chiffon*," and many were the conflicts between the paper makers of France and the rag merchants as to the *retrié* passed back to them. Men such as Rothschilds knew how to dispose of the *retrié*, and when they found paper makers unwilling to purchase their colored rejected rags, they organized a system, and sometimes found the money, for paper to be manufactured from the French *retrié*.

Enough, it may be said, on the origin of the English word *retree*. It is now well known and acknowledged in the trade. Paper makers make their own *retree* to a large extent. Fine papers are turned over sheet by sheet, and the finest qualities are divided into three parcels, only clean perfect sheets being passed for good paper. Those sheets which contain spots, or are otherwise imperfectly made, are separated from the well-authenticated sheets, and the broken make is called *retree*.—*Paper Trade Review*.

MANUFACTURED WOOD.

Several thin sheets of wood—called veneers, though sometimes an eighth of an inch thick—are glued one upon another, with the grain of each sheet crossing the grain of the sheet next above or below it at right angles; and when the whole complex fabric has lost all power of resistance through being almost saturated with steaming glue, it is pressed into an almost homogeneous board without any cleavage whatever, and so without possibility of splitting. Every sort of wood, of course, can be built up. The inside layers can be cheap and the outside choice. No matter whether or not the different sheets naturally swell and shrink evenly together; they are too thin to exert much force; their separate identities are lost in the common and overmastering union.

The advantages of economy, strength in every direction and immunity from cracking are enough to give the fabric the readiest possible acceptance for whatever uses it may be adapted. It is already in use for broad, flat surfaces in cabinet-work, especially where strength or permanence is wanted. It already competes with canvas for the use of artists, and with binders' board for book covers. Its availability for any purpose appears to be a matter of expense and skill—never of quality. That it will be adapted to many uses not now thought of, is as sure as the inventive fertility of our mechanics.

ELECTRO-PLATING WITH IRIIDIUM.

We have lately had the opportunity of seeing some remarkably fine electro-deposits of iridium, the hardest and most refractory and unalterable of all the metals of the platinum group. These iridium deposits, upon various metals, exhibited a fine steel-gray color and lustre. The inventor, Dr. W. L. Dudley, of Cincinnati, stated to us that he had solved the problem of coating metals with iridium by the use of a suitable solution of the metal and the proper employment of an electric current of regulated strength. He added to this the information that a company was engaged in the practical utilization of the process in Cincinnati, and in order to maintain uniformly the proper strength of the plating solution, a plate of iridium is employed as an anode. This statement would appear to convey the idea that the anode was dissolved in the same proportion that it was deposited at the cathode, which, with so difficultly soluble a metal as iridium, would be a very extraordinary circumstance.

From samples which we had the opportunity of examining, the matter is deposited in regular form, and is susceptible of taking a good polish. A thin platinum sheet, electroplated with iridium, retains its flexibility, and, when the coating is not too thick, its adherence is excellent. Engraved copper plates coated with iridium are claimed to possess decided advantages over steel plates.—*Manufacturer and Builder*.

TWELFTH YEAR OF PUBLICATION.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of
Typography, Lithography, Paper-Making,
and the Auxiliary Trades.

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high-class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, of WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an airtight reservoir kept by atmospheric pressure at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

POTTERY AND PORCELAIN DECORATION.

Even to this day it is possible to meet people who are in the business of buying and selling crockery who imagine that the gold is put on in the form of leaf and rendered comparatively permanent by water-proof varnish of some sort. The fact is, they have some reason for so thinking, because that is the way in which it was done years ago before gold was prepared by reduction and applied in the form of paint, which is afterward fired and burnished. It has always been an opinion among the best gilders that the durability of burnished gold depends largely upon the condition of firing, whether or not it has been fired "hard" or "easy." Then, again, the many different varieties of crockery and porcelain that come into a general decorating establishment make it almost impossible for the decorator to arrange his gold-fluxes so as to meet the requirements of the different glazes and their grades of hardness and softness. A gold that has been fluxed for a moderately soft earthenware glaze will not stay long enough on a piece of hard porcelain to be called gold, and if it were to be fired in what is known as the French *Grand feu* it would appear as a sort of milky way around the edges of the ware. This condition, if aimed at with gold prepared for the purpose, is a decidedly advantageous one, in that gilding that is done over lines that were over-fired is five times more permanent than the single fire at regular heat. If the better class of dealers throughout the country would persuade their patrons who order goods specially decorated to pay a little more money for having them doubly gilded it would give better satisfaction to the purchaser and maintain the reputation of the dealer. The theory of the increased permanency of porcelains treated in this manner is that the first application having been over-fired has by greater fusion of the glaze become incorporated with it in such a way that it prepares a foundation for the second gilding, which, attaching itself to the first lines, makes the gold line both in and over the glaze. We have tested pieces fired in this way by using coarse sandpaper on the burnished gold, and found it almost impossible to completely remove it, and pieces in actual use will withstand quite as much wear and at the same time lessen the annoyance of having half the gold worn off a set before it has been shown to the neighbors. One other fruitful cause of the rapid wearing away of gold on pottery is the lack of hot water used in washing the precipitated oxide from the acids used in reduction. The washing is frequently left to an attendant, who in running short of hot water thinks it will not matter much and lets it go, frequently with disastrous consequences. Every man who uses and makes his own burnished gold should have adequate means for obtaining a full supply of hot water, which should be liberally used, and the best means that we know of is the instantaneous water heater that we came across some time ago and which suggested itself as just the thing needful for the purpose of washing gold where it is prepared in a factory.—*Crockery and Glass Journal*.

ELECTRO-PLATING WITH NICKEL.

BY WILLIAM H. WAHL.*

(Continued.)

The Adams patents were the first on the subject of nickel-plating in the United States, and the rapid development of the art to the proportions of an important industry, which took place within a few years thereafter, gives color to the claim that Mr. Adams is entitled to the credit of being the originator of the art of nickel-plating. I have elsewhere pointed out that the true explanation of the remarkable growth of this art is to be found in the substantial improvements in the metallurgical treatment of nickel, by which anodes of any desired size and of great purity were placed at the service of the nickel-plater; and more especially in the invention and improvement of the dynamo-electric machine, which has made the nickel-plater independent of the uncertain and troublesome voltaic battery. Had it not been for the want of these two important elements of success in this branch of the galvanoplastic art, plating with nickel would unquestionably have been extensively practised, years before it actually assumed a position as a successful and popular industry.

It cannot be denied, however, that Mr. Adams, by directing the attention of technologists to the excellent qualities of the double salts of nickel and ammonium at a time when everything was ripe for the new industry, materially assisted in calling it into existence, and in assuring its commercial success.

The years immediately succeeding 1869 were very prolific of inventions relating to the art of nickel-plating, many of which, however, were comparatively valueless. I select for notice few that appear to have meritorious features.

In 1877, John Unwin, of Sheffield (England), devised an ingenious process of preparing the double salts of nickel and ammonium. This consists in preparing a strong solution of sulphate of ammonium, by dissolving the salt in hot water in the proportion of about 4 pounds of the salt to each gallon of water, then filtering if necessary, and allowing the liquid to become cool. The double sulphate of nickel and ammonium is obtained by adding this solution to one of the sulphate of nickel. The novelty of Mr. Unwin's process, however, resides in the fact that he does not stop the addition of the sulphate of ammonium when sufficient has been added to combine with all the sulphate of nickel present, but continues to add it in large excess. “I do this,” says Mr. Unwin, “because I have discovered that the double sulphate of nickel and ammonia is far less soluble in the solution of sulphate of ammonia than in pure water, so that it is precipitated from its solution in water on adding sulphate of ammonia. I therefore continue adding the solution of sulphate of ammonia, continuously stirring, until the liquid loses nearly all its color, by which time the double sulphate of nickel and ammonia will have been precipitated as a light-blue crystalline powder, which readily settles to the bottom of the vessel. I then pour off the liquid from the crystalline precipitate of double sulphate of nickel and ammonia and wash the latter quickly with a strong, cold solution of sulphate of ammonia as often as I consider necessary for its sufficient purification.” By this procedure, it will be perceived, the double salt of nickel and ammonium is thrown down in a pulverulent, granular condition, readily soluble in water, and therefore ready

*A paper read before the Chemical Section of the Franklin Institute.

for use in the depositing vat, without waiting for the tedious process of crystallization.

In 1878, Edward Weston, of Newark, N. J., noticing its favorable influence upon the electro-deposition of nickel, secured a patent for "the electro-deposition of nickel by means of a solution of the salts of nickel containing boric acid, either in its free or combined state. The nickel salts may be either single or double." Mr. Weston affirms that the presence of boric acid prevents the deposit of sub-salts upon the articles in the bath, which is apt to occur if the bath is not in proper working condition; he claims, furthermore, that its addition in either the free or combined state to a solution of nickel salts diminishes the liability to the evolution of hydrogen when the solution is used for the electro-deposition of nickel, and increases the rapidity of deposition, by permitting the use of a more intense current, and improves the character of the deposit by rendering it less brittle and increasing its adhesion.

The results of extended practical trials of Mr. Weston's formula, made by the writer, have convinced him of the substantial correctness of the claims of this inventor. Where the double sulphate of nickel and ammonium is used, the addition of boric acid in the proportion of from 1 to 3 ounces to the gallon of solution gives a bath less difficult to maintain in good working order, and affords a strongly adhesive deposit of nickel. The deposited metal is dense and white, approaching in brilliancy that obtained from the solution of the double cyanide.

In 1880, J. Powell, of Cincinnati, patented an electro-depositing solution "composed of the pyrophosphate of soda phosphate of nickel, the bisulphate of soda, and citrate of nickel and ammonia."

In the same year C. G. Pendelton, of New York, patented the use of an acid solution of the acetate of nickel. The inventor emphasizes the caution that this solution must always be kept acid. The metallic strength of this solution is fully maintained by the solution of the anodes, and the bath consequently requires no additions of fresh salt.

An interesting suggestion is that patented in 1880 by Mr. Powell, and which covers the use of benzoic acid in nickel-plating solutions.

In describing his improvement Mr. Powell calls attention to the fact (?) that simple salts of nickel cannot be used on account of their failure to yield a regular deposit. He claims to have discovered that the addition of benzoic acid to any of the nickel salts arrests in a marked degree the tendency to an imperfect deposit, and prevents the decomposition of the solution and consequently the formation of subsalts. The amount of benzoic acid necessary to be added to the bath for this purpose is said to be $\frac{1}{8}$ ounce to the gallon of solution. He, therefore, claims "an electro-depositing solution consisting of a soluble salt of nickel, its solvent, and benzoic acid." This bath is reported to give very satisfactory results.

In the same year J. H. Potts, of Philadelphia, was granted a patent for an improved solution for the electro-deposition of nickel "consisting of the acetate of nickel and the acetate of lime with the addition of sufficient free acetic acid to render the solution distinctly acid." Mr. Potts prepares his bath as follows: He precipitates the carbonate of nickel from a boiling aqueous solution of the sulphate by the addition of bicarbonate of sodium, filters and dissolves the well-washed precipitate in acetic acid, with the aid of heat.

The acetate of calcium he prepares by treating caustic lime or the carbonate (marble-dust)

with sufficient acetic acid to dissolve it with the aid of heat. The solution of these salts is acidified, slightly but distinctly, with acetic acid.

This solution, which I have worked with under a variety of circumstances, is in many respects an excellent one. It gives satisfactory results, without that care and nicety in respect to the condition of the solution and the regulation of the current which are necessary with the double sulphate solution. The metallic strength of the solution is fully maintained, without requiring the addition of fresh salt, the only point to be observed being the necessity of adding from time to time (say once a week) a sufficient quantity of acetic acid to maintain a distinctly acid reaction. It is rather more sensitive to the presence of a large quantity of free acid than to the opposite condition; as in the former condition it is apt to produce a black deposit, while it may be run down nearly to neutrality without notably affecting the character of the work. The deposited metal is characteristically bright on bright surfaces, and requiring but little buffing to finish. It does not appear, however, to be as well adapted for obtaining deposits of extra thickness as the commonly used double sulphate of nickel and ammonium. On the other hand, its stability in use, the variety of conditions under which it will work satisfactorily, and the trifling care and attention it calls for, make it a useful solution for nickeling.

FORMULE FOR NICKEL-PLATING SOLUTIONS.

No. 1.

	Parts.
Double sulphate of nickel and ammonium.....	5 to 8
Water.....	100

Dissolve the nickel double salt in above quantity of water with the aid of heat. Cautiously add ammonia, or the sulphate of ammonium, until the solution is neutral to test-paper. This solution should be maintained as nearly neutral as possible in use. This is commonly known in the United States as the Adams solution. It is in very general use by nickel-platers throughout the United States, and yields, where properly managed, excellent results.

No. 2.

	Parts.
Double sulphate of nickel and ammonium.....	10
Boric acid (refined).....	$2\frac{1}{2}$ to 5
Water.....	150 to 200

(Weston's solution.) The superiority of this solution is generally acknowledged. The deposited metal, as previously remarked, is almost silver-white, dense, homogeneous and tenacious, and the solution maintains its excellent working quality very uniformly in long-continued service.

The nickel salt and boric acid may be dissolved separately in boiling water, the solutions mixed, and the volume brought up to that of the formula, or the two components may be dissolved together.

No. 3.

	Parts.
Acetate of nickel.....	$2\frac{3}{4}$
Acetate of calcium.....	$2\frac{1}{2}$
Water.....	100

To each gallon of this solution add 1 fluid ounce acetic acid, 1.047 sp. gr.

To prepare this bath, dissolve about the same quantity of the dry carbonate of nickel as that called for in the formula (or three-quarters of that quantity of the hydrated oxide) in acetic acid, adding the acid cautiously, and heating until effervescence has ceased and solution is complete. The acetate of calcium may be made by dissolving the same weight of carbonate of calcium (marble-dust) as that called for in the formula (or one-half that quantity of caustic lime), and treating it in the same manner. Add the two solutions together, dilute the volume to the

required amount by the addition of water, and than to each gallon of the solution add a fluid ounce of free acetic acid, as prescribed. (Pott's solution.)

No. 4.

Sulphate of nickel and ammonium.....	10 parts.
Sulphate of ammonium.....	4 "
Citric acid.....	1 "
Water.....	200 "

The solution is made with the aid of heat, and, when cool, small fragments of carbonate of ammonium should be added until the bath is neutral to test-paper.

No. 5.

Sulphate of nickel.....	6 parts.
Citrate of nickel.....	3 "
Phosphate of nickel.....	3 "
Benzoic acid.....	$1\frac{1}{2}$ "
Water.....	200 "

No. 6.

Phosphate of nickel.....	10 parts.
Citrate of nickel.....	6 "
Pyrophosphate of sodium.....	$10\frac{1}{2}$ "
Bisulphate of sodium.....	$1\frac{1}{2}$ "
Citric acid.....	3 "
Aqua ammonia.....	15 "
Water.....	400 "

(Powell's solutions.) These solutions yield good results, but their complex composition must debar them from general use.

No. 7.

Sulphate of nickel.....	6 parts.
Aqua ammonia.....	3 "
Water.....	100 "

When the nickel is dissolved, add—
Aqua ammonia..... 20 parts.

This bath is similar to that recommended by Professor Boettger; it is said to be well suited for the purposes of amateurs, inasmuch as it gives good results with a platinum anode. It is worked at a temperature of 100° Fahr., with a moderate current. It requires renewal from time to time, as it becomes impoverished in nickel, by addition of fresh nickel salt; it must also be kept alkaline by the occasional addition of ammonia.

No. 8.

Sulphate of nickel and ammonium.....	17 parts.
Sulphate of ammonium.....	$11\frac{1}{2}$ "
Water.....	250 "

Dissolve in boiling water and allow to cool. These proportions are recommended for coating objects of cast and wrought iron and steel.

No. 9.

Sulphate of nickel and ammonium.....	10 parts.
Sulphate of ammonium.....	2 "
Water.....	300 "

Dissolve as above. Recommended for coating brass, copper, tin, Britannia, lead, zinc, &c.

No. 10.

Sulphate of nickel and ammonium.....	6 parts.
Chloride of ammonium (sal-ammoniac).....	3 "
Water.....	100 "

Watt recommends for ordinary purposes the following solution, which he affirms will give in careful hands very good results: "Take say 2 ounces of pure nickel, dissolve in hydrochloric acid, taking care not to have an excess. A gentle heat will assist the operation. When dissolved, dilute the solution with 1 quart of cold water. Now add ammonia gradually, until the solution is quite neutral to test-paper. Next dissolve 1 ounce of sal-ammoniac (chloride of ammonium) in water, and mix this with the former solution. Lastly, evaporate and crystallize slowly." The resulting salt will be the double chloride of nickel and ammonium. It is one of the earliest solutions used for nickel-plating by Smee and Gore, and is affirmed by these writers to give good results. Watt has also obtained excellent results with the double chloride. According to Smee, the simple chloride of nickel will yield a deposit having a very brilliant lustre.

I can unqualifiedly confirm the statement of Gore, that the electro-deposit obtained from a

solution of the double cyanide of nickel and potassium is "nearly equal in whiteness to silver." I have obtained deposits with this solution of such extreme whiteness and beauty as to deceive even an expert, on casual inspection, into the belief that they were silver. The bath, however, rapidly loses its activity and runs down, and is so difficult to manage that it is impracticable for general use. This, at least, is the opinion I have reached after many trials of it. I am informed, nevertheless, that it is successfully used on the large scale in certain nickel-plating works in this country, though I have not been able to substantiate the fact.

To prepare this bath make a solution of any salt of nickel, and add cyanide of potassium solution so long as a precipitate continue to be formed, being careful to avoid adding an excess. Then remove the liquid either by decantation or filtration; and after several washings dissolve the precipitate almost to saturation in cyanide of potassium solution. Make a completely saturated solution and add a small quantity of free cyanide of potassium. The brownish-red solution is then ready for use.

It may be added, in conclusion, that the double sulphate of nickel and ammonium is used most generally by electro-platers with nickel.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PRESS,
150 South Fourth Street,
PHILADELPHIA, March 26, 1884.

Trade seems to be regaining confidence and overcoming the excitement caused by the numerous failures which followed one upon the other toward the end of last year. An equitable law which should guarantee the rights of common creditors and restrict the privileges of the preferred, would give a security to business which is very much needed. Unhappily our politicians at Washington are too much engaged in agitating tariff issues, which are known to be contested, and therefore inopportune, to pay any attention to the real needs of the community. Scarcely six months have passed since changes were made in the revenue laws, and there has not been sufficient time to form a correct idea of their importance. It would seem that under such circumstances any man of judgment would wait for the experience of those changes before announcing that other modifications are desirable. But the free-traders don't bother about that. Their political interests are first to be considered, and they do not inquire as to what injury they may cause or create. Nevertheless, the enormous loss to which Pennsylvania alone (for I speak only for her) would be subjected, induces me to make this reflection. The iron industry, which is our principal source of wealth, would be in a more prosperous condition if it were certain as to its future. The stock is almost nothing, and the demand is relatively active. The manufacture of woolens, which has been so depressed for the past two years, had certain indications of revival, but the anxiety naturally created by projected changes in the tariff, has suspended new transactions until there is no longer hope of a better season. The loss sustained by the action of the theorists at Washington may be reckoned by millions of dollars. Paper and stationery lines of business has such vitality that we are able to resist efforts tending to paralyze our forces in everything that relates to our lines of trade. The price of paper is firm without being advanced, and the demand for consumption absorbs with little trouble the greater portion of the daily product.

J. G. Ditman & Co., who, as you know, are the largest dealers here, are more busy than ever. Their trade for the first three months of this year was very much greater than that for

the corresponding period of last year. They report that collections are made easily and that the financial situation is good. A. G. Elliott & Co., Magarge & Green and S. A. Rudolph's Sons are equally satisfied with trade.

The manufacture of chromo cards of all kinds, which is a very important branch of trade in our city, is in a very prosperous condition, if one can judge by the activity which prevails at A. M. Collins, Son & Co.'s, who supply the greater portion of the cards and card-board used in this industry. This firm, which is never carried away by booms, is also able to resist the contagion of discouragement, and has been kept busy during the usually dull winter months in manufacturing, as usual, in order to meet the great demand made upon it.

Leather goods are also in good position, and all the manufacturers hope for good results during the spring season. Among the houses in this trade here I must mention that of Langfeld, Turner & Andrews, which is doing an enormous yearly business, and will enlarge it still more during this year. It would scarcely seem possible that business in this line could be increased, but the firm has given its New York branch considerable extension, something rendered necessary by its increasing business, and so Philadelphia regards it as one of the houses which can prosecute its manufactures to the best advantage here, while New York is undoubtedly the best place for its sales.

JULES VIENNOT.

ROCHESTER ROAMINGS.

[CORRESPONDENCE OF THE STATIONER.]

ROCHESTER, April 1, 1884.

Winter is nearly over and occasional suns light up our days. Easter cards are selling, and while the dry-goods bazaars are invading the cheap and non-copyright book sales, the booksellers still sell the books, and propose to continue doing so.

A renumbering of the streets is going on under the charge of the city surveyor, changing the numbers but not the locations of our book and stationery trade. W. Merk & Co. will be at 234 East Main street; E. Darrow & Co., 182 East Main street; W. J. Wilcox, 82 same street; Williamson & Higbie, 16 West Main street; Al-ling & Cory's new and splendid paper warehouse, 66 and 68 Exchange street; Clague, Wegman, Schlicht & Field have fitted up new quarters in Exchange street; Scranton, Wetmore & Co.'s new number will be 12 State street; that of Steele & Avery will be 46 and 48 State street; R. M. Meyers & Co., 67 State street; American

Tract Society, 93 James street; Jackson & Burleigh will be unchanged in number and remain in Reynold's arcade.

Our new government building will soon be commenced on the corner of Fitzhugh and Church streets.

E. Darrow & Co. have just published "Ontario County Directory" and "Monroe County Directory."

Scranton, Wetmore & Co. are publishing a history of Rochester, to be completed on the celebration of the city's fiftieth birthday in June, which is to be a gala time and extend over into the second day, and call a great crowd to our vigorous, though young city. Book and paper trade is good for the season, and our dealers are hopeful for the year. The river is high, but not dangerous, and still pours over the falls of the

GENESEE.

WASHINGTON WRINKLES.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., April 1, 1884.

The misanthropic stationer and the hypochondriac in the book business should brace up and look cheerful and talk pleasantly on matters of trade, for there is a good time coming and it is not far off, as the grave and noble seignors of the Senate have about finished their talk on the "Educational Bill"—a bill of much importance to the booksellers and stationers of the United States, as well as of vast concern to the people everywhere. They have been talking about it for the space of three weeks, and as the subject is nearly exhausted, it is about time that the dignified gentlemen should vote; but in the Senate, there being no such thing as "calling the previous question," the sages of the upper house may talk another three weeks before the bill is put upon its passage. I have no doubt but that the stationers, with great unanimity, would vote "aye" on its presentation, and I am sure that the people are anxious to welcome it as a public blessing when it shall have become a law; therefore the sedate Solons of the Senate will please take a hint should these lines fall under their eyes, and let the thing go right through at once.

As the bill will without doubt soon become a law and the country be benefited and the stationers sell more books and school supplies thereby, it may not be out of place here to give a little synopsis of the measure. It is a bill "to aid in the establishment and the temporary support of the common schools." It provides that for the ten years next after the passage of the act there shall be annually appropriated

from the money in the Treasury the following sums :

First year, \$15,000,000; second year, \$14,000,000; third year, \$13,000,000; and thereafter a sum diminished \$1,000,000 yearly from the sum last appropriated until ten annual appropriations have been made, when all appropriations under the act shall cease, and the several sums shall be expended to secure the benefits of common-school education to all the children of the United States. Under this wise provision, which takes in all, the booksellers everywhere will have a fair show at the funds when they are forthcoming in exchange for school appliances.

The second section tells what sort of instruction may be imparted, and here again the scope is wide; it includes the art of reading, writing and speaking the English language, arithmetic, geography and history of the United States and such other branches of useful knowledge as may be taught under local laws and may include, whenever practicable, instruction in the arts of industry. With this "pointer" wholesale and retail dealers may begin to arrange their prices in anticipation of a big demand for the thousand and one needs of the youngster taking his first dip from the fountain of knowledge.

The States and Territories having the greatest number of persons over ten years of age who cannot read or write will receive the greater portion of the money appropriated, as is provided in Section 3. Section 5 says the money shall be used in the several school districts in such a way as to provide for equal privileges to all the children throughout the State or Territory, thereby giving each child an opportunity for common-school education, and in this way aiding existing public schools and establishing new ones as may be deemed best. In the sixth section there is a provision that the money not exceeding one-tenth of the sum apportioned to each State or Territory may be applied yearly to the education of teachers for the common schools therein who are without means, and who shall agree, in writing, to qualify themselves and teach at least one year in the common schools of such State or Territory.

Section 9 says that the President shall appoint, with the consent of the Senate, a Commissioner of Common Schools in each State and Territory, who shall perform such duties as may be assigned to him by the Secretary of the Interior and be charged with all details of the work, in co-operation with the State authorities. His salary shall be not less than three thousand nor more than five thousand dollars, at the discretion of the Secretary of the Interior. The Secretary of the Interior is charged with the practical administration of this law through the Bureau of Education.

There has been much higgling on the part of some Senators as to the constitutionality of the measure, and some have been bold enough to say that they did not want the Federal Government to interfere with the education of the illiterate people in their respective States; that they preferred to trust the matter entirely to the State governments immediately concerned. This all-important matter has been trusted to State governments long enough, especially in the Southern States. Common schools were scarcely known in the South before the war, and at present they are not up to the standard which they should attain and which they would reach under this bill. The tourist traveling for pleasure, or the business man seeking information through the Southern States to-day, will find well-to-do, respectable white men and

women, forty and fifty years of age, who can scarcely read and write, who were beneficiaries of the common schools as they were before the civil war. The children of these same illiterate people are fairly well educated having profited by the improved condition of schools since the war, while their more unfortunate parents, tracing their lack of knowledge to the "old field-school" system, are scarcely able to distinguish the pages of a patent medicine almanack from the leaves of a well-bound volume of Shakespeare.

"Befo' de wah," as the darkey says, the child of the workingman in the South, the son of the mechanic or the daughter of the poor farmer was generously (?) provided with a school by the State or municipal government, where he or she might get a smattering of grammar, a small stock of geography and a very limited allowance of mathematics, and then the work was over so far as the government was concerned, and for the child there was no more knowledge unless he or she burned the midnight oil over borrowed books in the dingy workshop or by the old fireplace in the kitchen of the farmhouse. Now that the general government is about to do a grand thing, and in a magnificent manner provide for the welfare of the whole people by educating the masses, is it not surprising that some men will raise themselves on end and vigorously kick and howl in protest against the consummation of the plan?

These kickers always fall behind the old barrier of the "Constitution," that is dragged out every time there is brought forward a popular measure for the relief of the common people. They say, "This thing is a menace to the mighty Constitution which is the bulwark of all our liberties. You must not wound the sacred Constitution by even as much as hinting it or you will destroy the nation!" Bah! The education of the young of this country is a holier and a greater thing than the hoary old Constitution itself, and the man who loves the child of Thomas Jefferson's brain better than he does the millions of school-children of this Union, and cares more for protecting it than them, is an old fossil, who should be sent to a museum, and is not worth one-tenth the sum he is paid by the government for making its laws.

Mr. Lamar, the senior Senator from Mississippi, in a speech last Friday advocating the passage of this bill, said: "No one has the right to predict that this or any class of people will not rise to that plane of intelligence and moral elevation necessary to the enjoyment of this great blessing and therefore refuse to vote for a measure like this, which proposes to aid them in their effort to emerge from that condition which centuries of barbarism have entailed upon them. For my part I would leave no legitimate effort unused and no constitutional means unemployed which would give to every human being in this country that highest title to American citizenship of virtue, knowledge and judgment."

Mr. Lamar is from the bulldozing State of the Union, and he has seen the need of education every time he came up for election, no doubt; and as he was for a great many years a school teacher, he speaks manly words in favor of his old profession. He is right; what the people need are more pens, ink and paper; more books and school stationery, and there are thousands who are ready, willing and anxious to sell the same useful articles to the benighted districts throughout the length and breadth of the land. The people by a large majority are ignorant, and the surest road to power and happiness for a nation is right through the doorway of the stationer and the bookseller, and if some of the surplus money now being wasted in repairing

old rotten ships, erecting unsightly public buildings and in purchasing æsthetic furniture for the same was spent in buying books and school appliances with which to educate the children of the common people there would be less corruption in public life, and there would be less chance of such scenes as have made Cincinnati for the past few days the focal point for the astonished eyes of the whole country.

The weather having been all that could be desired for the past week, trade has been quite brisk, and the windows on the avenue make a very fine display of the latest novelties in fine stationery. I notice that the more prominent jewelers of this city are beginning to make a large display of stationery in their windows, to the neglect of the watches and diamond rings which one naturally expects to find there. I inquired concerning this, and a prosperous stationer told me that the large manufacturing houses, those who make fine writing paper, have, for some time past, been in the habit of making by contract for certain jewelers, a certain class of goods for which the jeweler pays a stipulated price, say sixty cents a box, with the understanding that he is not to sell the same to the buyer for less than one dollar a box. This is the way the jeweler gets his hands in the stationer's business, and sometimes it works well for both the manufacturer and the dealer in silver watches and fine stationery, as the jeweler can get his price; but sometimes there comes a stagnation in the retail trade and the goldsmith violates his contract by selling for seventy cents a box, and then the manufacturer, with a lot on his hands, comes around and says to his old friend, the jobber, "Here, take a lot of this for twenty-five cents a box." The stationer does so, and thus works his revenge on his neighbor, the jeweler. A prominent jewelry firm of Philadelphia furnishes a great deal of this style of stationery to the stationers of this city, and I have been told that it is made for the jewelry firm by a large and well-known manufacturing stationery house of New York. The trade in this class of goods is growing rapidly in this city and the various designs on the paper and envelopes show a high degree of skill in the selection of colors and the subjects treated. Dinner, luncheon, and tea parties, wedding invitations, and every phase of fashionable social life is represented in some appropriate way by an embossed picture in gorgeous colors, or by apt quotations, and often in an admirable manner by both.

I stopped in at the cosy establishment of Paret & Whittington this afternoon, and Mr. Paret told me that, considering the bad influence of the continued rainy weather, trade was fair and as brisk as could be expected at this time of the season. I referred to the fact that there seemed to be a demand for the more fancy stationery, such as is now being displayed in the show windows of the jewelers. He said that his experience was that such a demand was fleeting—evanescent, as it were—and had no staying qualities. He said that the cream of his trade in the stationery line was not to be found in a desire for gorgeously colored embossed cards and paper, but rather in the steady and renewed application for the best paper bearing the family crest or monogram. People buy their visiting cards fashioned after the same style. The house of Paret & Whittington, though one of the youngest firms in the city, is, it would be safe to say, one of the largest dealers in engraved visiting cards at the capital. It has a large case against the wall in the rear of the store containing plates engraved with the names of most of the prominent people of the city. Some

of its customers in this special line live beyond the seas. We have had the pleasure of seeing representatives of the trade this week from Geo. B. Hurd & Co., Brown & Sanson, and Powers Paper Company, who report their sales to be reasonably large considering the state of the weather. BEN.

TORONTO TOPICS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., April 1, 1884.

Spring is near. There is no doubt about that. There are certain indications which have never failed in the recollection of that most reliable individual—the oldest inhabitant. And these are as follows: The small boy is in the street with his marbles, and as you pass along you hear, "Knuckle down tight," "No shovin'," &c. The melodious organ-grinder is abroad cheering the souls of the people with his dulcet music. The sweet-singing sparrows are engrossed with domestic matters, and the robin trills his morning song. The ice is out of the harbor, and we have mud enough for all the swine in the continent to wallow in, but it is being scraped up and carted off. On Friday last a thrill of excitement was noticeable along the docks. A vessel, the first of the season, with white sails gleaming in the sun, bore her proud course toward the city. It was a fine sight. She plunged through the broken ice and bumped up against a dock. She was an old scow freighted with stone.

Now, let us get a little more into the practical than we have of late. We are partially thawed out and begin to feel the reviving influence of the ascending sap, and we think the body politic feels the same thing. At all events, what appeared to be dead bones begin to move about. Along the dock, at all events, there is activity. Ship's carpenters are busy, and caulkers, and together make up a nice concert; and the painter, he comes like the—the—silk tailor, to put in the finishing touch, and is hanging around in all directions daubing away.

James Grand & Co. have removed to their new premises on Colborn street, a few doors south from their old stand on Leader lane, and have now a very much more commodious place and one of the best stands in the city for their trade, which, I am pleased to add, is rapidly increasing.

The stock of the late firm of Willing & Williamson was bought in by Mr. Williamson. They have taken the premises lately occupied by the late N. Noe & Co., and are refitting it and will shortly move into them. I regret that the stand of the late firm will be converted to other uses. It was certainly one of the finest bookstores on this continent. Mr. Williamson has associated with him Mercer Adam, a well-known bookman, and for a long time editor of the *Canadian Monthly*. I wish the new firm all manner of success.

The Standard Publishing Company says that it is quite satisfied with trade up to the present. Some lines have been a little slow for awhile, while others have been considerably ahead of last year. Altogether it is contented.

A look into Hart & Co.'s resulted in a statement that the business was improving every day. Their Mr. Roy is now on the road and is meeting with gratifying success.

The Methodist Book and Publishing House says: Our factory is very busy. We have the following books in hand, not yet published: "The Macedonian Cry," an essay on missions, by Rev. J. Lathern; "The Heathen World," a

prize essay on missions, by Rev. Thos. Patterson; "The Gospel to the Poor," by Rev. B. F. Austin, M. A.; "The Atonement," by Rev. J. S. Evans; "Men Worth Knowing," by Rev. Dr. Withrow; "Barbara Heck," by Rev. Dr. Withrow. Dr. Withrow's "History of the Dominion of Canada," a large octavo volume, illustrated with steel engravings, maps, 100 wood engravings, was issued in December last and is being sold by subscription, and bids fair to have a very large sale. It is certainly a very attractive book, and is spoken very highly of by the reviews. This house is to be commended for its excellent presswork. C. H.

BOSTON BRIEFS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., BOSTON, April 1, 1884. }

Trade generally is not up to expectations. The stormy weather of the past month has seriously interrupted commercial movements, and somewhat retarded the spring trade. The volume of business for March, as compared with last year, is generally conceded to have fallen short of the record. With pleasanter days a little more activity will possibly be noted, and an increased trade during April is among the possibilities.

In some special lines, however, trade has been quite active, especially in inks and mucilage. Reports from William A. Davis, manufacturer of the United States Treasurer brands of mucilage and inks, are very flattering. He claims that the spring trade in these goods is better than ever known. His factory is being run to its fullest capacity to supply orders now on hand. Many of these orders were booked during his late trip through the West, from which he just returned last week. The reputation of Davis's preparations is such that they now sell on their own merits, and quite an amount of new trade is opening up for his inks and mucilage. While Mr. Davis was pushing trade out West, a telegram informed him that a trusted clerk at home was pushing things to his own individual account, and so Mr. Davis took the next train for Boston. The amount of wealth embezzled by his dishonest clerk is not yet fully known, but it will reach some hundreds of dollars. The defaulter has acknowledged his guilt, and is held for future developments.

C. H. Woodman & Co., who, in February last, purchased the printing and stationery interests of W. A. Davis, are meeting with no little success. Commercial stationery is their leading specialty, and in this line orders are fully up to their present facilities.

Samuel Hobbs & Co. report that the Hubbard pens, for which they are agents, are having a very fair sale. Manifold copying books is another specialty that the house is handling, and trade in this line of goods is continually increasing, both in a local way and in the jobbing trade.

The Davidson Rubber Company is manufacturing a number of rubber specialties for the stationery trade which are having a good demand. The rubber bands made by this company are guaranteed to be the very best bands in the market. All sizes are sold at one uniform price, and are neatly put up in cartons containing one pound, subdivided into eight 2-ounce boxes, which manner of packing is found to be a great convenience. Rubber sheets for copying-press use is another article for which there is an increasing sale. These rubber sheets will not

crack or become ragged, as does oiled paper or other material, while they are very durable, lasting two or three years. Rubber penholders, pencils and erasive rubber are among the numerous articles manufactured by the company. A novelty in pencils, styled "No. 25," is the most convenient pocket pencil introduced. It is made of band rubber, and its peculiar shape makes it very comfortable to hold in the fingers. It is provided with an erasive head, and so adjusted that the eraser can be entirely used up. When not in use the pencil shuts within itself, protecting both the eraser and the lead point. These pencils are having a very good sale.

Mr. Gilman, inventor of the "Challenge" letter-file, will soon place on the market a new letter-press. In design this press is entirely original, being unlike anything of the kind now in use and needing no stand. It is so constructed that its legitimate place is on the wall, to which the press is attached, taking up but very little room. Like the several counting-room specialties invented by Mr. Gilman, this letter-press will undoubtedly have a large demand.

John Carter & Co., extensive dealers in stationers' supplies, are enjoying a very fair trade for this season, though business has been somewhat interrupted by continued bad weather. This house is the sole Boston agent for the East Hartford linen paper and agent also for Crane's bond paper.

D. F. Knight, of Knight, Adams & Co., sailed for Europe March 21, in the steamer Oregon from New York. Mr. Knight's tour abroad is partly for pleasure and partly in the interests of business. This house is working up quite an extensive trade in imported Vienna and Berlin wares. In brass, leather and glass novelties, plush goods and photograph albums this house is preparing for a large fall business, having already placed several orders. In common with other dealers this firm is experiencing a little dullness in trade, owing to the weather and other incidental causes.

"Picturesque Washington" is the title of a work now in press, which will soon appear from the publishing house of J. A. and R. A. Reid, Providence. The work will give interesting sketches of Washington, its scenery, history, traditions, public and social life, with graphic description of the Capitol and Congress, the White House and the government departments, together with a map of the city, and diagrams of the halls of Congress. The work is edited by Joseph West Moore, and illustrated with a hundred engravings of the finest character by leading American artists. The book will be a perfect sample of the printer's art, and elegantly bound. Canvassers throughout the country report thousands of sales.

The fifteenth triennial exhibition of the Massachusetts Charitable Mechanics' Association will open in this city in the early part of September next and continuing some sixty days. The policy of this association has always been to recognize merit, and such articles exhibited as are demonstrated to possess originality of design or show inventive genius of commercial value are awarded prizes of diplomas and medals. The exhibition of this association, known to the people as the "Old Mechanics' Fairs," are always largely attended, and exhibitors find these exhibitions the best possible medium for advertising novelties, inventions, &c. The many hundreds of specialties which reach the people through the stationers' hands should not miss so valuable an opportunity for introduction to popular notice. A. L. D.

MECHANICAL PROGRESS IN LITHOGRAPHY.

The principle upon which the art of lithography is based is very simple—the antagonistic qualities of grease and water. An unctuous composition is made to adhere to a peculiar kind of limestone. The parts thus covered acquire the power of receiving printing ink. The other parts are prevented from receiving it by the interposition of a film of water, and then by pressing the paper strongly upon the stone impressions are obtained. There are two distinct branches in lithography—drawing and printing. Those practising the first are known as lithographic draughtsmen or writers, the second as lithographic printers.

The art of lithography was discovered by Alois Senefelder, a native of Prague. His father, Peter Senefelder, was one of the performers of the Theatre Royal at Munich. The son Alois wished to follow the same profession, but his father being opposed to this, he went to the University of Ingolstadt, and devoted himself to the study of jurisprudence. Owing to the death of his father shortly afterward, he was unable to continue his studies at the university, and yielding to his own inclination, he tried to support himself as a performer and author, but without success. In order to accelerate the publication of one of his works, he frequently spent whole days in the printing office, and thus became acquainted with all the particulars of the process of printing. It appeared so simple that he conceived the idea of purchasing a small printing press, thus enabling himself to print and publish his own compositions, but his means were inadequate, and to this circumstance we probably owe the invention of lithography. Unable to pay for the engraving of his compositions, he attempted to engrave them himself. He tried numerous experiments with little success; tools and skill were alike wanting. Copper plates were expensive, and the want of a sufficient number entailed the tedious process of grinding and polishing afresh those he had used. About this period his attention was accidentally directed to the fine piece of Kellheim stone, which he had purchased for the purpose of grinding his ink. His first idea was to use it merely for practice in his exercises in writing backward, the ease with which the stone could be ground and polished afresh being his chief inducement. The idea of being able to take impressions from the stone had not yet occurred to him. While he was engaged one day in polishing a stone slab on which to continue his exercises, his mother entered the room and desired him to write her bill for the washerwoman, who was waiting for the linen. Neither paper nor ink being at hand, the bill was written on the stone he had just polished. The ink used was composed of wax, soap and lampblack. Some time afterward, when about to wipe the writing from the stone, the idea suddenly struck him to bite the stone with aqua fortis. If the parts written on resisted its action, impressions might be taken the same as from wood engravings. Surrounding the stone with a border of wax he covered it with a mixture of one part of aqua fortis and ten parts of water. The result of the experiment was that, at the end of ten minutes he found the writing elevated about 1-120 of an inch. He then proceeded to apply the printing ink to the stone, using first common printer's balls, but soon found that a thin piece of board covered with a fine cloth answered better, communicating the ink more freely. For years Senefelder continued his experiments, and lived to see his art brought to a comparatively high state of perfection.

During the past fifteen years the art of lithography has advanced with wonderful strides in all of the various processes of chromo-lithography, color printing and photo-lithographic printing by the aid of the camera. But it is more particularly the purpose of this article to speak of the mechanical progress of the art—that is, the progress in lithographic printing presses. Up to about fifteen or eighteen years ago lithographic impressions were obtained by the use of the hand press, which originally was a very simple machine, and exceedingly slow and tedious in operation. The lithographic hand-press consisted of a frame provided with rollers, on which the carriage ran to and fro. The scraper consisted of a flat piece of boxwood, beveled from both sides to about a quarter-inch edge, and firmly clamped in a sliding iron piece above. The height of the scraper above the carriage could be adjusted by the screw to suit the varying thickness of the stones. The manner of printing with this press was as follows: The stone with the design upon it was placed face up upon the carriage. It was damped and inked, and the sheet of paper used to print upon it was laid thereon. A tympan of leather stretched in an iron frame was then lowered upon it, and the carriage pushed under the scraper. By depressing the lever the toggles at each end of the shaft raised the bearings of the winch, upon the axle of which a strong iron roller was made fast. This roller or cylinder was the full width of the press, and the depression of the lever brought it into contact with the under side of the carriage, lifting the latter at the same time off from the rollers and pressing the forward end of the stone against the edge of the scraper. By revolving the winch-handle the stone was slowly dragged under this stationary ledge, which applied its pressure progressively through the leather of the tympan to a narrow strip of the work, the result being equivalent to a very much greater crushing force applied over a larger surface. When the whole of the design had passed under the scraper, the lever at the side was restored to its upright position; the carriage falling upon the rollers, it was brought back by hand, the tympan lifted and the printed sheet removed. This, with unimportant modifications, has been the form of the lithographic hand-press in use in this country and England.

In Germany, Belgium and France presses of this construction were rarely seen. In Prussia, for instance, a press was used occupying nearly double the space, but admirably constructed and well adapted for the execution of first-class work. In this machine the scraper and its holder swung from the side across the carriage, the holder or head was then locked and the pressure applied by a compound lever with the foot. The carriage was then drawn through by a broad girth or belt, one end of which was made fast to it and the other wound about an axle of small diameter at the extreme end of the frame, rotated by a star similar to that of a copper-plate press. The result was an extremely steady and uniform motion, but the loss of time, as compared with the English press, was considerable.

"The first steam lithographic printing press used in this country," said a well-known lithographer to a reporter of THE STATIONER, "was brought here from Germany. The first American press was called the Ackerman press. The main features of lithographic printing presses have not been improved upon. Only a few minor parts have been added since the introduction of these presses, and these vary with the machines of the different manufacturers. The

presses of to-day do quicker and better work, it is true, but I do not think that it is due so much to improvement in form as in construction, the material they are made from, the greater skill which printers have attained in handling them and the improvement in quality, finish, &c., of paper, inks, &c., making them better adapted for lithographic printing."

Although the art of lithography or printing from stone has been practised for years, it is only until recently that the lithographic power-press has been brought to such a state of perfection as to enable the desired ends of both excellence and rapidity of work to be attained in its use. To such an extent has this process been improved by the adaptation of machinery, that the comparison must be made as between printing, only a few years ago, from small stones at the rate of a few hundred impressions per day, with the present practice of printing on stones of the size of the largest letter-press forms, and at a speed of 1,000 impressions per hour. A technical description of the most improved form of lithographic printing-press would take up more space than THE STATIONER can spare. The essential motions of the improved press are arbitrary and positive in their character, the close and rigid connections providing for their exact relative occurrence. The crank motion accomplishes the stopping and starting easily and without jar, and with the utmost precision, while the strong construction and general character of stability prevent vibration and render the operation of the press at the highest rates of speed comparatively noiseless. The mechanical details are well worked out, the needed strength being attained with pleasing forms and arrangement. The construction is simple in character and the disposition of parts, including the stone, such that they are readily accessible for adjustment and inspection.

DIRECT PHOTO-PRINTING PROCESS.

At a recent meeting of the Photographic Society of France the chairman informed the members that a letter had been received from MM. Ch. Cross and Verger, concerning a photographic process which these gentlemen had presented at the last meeting of the Academy of Sciences. The inventors of this process obtained direct positives by the following means: Paper properly starched is floated on a bath composed of—water, 100 parts; bichromate of ammonia, 2 parts; glucose, 15 parts.

When dry it is exposed to light under an image forming a positive. As soon as those parts of the paper unprotected by the *cliche* have changed their color from a yellow hue to a grayish tint, the exposure is deemed to be sufficient. The paper is then floated upon the following solution: Distilled water, 100 parts; nitrate of silver, 1 part; acetic acid, 10 parts.

The image will appear immediately of a blood-red color, being composed of silver chromate, which, being insoluble in water, permits the paper to be well washed in order to eliminate all the bichromate unacted upon by light.

On every part of the paper upon which the chemical influence of light has acted, the bichromate has become reduced, accelerated by the presence of the glucose, therefore, every part or shade of the *cliche* will be faithfully represented. If the paper be dried before a fire and in the dark, the image will be of a blood-red color; if dried in the open air the light will change the color to a dark-brown tint; if exposed to the emanations of hydro-sulphuric acid, or plunged into a solution of sulphide of copper and potash, the image will turn to a brownish-black hue.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.

Second.—Larger, better spaced, and more readable type in all cheap and medium grades.

Third.—Latest and most attractive variety of side stamps.

Fourth.—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

E. P. DONNELL & CO., Chicago, Ill..

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

LAY-BOY.

The illustration gives the details of an improvement in lay-boys, which is primarily intended for application to a paper-ruling machine, and it will be described in this connection. It may be applied to printing presses and in other situations where a sheet of paper is carried forward in front of its supporting device.

Figure 1 illustrates the invention in side view. Fig. 2 is a transverse section at 2 2, Fig. 1, one of the lower dropper-rolls being shown in section. Fig. 3 is a section at 3 3, Fig. 2. Fig. 4 is a detail end view of the rollers by which the paper is carried and their drive pulleys. Fig. 5 is an enlarged detail perspective of the adjustable bearing of the stretching-roll of the endless apron by which the ruled paper is presented to the dropper-rolls. Fig. 6 represents a transverse section of the paper sheet.

A represents the frame of a paper-ruling machine; B, brackets, and C vertically-adjustable standards secured in the brackets by a dovetail groove and a set screw, D, passing through a slot, c, in the standard and screwing into the bracket.

E is a bearing-box at the head of the standard, receiving the journal or gudgeon of the apron-carrying roller, F.

G is the endless apron by which the ruled paper is carried from the ruling-pens to the dropper-rolls. The endless apron passes over a roller,

H, in near proximity to the lower dropper-rolls, M, and upper dropper-rolls, N, and in such relative position thereto that the advancing edge of the paper is taken between the dropper-rolls and it is drawn forward thereby. Upon the roller H (or the shaft of the same) is a pulley, I, carrying a belt, J, which also passes over a pulley, K, upon the carrying-shaft L of the lower dropper-rolls, M. The relative sizes of the pulleys I and K are such that the shaft L has faster rotation than the roller H, so that the paper sheet is drawn forward on the endless apron at a greater speed than the apron travels to prevent one sheet interfering with another that is following it. The peripheries of the dropper-rolls M are of concave conical form and flush with the carrying-shaft on their inner sides, so that the paper O, when lying upon them and pressed down by the rollers N, which have convex outer faces, will be curved up at the edges o without creasing, and will thus be made to assume the form of a shallow trough, with the sides gradually curved upward without being bent, having suffi-

cient rigidity to prevent its bending downward, so that it is self-supporting throughout its length, and is supported clear of the receiving-box T until the last edge escapes from the dropping-rolls, when it falls down upon the table (or the other sheets thereon). The lower rolls, M, taper off on their inner sides, forming annular knife-edges in close contact with the shaft, as shown in Fig. 2, so that the surfaces of the shaft and roller shade into each other, and the shaft really forms a continuation of the rolls in all their positions, and both sets of rolls M and N

sure their proper engagement. The inclination may be increased by raising the roller F.

THE ADJUSTABLE TABLET.

This is an invention for securing bill heads, letter and note heads, statements, receipts, blank forms, shipping and tally sheets, way bills and bills of lading, order blanks for commercial men, and, in short, everything that requires an even and firm surface to write upon. The device consists of a rubber cushion, with an

adjustable binder, which adjusts itself to the number of sheets required, the friction of the rubber holding the paper firmly in place, only yielding when removing the sheets. It is made capable of retaining about twenty-five sheets of ordinary paper, but can be made to hold and retain any amount required. It is especially adapted for ladies who wish to write on their lap, or on a table or stand, as the sheets rest firmly on a hard surface covered with a blotter. The sizes made are the legal, letter, in cloth; note, in cloth; bill-heads, 4 or 6 to cap, and statement. This tablet is made by the Adjustable Cover Company, 46 West Broadway, New York.

NEW PATENTS.

No. 294,961. Signature-Presenting Mechanism for Book-Sewing Machines.—Edward S. Boynton, Bridgeport, Conn.

A signature-holder composed of a series of chain-jointed end pieces and connected plates carried thereby. In a signature-holder, two parallel plates of different widths connected at their ends with end pieces, to thereby leave between the plates a suitable opening for the passage of the devices which are to remove the signatures from the plates.

No. 295,023. Domino.—Jesse L. Law, Mount Vernon, N. Y.

No. 295,057. Stop-Cylinder Printing-Machine.—Walter Scott, Plainfield, N. J.

No. 295,076. Compasses.—Fritz Samuel Svenson, Lund, Skane, Sweden. Patented in Sweden, July 3, 1883, No. 237.

1. In compasses for use in blackboard or similar drawing, the combination of a sharp metallic point at the end of one of the legs, and a rubber block slipped over the point, the latter penetrating the block, covering the entire point or needle, excepting the extreme point. 2. The combination of the ruler having the crayon-holding block at one end, a slotted block sliding adjustably upon the ruler, and having a needle at its lower end, and a rubber block slipped upon the needle, the latter penetrating the block and covering the entire needle, excepting the point, as for the purpose shown and set forth.

No. 295,083. Toy.—Anton Trunk, Bridgeport, Conn.

No. 295,137. Writing-Tablet.—Rudolf C. Whittmann

IMPROVED LAY-BOY.

are adjustable upon their shafts L and P, so that they can be moved sidewise to suit paper of various widths—from the narrowest to the widest—and a continuous support from side to side for any width. The faces of the upper dropper-rolls being convex, as shown, impart a curved edge to the paper without creasing it.

m and n are set-screws by which the rollers M and N are held in position upon their shafts when in use.

The roller H and shafts L and P have journal-bearing on bracket arms R and S, respectively.

The operation is as follows: The sheets of paper are brought forward upon the endless apron and their front edges are seized by the dropper-rolls, which curve up the edges and stiffen the sheet, and it is held clear of the box until it leaves the rolls, when it drops down. The downward slope or inclination of the endless apron from the roller F to the roller H is such as to insure the feeding of the sheets of paper to the dropper-rolls with sufficient force to in-

New York, N. Y., assignor to himself and Charles Nelson, same place.

An artificial slate or writing tablet, composed of two layers of cement—such as magnesia cement—and an intermediate layer of wood, pasteboard or equivalent material.

No. 295,138. Toy.—J. Warren Worcester, New York, N. Y., assignor of one-half to Alfred W. Storm and Edwin R. Storm, both of same place.

No. 295,141. Protector for Book Leaves.—John Akins, Buffalo, N. Y., assignor to Orville A. Crandall, same place.

No. 295,152. Instrument for Calculating Interest, &c.—Uriah Curtis, Concord, Minn.

The combination of a table of figures computed to denote the progressive amounts of interest or taxation at a given rate, arranged in columns, which are divided into blocks by suitable means of indication, a key-scale divided, numbered and arranged to correspond with the table, and a sliding gage graduated with prominent figures in the order of the digits, and with intermediate figures, and provided with a decimal index wire.

No. 295,182. Christmas Tree Candle-Holder.—Frederik Lechler, Cleveland, Ohio.

No. 295,220. Manufacture of Fly Paper.—Edward F. Baker, Chicago, Ill., assignor to Margaret M. Baker, same place.

No. 295,222. Toilet Case.—Hart O. Berg, New York, N. Y.

A toilet case provided on its interior with frames attached to one side of the body and cover, and covered with satin or any other suitable material, and removable panels inserted between the frames and the bottom of the body and cover of the case, having on their surfaces the requisite projections for holding and securing toilet articles.

No. 295,226. Book-Carrier.—Peter Napoleon Breton, Montreal, Quebec, Canada. Patented in Canada, September 10, 1883, No. 17,601.

No. 295,266. Blank-Book.—Joseph P. McCandless, New York, N. Y.

No. 295,275. Stand or Frame for Suspension of Swings or Hammocks.—Wm. A. C. Oaks, Antrim, N. H., assignor to the Goodell Company, same place.

No. 295,296. Pencil Sharpener.—Albert M. Smith, Brooklyn, N. Y.

No. 295,310. Clasp.—Sidney D. Tucker, Troy, N. Y.

The combination, in a clasp, of a studded plate, and spring-arms provided with suitable means for spreading and closing said arms.

No. 295,359. Perfumery-Charged Cane and other Handles.—Ezra R. Cowles, Henry A. Cowles and Martin Osborn, Westfield, Mass.

A knob or handle of a cane or other analogous article, made hollow, and having its shell perforated, and having within it a receptacle for perfumery and a perfume-absorbing material, said receptacle having a stopper capable of permitting more or less of the contents of the receptacle to escape through it.

No. 295,370. Clamp for Ruling-Pens.—John William Dirhold, St. Louis, Mo.

No. 295,388. Card for Playing Loto and other Games.—Henry Heller Harrison, New York, N. Y.

No. 295,391. Letter or Paper File.—William R. Havens, Denver, Col.

No. 295,395. Metallic Pen.—Hezekiah Hewett, Birmingham, County of Warwick, England. Patented in England January 26, 1883, No. 429; in France, February 23, 1883, No. 141,592; in Germany, February 24, 1883, No. 16,788; and in Belgium, February 24, 1883, No. 4,128.

A pen having the extreme points of its nibs

bent backward from its concave side into a semicircular or hollow form, to provide a flexible curved writing surface on its under side, and a minute reservoir on the opposite side, and having a main ink reservoir and a channel in the back of its nibs, connecting the two reservoirs.

No. 295,416. Copy-Holder.—William F. Miller, New York, N. Y., assignor to the American Writing Machine Company, of New York.

No. 295,429. Indian Club.—Robert Reach, Philadelphia, Pa.

No. 295,435. Doll.—Stephan Max Ferdinand Schilling, Sonneberg, Saxe-Meiningen, Germany.

The combination of a doll-body having a fixed transverse tube at the shoulder portion, with articulated arms, elastic cords secured to the arms, and means for connecting the cords within the tube. 2. The combination of a doll-body having a fixed transverse tube at the shoulder portion, perforated upper arm-sections, jointed fore-arms having fixed transverse pins,

or pivoted at its lower end upon a shaft having a spring-tension toward the left, and a means for regulating the tension. 2. A driving-power for the paper-carriage of a type-writer, consisting of an arm or lever hinged or pivoted at its lower end and having a tension toward the left, the upper end being connected with the paper-carriage and adapted to vibrate with it.

No. 295,473. Toy Electric Railway.—Murray Bacon, Philadelphia, Pa., assignor to the Novelty Electric Company, same place.

No. 295,475. Type-Writing Machine.—Walter J. Barron, New York, N. Y., assignor, by mesne assignments, to the American Writing Machine Company, of New York.

1. In a type-writing machine, the combination of two series of ratchet-teeth, which are adapted to move alternately in one direction, each independently of the other, for a letter-space distance at a time, with the driving mechanism and carriage, and with only one letter-space ratchet, which is adapted to work alternately in both series of ratchet-teeth,

first in one and then in the other.

2. In a type-writing machine, the combination of two ratchet-wheels, which are adapted to turn alternately in one direction, each independently of the other, for a letter-space distance at a time, with the driving mechanism and carriage, and with only one letter-space ratchet, which is adapted to work alternately in both ratchet-wheels, first in one and then in the other.

3. In a type-writing machine, the combination of two ratchet-wheels, which are adapted to turn alternately in one direction, each independently of the other, for a letter-space distance at a time, the first of which is attached to the driving mechanism and the second to the first, with a spring on the first ratchet

wheel, which is adapted to press against and turn the second one, with an arm or shoulder on the second ratchet-wheel, which is adapted to strike and stop against the first one, and with only one letter-space ratchet, which is adapted to work alternately in both ratchet-wheels, first in one and then in the other.

A NEW MUCILAGE STAND.

The Sanford Manufacturing Company, of Chicago, is about to put on the market a new style of mucilage stand, which will meet a long-felt want, in giving the consumers a stand embracing all the advantages possible to have in one article.

It consists of a wide-mouth bottle, in which, by a screw on the neck, is inserted a metal tube passing nearly to the bottom of the vessel, forming a tight joint at the neck. By this combination the mucilage is confined in an air-tight reservoir, supplying only enough at the bottom of the well made by the tube, to keep the brush moistened sufficiently for use. It entirely prevents evaporation from the main supply of mucilage, and the little that is exposed to the air at the bottom of the well must be the first taken up on the brush, thus always keeping it fresh. As the mucilage is used a new supply is admitted by allowing a little air to pass under the tube, the atmospheric pressure always keeping the mucilage at the same depth in the well. It is supplied with a bar across the tube, on which to wipe the brush when only a little mucilage is required. The company is just advised that its application for a patent has been allowed.

NEW MUCILAGE STAND.

and elastic cords that are attached to the pins, passed through the upper arm-sections, and connected in the transverse tube. 3. The combination of a doll-body, a fixed transverse tube having concave end seats or sockets, upper perforated arm-sections having ball-shaped terminals, jointed forearms having recesses and fixed transverse pins, and elastic cords attached to said pins, said cords being passed through the upper arm-sections, and connected by a double wire hook within the transverse tube.

No. 295,450. Envelope or Folding Card.—Charles Sneider, New York, N. Y., assignor to Philipp Hake, Hoboken, N. J.

An envelope or folding card provided with folding flaps having struck-up hooks near their edges, in combination with a lacing adapted to be secured around said hooks, to hold the parts of the envelope together.

No. 295,457. Shoo-Fly Rocker.—George P. Steinbach, Baltimore, Md., assignor to himself, trustee for Albert Steinbach, same place.

The combination, with a shoo-fly rocker having the ordinary seat, back and rockers, of two pairs of wheels, each pair mounted on a bar a little longer than the distance between the horses, and links pivoted to the inner side of the rockers, and on the bars which carry the wheels at points slightly outside the plane of the inner side of the rockers, one pair of wheels being mounted near the front end and one pair near the rear end of the rockers.

No. 295,469. Type-Writer.—George W. N. Yost, New York, N. Y., assignor to the American Writing Machine Company, of New York.

1. In a type-writer, a lever connected at its upper end with the paper carriage, and hinged

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

F. C. Thompson, printer, New York city, has sold out.

F. M. Spooner & Father, publishers, Brookville, N. Y., have sold out.

Shaw & Swartz, booksellers, &c., Providence, R. I., have made an assignment.

Lowe & Co., manufacturers of paper bags, and printers, New York city, have been damaged by fire.

Ashmead Brothers, stationers, &c., Jacksonville, Fla., have lost \$8,000 by fire. Insured for \$3,000.

John C. Smith, late president of the *Maritime Register* Publishing Company, Limited, New York city, is dead.

A dissolution has taken place in the firm of Travis & Reeves, stationers, &c., Ovid, Mich. Reeves & Allen succeed to the business.

A company called the *Mercantile Gazette* Company, has been incorporated at St. Louis, Mo., with a capital stock of \$2,000.

Chambers, Watson & Shryock, have succeeded the firm of Chambers, Cochran & Shryock, publishers of the *Review*, Pittsburg, Pa.

George W. Danielson, of the firm of Knowles, Anthony & Danielson, publishers of the *Providence Journal*, Providence, R. I., is dead.

Peter A. Jordan, of the firm of Mackellar, Smiths & Jordan, proprietors of the Johnson Type Foundry, Philadelphia, Pa., is dead.

Rubincain & Hendel, printers and publishers of the *Philadelphia Trade Journal*, Philadelphia, Pa., have dissolved partnership. Albert Rubincain settles up the business.

The Wilson Brothers Toy & Willow Ware Company reports a considerable demand for baby carriages, which come in all of the popular styles and at all prices. This firm is agents for "Enchantment," the new game brought out by Milton, Bradley & Co., which is destined to have a large sale.

Carter, Dinsmore & Co., on May 1, will remove their New York office from 36 Dey street to 62 Cliff street, near Beekman. The new factory of the firm at Nos. 162 and 172 Columbus street, Boston, has been completed and occupied and the firm is now prepared to supply the trade with its popular brand of inks at the shortest notice, and in quantities to suit the largest demands.

There are so many birthday, Easter and other cards on the market that it is difficult to see how any firm in this line of productions can claim to having brought out anything new, so varied and unlimited are the designs of these goods; yet there are firms who not only claim this achievement but are prepared to prove it. One of these firms is Marcus Ward & Co., whose line of plain and fringed cards is decidedly new and fresh in design and of so varied a character as to suit all tastes. The firm has cards of all sizes and prices, but even the cheaper grades are very attractive. They are printed on the best stock, and the coloring and general execution are done in the finest style of chromo-lithography. No. 9228 is a cheap but very pretty card in two floral designs, the most striking of which is a bunch of red and white roses on a rich background of leaves and grasses. The coloring is very effective and cannot fail to please every one. No. 9239 is a card with a dark yellow background and blue bordering and a centre of flowering vines, the coloring of which is very natural. No. 2258 shows three designs of lilies, and No. 4202 is another very pretty floral design. These cards have appropriate inscriptions and mottoes suitable for Easter. The firm is now offering scriptural text books in a new form. The little books known as "Bible Heartsease," "Bible Forget-Me-Nots" and "Golden Grains," are put up in a beautiful cloth cover-case handsomely decorated and inscribed in gold and colors.

The "Rose" shade of F. H. Loss, Jr., is a novelty that must be seen to be appreciated. The shade is made of tissue paper in various tints, red, pink, yellow, green and purple. It comes in the shape of a full-blown rose, with a dark yellow centre and crimped leaves in exact imitation of the natural flower. It is made to slip over any gas or lamp globe by means of a bit of wire, which is secured to the back of the shade and by means of which the shade is fastened to the burner, thus acting as a shield for the eyes and diffusing through the room a light corresponding to its beautiful color. The shade is neatly packed in a paper box and being light the cost of sending it through the mails is very trifling. It retails for fifty cents. In addition to the "Rose" shade Mr. Loss constantly keeps on hand a full line of Swiss carvings and other novelties of a salable character.

C. F. A. Hinrichs has a very complete line of out-door games, including lawn tennis, archery, croquet, base balls, foot balls, &c. He has also all the standard parlor games. His line of toys and household ornaments, such as bisque figures, stationery, &c., is also very large, and dealers wishing to order goods in this line would do well to send for his catalogues and price-lists.

Adam Mohart, dealer in toys, &c., Elizabeth, N. J., has sold out.

H. W. Johnson, publisher, Apalachicola, Fla., is advertising to sell out.

R. A. O'Gorman, dealer in picture frames, Hartford, Conn., have assigned.

Nounnan & McCusker, stationers and printers, San Francisco, Cal., have been attached.

Wise & Van Horn, printers, Philadelphia, Pa., have failed and have been sold out by the sheriff.

Beach, Barnard & Co., printers, Chicago, Ill., have lost a member of their firm in the death of S. S. Beach.

Charles Cotton & Brothers, stationers, &c., Phoenix, Ariz., have dissolved partnership. Charles Cotton having retired from the business.

Wilcox & Parker, publishers of the *People's Gazette*, Norwich, Conn., have dissolved partnership. George L. Parker retires from the business.

The *Michigan Tradesman* has been enlarged from four to eight pages. This journal is devoted to the mercantile and manufacturing interests of the State of Michigan. Its increasing prosperity is an indication of the ability with which it is conducted.

The New York Silicate Book Slate Company has reduced its prices on book and leaf slates 25 per cent. This reduction is warranted by the large increase in the business of the company. The Boards of Education of New York and Philadelphia are using the book and leaf slates in large quantities. For the past fourteen years these articles have given satisfaction to teachers and pupils in many thousands of schools throughout the country.

I. H. Hamburger's advertising novelties and art souvenir establishment at 332 Broadway, New York, was damaged by fire on Monday evening. The business occupies the four upper floors of the five-story iron front building at that number. The top floor was the stock room and was piled full of the brilliant hued and pictured paper saws, paper whisp brooms, paper bouquets, and other paper devices, some of which are already in nine-tenths of all the households in the land, and some of which are yet to excite the admiration and stimulate the extravagance of the spring shopper. A good many tons of the stuff in neat piles afforded material in which the fire, which seems to have caught from the stove, smouldered and smoked for two hours last evening. When the roof had been opened to let out the smoke and thousands of gallons of water had drowned out most of the fire, the piled-up stuff had all to be overhauled to get at smouldering and heated parts of the heaps. The result was a peculiar ruin. The floor was strewn three feet deep with the wreck of the pictures, some blackened and some wet, but still furnishing a bewildering variety of form and color. Many were showered into the

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c., Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

W. H. HASBROUCK, 91 Liberty Street, New York.

street. Mr. Hamburger estimates his loss at \$15,000. He has an insurance of \$57,000.

Thomas Connell, paper stock dealer, Providence, R. I., has been attached for \$800.

The Topeka Daily Capital Publishing Company, Topeka, Kan., has been sold to J. K. Hudson.

The American Trade Printing and Publishing Company, St. Louis, Mo., has been incorporated with a capital stock of \$15,000.

The price-list and special discounts for "Spencerian" inks were changed by Ivison, Blake-man, Taylor & Co. on February 1.

J. W. Stowell & Co., toy chair manufacturers, Putney, Vt., have dissolved partnership. J. W. Stowell continues the business.

Timothy O'Connell, stationer, &c., Moncton, N. B., is reported to have left that town. His business at Amherst, N. S., is closed.

William Butler & Co., paper manufacturers, Philadelphia, Pa., are offering to compromise with their creditors at fifty cents on the dollar, in unsecured notes, at twelve, fifteen and eighteen months.

The bondholders of the Exeter Wood Pulp Company, having an office in Boston, have taken possession, and the concern will be wound up. It is thought that the property will about pay the bonds.

The schedules in the assignment for the benefit of creditors by Seymour Lyman and Julian W. Curtiss, of Lyman & Curtiss, 23 Murray street, wholesale toy merchants, to Geo. P. Sheldon, which were filed yesterday in the Court of Common Pleas, show: liabilities, \$172,385.01; nominal assets, \$148,393.37, and actual assets, \$95,634.13.

The paper and card cutting machines manufactured by Edward L. Miller, Philadelphia, are ranked among the best. They are said to be well built, powerful and rapid cutters, fitted perfectly in all of their parts, and of ample strength to bear any strain that can be placed upon them. They cut cardboard and paper perfectly true and smooth. The full cut is made by one stroke of the lever; any length of paper can be handled in front of the knife. Various improvements have been made during the two years of their manufacture, which have added greatly to their convenience, speed and durability.

The Globe Manufacturing Company, 44 Beekman street, New York, is making several styles of paper cutters, in different sizes, to which it invites the attention of buyers. The "Peerless" side lever cutter is said to be the easiest and quickest hand-working cutter in the market. This company also manufactures the end-lever "Jewel" cutter and the "Peerless" job printing press, which has obtained a high reputation.

A meeting of the stockholders of the National Blank Book Company, 66 and 68 Duane street, New York city, and Holyoke, Mass., took place yesterday, and H. S. Dewey was appointed agent and general manager. Under this arrangement Charles H. Lamport retires.

The copartnership heretofore existing under the firm name of E. H. Bender, bookseller and stationer, Albany, N. Y., has been dissolved, and a new copartnership has been formed by H. H. Bender and E. H. Bender, under the firm name of H. H. Bender.

The style of the Gilbert & Mallory Publishing Company, Louisville, Ky., has been changed to Bradley & Gilbert Company.

T. J. Brown, paper hanger, New Orleans, La., is dead.

J. P. Currie, stationer, &c., Omaha, Neb., has sold out.

James W. Gollidge, printer, Hillsboro, Tex., has been burned out. Insured.

Glenwood J. Brann, picture frame manufacturer, Boston, Mass., has failed.

Edward Kean, newsdealer, &c., Greenfield, Mass., has sold out to Edward O'Hara.

The Champion Card and Paper Company, Pepperell, Mass., has a paid in capital of \$47,300.

McKay & Osborne, printers, Penetanguishene, Ont., have dissolved partnership. D. R. McKay continues the business.

J. S. Cushing & Co., printers, Boston, Mass., have dissolved partnership. J. S. Cushing continues the business under the same style.

The reversible sample envelope, made by the Cincinnati Paper Novelty Company, for which C. M. Ward, 28 Bond street, New York, is agent, is one of the best mediums for inclosing samples in the market. It can be had in a variety of sizes, and will be supplied in sizes to order. Each envelope will answer for a single sample or for a package over an inch thick.

The weather of the past few days has stimulated the trade in spring goods very much. The small boy has fairly made a corner on baseballs, as the demand has grown so great that manufacturers are unable to supply the goods as fast as wanted. The Wilson Brothers Toy and Willoware Company, in anticipation of this run, has supplied itself with the finest and largest line of baseballs and bats to be had, and the trade would do well to inspect its goods, which

are from the best and most reliable manufacturers.

A. & K. Flynn, paper manufacturers, Whippany, N. J., have been attached.

W. R. Leflet, publisher of the *Railroader*, Toledo, Ohio., has sold out to J. H. McElroy.

Nounnan & McCusker, stationers and printers, San Francisco, Cal., have been attached.

S. J. Talbot & Co., manufacturers of fancy boxes, Milford, N. H., have sold out to the D. L. Wilcox Manufacturing Company.

W. C. Nevin & Brothers, dealers in show-cases, Denver, Col., have dissolved partnership. W. C. and A. L. Nevin continue the business under the style of W. C. Nevin & Brother.

Edward Posen & Co. are offering to the trade the finest line of fancy leather albums probably ever on exhibition in this city. These goods are made up in the most elegant style and their quality is A 1.

T. M. Simpson, Philadelphia, is sending sample sets of chromo cards, embracing some 150 numbers, also sample sheet of bevel-edge cards, containing about forty different styles, the charge for which will be deducted on an order amounting to \$15.

George Uibel has pleased lovers of novelty very much in the production of his sea-bean and alligator-teeth jewelry. A sea-bean is a novelty in itself, especially to Northerners, being a production of the coast of Florida. It is susceptible of a high polish and when set with a compass or inscribed with an initial letter, symbol or figure, with gold mounting, it makes a very handsome watch-charm. It is made up not only in charms but ladies' breast-pins, ear-rings, and as articles of curio. Mr. Uibel also makes very fine scarf, veil-pins, bangles, ear-drops, &c., from alligator-teeth, which are susceptible of a fine polish.

Eberhard Faber has brought out two new styles of combination pens and pencils. They are designated as Nos. 13 and 14. The holder is an enameled paper tube, one end of which has a pen and the other a pencil. No. 14, in addition to pen and pencil combinations, has a rubber attachment, and comes with a No. 35 reversible pen-holder. Both numbers are in assorted colors—red, black and blue. One great advantage of this combination pen and pencil is that the pen and pencil attachments screw instead of slide into the tube holder, thus making them perfectly firm, whereas by a simple sliding arrangement they would be very apt to be loose, thus preventing rapid and good writing. The article is very nicely finished in nickel, and must become very popular with the trade.

Alexander Roberts, the secretary of the Book Binders' Provident Association, committed suicide by shooting himself on the 26th ult. Mr. Roberts occupied a desk in an office on Park row, New York, and was admitted to it late the evening before by the janitor of the building. It is supposed that a short time afterward he committed suicide. On his desk were found letters addressed to Eugene N. Roberts, a brother, and to Mr. Hubbard. In his letter to his brother he said he was despondent; he was tired of living and therefore he ended his life. Mr. Roberts was a bachelor. For nineteen years he was employed by Munn & Co., and was the last person rescued from the World building fire two years ago. His brother said he could assign no cause for the suicide, as the dead man's accounts and business matters were in good condition.

The numerous art productions of the Palmer Art Company have attained such a wide popularity that no stationer or fancy goods dealer can expect to meet the wants of his customers without having in stock a larger or smaller number of the novelties of this company. The Easter goods of the Palmer Art Company are unusually attractive this season. Its line of Easter lilies and magnolia flowers on palettes, plaques and panels is composed of a most artistic class of goods. The same may be said of its large line of plush and satin handkerchief boxes, Easter and birthday cards, confectionery boxes, &c.

J. E. Linde has brought out a very fine line of fans this season. They are printed in from three to ten colors, and comprise some twenty designs. Some of the leading designs are pansies with a child's head in the centre, "crazy quilt," a boat scene, &c. They are well gotten up, and will, no doubt, prove some of the most popular advertising novelties for the coming season.

The "Acme" tablet composition is intended for bookbinders' and stationers' use in putting up billheads, statements, &c., into neat pads. One pound of the composition will make up from 400 to 500 pads of commercial note, 100 sheets each. The article is prepared by the Acme Composition Company, New York.

John Petrie, Jr., has received notice of the shipment of a large quantity of the "French A. B." ink. This will be welcome news to the trade, as he is behind on his orders.

E. J. Dill, publisher of *Cosmos*, Council Grove, Kan., has been succeeded by Dill & Bell.

The *News and Courier* Company, Boulder, Col., has been sold to Robert Tilney for \$4,000.

W. H. Bowen, publisher of the *Republican*, Suisun, Cal., has sold out.

Agnes Aycock, bookseller and stationer, Americus, Ga., has been burned out; loss, \$4,000, insured for \$2,600.

Reports from Philadelphia state that the liabilities of Wm. Butler & Co., paper manufacturers, will amount to about \$43,000.

A fire at Niagara Falls, N. Y., on Monday destroyed Hill & Murray's paper mill. The loss is estimated at \$40,000; fully covered by insurance.

E. H. Guppy, bookseller, &c., San José, Cal., has admitted E. S. G. Guppy to partnership, and the style of the firm has been changed to E. H. Guppy & Son.

Louis Dreka, Philadelphia, has been very successful with his fancy articles for Easter, and is now preparing for Xmas novelties, which will be of the highest order.

E. G. Locke & Co., Philadelphia, have a large trade in gold and silver papers, relief sheet pictures, and paper laces. Their assortment of illuminated birthday and chromo cards is very extensive and moderate in price.

Waggener's improved trial balance book published by W. M. Christy's Sons, Philadelphia, are now in use in all of the large commercial establishments of this country. The increase in its sales of this year has been enormous.

J. L. Shoemaker & Co., Philadelphia, report that their sales for last month exceed those of any previous March, and their factories are kept running at night. They have added shoe goods to their lines, and have recently started another factory which nearly doubles their manufacturing capacity. The outlook for business is good.

John B. Davids & Co. have just been awarded a patent for a penrack inkstand. It is cylindrical in form, and has a deflected base which serves to hold in place a rim of metal. This has an arm on either side, which, when the stand is in use, can be made to project, and thus serve as a pen-rack. The stand is put up with all varieties of the firm's inks.

The National Publishing Company, Philadelphia, offers to the trade its new line of photograph albums bound in plush and leather. It has issued a large and attractive assortment of designs, which cannot fail to command a large sale. It has made a specialty of using only the best materials and of producing a durably bound and elegantly finished album. The cards are of heavy white paper, with a neat gold border, and are free from the wrinkling or "cockling" which causes so much dissatisfaction.

tion in other albums. The plush used is of extra fine quality, with a long silky nap.

Jenkinson & Foulke, publishers, Richmond, Ind., have applied for a receiver.

On Monday evening a fire broke out on the second floor of No. 138 Fulton street, New York, occupied by Thomas H. Morrison, printer. His stock and fixtures were damaged \$2,000.

On Monday night a fire broke out on the top floor of No. 332 Broadway, New York, occupied by I. H. Hamburger, dealer in fancy paper and novelty goods. The stock was damaged \$10,000.

The Thomas W. Price Company, Philadelphia, is doing a good business with Easter and birthday cards, chromo cards, and shape novelties. This firm has also a good trade in printers' supplies.

Henry Bainbridge & Co., stationers, New York city, have lost the senior member of their firm by the death of Henry Bainbridge. The business will be continued by John George Bainbridge under the same style.

John Glenn, Marcus Ward & Co.'s well-known representative, has lately been in Chicago, and reports a moderate trade for immediate wants, with prospective requirements quite up to the average. The lately flooded districts are behind with business, but the trade there expect an increased demand which is likely to swell their sales to an amount equal to former seasons.

W. Schimonsky, manager for Theodore Leonhardt & Sons, Philadelphia, reports that their line of Easter cards has been a success. The firm is preparing its samples of Christmas cards, and will have a large assortment of fine and high-priced goods, and also some attractive but cheaper cards, including job lots. The house is in the field with Xmas novelties to suit all demands for high and low-priced goods.

Claxton & Co., book publishers, Philadelphia, have suspended. The liabilities are over \$150,000, of which \$100,000 is personal debts and \$50,000 for merchandise. The firm has not been regarded as making any progress for some time past. Their publishing business was not large, but they had a good jobbing trade. The failure was due to an extremely dull trade during the past year. The firm had been previously doing a profitable business. It is the intention of the firm to ask for an extension, which will probably be given. It has requested all of the houses which sell it goods to give it a week's credit for all goods sold the firm since the 2d inst. A statement will be made in a few days and sent out to the creditors. It has been known for some time in the book and stationery trade in this city that the firm was embarrassed, but this was only thought to be temporary, and hence its credit was very good. The announcement of the failure took the trade by surprise here, as the creditors had received no intimation of it beyond the fact that the extension was desired. William Barnes, of the firm of A. S. Barnes & Co., stated to a reporter of THE STATIONER that his firm had been told some time ago that Claxton & Co. were embarrassed, but as their orders were small, they were filled without hesitation. His firm would lose something like \$200 by the failure. Another member of A. S. Barnes & Co. said that he had no doubt that a temporary extension would be given, and the firm would continue business. Daniel Appleton, of D. Appleton & Co., said: "The failure has been anticipated by us for some time, because the firm has been doing an unprofitable business. Our loss will be about \$1,000." Perhaps the largest creditors in New

York are Ivison, Blakeman, Taylor & Co., who will lose probably \$2,000. Liebenroth, Von Auw & Co., who have been doing business with Claxton & Co., stated that their loss would be between \$700 and \$800. The following has been received by the trade here:

DEAR SIR—Owing to the extremely dull trade this year, and a profitless business for several past years, we find ourselves compelled to stop payments. We will, as soon as possible, make a statement of our affairs, and trust our friends and creditors will be disposed to act toward us in a liberal spirit.

Yours very respectfully,

E. CLAXTON & Co.

The National Publishing Company, Philadelphia, has issued its spring catalogue of

Family Bibles and standard books. Every dealer in the United States and Canada should have one. It is handsomely illustrated with engravings of the bindings, which are invaluable to the dealers in making up orders understandingly.

The Globe Files Company has informed C. M. Ward, its New York agent, 28 Bond street, that its factory is again in full working order, and the heavy loss and inconvenience caused to its customers by the late flood it hopes will never be duplicated. It promises with its improved facilities to add constantly new and live-selling novelties, the board clips and lawyers' document-box cases being the latest.

H. H. CARTER, 3 Beacon St., Boston.**TRADE ITEMS**

C. F. Rump, Philadelphia, is doing very well with his newly-imported goods, as well as with his own manufactured goods. His travelers, E. C. Ripka, in the East, and C. B. Moore, in the West, report a very good trade.

It is needless to waste words in calling attention to the fine art cards of L. Prang & Co. They have been so repeatedly described in THE STATIONER that they are almost as well known to the trade as a steel pen or blank book. Suffice to say that no dealer cares to present a line of goods to the trade without adding to it some of the well-known productions of Prang. This firm is preparing to present this season additional attractions in its line. Its variety is already unlimited, and there is also a wide range of prices. It has literally a bazaar of fine art souvenirs.

The Acme Stationery and Paper Company has been obliged to secure more commodious quarters, and hence will remove on May 1 to Nos. 146, 148 and 150 Centre street, corner Walker, where it will have four times its present office and factory capacity. The company will continue to manufacture its present line of white and manilla writing tablets, pads and portfolios, and will in addition introduce in a short time several new and popular forms of writing tablets. Its line now embraces desk or memorandum pads, white book pads, bound on the end, the "Perfect" pencil tablet, manuscript papers in pads, tinted and white, heavy neutral tint, legal and foolscap in pads, blank drafts, notes, receipts, reporters' note books, spelling blanks, the "American" blotter tablet, the "Knickerbocker" blotter tablet for pen and pencil use, "Perfect" pencil drawing tablets, parchment copying books and paper, water-color blocks, the "Fac Simile" sales book, &c. Of the "Perfect" pencil tablets it made 50,000,000 in eighteen months. The company's facilities will be more than doubled in its new quarters. It will have a larger force of employes, more machinery, and altogether it expects to be able to fill every order within forty-eight hours after it is given.

Janentzky & Weber, manufacturers and dealers in artists' materials, Philadelphia, are having a great run on their medallion papier-maché plaques, square outside, with plaque centre, of a diameter of 8, 10 and 12 inches. The square outside answers the purpose of a frame, and can be gilded and ornamented, making a beautiful contrast for painting on the plaque centre. The demand for these medallion plaques have increased to such an extent that this firm has found it necessary to make special efforts to fill its orders. Oblong papier-maché plaques, from 5x8 to 10x15 inches in size, are very desirable for landscape and figure painting. Architects' indelible colored inks and indelible India ink, which are sold by Janentzky & Weber, are finely prepared, and will stand washing with either alcohol or water. The liquid indelible India ink is jet-black and perfectly soluble in water. Drawings made with it, when diluted, will still bear washing. Draughtsmen desiring to make notes or corrections on blue prints will find the blue print inks of this firm indispensable. No other ink can be used for this purpose. Polished mahogany cases, containing twelve bottles assorted of architects, India and blue print inks, for counter or drawing-room, are made by this firm. Its collection of Barbotene ware is the finest in the country, and this ware is always in great demand, as well as the material for tapestry, painting and repousse work (hammered brass).

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 3, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

BECAUSE of extra pressure on its columns, occasioned by the spring announcements of the trade, THE STATIONER has been obliged to increase its pages this week. Readers are cautioned to carefully scrutinize the contents of the advertising pages, that they may profit thereby.

THE events of the past week in Cincinnati, deplorable from every point of view, have unsettled business in that city and have kept back our usual letter from that point. The silence of our correspondent is sufficiently indicative of disturbed and unsettled feeling, injurious alike to public comfort and business prosperity.

AN enthusiastic subscriber, remitting to THE STATIONER for another year, says: "Would not be without it for \$10 per year." That's just the way we want to make it. It is the aim of this paper to so faithfully represent its constituency and serve the interests of the trade that the matter of cost will not stand in the way of its patrons. At the same time, THE STATIONER costs only \$2 per annum and it hopes to increase the estimation in which it is held, if such a possibility exists.

SEVERAL bills are pending in Congress, designed to cheapen and facilitate postal delivery. One of the features is the reduction of letter postage to one cent. THE STATIONER heartily favors this, as well as every other "reform," which will reduce the cost of postage and expedite the transmission of mail matter. One step, we think, ought to be taken; that is, that the telegraph companies should be required to affix and cancel a postage-stamp to each message which they may deliver. They now "beat" the postal revenue and should be required to make up the deficiency so far as they are concerned in creating it.

"KNOWLEDGE and business" is the text which one of the daily papers takes as a basis for remark in a recent issue. It premises by saying: "The virtues of honesty, diligence and thrift, if requiring to be always inculcated by precept and example, like all other admonitions to good conduct, are the primary essentials to success, and universally recognized as such. No business man would expect to succeed without them, any more than without a knowledge of prices or the conditions of the market."

Then follows the argument that even these qualifications are insufficient without study of the conditions which govern trade and the circumstances which actuate them. These are fair conclusions. A merchant may be scrupulously honest, attentive to business and economical in management and yet never get along. We find ample record of failures where all of these good qualities pervaded the business life of the unfortunate insolvent, and yet ignorance was the inciting cause to disaster. The business man must become a student, not only of the resources of his occupation, but

of its perplexities and disorders. "Wisdom," says the proverb, "is justified of her children," and the truth of the saying is never better exemplified than in the life of a business man. Superior knowledge, or natural intuition, broadened by education, reinforced by activity, inquiry, courage and energy, and backed by integrity, make the perfect man of business. Education is "essential not only to standing but to practical success,"—this in a moral sense as well. Don't forget it.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

Some very pretty things are to be had in Japanese ware. These consist of punch bowls, vases, cigar cases, &c. They have handsome decorations in colors and are attractive. Prices vary according to style, &c.

Rubber dolls can be had in all sizes neatly dressed in plain and fashionable goods. They are very durable and this is their only point of merit, as they are not equal in appearance to China and bisque goods.

If one wants a nice article in the way of a fine album without paying a very high price there is a great variety of albums bound in French morocco, to choose from. They are of the quarto size with handsomely embossed covers. Prices are \$3.50 and up. A cheaper album has a plush cover and is of the octavo size.

If you want to see yourself in oil, and your purse is not overburdened with spare cash, get your likeness taken on a sea-shell. There are one or two firms who make a business of furnishing likenesses on sea-shells, and the work is done very nicely. The shells are of various sizes, some being large enough to mount on easels. Prices are as low as \$1.

A neat thing in paper-weights is the obelisk weight. It is made of colored glass with numerous hieroglyphics in imitation of the Egyptian obelisk, making it ornamental as well as symbolical.

Some very fine table-ware now comes in fine French glass of various beautiful colors, elegantly figured, &c., and mounted in silver frames.

An exceedingly tasteful thing in Easter and birthday cards is a small square panel of oak with landscape scenes painted in oil. Goods of this character retail for \$3.50 apiece, and are a Swiss production.

During the past few years quite a demand has been created for Japanese fans. Some of the new styles this season will consist of square and rectangular shaped fans. They are cheap, but novel and attractive.

A "sewing companion" can be had in the shape of a horse-shoe made of nickel nicely polished. It has a velvet emery cushion for needles and pins; holds a thimble, four spools of thread, a pair of scissors, and a button-hook.

The rage is now for novelties in pocket and pen-knives. These are made in a variety of odd shapes. The handles are of pearl and va-

rious expensive materials. Some of these articles are quite fashionable as watch charms.

Sconces of bronze are mounted in easel frames and on pedestals. They are very ornamental, being in large demand for furnishing the parlor or sitting-room.

The junior partner of a down-town blank-book concern has returned from a visit to the South, having been to Washington, where he tarried several days. Tariff issues are still unsettled, although he might have added the weight of his influence to bring them to a focus. Why did he not perform this duty?

It is currently reported that the stockholders of a well-known manufacturing house have been in consultation during the past week, discussing the question: "What shall we do with it?" The future is still uncertain. I could make a suggestion.

I learn, in conversation with members of the trade, that your Boston correspondent is suspected of being another individual whose initials are identical with his, and who was formerly in the stationery trade. Now, I happen to know that they are all wrong, and that the Boston man is not the person whom they take him to be. He is a "newspaper feller." Don't mix things any more.

ANSWERS TO CORRESPONDENTS.

M. wants to know who makes paper barrels.

Ans.—American Paper Barrel Company, Hartford, Conn.

M. & M. ask: Who makes the "Westlock" brand of flat and folded papers?

Ans.—We believe that it is made by the Keith Paper Company, Turner's Falls, Mass.

R. K. F. wants to know who manufactures "Perfection" linen paper, and whether it is put up in note, &c., sizes with envelopes for fine trade.

Ans.—We don't know who makes it, but understand that it is controlled by the Powers Paper Company. It is to be had in any size wanted and with envelopes as desired.

F. G. G. wants addresses of manufacturers of envelope machines.

Ans.—Whitcomb Envelope Company, Worcester, Mass.; W. H. Hill, Worcester, Mass.; Lockwood Manufacturing Company, Philadelphia, Pa.; Berlin & Jones Envelope Company, New York, M. A. Reay, New York.

W. & K. want to know who manufactures the "Duplex" letter clip.

Ans.—H. B. Fisk & Co., Newark, N. J.

M. M. & Co. are informed that the Lawrence patent has expired and that Ivison, Blakeman, Taylor & Co., New York, are making the "Spencerian" spiral pen rack.

W. H. H. is informed that Ward & Gay, Boston, are also proprietors of a brand of paper known as "Banker's."

Subscriber is informed that patent oilers are also manufactured by T. C. Chalk, Pawtucket, R. I.

F. C. Brown, manager of the Fountain Ink Company, has just returned from a very successful trip through New England where the sterling good qualities of "Caw's" ink are probably better known and appreciated than anywhere else. During the past two years this enterprising corporation has made extensive inroads into the West and South, and at present it is hard to find a well stocked stationery store from Maine to California, or from Lake Superior to the Gulf of Mexico where "Caw's Ink" is not conspicuously exhibited on the shelves.

The Geo. W. Cross Blank Book Manufacturing Company, Newburgh, N. Y., is offering specialties in blank books to which the attention of the trade is invited. George W. Cross, of the company, lately doing business at Saugerties, asks his customers to address the new concern at Newburgh, N. Y. See advertisement in another column.

J. H. Bufford's Sons have furnished a large number of souvenirs for special occasions lately, some of them being very novel and pretty. The firm has facilities for supplying souvenirs at the

shortest notice for entertainments, balls, theatrical purposes, &c.; and, when desired, designs are also furnished. A very pretty souvenir recently made up by the firm is in the form of a kettle-drum. The material is red satin, the hoops being blue ribbon. The heads of the drum contain an inscription commemorative of the occasion on which they were presented. The firm is also making up a dove folding card as a souvenir. This is very a propiate, especially when it is desired to circulate printed matter such as notices of the press, testimonials, &c. In the production of shape novelties, the firm is as usual wide awake and enterprising, and is able to furnish a great variety of new things in this line at the shortest notice.

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, April 2, 1884.

THE MONEY MARKET.—Call loans on stocks remain $1\frac{1}{2}$ to 2 per cent. and have not been affected by the April settlements. The quarterly interest of the United States 4s, amounting to \$7,376,435, together with other interest payments now being disbursed, assure a plentiful supply of money for some time to come. The temper of the stock market continues bearish and speculation is exceedingly tame, and there is yet a lack of confidence which restrains outside operators from investing. Government bonds were firm and railway bonds were active and irregular. Commercial bills of exchange are still very scarce, and the market, though quiet, is firm.

THE PAPER MARKET.—Although business is far from being encouraging, or even in as good shape as was generally believed at the beginning of the year it would be at this time, most of the tendencies are in the right direction. The course of shrinkage in the prices of paper is very generally thought to have found its level, and it is encouraging to know that a point has been reached where a gradual recuperation may be looked for with some reaction in prices which have fallen so abnormally low. Although there are still business failures to record each week, those of the past week in general trade were fewer in number than they have been for several months, indicating that the weak concerns are being eliminated, and thus conveying a greater degree of confidence in the future. Although we hear of very low prices being made, quotations for almost every grade are on a very steady line, and, with one or two exceptions, are about the same as have ruled since the beginning of the year. A drop of $\frac{1}{4}$ c. on No. 1 manilla has been made by one of the leading makers. The manufacturers of straw wrappings had a very secret meeting last week at Albany, the object of which, it is said, was to take some action to meet the advance in the price of straw, for which they claim to be paying \$10@12 per ton. They declared an advance in heavy-weight paper of 15c. per 100 lbs., so it is reported, but, in view of the stocks in the market, it is doubtful if they will be able to sustain this advance.

THE STATIONERY MARKET.—Business has not received that stimulus which the advent of spring weather, it was hoped a few weeks ago, would impart to it. There are still complaints of dullness, and while prices have not declined the demand for most articles of a staple character is very indifferent, to say the least. Dealers are very cautious and are ordering in the smallest quantities. The demand for fine stationery is very limited, although a little better than a week or two ago. The trade in blank-books is also very quiet and the indications are that there will be no great activity in this line until advance orders for fall delivery begin to be received. This change is not expected to take place before May. There continues to be a fair demand for inks, probably owing to the severe winter, which almost entirely prevented shipments and thus caused a large accumulation of orders. The trade in Easter goods has almost ceased. A few dealers are re-ordering, but the bulk of business does not amount to much and is mostly of a home character. There is a very good demand for outdoor games, and business in these is expected to increase within the next week or two. There is a little doing in juvenile books, but the movement is very slow and does not promise much.

TRADE NOTES.

The demand for copying paper and books made by William Mann, Philadelphia, is so large that this firm has had to get some new machinery built to keep pace with its orders. The capacity for production will be doubled, which will permit the house to satisfy all the demand for these goods. This firm reports a very good trade in all of its different departments.

Cassell & Company, 739 and 741 Broadway, have in press for immediate publication, "The United States Art Directory and Year Book" (second year), being a chronicle of events in the art world, and a guide for all interested in the progress of art in America. Compiled by S. R. Koehler. This new edition of a book which was pronounced upon its first appearance to be one of the most useful publications ever issued, will be found to have been materially improved and augmented. Its size has been increased, and to the useful features there have been added a number of attractions, which will lift the new issue far above the level of a mere practical book of reference. Principal among these attractions are the "Chronicle," giving a concise but very full account of the art events of the past year, and the illustrations, of which there are no less than seventy-six, most of them full-page. Of these illustrations, forty-four are given as souvenirs of the exhibitions, representing some of the principal pictures shown during the year; three are devoted to sculpture; ten represent American art in Europe, i. e., pictures shown or medalled on the other side during the year, while the balance, nineteen in all, consists of views and plans of nearly all the more important buildings devoted to art, in the shape of museums, academies, &c., throughout the United States.

Among the large line of plush and satin Easter novelties, lately brought out by Charles Beck, Philadelphia, are several, which for beauty and originality of design, are especially commendable. No. 610, a diagonal white plush cross decorated with daisies or water-lilies, mounted on satin and fringed. No. 596, a handsome square card, with Easter dove, rich satin puffed, fringed, colors assorted. No. 601 is a plush egg, decorated with flowers, ribbon and fringe. No. 611 is an exquisite fern cross, the body being made of the downy wild harefoot, with trimmings of ferns, lichens, fronds, &c., in their natural state, their rustic beauty much enhanced by being mounted on white plush; this is a perfect gem of Nature's art. No. 903 is a combination of plush and satin, with double doors, one opening upon the other, and cards with appropriate Easter designs, puffed and fringed. In a cheaper line of goods, besides cross and egg-shapes of every suggestion and variety, are No. 631, a satin triangle, with puffing, card and fringe. No. 632, diamond shape, with goblet mounted on plush, holding egg, with chicken peeping from the shell, cord and fringe. No. 618, circle of satin, with a crescent of plush, and handsome satin flower mounted thereon, card ribbon, fringed. Mr. Beck has also a handsome line of plush and satin bannerettes. These are only a few of the goods which will attract attention. Having secured the control of several large European manufacturers, this house is now prepared to offer an extensive line of fine imported embossed chromo cards, suitable for advertising purposes, at prices almost as low as the domestic. Owing to the great demand for his patent lock easels, Mr. Beck has succeeded in perfecting his machines, so as to enable him to produce them much more rapidly, and in still larger quantities than heretofore. All parties manufacturing paper novelties should communicate with him, as this is said to be the only durable patent-lock easel in the market, being made of the best rope manilla middle.

THE HARVARD FOUNTAIN PEN.—The Harvard is a flexible Gold Pen affixed to a fountain or reservoir holder. Having no air tubes, wires, springs, &c., which are the great obstacles to the efficient working of all fountain pens. These objections have been finally overcome in the construction of this Pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for, we take pleasure in offering it as one in which this result has been accomplished to the highest degree possible. Every Pen guaranteed to give satisfaction. Send for Price List.

THE LAW OF COPYRIGHT.

Patent trade-mark and copyright law formed the subject of a special course of lectures by James A. Whitney, LL.D., counselor-at-law, before the Law School of the University of the City of New York. The course concluded on March 20, with a lecture on copyrights, their history, character and legal status. The following is a much more complete report of this interesting lecture than has heretofore appeared:

The principle of copyright protection is very old. It is founded on ideas of natural justice. But we are not to confuse the primary examples of exclusive literary property with what is now most commonly understood by the term copyright or right in copies of a literary or artistic production. There are, in fact, two systems of copyright, both embodying the same ethical idea and both framed to secure justice to the individual and indirectly to benefit the public by promoting learning and the diffusion of education, but each separate from the other in origin, development, administration and legal character. The tendency to confuse the two together has led to much false argument concerning the law of literature and the just and reasonable rights of authors and of artists, who in some degree stand on the same ground as authors.

The most ancient form of copyright was that forbidding the reproduction of manuscripts without the consent of the owners. This is said to have been done among the Romans. This protection, however, was cognate with a right exercised by governments to forbid the copying and distribution even by the authors themselves. The power to completely suppress a literary work, of course, included the lesser power of defining by whom and on what conditions it could be published or circulated at all. The censorship was common with the ancients. The writings of Protagoras were forbidden in Athens. In Syria, Antiochus Epiphanes forbid the books of the Hebrews; in Rome, Diocletian those of the Christians. The earliest illustration of the principle of copyrights in Christendom is interesting, and indirectly produced consequences of the greatest historical importance. It occurred in Ireland in the sixth century. St. Finian, so runs the chronicle, prepared a psalter, and St. Columba, statesman and scholar, but not yet the great and austere man he afterward became, copied it by stealth. St. Finian demanded that the copy be given up, but Columba refused, and the matter was carried before King Dermot, sitting in high court at Tara. He said that "to every cow belongs her own calf," which passed into a proverb, and Columba, angered and morose, took the first excuse for revolt. He gathered the tribes of Donegal and was defeated in a great battle in Sligo, where seventeen hundred men were killed. Christianity had taught a wiser law to his captors than that of vengeance, and in solemn form it was proclaimed that he be banished from Ireland and should win from heathendom as many souls as men had perished in the strife. A coracle bore him and twelve followers to the coast of Scotland, and thereafter for four-and-thirty years he led the vanguard of Christian faith in the wilds of Scotland and Northern England, and left a name immortal for all time. Such was the result, indirect it may seem, but none the less the true result of the first literary piracy in a Christian land.

In our time the common law forbids the copying of manuscripts, just as it forbids, in many instances, the publication of private letters. This rests on general principles of equity and propriety. It does not touch the question of the multiplication of what has already been made public by the author or owner. This rests on an entirely different foundation.

(To be Continued.)

CAW'S * STYLOGRAPHIC * PEN.

Acknowledged to be the simplest, most practical, reliable and durable Stylographic Pen in the market. The least liable to get out of order, and no expert required to adjust it. Gentlemen.

I duly rec^d the sample of new lot of "Spencerian Blue Black Writing Fluid", & I take pleasure in saying that we find it on trial to be entirely satisfactory in every respect. It is strong & brilliant in color, flows freely, with no dropping from the pen & leaving no surface to rub off, while at the same time it gives an excellent copy. We are using it both on our books & for correspondence & it appears to answer equally well for either purpose. We do not see why it does not meet every requirement for a perfect writing fluid. Please send us per Express one doz. quarts with bill per mail.

Truly yours
W. S. Bridgman Cash.

CAW'S STYLOGRAPHIC PEN.

The pen known as "Caw's Stylographic" is said to be the simplest, most easily kept in order and the most reliable pen of the stylograph form in the market. In the midst of the great competition which exists in the line of fountain pens, this is a very broad assertion, but the makers claim to be justified in it. The pen is made of the best hard rubber, with alloy points of platinum and iridium, and the adjustable needle, of which an illustration is given, is said to be a crowning feature which distinguishes it from its competitors. The needle itself is made of platinum and iridium, the spring being of gold and the frame or yoke of silver—all non-corrosive materials. This needle can be

adjusted at any angle to suit the requirements of the user and serves to clear the point if it becomes clogged. The needle, which goes inside of the joint section of the pen, can be shortened or lengthened by sliding the yoke F up or down. The pen is manufactured by Lapham & Bogart, 3 John street, New York.

GOLD INK.

For making gold ink the following has been quoted in the *Chemist and Druggist*: Take equal parts of iodide of potassium and acetate of lead; put them on a filter and pour over them twenty times the quantity of warm distilled water. As the filtrate cools, iodide of lead separates in golden scales. This is collected when the filtrate has quite cooled, washed with cold water on a filter and rubbed up for an ink with a little mucilage. The ink thus made must be shaken every time it is used.

DE LANG'S INKS.

Eleven years ago, F. C. De Lang started the manufacture of De Lang's writing fluids and copying ink in the city of Chicago, since which

time the business has grown to large proportions. Mr. De Lang is a practical chemist and thoroughly understands the secret process for making the celebrated De Lang's copying fluid, which is said to be equal to Antoine's. Mr. De Lang has recently associated with him in business J. B. Keen, and with increased capital will continue the manufacture of inks at 138 La Salle street, Chicago, under the firm-name of Keen & De Lang.

Artists of ability now bring out charming novelties in the guest cards used at dinner parties.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat.

Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

WORCESTER, MASS., U. S. A.

HUGHES' NEW WALL MAPS

Prepared expressly for School use under the personal supervision of WILLIAM HUGHES, F.R.G.S. (late Professor of Geography in King's College, London), whose name is of itself a passport to the accuracy and merit of any work on Geography. The NAMES are introduced with great judgment, and free from the common fault of overcrowding. The physical features are boldly and distinctly delineated, and the political boundaries are carefully colored. They are adapted to any series of geographies, no keys being required.

THE STATIONER, Printer and Fancy Trades' Register.

A MEDIUM OF TRADE COMMUNICATION AND ADVERTISING CIRCULAR FOR

Stationers and Paper Makers, Printers, Publishers, and Printers' Engineers, Bookbinders, Book-sellers and Toy Manufacturers, the Leather Trades, and all persons interested in the Fancy Trades.

THE OLDEST AND ONLY RECOGNIZED ORGAN of the British Stationery and Fancy Trades. Circulates over all portions of the civilized globe. Correspondents in all countries.

The American trade should not fail to make itself acquainted with the histories of the rise and progress of the leading manufacturing and wholesale houses in the United Kingdom, now appearing in each issue of this journal, and pronounced to be the most valuable of their class.

As an Advertising medium for the American trade, especially to those who wish to cultivate an English, Colonial or Foreign connection, it will prove itself to be unequalled.

If you wish to build up a good, substantial business, consult The Stationer, &c. If you wish to know the latest News concerning the Trade, consult The Stationer, &c. If you wish to buy judiciously, consult The Stationer, &c. If you wish to make a fortune, consult The Stationer, &c. On all Trade Matters, consult The Stationer, &c.

WHITE'S TAR,

Size 5x7,

\$11 per Case,

shown in the cut, which we claim to be the most perfect Form or Style of package ever devised. It is superior to the ordinary Package of Sheets, because all litter of scraps is avoided; and it is superior to Rolls, because it is certain where the sheet will detach from the package and this avoids waste. The disinfecting cover is as thorough a deodorizer as any costly apparatus, while the artistic design and printing gives the book a very neat appearance.

PRICE LISTS AND SPECIMEN BOOKS FURNISHED ON APPLICATION.

COPYING BRUSH.

The cut illustrates the design of Schriver's patent copying brush, having a reservoir handle which will hold water enough to dampen one hundred pages of a letter book. This brush does away with the necessity of having a cup or separate receptacle for holding water to be used in preparing the letter book for copying. The handle of the brush is made of brass and will not, therefore, rust and the water is kept clean no matter how long it is retained in the handle. The flow of water from the fountain to the brush is regulated by a valve in the handle

operated by the finger as shown in the cut. This is a convenient and durable article and is said to be the most economical appliance for the uses to which it is devoted. It is made by T. Shriver & Co., 333 East Fifty-sixth street, New York, who also manufacture copying presses in all sizes and in a great variety of styles of finish.

COTTAGE DRAWING MODELS.

Linear perspective, the foundation of all model and cast drawing, as taught by the use of geometrical models, has been attended by difficulties which rendered the study dry and uninteresting mainly for the following reasons, viz.:

The objects used to illustrate the theory have been merely abstract forms, too small to give full meaning to the convergence of lines or their proper connections. The absence of character and want of effect in the models when assembled in complex forms, and the consequent perplexity to the student in the endeavor to keep in mind the relationship of the parts as the combinations progressed from the lower to the highest scale has, doubtless, been the most serious impediment to a clear understanding of the subject as heretofore illustrated by blocks or models.

To obviate the objections referred to and supply some other requirements that have suggested themselves in the course of a somewhat long experience, and present the object in as familiar form as possible, "Cottage Drawing Models" have been prepared. They comprise more than twenty pieces from which a dozen good models adapted to the purposes of art can be made at one time. They may also be combined in one composition representing a model of a modern cottage having nearly every possible combination of right lines, the perspective value of which, owing to the large size, may be made identical with similar lines of the natural object. By adjusting the model to the proper elevation, near or remote, the perspective lines will tend to the vanishing points precisely as would those in nature.—*Ed.*

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each. " $6\frac{1}{4} \times 3\frac{1}{4}$ " \$1.00 Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN, Sole Prop'r & Mfr
60 WILLIAM STREET, NEW YORK CITY.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$4.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Price, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. The patented device for reversing the die and counter saves time. Have been in use by many of the principal Stationers for the past twelve years.

BROWN & BESLY'S FILES.

The new firm of Brown & Besly, incorporated, 114 Monroe street, Chicago, Ill., has made arrangements with the licensees of Brown's "Perfect" file, and is now the successor of Culver, Page, Hoyne & Co., as sole licensee and manufacturer of that file. This firm has greatly improved the files and is now offering better goods than ever before and is giving liberal discounts to the trade.

It is also perfecting and will bring forth in a short time what is claimed will be the best cheap file ever invented; it will be known as the "Every Day" letter file, to retail at 75 cents. It invites correspondence from the trade.

SHAPE NOVELTIES.

H. McAllaster & Co., 196 & 198 South Clark st., Chicago, are putting on the market many new and taking designs in the way of shape novelties for the spring trade. The accompanying designs are selected from their new catalogue and are considered some of their best. They say that their spring trade is opening up very good.

HOW SILK WAS FABRICATED.

Spain and Portugal received from their Arabian conquerors the art of fabricating silk. It was in 711, under the Caliphs, that the Saracens conquered Spain, and they soon taught its inhabitants to improve their agriculture, their manufactures and their arts. "With the same vigor," observes Professor Dresch, in his *Universal History*, "with the same earnest zeal with which they

debted to them for the manufacture of paper; for the expression of quantities by figures, and for many improvements in the art of dyeing; nay, our language bears numberless traces of the inventions transmitted to us by the Arabians. The historian and bishop, Otto de Freysingen, speaking of the great progress which silk manufactures had made in Spain, relates that, after the siege of Milan, Frederick I.

sively Corfu, Cephalonia, Negropont, Corinth, Thebes, Athens and several other cities and islands of Greece; from whence he carried with him into Sicily an immense booty and several thousand captives. Among the latter were a great number of persons acquainted with the culture and fabrication of silk. Roger gave orders to treat them with much kindness, and persuaded them to settle in Palermo, offering them the most advantageous conditions. They introduced there their useful industry, and opened manufactures which soon acquired great celebrity; and from thence it was transmitted to the Calabrians, and at length propagated through the rest of the kingdom of Naples.—*Boston Bulletin*.

BROWN & BESLY'S FILES.

held a diet of the empire, in 1158, in the fields of Roncaglia, at which were present, in magnificent attires, the ambassadors of the Genoese, who recently had conquered from the Saracens two important cities, Lisbon and Almeria, both famous on account of their manufactures of silk, and had made a rich booty. The later wars, and the defeat of the Saracens, might

Rubber cushions on the cylinder prevent injury to drawings on stone, and the form rollers are supplied with adjustable bearings to regulate their pressure to the stone.

The side-rack on the bed is connected by pinions with the distribution rollers, which they operate, thus equalizing the ink on the rollers as it is parted with to the face of the

SHAPE NOVELTIES.

fought for more than a century, they pursued the cultivation of science, under the auspices of the great Caliph Haroun al Raschid," the contemporary of Charles, and his son Al Mamun. These sovereigns regarded it as a maxim of policy, that the welfare of a nation consisted in its civilization. The Koran had classed agriculture, industry and commerce among the good deeds of the believer. Like the Roman senators, who took their surnames from the plants which they had principally cultivated, as, for instance, the Fabii and Lentuli, the Arabian chieftains were fain to adopt, in the quiet of their private lives, names alluding to their skill in some manual industry, though at that time Central and Western Europe knew of no other pleasure than that derived from war, from wine and from the chase. Charlemagne was the only sovereign who made any provision for the cultivation of the mind; but the benefits he conferred terminated with his life, and from that time the Arabian empire was the only seat of science, industry and civilization. We owe them much in regard to agriculture; we are in-

have been the cause that this species of industry did not pass the limits of the Spanish Peninsula, and fell partly into decay; for it cannot be doubted that the rest of Europe received it from Greece." Greece remained for a long time in the possession of the silk culture, and it seems that the Saracens were never acquainted with the breeding of the worms, and were skilled only in the art of manufacturing beautiful stuffs from the raw silk, which they received from the great emporium of Bagdad. The war of 1146 introduced that culture into Italy. According to historical authority, Roger I., the Norman king of Sicily and Naples, hearing that the great Emperor Manuel Comnenus was negotiating an alliance against him, with Conrad III. of Germany, resolved to send an embassy to Constantinople, in the hope of averting the danger which threatened his power, and to propose a matrimonial alliance with one of the daughters of the Emperor; but Manuel threw the ambassadors into prison, and Roger, having accordingly collected his land and maritime forces, was so fortunate as to conquer succes-

stone and perfecting the distribution in an obvious manner. The reservoir in the rear of the cylinder provides the facilities for dampening the wetting rollers by a self-acting mechanism similar to that of the ink-fountain, and this mechanism is operated by the motion of the press as are the form rollers. The exact quantity of water needed is accurately gauged by the pressman with the aid of the proper facilities attached. The feed-board is provided with adjustable guides and pointing mechanisms, which insure the most accurate register.

The press is arranged for single and double rolling, and the bed can be run any number of times, while inking up, without giving an impression.

A young mother, traveling with her infant child, writes the following letter to her husband at home: "We are all doing first-rate and enjoying ourselves very much. We are in fine health. The boy can crawl about on all fours. Hoping that the same can be said of you, I remain, &c., Fanny."

ANTOINE'S COPYING INK

Is the only **COPYING INK** which gives perfect Copies even if a month has e'apsed after a letter has been written.

Antoine's Modern Writing Ink

Is the only one which resists the action of **BLOTTING PAPER**, and always keeps its original colour, no matter how long in bottle.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the TRIUMPH MUCILAGE,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its never spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

OBITUARY.

FREDERICK LEYPOLDT.

Frederick Leypoldt, the well-known bibliographer and publisher, died at his residence, No. 964 Sixth avenue, New York, on Monday morning, of cerebral congestion, after an illness of three weeks. Mr. Leypoldt was born at Stuttgart, Wurtemberg, in 1837. He came to this country when seventeen years old and entered the employ of F. Christern, a dealer in foreign books. In 1859 he opened a foreign book store of his own in Philadelphia, in connection with which he established a French circulating library and also published several books. In 1865 he came to this city and established the firm of Leypoldt & Holt, publishers, the junior partner being Henry Holt. In 1872 Mr. Leypoldt began the publication of the *Weekly Trade Circular*, which subsequently became the *Publishers' Weekly*. The *Publishers' Trade List Annual* was started in 1873. Two years later Mr. Leypoldt began the work of his life, "The American Catalogue," which was completed in 1880, and which forms one of the most thorough bibliographies in existence. In addition, Mr. Leypoldt has also published the *Library Journal*, the *Literary News*, and the "Index Medicus." To the first-named he contributed valuable articles on library management and economy. In addition to his periodicals Mr. Leypoldt has written and compiled a number of bibliographical works and French and German text-books. Much of his work was up-hill and unremunerative, but he never seemed to take the latter fact into consideration. He was an indefatigable worker, and the disease from which he died was the result of too close application. "He literally worked night and day," said a gentleman yesterday, who knew him well. He was an enthusiastic lover of books, and had acquired an enviable reputation as a publisher of foreign works. He leaves a widow and three children.

Funeral services were held on Wednesday morning at nine o'clock at the residence of the deceased. Interment was at Woodlawn Cemetery.

On Wednesday at two o'clock P. M. a meeting of the book trade was held at A. C. Armstrong & Sons, No. 714 Broadway, to take action regarding the death of Mr. Leypoldt.

Peter Carter, of Carter Brothers, presided. There were many prominent members of the book trade present. Speeches were made eulogistic of the deceased by George Haven Putnam, Mr. Holt and A. D. F. Randolph. Resolutions were adopted setting forth that the public libraries of America were largely indebted to Mr. Leypoldt for the establishment of the *Library Journal* and for his work on the *American Catalogue*.

NICHOLAS TRÜBNER.

A London despatch announces the death there on Monday of Nicholas Trübner, the well-known bookseller and bibliographer. He was of English origin and was born at Heidelberg, June 12, 1817. He was employed in several large English libraries, and in 1843 became connected with the house of the Longmans, when he familiarized himself with the literatures of the principal countries of Europe. In 1852 he founded for himself a house which rapidly was extended, especially in its relations with the United States. He himself paid a visit to this country and made a tour through the principal cities. In 1859 he published a "Bibliographical Guide to American Literature." Subsequently he visited the principal cities of the Orient. In 1865 he founded

25c. A GENUINE STYLOGRAPHIC. This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

ARNOLD'S WRITING FLUIDS.

Half and Full-Bound Blank Books, Memorandum
Books, Pencils, Penholders and Pens,

And every article of General Stationery at the Lowest Market Prices.

Trübner's "American and Oriental Literary Record," devoted chiefly to the language, philology, archæology and philosophy of the Orient. Among other publications of his were "Sketches from Flemish Life," translated from the Flemish of Hendrick Conscience, and an edition by himself of H. E. Ludewig's "Literature of American Aboriginal Languages." The whole edition of his "Bibliographical Guide" was sold in four months. Encouraged by this, he continued his researches, extended his plan, and four years later issued a new and exhaustive edition. It was highly praised by the newspapers of this country, England and France, and is still considered an invaluable work. Mr. Trübner was also a frequent contributor to periodicals. One of his contributions was a valuable paper on Lucien Bonaparte's visit to the Basque Provinces, in the *Critic*, London, 1856. He also published a series of letters in the *Athenæum* in the same year.

HENRY BAINBRIDGE.

Henry Bainbridge, one of the best-known members of the stationery trade in this city, and, indeed, in the country, died on Saturday, March 29, at his home, No. 76 Lefferts place, Brooklyn, of Bright's disease. He was the head of the firm of Henry Bainbridge & Co., of No. 99 and 101 William street, and was very popular in the trade throughout the country. Mr. Bainbridge was essentially a self-made man, and owed the fortune he accumulated to his own energy, perseverance and devotion to business. He was born in the village of Huddersfield, Yorkshire, England. In 1849 he came to New York and found employment with his brother Richard, who was a stationer at No. 47 Cliff street. Richard Bainbridge failed after the panic of 1857, and Henry Bainbridge in 1858 began business for himself, opening his office at No. 48 John street. He was joined in 1863 by his other brother, John George Bainbridge, who had also been in the employ of Richard, and throughout the war the house did a prosperous business.

The present business of the firm was established at Nos. 99 and 101 William street in 1860, the partners being Henry Bainbridge and John George Bainbridge. It began in a very humble way, but rapidly increased from a few thousands of dollars annually to its present magnitude of over half a million. The members of the firm owed this result to their energy and at the same time liberal but cautious and conservative dealing. They built up not only a very large domestic trade, but a considerable export business. They also did an extensive import trade, being, in fact, the pioneer importers of fine stationery and stationers' specialties in this country. Their introduction of foreign goods had a wholesome effect on home trade, as it stimulated enterprise and inventive genius, and opened up a profitable way for the investment of capital.

Henry Bainbridge, the head of the firm, came to be looked upon as an authority on all trade points connected with the stationery business. Remarkable fidelity to truth, a keen sense of honesty, and his old-fashioned notions of the proper method of doing business were the salient points of his character. Though very bluff and outspoken as a man, Mr. Bainbridge possessed a kind, sympathetic nature, and was respected and esteemed by all who knew him. He was very generous, giving away much in charity, but in a quiet, unostentatious way.

Mr. Bainbridge was a leading member of the Stationers' Board of Trade. A meeting of the Board was held on Monday at 12 o'clock, to take

action regarding his death, George L. Pease, the president, in the chair. The meeting was largely attended. The following resolutions were passed:

Whereas, It has pleased an all-wise and almighty Providence to remove from our midst by death our esteemed and respected member, Henry Bainbridge.

Resolved, That we, the members of the Stationers' Board of Trade of New York, tender to his family in this their hour of sorrow our heartfelt sympathy and condolence.

Resolved, that in Mr. Bainbridge we all have recognized the honest upright man of business, the genial associate, the friend of those who needed a generous sympathy, and noble for his exemplary Christian character, which was illustrated in every department of life. His loss from our brotherhood is one that can never be replaced, and will long be keenly felt by those who were thrown into business relations with him.

Resolved, That as a further token of respect, we appoint a committee of twenty to attend his funeral on behalf of this Board.

Resolved, That this minute be entered in full on our records and a copy engrossed and signed by the Board and sent to his widow and family.

The committee appointed was composed of the following named gentlemen:

Wm. T. Pratt, L. W. Fairchild, J. F. Anderson, Jr., I. C. Kiggins, J. P. Dinsmore, David F. Davids, Fred. W. Horn, Henry Levy, A. Liebenrath, C. F. Hinrich, James D. Shipman, Edward Todd, David A. Tower, Geo. H. Jones, Samuel I. Knight, P. Farrally, General A. C. Barnes, H. Esser, Alex. Agar, Wm. Keuffel.

The secretary, Mr. Booraem, was directed to send out to all the members of the board the following notice of the funeral:

NEW YORK, March 31, 1884.

The funeral of Mr. Henry Bainbridge will take place at St. Luke's Church, Clinton avenue near Fulton, Brooklyn, to-morrow, April 1, at 3 P. M. The

members of the Stationers' Board of Trade are requested to meet on the porch of the church at the time named and attend in a body. Yours truly,

Geo. L. PEASE, President.

The funeral was largely attended by business men and relatives and friends of the deceased. The Rev. Mr. Vandewater officiated. The services were brief but impressive. The following-named gentlemen acted as pall bearers: W. I. Martin, Alex. Agar, Edwin Kimpton, W. H. Arthur, Geo. H. Janes, C. F. Macy, G. A. Olney, Dr. Swift.

At the conclusion of the services, the remains were taken to Greenwood Cemetery and interred in the family plot.

Mr. Bainbridge leaves a widow and two daughters, the oldest being the wife of J. M. Favill, of the Produce Exchange.

ANNA OTTENDORFER.

Anna Ottendorfer, wife of Oswald Ottendorfer of the *Staats Zeitung*, died on Wednesday of heart disease. Mrs. Ottendorfer, whose maiden name was Sartorius, was born in Wuerzburg, Bavaria, February 11, 1815. She was first married to Jacques Uhl, with whom she came to New York in 1836. In 1844 Mr. Uhl opened a job-printing office at No. 44 Frankfort street, his wife assisting him in his labors. The following year they purchased the *Staats Zeitung*, then a weekly paper, edited by Gustave Adolf Neumann. It was soon afterward made a daily publication. Mr. Uhl died in 1852, from which time until 1859, when she married Mr. Ottendorfer, Mrs. Uhl was the sole manager of the paper and printing office. Mrs. Ottendorfer was widely known for the charitable enterprises in which she engaged. Last year she received a decoration from the Empress Augusta of Germany. She had six children, all by her first husband, of whom four are now living.

TYPOGRAPHICAL ORNAMENTS.

Printers who look back to the styles and methods in printing of some twenty-five or thirty years ago, cannot fail to observe the great improvement in typography and the strides in every branch of the art since that time. Perhaps in no other department is the

founders will continue to belabor their brains, if impelled by the substantial encouragement which has been given by printers in the past.

"Typographical ornaments," said a leading type founder to a reporter of THE STATIONER, "have reached such a state of perfection in the matter of design and adaptation that effects can be produced with them nearly equal to those of

from twelve up to fifty or more numbers as may be desired. Prices are from \$2 up, a font. For small printers, perhaps, the lowest priced font is in many cases all that is required, as he may order additional sets of ornaments as fast as his business requires it. As a usual thing an outfit of typographical ornaments costs much less considering its desirability than is generally sup-

COMBINATION OF ORNAMENTS.

change so noticeable as in that of job printing, involving as it does an unlimited number of tasteful ornaments of every form that inventive genius has been able to suggest. The type founders have certainly done their part to put the best facilities within the reach of the compositor, while the press builders have been hardly less active in furnishing the necessary machinery for consummating the work. One need

fine art. They are made in the most simple as well as complex forms, and the use that they can be put to is only limited by the degree of skill and taste of the printer. Very fine effects can be produced from the most simple forms. Typographical ornaments are used to such a large extent in even what is nowadays called ordinary job work that no printer can get along without them. All work embellished

posed. Cheap processes of manufacture and competition have, of course, considerably reduced the price."

"Has there been any marked progress in typographical ornaments within the last few years?"

"Very little, except, perhaps, in their adaptations. Americans excel in originating new designs in various kinds of jobbing type, but

CARD ORNAMENTS.

only glance at a piece of printing considered good a quarter of a century ago to wonder how such work could be tolerated. If a compositor of the present day were put in a room with only the sober faces of those times to embellish his work, no doubt he would be glad to leave the practice of the art within a week for some more congenial employment.

While healthy advancement in the art of printing is commendable, as in any other industry, there frequently comes the cry from some quarters to "put on the brakes." This shout is directed at the type founders and comes not only from those who allege that their purses are in danger of collapse, through the attempt to keep up with their abler competitors, but also from many who can well afford nearly all of the good things. But as long as there is a market for the many novelties no doubt the law of supply and demand will hold sway, and the type

with these ornaments is rendered in every way more neat and attractive and there is scarcely a piece of job work done with the exception, perhaps of a plain business card which does not involve more or less use of these ornaments. These ornaments, besides, dispense in a great degree with the tedious and expensive process of engraving because the artistic effects, which may be produced by them are almost equal to those of engraving. Where great economy must be practiced on the part of the job printer, a piece of work, such as a bordering around a fine card for instance, may be electrotyped and used in connection with other jobs, as it is possible to vary the filling-in used afterward in such a manner as to produce entirely different effects in each case. At the same time the foundation ornaments may be re-distributed the same as ordinary type.

"We supply ornaments in fonts containing

typographical ornaments, strictly speaking, are about as they were fifteen years ago, when they were borrowed from France and Germany. I do not mean to say that Americans have entirely stood still in the origination of designs, but that the finest work which is done to-day is done with precisely the same foundation ornaments that were in use in France and Germany years ago. A Frenchman named Derriey was the most ingenious originator of typographical ornaments who has ever been known. He produced some of the finest ornamental printing, especially in the shape of artistic bordering that this or any other age has seen."

The set of ornaments shown and numbered from 1 to 16, contains some of the most simple forms used. They were kindly furnished by Farmer, Little & Co. From these ornaments the bordering of a neat and simple card is constructed, as shown. A more elaborate and fanciful set of

ornaments is shown in the illustration furnished by James Conner's Sons:

With these, an unlimited number of borders, corners, centre-pieces, &c., may be constructed, and fine ornamental work may be done. From an examination of the ornaments it will be seen in what a multiplicity of ways they can be joined together.

ENVELOPE MAKING.

There is no industry in this country which has been more steady in its growth than the manufacture of envelopes. This was begun about the year 1848, the first factory being located at No. 180 Fulton street, New York. The building in which the industry originated stands to-day just as it stood thirty-six years ago. Prior to and during 1849 envelopes were imported in large quantities, but a steady demand arose for the domestic article and to-day the United States not only manufactures all of the envelopes that this country consumes, with the exception, perhaps, of an infinitesimally small quantity of fine envelopes, which are imported from France, but sends abroad a large amount of surplus product.

A leading manufacturer of envelopes showed a reporter of THE STATIONER through his factory a few days ago. "Envelopes were originally," said the gentleman alluded to, as he led the reporter up a narrow stairway to the cutting room, "all made by hand. That is, the folding was done by hand, but, of course, a press was used to cut the envelopes. It was, however, operated by hand. About 1852 an envelope folding machine was brought here from Europe. This machine was greatly improved in the course of time and so completely changed that little of the original mechanism was left. The machines used for manufacturing envelopes to-day are as near perfection as it is possible to make them. But while there are no apparent defects in them, it is hard to tell what the brain of the inventor may bring forth and therefore we are prepared for any surprises. The machines used at present do the folding, pasting, gumming, sealing of the flaps and counting at the rate of 5,000 envelopes an hour.

"The paper used by us comes to the factory cut in squares, varying in size with the size of the envelope to be cut from it, so that there may be the least possible waste. For instance, a square of paper, 3x3 feet, is used with a die of a certain size. Its area, we will say, is forty-eight times the size of the envelope before it is folded. Suppose it were forty-seven and a half times the size of the envelope. In that case there would be just 5,000 imperfect envelopes cut to waste,

because each square of paper contains 5,000 sheets. The paper all comes to this room and the cutting, as you see, is done here. The envelopes, after being cut, go to the floor above, which is the folding room."

The speaker led the reporter up another narrow flight of stairs to the folding-room, which contained a dozen or more of envelope-making machines in operation. A girl was seated before each machine, her duties being to feed it as fast as required with envelope blanks, keep sufficient gum in the gumming-trough, paste the bands around each package of envelopes as soon

meanwhile been dried. Each package of envelopes as it comes from the machine is put in a box, containing twenty packages and is then ready for the trade. In spite of the closest calculation there is more or less waste material in envelope making. This goes back to the mills and is made over again into paper.

"There are at the present time," continued the manufacturer, "about twenty-five factories in the United States, but these factories produce at the rate of 50,000,000 envelopes a day. They are always run on either full or half time and consequently the production is largely in excess of the consumption, resulting in a large surplus.

"The use of envelopes is very great, as every person with ordinary powers of observation knows. Envelopes are made in a great variety of colors, shapes and thicknesses, not to mention sizes, which range from the most minute form used by druggists, to very large package envelopes. They are now not only used by merchants in sending out samples of their goods to the trade, but by retail dealers to inclose goods sold to customers and also to hold many kinds of goods in stock. Their cheapness has undoubtedly largely increased correspondence by mail within the last few years as well as increased the use made of them by business men in the distribution of circulars and in various other ways.

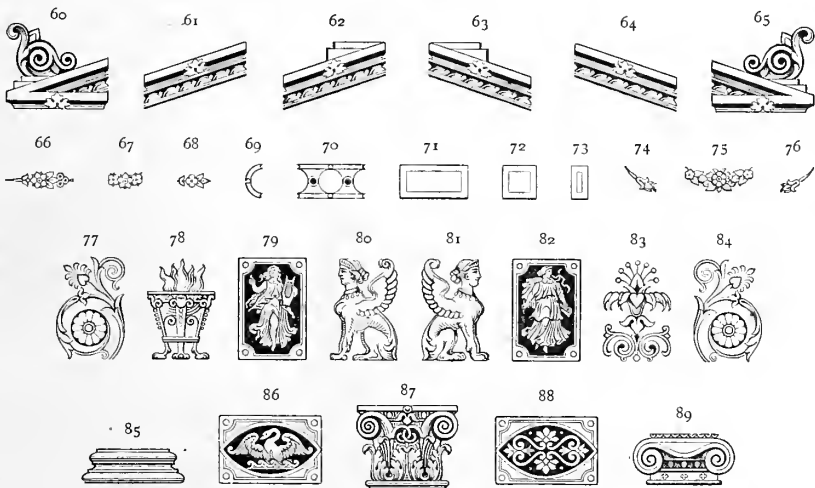

"To carry on the industry of envelope making demands a great deal of capital. The machinery is costly and requires a great number of operatives. Yet, notwithstanding this fact, the main cost in the manufacture of envelopes is the paper."

Robert Browning has written an introductory note to a volume of sermons and addresses by the late Thomas Jones. The poet thus describes the preacher: "It was a fancy of mine that a younger Carlyle might, sharing the same convictions, have spoken so, even have looked so; but the clean-cut, Celtic features, the lips com-

CONNER'S TYPE ORNAMENTS.

as completed and box the envelopes for the market. On reaching the folding-room, the reporter interested himself by watching the operation of the envelope machines. In the top of each machine were the envelope blanks. With every second of time a pair of claws deftly picked up an envelope blank (always one, never more) jerked it forward a few inches, then released it, when it was carried down through the boxing or folding mechanism, from which it dropped down into the drying-belt (the former operation having, in addition to folding the envelope, gummed it), where, after being sealed, it was carried around to the counting-box in front of the machine, the gum on the flaps having in the

pressed as with the retention of a discovered prize in thought or feeling, the triumph of the eyes, brimful of conviction and confidence—these, no less than the fervency of faith and hope, were the orator's own."

Robert Smith, brother of Sydney, and familiarly called "Bobus," was a lawyer and ex-advocate-general, and happened on one occasion to be engaged in an argument with an excellent physician touching the merits of their respective professions. "You must admit," urged Dr. X., "that your profession does not make angels of men." "No," was the retort, "there you have the best of it; yours certainly gives them the first chance."

BOSTON, MASS.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

Correspondence.

SCHENECTADY SCRAPS.

[FROM OUR REGULAR CORRESPONDENT.]

SCHENECTADY, N. Y., April 2, 1884.

Not for many years has business been so dull at Schenectady as it has been during the past three months. One cause of this has been the weather, which has been the very worst possible. During the greater part of this month the country roads have been well-nigh impassable and very few farmers have been in the city. The other cause is the general scarcity of work. However, in this respect, the outlook is somewhat better than at my last writing.

There have also been more failures here during the past three months than during the three previous years.

In the Henry Swere assignment the sale realized in the neighborhood of \$2,500; this with other assets makes the total assets in the neighborhood of \$3,500, not enough to pay the preferred creditors, after deducting expenses, which will be quite large, as the sale occupied almost a full month. The schedule filed by the assignee of H. M. C. Daley, dry goods, shows over \$2,000 more assets than liabilities, and now the question is why an assignment was made at all. The assignee is trying to dispose of the stock by private sale.

Early in the month George Olley, jeweler, made a general assignment for the benefit of his creditors. Liabilities, \$6,000; assets, \$4,500.

S. R. James, who had one of the largest wholesale and retail crockery stores in Central New York, owing to business complications with a former partner, has been compelled to turn over all his property to Col. D. D. Campbell, his father-in-law. Mr. James has some \$10,000 in liabilities unsecured, due outside parties.

Since the retirement of Henry Swere, the houses engaged in the book trade are James H. Barhydt, Swart & Van Auken, and Robert T. Moir, all good and substantial business men. These are amply sufficient for the needs of Schenectady. Schenectady has one of the very best union school systems in the State and is a good book town.

It is also the seat of Union College. James H. Barhydt is an old-established business man and has the exclusive sale of Rogers' stationery here. He has also the larger part of the Union College trade and some of the school. Swart & Van Auken have a large school trade, as has also Robert T. Moir, who also carries quite a

line of fancy goods. Each of these parties has a large wall-paper department.

John A. Sleichner, who recently purchased the *Daily Union* and assumed editorial control, has disposed of the paper and accepted a position as editor of the *Albany Evening Journal*. Mr. Sleichner greatly improved the *Union*. It is said the *Union* is owned by Hon. George West, ex-member of Congress. It is now edited by Geo. W. Cottrell.

RICHMOND REPORTS.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., April 2, 1884.

Despite the rainy weather which has prevailed throughout this section of the Sunny South for the past three months, the stationery trade has kept pace with all other lines of business. With retailers generally business has been dull, the moist weather having prevented the ladies from making their usual purchases, but it has, however, enabled the dear creatures to clear up their backward correspondence. "Tis an ill wind that blows nobody good." When gentle spring really comes to stay her allotted time our retail dealers' countenances will bear smiles in lieu of frowns. Their counters are well-stocked with an almost endless variety of Easter cards and flowers of American and English manufacture of beautiful design and finish. From present appearances, enough will be left over to make a creditable showing next season—still, as the ground-hog has been snowed under, the weather-cock may change the surmise.

J. W. Randolph & English have a new novel in press, written by a young lady from Youthside, Va.; but she has not yet fixed her mind on a name for it. They are also rapidly disposing of the second edition of "No. 40 A. Romance;" also pamphlet No. 1, "The Battle of Bethel and the John Brown Raid," and pamphlet No. 2, "A Diary of the War." All of these have been published by them since the failure of Carlton, McCarthy & Co. They report a good jobbing trade.

"We are very busy, but there is no new feature in trade during the past month," said Mr. Randolph, of paper-box notoriety.

Up and down stairs we were elevated through the establishment of Baughman Brothers and shown the improvements, now nearly completed. "When we get our presses in" (second floor), remarked one of the enthusiastic brothers, "we will be enabled to strike off a quarter of a million impressions in a day." They report business lively in the printing line, but otherwise in the stationery line.

The Virginia Paper Company, which now

does a large jobbing and commission trade, representing some of the largest houses in the country, contemplates building one immense warehouse—it now has four. It also has a charter to build a paper mill and proposes doing so at an early day. It claims to carry the largest stock in the South. "We are doing our share of business and our sales the past quarter show an increase of several thousand dollars over the corresponding period of last year," said L. A. Adler, manager of the company, who is a practical man, thoroughly acquainted with the manufacture of paper in all its details, from the rag room to the finishing department. Jno. H. Montague is president of the company, and M. F. Montague is secretary and treasurer.

Every wholesale stationery establishment in the city, without an exception, has recently enlarged its facilities for an increased trade. "I don't know what I should do without THE STATIONER," remarked a member of the firm of one of the largest houses in the business to your correspondent to-day.

SENTINEL.

BOSTON BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, April 3, 1884.

It's getting late in the season, I must admit, still I should mention for the benefit of the trade that this is spring. True, I have as yet seen no evidence of spring-time, but am rash enough to make the assertion on the strength of the "Farmers' Almanac" and last week's issue of THE STATIONER. Instead of gentle April showers (as per almanac) snow storms of no mean proportions are of almost daily occurrence; and winter overcoats oft hide from view many a new spring suit. But winter's days are numbered (if I could only give the figures), and gentle spring must soon hold brief sway.

For this have the many trades-people been long waiting, and in anticipation thereof the hundreds of show-windows have been gaily dressed with the numerous novelties of the season. Among these window displays one in particular attracts great attention. It gives a picture of Easter. Many beautiful and costly souvenirs of the season, with artistic novelties are handsomely grouped together, making a strikingly appropriate and beautiful picture of Easter-tide. With the exception of a little foreign material for framing and background, the entire tableau is made up of such Easter novelties as are in stock, to which the attention of purchasers is invited. To design and arrange this elaborate display costs something, and one might ask, Does it pay? Well, it does,

for what the eye doesn't see the heart can't crave for, nor the purse respond to. One would naturally suppose that so beautiful a display of Easter goods is made by some one of the leading houses that makes this line of novelties a specialty. But it isn't. They don't seem yet to have realized that such window-displays are profitable. No. It is a *dry-goods house* that does it!

Though spring is very much delayed in this Eastern section, the large houses report that trade generally is very good, the greater part of the shipments going to milder climes. A heavy spring trade in toys and juvenile goods is being done by Heyer Brothers, marbles, tops, hoops, &c., having a good demand. Orders for summer seaside goods, such as croquet sets, lawn-tennis, hammocks, archery and the like, are being numerously received. For private theatricals and parlor tableaux, this house makes a specialty of tableau fire, which is of a very rich color. Boxed fireworks for home use is another special feature, for which Heyer Brothers have a very large trade. In musical instruments, I am informed that the heaviest run is on harmonicas, and that thousands of these are sold the year round.

In Easter goods a very large trade has been done by the several city dealers, and H. H. Carter has enjoyed a large share of the business. The many original novelties which this enterprising dealer introduced for the Easter season found ready sale, both from his counters and his jobbing room. Easter goods will soon be out of date, and this house is already preparing other lines for the trade. In birthday cards and scrap pictures for albums, Mr. Carter will show some new designs, which will undoubtedly please card collectors. This house is just opening up an extensive line of writing-papers and envelopes, which includes a large lot of Crane's tinted note. These goods having been bought in extra large lots from mills anxious to close out their superfluous stock preparatory to taking stock. Mr. Carter made some close bargains, and he is prepared to supply the trade in such quantities needed at extremely low figures. Samples of his extensive line of papers, with envelopes to match, will be sent free to the trade upon application.

The Robinson Engraving Company is presenting a new line of folding cards and paperies. The designs are very beautiful and show that same artistic finish for which the steel-plate work of this company is so justly noted. In paperies, about two dozen styles are offered. Mr. Robinson returned about ten days ago from an extended trip West and South, where he met with much encouragement, doing a good business. Dull trade is an "unknown quantity" to the Robinson Engraving Company.

Dropping into the busy salesroom of King & Merrill's I was foolish enough to venture an inquiry concerning pens, whereupon the genial George seated me to a desk and placed before me a hugh pile of letters bearing postmarks from hundreds of different towns and cities. These epistles bore the signatures of clerks, school teachers, State officials and bankers, and all proclaimed the superiority of "King's Nonpareil" pen. Some of these letters from school teachers commenting upon the Nonpareil pens stated that the "children cry for them;" others carry the conviction that no "family should be without them;" and others again claim that "a bad case of penmanship was immediately improved by the use of one dozen." These testimonials, I am informed, were unsolicited and bear much weight—there's a crate full of 'em.

The Russell Paper Company reports that its heavy Manila papers are having a big run. Publishers are using this paper for pamphlet covers. For mechanical drafting it is also extensively used. Tag manufacturers, moreover, find this double manilla paper the most suitable for their goods. For ice cream and candy boxes it is also being utilized. This paper is made in several sizes and weights and a large stock is always on hand for immediate delivery.

The Newsdealers' Supply Company has moved from its former quarters on Devonshire street to No. 40 Hawley street, where greater facilities are offered for its increasing business. This company is auxiliary to the Newsdealers and Stationers' Union of New England, and it is proposed by its manager, Thomas Marsh, to make it a stock company. A circular issued to the trade throughout New England, defines the position of the company as follows:

"A company is now being formed with the above title. Are you willing to commit yourself to the enterprise, and to endorse it by agreeing to buy of and through this company, if you can get goods as cheaply as elsewhere? In this manner, more than in any other, you can show to the News Company monopoly that you are going to work for your own interest hereafter. The necessity and benefit of a system of supply, independent of existing methods, has long and thoroughly been considered by the entire retail trade, and earnestly approved. Other companies, prepared to carry forward such a system, have been started at intervals; but, except in a few notable and commendable instances, they have been gradually added to the present aggregation. With the experience of the past to guard against disaster, this new undertaking is bound to succeed, and to continue in the purpose and interest for which it is started—for your interest. It is an outgrowth of the Newsdealers and Stationers' Union, by which it is endorsed. The Union is for principles; the company is for practice. For more than a year the Union has maintained an agency (with limited facilities) for general supplies, and a proportionate business has been transacted, and great benefits have been derived. Now, in a more extensive form, the business is to be taken charge of by the new body, with improved facilities to supply whatever you may wish, if possible. A. L. D.

LOUISVILLE GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., April 5, 1884.

The trade situation has latterly presented a more cheerful appearance. The past three weeks have given us, in the main, a steady spell of bright, seasonable weather, which has exerted a much needed stimulus on general business. There is, however, as yet no spring boom, and the fact that there is a wide-spread disposition in favor of conservatism and caution, and against pressing sales to the utmost limit, indicates that this season's trade will be of moderate average volume. There is evidently an underconsumption or overproduction—perhaps a little of both—in several departments of business, and, as a result, the movement shows a lack of spirit if not an absence of profit in lines affected. For the past month the shipments of agricultural implements, cotton, grain, and leaf and manufactured tobaccos show a handsome increase, as compared with the same month last year; whisky and leather have about held their own, while boots and shoes, hardware and furniture show a decrease, as compared with same period. The dry-goods trade, which is usually

accepted as a good barometer of general business, has this spring been slow to develop activity, but is now coming forward encouragingly, necessitating nightwork in leading jobbing houses, and promising a brisk and satisfactory season. Statistics of the movement of paper, books and stationery are not recorded here, but, on inquiry of the principal concerns, sales are found to be quite satisfactory and of larger dimensions than usual at this date. The clearing-house returns for the first quarter of the current year are found to be \$56,000,000, as against \$49,000,000 for the first quarter of 1883—a handsome gain.

Based on the present crop outlook in this section, business ought certainly to be in a healthy and flourishing condition. Planting operations have been rapidly pushed forward since the middle of March under the most favorable auspices, the ground being in perfect condition and the weather dry and seasonable, with scarcely an interruption. Wheat is growing finely; oats and tobacco are beginning to peep through, and animated field work is now being done in the planting of corn, potatoes and grasses.

There seems to be no longer a doubt that the Southern Exposition at Louisville will be reopened this autumn. Efforts to secure additional means necessary to increase the capital stock to \$500,000 have resulted in raising all but \$20,000, which small balance seems certain to be subscribed next week; then the official announcement will be made that Louisville will repeat and emphasize the triumph of last year. The great exposition is to open this year on the 16th day of August, and will continue sixty to seventy-five days; the interest already manifested at home and abroad seems to make it sure to be even a better exhibition than the first. Here is a most excellent opportunity for all seekers after Southern business; after exhibiting in this city displays can be forwarded in ample time to be placed in the grand Cotton Centennial Exposition, which opens in New Orleans in December, thus securing a varied and far-reaching advertisement. Manufacturers especially should make a note of this and prepare early.

News items in the stationery trade are few. The Gilbert & Mallory Publishing Company has amended its articles of incorporation by changing style to Bradley & Gilbert Company, with Jas. C. Gilbert, president, John C. Herndon, vice-president, and William Harrison, secretary and treasurer. This house was established twenty-three years ago as Bradley & Gilbert, and maintains a prominent place in the book, stationery, printing and paper-box manufacturing trades here.

Thos. B. Poutch, of the stationery department of J. P. Morton & Co., executed a unique idea in the way of a job of invitations last week. It read as follows:

LE JOYEUX CLUB

Requests the pleasure of your
Company

FRIDAY EVENING, APRIL 18,
1884.

GALT HOUSE.

The above, printed in blue ink upon coarse brown "extra wrapping," cut a small octavo or billet note sheet, "very rough edge," with square wedding envelope made of same paper to match, makes a novel souvenir of elegance in its utter simplicity. BOURBON.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

MILLS.

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

EUROPEAN GOSSIP.

[CORRESPONDENCE OF THE STATIONER.]

LONDON, March 24, 1884.

Walking through the city of London one is very much impressed with the great number of warehouses stocked to the roof with paper of every conceivable size, color and weight; the chief trade seems to be in export to the colonies, notably Australia and the Cape of Good Hope, the Home trade absorbing only a small part of the mill production. There is great difficulty, as a rule, in obtaining samples from one of these large houses; they are ready for business, but take it for granted that they know by description what is wanted, and in many instances their manner is so devoid of courtesy as to divert the trade in other directions.

One of the very largest book makers in London told me last week that all of his supplies of certain grades were imported from Germany, the price being 20 per cent. less than the same article of English make. Another maker who produces scrap-books, largely imports his leatherette from Belgium, his paper and boards from Germany, the chromo pictures and the bronze leaf for ornamenting also from Germany. Is it, therefore, a matter of surprise that there are complaints throughout this country as to the state of trade? And yet, wages here are low as compared with ours. I notice in the Philadelphia *Ledger* of the 7th inst. a discussion as to the relative rate of wages. While, undoubtedly, the cost of living here is less than with us, the proportion is much greater among the middle and upper classes than with the working people, for example, a workingman pays about the same rent in London as in New York, his tea, coffee, bread and meat cost no less, his clothing is very little less and so on through the list of actual necessities, but the wide difference begins with the expenses of the middle classes, silk dresses, good clothes, wines for the table, gas, the use of a cab on occasions, amusements, servant hire, the luxuries of the table, &c., are quite one-half our prices and the same ratio exists with all luxuries.

Wages are low here, principally because the supply is largely in excess of the demand. I have seen here and in Liverpool and in Birmingham more idle men about the streets than in a dozen American cities. When visiting a large paper-box factory here last week, which employs several hundred hands, I learned that girls of sixteen began at sixty cents per week, and if adepts in a year could earn from one to two dollars a week, the older and well-experienced hands getting as high as four dollars, the hours being from eight in the morning till seven at night. Naturally under such regulations work can be produced at a minimum price.

It is odd to an American eye to see quills so largely used (as is the case here) instead of the universal steel pen, as with us; and sealing-wax, too, is largely consumed, although I was unable to obtain a pack of "baronial" envelopes without mucilage on the flap, and I must have asked for them in twenty shops. I think that Dreka or Murphy's Sons, of Chestnut street, could have furnished such on demand.

Playing-cards here are generally square-cornered, for the British public do not take kindly to the innovation of round edges. I think that they would prefer the latter if once adopted, but few of the shops seem to have an assortment of them and the clubs will not, as a rule, depart from their "square" standard.

The stationery supplied at the various hotels throughout England, and especially in the metropolis, is of a very superior character; the

ink and pens are always good and the paper and envelopes the very best. At the hotel where I am stopping the paper supplied in profusion is Pirie's old-style note; envelopes to correspond, all stamped in color from steel dies.

Now, Pirie's paper costs here twenty-five cents per pound; I wonder if there is a hotel in America that would pay that price? My observation has been that they usually get the very cheapest the market affords.

As a contrast to what I have said above in reference to lack of courtesy, I must note that one of the largest houses here has acted toward me in very marked contrast, by showing me its entire works, comprising seven fine paper mills and a wonderful envelope factory, all of which, as you may suppose, were interesting and valuable to me in my particular branch of manufacture. The economies practised would set us wasteful Americans a good example and teach us the necessity of care and saving.

I shall hope to have the privilege of sending you some further of my impressions from the Continent.

CHARLES J. COHEN.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, April 7, 1884.

No. 14 of THE STATIONER is a splendid one, and the trade here were quick to express the most favorable comments about it.

A few weeks ago the general trade of our city became quiet and inactive, and many feared that the dullness would continue. I am very happy to say that all kinds of business have brightened up, and the outlook shows a most cheerful aspect. The banks have a pretty fair demand for their surplus money, and plenty of good paper is given them. I think that the year will see a better business and more confidence than is usually shown during the year of the Presidential election. There is no denying the fact, though, that the excitement of a hot political canvass affects business. Last week our county had a little fight over the election of

delegates to the National Republican Convention, and many a business man neglected needed hours in order to see that his side won.

The Easter card trade is not what it was expected to be. Never was such a lot of rich and beautiful Easter cards brought to our City. The Easter window of W. W. Edgar is the prettiest I ever saw. The demand for cards up to this date has been small, and the trade do not look for a very much increased business in that line this week. The truth of the whole matter is, the people are tiring of the card-gift business. It may be that our city is an exception, however. You know how very smoky and sooty our place is, and therefore can readily see what a difficult thing it is to keep cards clean.

Geo. W. Reed & Co. have become nicely fixed in their new quarters on Wood street, and their store presents a most attractive appearance.

H. Watts & Co. occupy the old stand of G. W. Reed & Co. on Wood street, and when they finally get the papering, painting, &c., finished and their new goods arranged, they will have an elegant place.

R. S. Davis & Co. moved into the old *Chronicle* office on the 1st inst., and before all of the alterations were completed. This week will see them in good shape.

I have lived in this smoky city about thirty-one years and have seen a good deal of moving on April fool's day, but never before did I witness as much of it as this year, especially so among the business houses. The directory man ought to sell a much increased number of books this year.

A good deal of interest has been taken in the oil business lately by our young men. The woe-begone expression on their faces clearly demonstrates that a "drop" in oil is about as disastrous as you New York people frequently see on Wall street. Trading on margins is more dangerous than mortgaging your real estate at 10 per cent. interest in order to borrow money to begin a business you know nothing about. Both are bad enough, sure.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

DAVIDS' PATENT PEN-RACK STANDS.

A neat, novel and useful invention has recently been patented by John B. Davids, of John B. Davids & Co. It consists of a combined inkstand and pen-rack, designed to meet the wants of the million, the price placing it within the reach of everybody. The pen-rack is a decorated metallic band having sectional arms, which, when extended, form supports for pens, pencils, &c. The inkstand, upon which the band pen-rack is fitted, is of the class known as "bell" or "trumpet" mouth, is cylindrical in form and has a deflected base, which insures safety from overturning—the whole comprising as perfect an article in all its parts as could be desired. The pen-racks are in assorted lithographed colors—red, green, yellow, lavender, &c.—and will form a valuable addition to the stationer's stock in trade, inasmuch as they can be arranged to make an attractive display, and at the same time prove an attraction to buyers. The cuts represent the pen-rack stand with the arms closed, as it is packed for shipment, and with the arms or supports turned outward, ready for use. These stand complete, each with the Davids' improved corkscrew fitted in the cork, and containing the firm's productions—to wit, black, blue, violet, red, green, scarlet and carmine inks and chemical writing fluid, combined writing and copying fluid and blue-black copying ink—can be obtained from the manufacturers, John B. Davids & Co., 184 William street.

For the convenience of the trade these goods are packed in neat lock-corner wood boxes, each containing one dozen.

—:O:—

NEW PATENTS.

No. 295,497. Lead and Crayon-Holder.—John H. Knapp, New York, N. Y.

No. 295,591. Paper File.—Calvin W. Sherwood, Chicago, Ill.

A receiving-wire for a paper-file, provided with a notch at its upper end, the walls of which notch are adapted to cut a piece out from a paper when being placed on the wire, in combination with a sliding holding-wire adapted to enter said notch by its sliding movement.

No. 295,596. Stereotype-plate.—Frederick K. Tracy, Chicago, Ill., assignor of one-half to Charles E. Strong, same place.

A stereotyped-plate of columned matter cast type high, and with column-rules and anterior longitudinal grooves under and extending upward toward the rules, and provided with necks or bridges across and intercepting such grooves, for the purpose of diminishing the labor of subdividing such plates and preventing any bulging of the form.

No. 295,598. Envelope.—Emanuel J. Trum, Brooklyn, N. Y.

No. 295,625. Blotter.—August H. Frederick, St. Louis, Mo.

An improved blotter, consisting of a suitable base or head, having a series of blotting-leaves flexibly hinged thereto, with intermediate spaces

adapted to receive a block of writing paper and to be interchangeable used.

No. 295,636. Revolving Map-Stand.—Henry Edwin Hayes, Brooklyn, N. Y.

No. 295,657. Manufacture of Wood-Grain Paper.

DAVIDS' PATENT PEN-RACK STANDS.

Cloth, &c.—Geo. F. McIndoe and Jas. W. McIndoe, Everett, Mass.

A wood-grain fabric consisting of paper, cloth or other like material, colored to imitate the color or tint of the natural wood, and having printed thereon a representation of the lines or grain of the natural wood, obtained by taking an impression of the grain and lines of the wood by means of wax, then preparing an electrotype therefrom, and then printing upon the colored paper or cloth the lines or grain thus transferred to the electrotype.

No. 295,658. Manufacture of Wood Grain Paper, Cloth, &c.—Geo. F. McIndoe and Jas. W. McIndoe, Everett, Mass.

The art or process of making wood-grain paper, cloth, &c., consisting, first, in obtaining from wood itself an electrotype or engraved fac-simile of the grain or natural lines thereof,

in the manner described; second, in preparing a stain electrotype or engraved plate that shall represent the stain or color lines of the wood between the lines or grain; third, in taking paper, cloth or other suitable material of a color which shall approximate the natural color of the wood; fourth, in printing in suitable color thereon the stain, by an electrotype-plate, prepared as described, or representation of the wood between the grain-lines; and fifth, in subsequently printing in proper color the grain or lines of the natural wood thereon by means of the electrotype or key-plate.

No. 295,661. Method of Making Lithographic Printing Plates.—Peter Corfitz Möller, Leipsic, Saxony, Germany. Patented in Germany, February 10, 1883, No. 23,302; in France, March 19, 1883, No. 154,373; in Hungary, April 10, 1883, No. 22,459; in Belgium, April 14, 1883, No. 61,090; in Austria, May 30, 1883, No. 14,129, and in Italy, June 30, 1883, XVII. No. 15,586, XXXI. 77.

No. 295,665. Method of Attaching Advertising Articles to Cards.—Seeley P. Mount, Cleveland, Ohio.

No. 295,680. Device for Pointing Pencils.—Henry G. Schramm, Camden, assignor to William Keuffel and Herman Esser, Hoboken, N. J.

No. 295,688. Art of Printing and Mounting Photographic Pictures.—Juan de M. Terreforte, New York, N. Y., assignor to himself and Antonio M. Molina, same place.

The method of taking and mounting photographic pictures, which consists in preparing upon glass or other suitable surface a film of dry collodion, then spreading upon the collodion film a sensitive coating of gelatinous or albuminous emulsion containing nitrate of silver, then drying the same, then printing and developing the picture in the ordinary manner on said sensitized coating, then attaching paper to the picture by applying paper that is faced or coated with plain moist gelatine or albumen to the picture upon the glass, then allowing the paper to dry under pressure in contact with the picture, and then stripping the paper, and with it the picture, from the glass.

No. 295,729. Canceling Stamp.—Enoch B. Brown, Mystic, Conn.

A stamp-canceler, consisting of an L-shaped lever or arm pivoted to the bed-plate of the canceler, and having attached at its lower

extremity a pivoted serrating piece or scratcher, in combination with mechanism for operating said arm.

No. 295,739. Inkstand or Receiver.—John B. Davids, New Rochelle, N. Y.

The inkstand or receiver is surrounded with a belt or band, having sections adapted to be turned outward to form a holding-rack for pens, &c.

DESIGNS.

No. 14,885. Font of Printing Type.—George Giesecke, Leipsic, Saxony, Germany. Term of patent, 7 years.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A. T. Dunton, newsdealer, &c., St. Albans, Vt., has sold out.

Thomas F. Stafford, stationer, &c., Greenwood, S. C., is dead.

Charles L. Kusz, of the firm of Kusz & Co., publishers, Manzano, N. M., is dead.

G. W. Collins, stationer, &c., Georgetown, Cal., has been succeeded by Mrs. D. Blair.

Sarah (Mrs. Louis) Mayer, dealer in picture-frames, New York city, has made an assignment.

C. V. Wintzingerode, bookseller and stationer, Portland, Ore., has been damaged by water. Insured.

T. S. Pattillo has been admitted as a partner of D. H. Smith & Co., booksellers and stationers, Truro, N. S.

The stock and plant of Bailey Brothers, printers, Kingston, Ont., have been damaged by smoke and water. Insured.

John Polhemus, printer and publisher, 102 Nassau street, is about to enlarge his premises by extending them fourteen feet.

J. B. Payne has retired from the firm of Payne & Gardner, bookbinders, &c., London, Ont., the old firm having dissolved.

Herman E. Frist and George H. Davis, Wilmington, Del., have formed a copartnership under the firm-name of Frist & Davis, as stationers and newsdealers.

The *Keystone Courier* newspaper office, Connelville, Pa., was destroyed by fire on the 1st inst. The loss on type and machinery will reach \$10,000. Insured for \$3,500.

The building occupied by the August Gast Lithographic Company, Nos. 217 and 219 Pine street, St. Louis, was burned on Sunday night. Gast & Co. lose probably \$50,000, and the building is damaged to the extent of \$15,000; both fully insured.

C. F. A. Hinrich's designs in brass lamps are a new departure in both shapes and art work. The metal is solid with both silver relief finish and with landscape and marine views hand-wrought upon the body of the vase. The effects are as variable as are the conceptions of the artist who has had the work in hand, being projected over an illimitable field of land, water and animal scenes. The shapes and ornamental adaptations are, moreover, entirely original.

The new fountain-pen brought out a few months ago by the Harvard Fountain-Pen Company has had a very large sale. The pen gives general satisfaction, and is in every respect an article of considerable merit. The Harvard stylographic pen has also been well received by the trade everywhere. It works perfectly. Buyers never have any trouble with it, and not one of the many thousands sold has been returned, which alone is an indication of its superiority. It is simple and durable, and does not get out of order.

The self-inking pad manufactured by H. N. Baumgarten & Co., is an article which must commend itself to all stationers. Every pad sold is warranted for one year. With ordinary office use it has been known to last two years. Mr. Baumgarten claims to be the original inventor of the self-inking pad, having been the first in the field. The pads come in two sizes, but are also made to order in any size wanted.

Williams & Co., Bellows Falls, Vt., have succeeded to the business of S. T. Coy & Co., as packers of all grades of paperstock and woolen rags. S. T. Coy is now proprietor of the West Claremont Paper mill, and is a manufacturer of tissue manilla.

The bondholders of the Exeter (Mass.) Wood Pulp Company have taken possession, and the concern will probably be wound up. The assets will, it is thought, about pay the bonds.

J. R. Dayton & Co., booksellers, &c., Quincy, Ill., have been incorporated under the style of the Dayton Book and Paper Company, with an authorized capital stock of \$50,000.

C. Haubach, dealer in wall-paper, &c., Quincy, Ill., has taken his son into partnership, and the style of the firm is now C. Haubach & Son.

Graham & Co., publishers of the *Star*, Montreal, Quebec, have admitted R. K. Graham into membership. Style unchanged.

Grant & Brown, dealers in cards and novelties, Boston, Mass., have dissolved partnership. The firm is now J. E. Brown & Co.

Andress & Co., dealers in wall-paper, Cincinnati, Ohio, have dissolved. The firm is now C. F. Andress & Co.

G. W. Brooks, manufacturer of jewelers' cards and boxes, Boston, Mass., has been damaged by fire.

An assignment has been made by Jacob B. Smith, job printer and publisher of the *Times*, Altoona, Pa.

P. J. Ryan, dealer in Catholic books, &c., Springfield, Mass., has filed a petition in insolvency.

H. J. Laughlin & Co., publishers, Santa Marie, Cal., have disposed of their business.

J. D. Reymert, publisher of the *Pinal Drill*, Pinal, Ariz., has sold out.

J. F. Snelling, of Payot, Upham & Co., San Francisco, is in town.

Evans & Brody, New York city, have been sold out by the sheriff.

B. Harris & Son, stationers, &c., San Francisco, Cal., have sold out.

X. P. Snyder, publisher of the *Courier*, Connelville, Pa., has been burned out.

The estate of A. Mortimer, blank-book manufacturer, Ottawa, Ont., has been sold out.

Barrett & Gallagher, dealers in picture frames, &c., Baltimore, Md., have made an assignment.

The Crescent Label Company, St. Louis, Mo., has been incorporated with a capital stock of \$50,000.

John W. Leckie, manufacturer of twine, Pawtucket, R. I., is dead and his property has been attached.

The estate of N. D. Papert, bookseller and stationer, Marysville, Cal., has been succeeded by Phil. Engel.

Sanford & Wood, printers, Worcester, Mass., have dissolved partnership. O. B. Wood continues the business.

M. M. Raymond, manufacturer of baby-jumpers, Corry, Pa., has been succeeded by the Raymond Manufacturing Company.

Mathers & Atkinson, printers, Portage la Prairie, Man., have dissolved partnership. C. G. Atkinson continues the business.

J. A. Schleunes, manufacturer of morocco cases, Philadelphia, Pa., has compromised with his creditors at fifty cents on the dollar.

Hill & Hartley, manufacturers of plush goods, Philadelphia, Pa., have dissolved partnership. Campbell & Hartley succeed to the business.

Brown Brothers' paper warehouse, near East Hampton village, Conn., was destroyed by fire on Sunday night with all its contents. Loss not ascertained.

The Sheridan Paper Mill, at Marseilles, Ill., was burned on Sunday night. Loss, \$60,000; fully insured.

Wiser & Brown, printers, New Haven, Conn., have dissolved partnership. D. F. Wiser continues the business.

Mitchell & Rodgers, dealers in paper-hangings, Philadelphia, Pa., have dissolved partnership. Robert T. Mitchell continues the business.

French & Choate, dealers in stationers' specialties, New York city, have formed a limited partnership, with special capital of \$2,500, to April 1, 1889.

Palmer & Rey, dealers in printers' materials, San Francisco, Cal., have been attached in New York City for \$461. They dispute the claim against them.

Bacon, Priestly & Co., dealers in children's wagons, &c., Grand Rapids, Mich., have dis-

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c. &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statment and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

solved partnership. The business will be continued by Gurdon Corning.

John Geo. Bainbridge announces that he will continue the business of Henry Bainbridge & Co. under the same firm-name.

The Gilbert & Mallory Publishing Company, Louisville, Ky., has changed its name to the Bradley & Gilbert Company, with James C.

Irving Eaton, a son of Rev. W. H. Eaton, of Westfield, and employed in the Morgan envelope factory on Harrison avenue, Springfield, Mass., while at work Friday of last week, was badly hurt by an unwieldy packing-case.

Phil. Hake's line of fancy and fine stationery is most complete. It embraces all the newest styles of these goods and many designs of the firm's own origination, which have only been out a few weeks. It will pay buyers to inspect Mr. Hake's line before purchasing.

Edward Posen & Co. have had such a large sale in their fine art albums that they will bring out a much larger line next season. This is the first year that the New York branch of the firm has been established, and its success must be very gratifying to it.

George B. Hurd & Co. have just gotten up a very fine sample book of their line of wedding, visiting and business stationery. The book has a fine black cloth cover and contains 149 different samples of papers. A very beautiful variety is shown of embossed and hammered papers in silver, silver gray, Marguerite, turquoise, café and other shades. There are also shown alligator russet, drab, terra cotta, embossed morocco and a great variety of other kinds of fancy writing papers. Every dealer should have one. Copies will be sent on application to George B. Hurd & Co.

Allis & Conant have recently introduced a novelty in fancy goods. It is called the "Combination ladies' work-box and writing-desk." It is finished in plush and fancy leather, and is an article that is going to take. Another article recently introduced by the firm is a leather-covered adjustable hand-mirror with an easel back. The article has a fine French plate, bevel edge looking-glass. It does not become detached from the frame, and when not in use it forms a handsome leather case, which may be carried in the pocket. It is very convenient for travelers and tourists, as well as for others, being an exceptionally fancy shaving and toilet mirror. For the toilet it will be a most welcome companion to either a lady or gentleman.

A new monthly publication has appeared under the title of the *Journalist*. The April number is full of crisp, interesting facts and gossip pertaining to newspapers and newspaper men. The *Journalist* is a decidedly bright and newsy publication and must gain a large circulation outside of newspaper men. It is published in this city by C. A. Byrne and Leander Richard-son.

Glenwood J. Brann, picture-frame manufacturer, Boston, Mass., is reported failed. Liabilities, \$2,350. The assets are accounts for about \$1,560, and some real estate mortgaged for about \$1,900.

Hard & Parsons have brought out a new line of illuminated papeterie and card-cabinet stationery, and also some novelties in programme, menu and guest cards.

Otto Wonnburg has bought the stock of stationery, &c. of Horatio Kelley, Jamestown, D. T.

Selchow & Righter have issued their spring wholesale price-list.

Gilbert, president; John C. Herndon, vice-president, and William Harrison, secretary and treasurer.

C. F. A. Hinrichs has issued a new price-list of outdoor games and sporting goods, with special trade discounts.

John D. Suter, bookseller and stationer, Lynchburg, Va., has changed his style to John D. Suter & Co. He is about to enlarge his business, and will add a job printing department.

The Globe clip, made by the Globe Files Company, can be had in different styles. It is well made, and is remarkable for its strength of spring. It can be had at the New York office, 28 Bond street.

Jenkins & Thomas, printers, will shortly remove from No. 8 Spruce street to Nos. 165 to 171 Grand street. This removal is due to increased business demands. New equipment will be put in by the firm.

John C. Ward & Co., 389 Park avenue, Chicago, have published a book of tables under the title of "Comparative Weights of Standard Papers." It is a very convenient ready reference for printers and stationers, and will meet a demand. It will "save an immense amount of figuring."

Frederick H. Levey & Co. have issued a very handsome specimen book showing their brilliant black and colored printers' inks. The firm carries everything in this line mostly used by printers, such as news, extra news, book, book and cut, fine cut, job, wood-cut or card inks, and every variety of shade of blue, red, green, purple, yellow, white, brown, gold size, &c. The firm has a large line of superior bronze powders, together with printers' varnishes, transfer copying inks, &c. The prices are very reason-

"Tatine" in patented perforated pads is valuable for packing away with woolens, furs, &c. to keep out moths. It is also a disinfectant. It can be had of Thomas Manahan, 6 Reade street, New York.

The Powers Paper Company has a very fine line of fancy stationery which it is making a specialty of this season. Its line embraces everything of a rich and "toney" character, and will pay for the trouble of inspection.

The new family Bibles, imperial quarto, printed from large, clear type, lately issued by the National Publishing Company, Philadelphia, are magnificent volumes. They are bound in plain but exceedingly rich and beautiful designs, and are equal to the best London and Oxford Bibles, at a much less price. Copious notes and marginal readings are given with each chapter.

Clague, Wegman, Schlicht & Field, Rochester, N. Y., have appointed John F. Lash as their business manager for the Dominion of Canada. Mr. Lash is well known to business men throughout Canada as a man of energy, push and excellent business qualifications. He is a brother of Z. A. Lash, Q. C., late Deputy Minister of Justice. The office is located in Toronto, at 23 Adelaide street east, and the manufacture of both files and cabinets will be conducted at Toronto.

W. E. Jackson will remove from his present location at No. 62 Duane street, on May 1, to No. 46 West Broadway. Mr. Jackson will carry a full line of stationery and will also continue to receive orders for job printing. He has recently brought out a small line of steel pens. This embraces some seven numbers of business and school pens, all of which are controlled by him.

THE LAW OF COPYRIGHT.

(Continued.)

When the art of printing began to come into use, governments exercised the power of censorship over books as they had before done over manuscripts, and the printing of many books was forbidden. In 1501, printing was forbidden at Cologne, Mentz, Triens and Magdeburg, except under license. From this it followed that a license conferred a privilege, and in most cases this was exclusive. The oldest of these was granted by Henry Bishop, of Bamberg, in 1490. Similar privileges were granted in Venice, in 1491; Milan, 1495; France, 1507, and in Germany in 1510. It was in this last-named

year that, in England, one Thomas Godfrey received a patent *cum privilegio regali* for printing a work called "The History of King Bacchus."

These are not mere idle dates and dry facts. They show that the exclusive right to publish by printing was not a common law right, as some have contended, but a privilege derived from an act of the government, just as a patent is granted for an invention. Thus in 1543 a patent was issued to Richard Grafton and Edward Whitechurch to print the Book of Divine Service, and four years later Grafton received a special patent to print the statute books. In 1551 Laurentius Torrentinus received a seven years' patent to print the Digests and Pandects of the Roman Law. Two years later William Seres obtained a patent for the sole printing of primers containing the Psalter; and eight years later one Thomas Cooper obtained a like patent for printing an English "Dictionary." In the same year he secured another patent, which reads quaintly enough, but which is not without interest and instruction. It was "for printing a catechism in English with the brief of an A, B, C thereunto annexed." Also, for printing and reprinting such of the works of the Bishop of Winchester or Thomas Beacon as were "not contrary to the Holy Scriptures or proceedings in religion or the laws of the realm." This last paragraph, said the lecturer, contains the germ of a principle now inherent in the copyright law. Nothing clearly contrary to good morals or to public policy can invoke the protection of lawful copyright. That copyright, as relating to printed matter, did not have a common law origin is further shown, said the lecturer, by the fact that in the earliest period of printing in England, in 1523, Wynkin de Worde printed a grammar which was pirated. Whereupon he obtained a special privilege for the second edition. If the common law had afforded protection no such special aid would have been necessary.

It is, therefore, plain that copyright for printed matter had no common-law origin, and at common law does not exist. It is the creation of the government. This may be done by special grants without any general statute, or the protection may be afforded by statutory law.

The government may delegate the power, as was virtually done in England by the charter of the Stationers' Company in 1556, a narrow and oppressive corporation that engrossed the printing business. The Crown, however, continued to grant patents for printing, but so strong was the company that it attempted to infringe, but, as an old writer pithily says,

"They were advised to desist." More than a hundred years after the organization of the Stationers' Company its powers were modified and books were to be entered at Stationers' Hall. Here we have the origin of the registry of copyrights works. In 1709, the first copyright law clearly deserving the name was passed. It is known as the "Statute of Queen Anne." Books already printed were protected for twenty-one years, new books for fourteen years, with an extension of fourteen more if the author were living at the expiration of the first term. This related to all books except those exclusively the prerogative of the Crown. This is the foundation of English copyright law, and from it and the jurisprudence that grew up under it, the framers of the American Constitution received their ideas as to the propriety and justice of copyright.

And here, let me again impress that, in a legal sense, copyright, as it relates to the production of printed matter, is not a common law right. Neither, of course, can American copyright be a right inherited from the statute of Queen Anne or from any other British statute. Where then, shall we look for the foundation in our country of this branch of protection to literary property, so far as concerns federal protection? It exists only in Clause 8 of Section 8, of Article 1 of the Constitution. As the power of the several States to grant patents for inventions is undisputed, it would appear that State governments could grant copyrights for printed books. But this does not appear to have been done, and all things considered, would, perhaps, be of doubtful expediency where the clause of the Constitution just referred to authorizes Congress "To promote the progress of science and the useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." This is the only source from which national protection for printed matter can be obtained. It is important, therefore, to weigh its words and consider its import. In the first place, it is to be noted that there is no restriction as to nationality. Congress can grant the exclusive privilege to a foreigner the same as to a citizen, provided he is *bona fide* the author. Hence, it is eminently fitting that legislation concerning international copyright should come "by act of Congress," under this clear and strong provision of the Constitution.

Pastel colors are made in cylinders two or three inches long and quarter of an inch thick, like the familiar school black-board crayons. They are made of pipe-clay and chalk, mixed with coloring substances and mucilage, or thin gum.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, April 8, 1884.

Business is dull all around—dull in consequence of a general conservatism that pervades city and country. The manufacturer, the jobber, the retailer and the consumer are all moving with equal caution in business transactions. Purchases are small. The manufacturer lays in material from hand to mouth; the jobber is intent rather upon working off stock than upon accumulating it; the retailer guards carefully against overstocking and makes purchases often and in small quantities. All of these classes carefully avoid contracting debts and giving credits. In short, liquidating processes are applied severely. Only unquestionably responsible men can obtain credit. Cash purchasers are given most decided advantages. All classes appear to be fortifying against whatever contingencies of danger there may be lurking in the ambush of the invisible future. Yet trade is not horridly dull. The extreme caution which attends trade is sometimes mistaken for extreme dullness. Manufacturers and jobbers are not pressing their goods on the market, because the situation does not warrant any such proceeding. Nobody is grieving over the situation. Cheerfulness prevails almost universally, and the dawn of a better day is confidently expected.

Easter goods are going off pretty well considering that the mind of the public has been diverted from such matters by the event of March 28 and 29, which people elsewhere call a mob and which Cincinnatians know to have been a revolution. By the way, the burning of the courthouse with its records will make occasion for the sale of quite a large quantity of blank-books for the restoration, as far as possible, of these destroyed records. In the probate office everything is gone, burnt to ashes. Records of marriages and births, records of proceedings by executors and administrators, records of wills—all gone to cinders and ashes. Fortunately, nearly everything in the recorder's office was saved. In this office are the records of land titles, deeds, mortgages, and the like. All of this revolution was on Friday night, an expression of popular indignation at perversions of the law and of the petit jury system for the benefit of confessed murderers. There was an immediate occasion for it and it was a sufficient one. On Saturday night the mob, as mobs always do, sent out some pillaging offshoots and ceased to represent the popular indignation. Already measures have been taken in the Legislature to institute a reform. A public sentiment has been so firmly grounded that reckless attorneys and unprincipled jurors will hardly dare assault it hereafter.

Manufacturing stationers have a reasonable amount of orders on hand—not enough to require working extra time by their help, but enough to keep all hands busy. Prices and wages are fairly remunerative. A reaction which seems to be general has set in against working for fun or for nothing. Most people who run to the extreme in small margins have had enough of them. The business principle that investments of capital, skill, experience, judgment, time and energy must pay is pretty generally recognized. About all of those who ignored this principle have made assignments already.

The indications for a good wheat crop are quite up to the average. The spring howl from the farmers that the wheat is nearly all winter killed, and that there will be no fruit, has not

yet been heard with its customary vehemence. Some fruit, no doubt, was winter killed; but late examinations show that there is a bare prospect for a thin crop of peaches in some orchards in Southern Ohio.

PRINCE WILLIAM.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 10, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE copyright bill, which has been reported to the House has been got out of sight, and we don't know but that it might as well stay there. One of the very inexplicable features of the copyright question is that the free-traders are seemingly its most earnest advocates, taking strong ground in favor of according as much protection to the foreign as to the native book-makers, and not declaring against the privilege of copyright in any form. This is one of the things which induces a suspicion of the ingenuousness of some of those who are most opposed to a tariff.

CONSUL McLAIN, of Nassau, notes for the last six months of 1883 the development of a new branch of trade with the United States, namely, Christmas toys, fancy articles and holiday goods in general, which heretofore came from England. How simply this came shows how easily trade is diverted from one channel to another. The failure of the British steamers to arrive in time on several occasions—once coming in to port after the holidays—induced some dealers to try the American market a year ago, the venture proving so satisfactory that last year the windows and counters of some leading merchants were filled with very attractive goods of this sort purchased in New York, and which were eagerly sought for and afforded a satisfactory profit to the dealers. This trade, now fairly inaugurated, will not, we are assured, drift back again into the old channels with the "mother country." If "a word to the wise" is sufficient, our trade can develop many more channels of commerce like that indicated. But care must be taken not to rush business.

THE bill to promote popular education passed the United States Senate on Monday and has gone to the House of Representatives for concurrence. What the latter body will do with it is uncertain, and the chances are that the measure will hang on the hooks until too late for final action by the present Congress. The appropriation for the support of public schools has been fixed in the bill at \$77,000,000, of which amount the first year's expenditure is to be \$7,000,000, the second year, \$10,000,000, and the third, \$15,000,000, after which the expenditure is to be annually reduced in the sum of \$2,000,000, until the eighth year, when the unexpended balance of \$5,000,000 is to be distributed. This money is proposed to be paid to the different States in proportion to the illiterate population in each State, the purpose being to advance the educational and mental standing of that portion of the American people which just now is in greatest educational need. The details of the bill designed to quicken the effort to educate the people are closely drawn, and ought to be approved by the public. The effect of this pending enactment, if it shall reach final adoption, will be to stimulate and increase business in the allied paper-making, publishing and sta-

tionary interests. Considering it from this point of view alone, selfish, perhaps, but not the less desirable, we are sure that readers of THE STATIONER will heartily advocate the passage of the measure; and whatever influence they can exert to further it will be directly to their own advantage. Aside from this, there are broad reasons, which we are sure will readily suggest themselves to an intelligent constituency such as ours, why the cause of education should be furthered and support given to it by such financial aid as the government can well afford to bestow. We need not, therefore, enter into a review of these reasons. This is not a question of politics or partisanship, and wherever or whenever the effort shall be made to give it such a cast, it is the high duty of earnest citizens who love their country and look for its moral and material advancement, to oppose and frown upon every attempt to take the matter of education into politics. We are getting sick of politics and politicians of all shades and differences of opinion, inasmuch as party principles are not defined on very broad lines, and they have become too much the toy of men who seek to utilize them only for their own benefit. The common sense and better judgment of the people should prevail, and we know that these are altogether in favor of popular education and of the eradication of illiteracy in the masses.

ROUNDOUBTS.

BY THE TRADE LOUNGER.

While the cause of popular education is progressing in the National Legislature, the Legislature of New Jersey has under consideration a proposition to restrict the studies in the public schools of that State. Why is this?

Perhaps by and by some of the Jersey statesmen will think that even the "three Rs" are too much for their constituencies.

Alligator skins for this market must be at least five feet long. The leather goods manufacturers have taken pity on the young alligators, and in order to prevent indiscriminate slaughter have adopted the foregoing rule. It is alleged that this is done to prevent the taking of skins which are too small to be of much value. Now, I want to ask; What effect will this resolution have on the price of mutton?

As a general thing, the Easter goods this season are more varied and novel than those of last season, although it was believed then they had attained the highest state of artistic beauty and ingenuity. The custom of sending dainty cards, painted or embossed in flowers or covered with pictures, has extended further, and now prettily tinted eggs are sent to friends.

A very dainty Easter gift is a little box of satin or plush in the form of an egg, which opens and discloses two bottles of cologne. A large bow of ribbon is placed on one end, and the outside is frequently hand painted. One of pale-blue satin, hand painted in apple-blossoms and bordered with pale-blue chenille, is exceed-

ingly pretty. The bottles are cut-glass and are filled with the best white-rose perfume.

Little ink bottles, scent-bags, work-boxes and bonbon boxes are all shown in the form of eggs. Dark blue, purple and green velvet are seen in the former, while the bonbon boxes are very artistic, some being ornamented on the top by a natural calla or Ascension lily, while others have hand-painted clusters of flowers, bunches of artificial cherries, and the like.

Here is another shot at the type-setters: One of our city printers is said to have ruined the happiness of an artist and started a suit for damages to lacerated feelings. The programme of a concert was sent to be printed, and when it was distributed, one of the virtuosi found himself laid out in cold type as a "milkman pianist" instead of "eminent pianist." He refused to play, and is about to sue the managers of the concert, claiming that the thing was an intentional slight. Fortunately for the managers, it is not known that any milkman is involved, or he, too, might feel aggrieved. To some people the weight of war might seem to be evenly balanced as between the milkmen and pianists.

The columns of THE STATIONER were very suggestive of mourning last week. It is rare that the trade are called upon to write their condolences in so many instances as were noted in your last issue. Let us mourn with those that mourn and weep with those that weep. Our sympathy will not be vainly expended and we should plant the forget-me-not over the resting-place of those who were so long and faithfully identified with the trade and its interests.

ANSWERS TO CORRESPONDENTS.

W. H. asks for address of dealers in French fashion magazines.

Ans.—International News Company, 29 Beekman street, New York. American News Company.

L. Brothers & Co. want names of some manufacturers of cheap playing cards, making reference to a remark made by the "Trade Lounger."

Ans.—David Lesser, 211 Centre street, New York.

E. E. C. wants address of manufacturer of cut papers for meats, &c.

Ans.—George J. Kraft, 48 Maiden lane, New York, and Chadwick & Miller, 323 Pearl street, New York.

W. & Son ask for address of New York and Monterey Manufacturing Company.

Ans.—Temple Court, 7 and 9 Beekman street, New York.

G. H. R. incloses a Tompkins sample mailing envelope and wants address of manufacturer.

Ans.—R. H. Penfield, 79 Cedar street, New York.

Subscriber inquires who makes the American copying pad.

Ans.—Joseph Garrus, 309 Broadway, New York. You can get them of Henry Bainbridge & Co.

S. wants to know address of manufacturer of American writing fluid.

Ans.—American Ink Company, Washington, D. C.

C. & Co. want information about Quackenbosh's ready reference desk rack; what they are like, price, &c.

Ans.—We don't know the article and don't find anybody that does. Will some one tell us?

F. J. B. wants names of dealers in framed pictures, chromos, &c.

Ans.—T. O. Young, 116 Duane street, New

York; J. L. Ludwig, 98 Duane street, New York; Charles Taber & Co., New Bedford, Mass.

--------------------------------------	-------

GLAZE PRINTING INKS.—In order to give printing inks a rich bronze-like appearance, the following may be adopted: Take twelve ounces of shellac and dissolve in half a gallon of spirits of wine of a strength of ninety-five degrees. After standing for twenty-four hours add seven ounces of aniline red and leave it standing for a few hours. The liquid will then be ready for use, and may be added in small quantities, as required, to good black, blue or other dark inks.

Dealers wishing to order anything in the line of blank-books should remember that S. M. & E. Vernon have a number of very popular specialties of this character. The firm is doing

considerable business in its manilla order-books. It has recently adopted an extra quality of superfine press-board of a light creamy shade for blank-book covers, and this is proving very acceptable to buyers. The number of duplicate orders received for its medium quality blank-books justify the expression that they are one of the best lines of goods ever put in the market. The active demand for the "Golden Rule" blank-book is fully meeting the expectations of its makers. The firm has recently added to its line a composition book for the use of schools. This has a handsomely illustrated cover and is excellently adapted for its purpose.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, April 9, 1884. }

THE MONEY MARKET.—There has been no quotable change in the money market, there being still a superabundance of loanable funds, and the stereotyped quotations of the past two weeks being still current. The stock market has again ruled dull and featureless, with speculation of narrow proportions and values showing an upward tendency. Railroad bonds were moderately active and irregular, with the majority of changes fractional. Government bonds continue strong at unchanged prices. Foreign exchange has not been active, but advanced rates are firmly maintained.

THE PAPER MARKET.—The improvement in the paper trade continues to make very slow progress, and where there has been any improvement at all, it is, in most instances, at the expense of smaller profits. The general situation is not, however, without some hopeful indications, among the most prominent of which is the diminishing failures, both in numbers and importance. As compared with business a month ago, the volume of transactions thus far this month is mostly reported as somewhat larger, and in the opinion of some of the most careful thinking men of the trade, it begins to look as though a step had been taken toward renewed activity upon a little lower plane of values, to which some of the coarse grades of manilla and straw wrappings and straw boards have been tending of late, owing to the decline in the raw material, jute butts and bagging. For all grades into which straw enters into the composition lower prices cannot reasonably be expected, as a considerable portion of the crop is said to have been bought up at an advance, the price in the East ranging from \$10 to \$12 per ton at the mills. Fine papers, more particularly writings, held their own very well, the adjustment between the supply and demand being closer than in other grades. Print papers may be said to be fairly steady, notwithstanding the large and unlimited production, and prices have been brought down so low that the closest buyer cannot reasonably ask or expect to receive any further concessions. In fact, there can be no just ground for complaint when they contract at the mills for a fair grade of book paper at 7½¢ to 7¾¢, and get all the news they may want at 5½¢ to 5¾¢.

THE STATIONERY MARKET.—There is no variation perceptible in business this week. The general indications are what are commonly termed quiet. Yet there is a more hopeful feeling among dealers, who look for a better condition of trade in the latter part of the month. It is generally believed that there will be a late spring trade, the ground for this belief being based on the theory that buyers cannot do without goods all the year. There is a steady demand for fine stationery, excepting fancy grades, which move rather slowly. The movement in albums is also steady, but most of the orders received are for fall delivery. There is a good demand for stylographic pens just now, particularly of the cheaper grades, which have become almost as indispensable to the business and professional world as a bottle of ink or sheet of writing-paper. In plush goods the movement is quiet, excepting in a few specialties, which are being pushed by enterprising producers. There is no perceptible activity in blank-books and envelopes, which remain about the same as last reported.

SANFORD'S

Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat.

Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

PHILADELPHIA, PA.

OBITUARY.

FREDERICK LEYPOLDT.

The minute adopted at the meeting of the book trade last week in consideration of the death of Frederick Leyppoldt was as follows:

In the death of Mr. Frederick Leyppoldt the American book trade has lost the valuable services of one who for many years labored with signal ability and unselfish devotion to promote its best interests.

Mr. Leyppoldt was first identified with the trade as a publisher of books, to which business he brought a large intelligence and a high ideal; and when, subsequently, he established the *Publishers' Weekly* as an organ of the trade, it was in the hope that he might be instrumental in placing it upon higher and broader foundations. He brought to the difficult and often delicate responsibilities of his editorial position great earnestness of purpose and purity of motive, combined with a singular thoroughness and almost scientific precision. With unwearied industry and patience, year in and year out, and often under keen disappointments and discouragement, he continued his labors, and those who knew him best will bear willing testimony not only to the faithfulness of the service, but to the generous impulses and almost heroic self-sacrifice which always characterized the man and his work.

The public libraries of the country are largely indebted to him for the establishment of the *Library Journal*, and for a steadfast, earnest and effective fidelity to their interests. To him also the publishers, booksellers and book buyers are indebted for the American Catalogue, to the preparation of which he brought the rarest qualifications, and to which he gave long years of industrious and exhaustive labor. This is indeed his fitting monument, which will remain the most comprehensive American Bibliography, and become the permanent basis of all similar works hereafter. What it cost him, they only know who knew him best; while its constant use by those for whom it was specially prepared is full proof of its value.

The representatives of the trade here assembled desire to put on record not only their recognition of his conscientious and intelligent industry, which tended to make bibliography almost an exact science, and in thus facilitating the work of the book-maker, bookseller and book buyer, rendered invaluable service to the cause of American literature; but also to his blameless character and widespread usefulness, and to the loss which the trade and reading public has suffered in his death; therefore, be it resolved, that this minute be printed in the *Publishers' Weekly* and the *American Bookseller*, and that a copy be sent to his editorial associates, and also to Mrs. Leyppoldt.

ELI PERKINS'S LIVE COMMERCIAL TRAVELER.

Sheriff Wiggins, of Dallas, Texas, made it a prominent part of his business to ferret out and punish commercial travelers who traveled in Texas without license; but one morning he met his match, a genuine Yankee drummer.

"What have you got to sell? Anything?" asked the sheriff, as he met Connecticut man on the streets.

"Oh, yes; I'm selling medicine—patent medicine. Selling Radway's Ready Relief, and it's the best thing in the world. You ought to try a bottle. It will cure your ager; cure rheumatism; cure anything."

"And you will sell me a case?"

"Sartenly, sir; glad to."

Then the sheriff bought a case.

"Anything more?" asked the drummer.

"Yes, sir; I want to see your license for selling goods in Texas. That is my duty as the high sheriff of Dallas County."

The drummer showed him a document, fixed up good and strong, in black and white. The sheriff looked at it and pronounced it "al

right." Then, turning to the commercial traveler, he said :

"I don't know, now that I've bought this stuff, that I shall ever want it. I reckon that I may as well sell it to you again. What will you give for it?"

"Oh, I don't know that the darned stuff is any use to me, but seeing it's you, sheriff, I'll give you a dollar for the lot, if you really don't want it."

The sheriff delivered back the medicine at four dollars discount from his own purchase and received his change.

"Now," said the drummer, "I've got a question or two to ask you. Hev you got a drummer's license about your trousers anywhere?"

"No; I haven't any use for the article myself," replied the sheriff.

"Hain't eh? Wal, I guess we'll see about that pretty darned soon. If I understand the law, it's a clean case that you've been tradin' with me, and hawkin' and peddlin' Radway's Ready Relief on the highway, and I shall inform on you—darn'd ef I don't neow!"

When the Yankee reached the court house he made his complaint, and the sheriff was fined eight dollars for selling goods without a license.

The sheriff was heard afterward to say that "you might as well try to hold a greased eel as a live Yankee.—*Wit and Humor of the Age.*

HOW ADVERTISING WORKS.

Colonel Pierce, of the *Chicago News*, gave, in the course of a recent address to the editors of Indiana, some thoughts with reference to advertising that are well worth remembering. After premising that a man never realizes the full benefits of advertising until he has placed the matter before the people fifty or one hundred times, the Colonel presents this valuable table, which, however, is simply an elaboration of the one generally credited to Stephen Girard :

The first time a man sees an advertisement he does not see it.

The second time he does not notice it.

The third time he is dimly conscious of it.

The fourth time he faintly remembers something of the kind before.

The fifth time he half reads it.

The sixth time he turns his nose up to it.

The seventh time he throws his paper down impatiently.

The eighth time he ejaculates : "There's the confounded thing again."

The ninth time he wonders if there's anything in it.

The tenth time he thinks it might possibly suit somebody else's case.

The eleventh time he thinks he will ask his neighbor if he has tried it, or knows anything about it.

The twelfth time he wonders if the advertiser can make it pay.

The thirteenth time he rather thinks it must be a good thing.

The fourteenth time he happens to think it is just what he wanted.

The fifteenth time he for a long time resolves to try it as soon as he can afford it.

The sixteenth time he examines the address carefully, and makes a memorandum of it.

The seventeenth time he is tantalized to think he is hardly able to afford it.

The eighteenth time he sees painfully how much he is in need of that particular thing.

The nineteenth time he counts his money to see how much he would have left if he bought it.

The twentieth time he rushes frantically forth and buys it.

One of Prang's latest publications is from an original design by W. Hamilton Gibson, which was especially conceived for Easter. It is emblematic in idea and treatment, and is in many respects a very interesting example of color effect in lithography. The design represents a flight of butterflies escaping from their chrysalis condition and winging their way upward to the sunlight; but instead of concentrating his effort upon the butterflies, whose "gayly painted" wings are generally supposed to be susceptible of high coloring, the artist has created an atmosphere of golden light, which, beginning in the deepest gloom, culminates in a dazzling radiance above. Very few people probably realize how much labor goes to the perfection of such a reproduction, and many will be surprised to learn that it requires no less than twenty distinct printings, the exactitude of each of which must be absolutely faultless.

WHITMORE BROTHERS & CO.,
172, 174, 176 Lincoln Street, Boston, Mass.,
WHOLESALE MANUFACTURERS OF
SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.
Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers,

LIQUID FOR ETCHING GLASS.

Rub together in a porcelain mortar equal parts of (non-fuming) hydrofluoric acid, fluoride of ammonium, and dry sulphate of barium. The latter should have been precipitated from a solution of chloride of barium by an excess of sulphuric acid, washed well by decantation, filtered, and dried at 120° C. The mixture is then poured into a platinum, lead, or rubber vessel, and gradually mixed with fuming hydrofluoric acid, while being thoroughly stirred with a rod made of one of the just-mentioned substances until the magma is rather soft. This thickish liquid may be used for writing on glass with a steel pen. The etching takes place at once, and leaves very handsome opaque marks. It is advisable not to allow the action to continue over twenty seconds, as the edges of the marks may lose their sharpness. If a less strong acid is used, the edges are less liable to be jagged, but the marks are generally less plain.

The thick liquid must be kept in rubber bottles, or may be kept in glass vessels if the latter are coated inside with wax or paraffin. The barium salt is added to prevent the mass from running. It is apt to settle to the bottom in a dense mass, and must be incorporated by shaking before use. Should this be found difficult, some lead-shot may be dropped into the mixture and shaken up with it.

It should always be remembered that strong hydrofluoric acid is apt to produce very painful and even dangerous sores upon the skin. Caution should, therefore, be observed in using the mixture. [When shaking the bottle, the hands should be wrapped in a towel, and the shaking should be done in such a direction that none of the liquid can be thrown into the face.]

Dr. Ehrlich, of Görlitz, reports that he has had much experience in etching glass and that on one occasion the etching liquid, instead of producing the usual dull or opaque marks, caused the etched places to be perfectly transparent. It was found that opaque etching is effected only by neutral fluoride of ammonium.

If hydrofluoric acid is evaporated (in a lead or platinum capsule, or in an ordinary porcelain capsule lined with sheet-rubber) after having been neutralized with ammonia, the acid salt— $\text{NH}_4\text{F} \cdot \text{HF}$, is always obtained, since a portion of the ammonia is lost by evaporation. The neutral salt is only obtained if the contents of the capsule are repeatedly neutralized with ammonia during the evaporation.—*Pharm. Zeit.*

James D. Whitmore & Co. have placed in the hands of their traveling representatives, the new line of orders of dance for the season of 1884-85. Great expense has been incurred and a vast amount of labor expended to make this line eclipse former efforts of this house, and the large orders placed for early delivery bear ample testimony to its worth. They have also gone largely into fine plate printing and engraving and shows some beautiful specimens of work. Any of the trade desiring special designs for their customers for letter-headings, &c., will be furnished the same without charge, if an order is placed. They have just published a very complete and useful book, containing samples of all of the latest novelties in papers, giving the different weights, sizes, &c., which they will furnish to the trade on application.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

ELECTRO-PLATING WITH NICKEL.

BY WILLIAM H. WAHL *

[Continued.]

GENERAL OBSERVATIONS.

Where the double sulphate of nickel and ammonium is used, it is important that the operator should bear in mind the caution to maintain bath as nearly neutral as possible. There is a diversity of opinion among the nickel-platers upon this point, some preferring to operate with a slightly acid bath, while others prefer the opposite condition. Experience has shown that the solution will give satisfactory results either when slightly acid or slightly alkaline, and, as the chemical character of the bath during electrolysis is constantly being modified, it is manifestly impossible for the operator to do more than to keep his solution approximately in the right condition. A strongly acid solution will fail to give a deposit. When the bath therefore is found to be in this condition, the addition of sufficient ammonia to restore its neutrality will bring it to working condition.

It is only by accident or carelessness, however, that the solution will become inoperative from this cause, as the chemical changes which occur in the solution of this salt, under the influence of the electrical current, and under the conditions in which it is commonly used in the plating bath are such as to cause it to gradually assume an alkaline character. This is due to the fact that not simply sulphate of nickel, but to some extent also sulphate of ammonium, undergoes decomposition into its proximate constituents. The sulphuric acid set free by the decomposition of the ammonium sulphate will form an equivalent quantity of sulphate of nickel by solution of the anode, while the ammonia will remain free, and gradually, as it accumulates, will impart a decided alkalinity to the bath. The more intense the current employed, the more rapid will be the decomposition of the solution and the liberation of free ammonia. As this change progresses, the quality of the work is more or less unfavorably influenced. Accompanying this change, especially where the current employed is irregular and at times too intense, there is also a precipitation of some of the nickel, probably in the form of basic salt, by which the metallic strength of the bath is impaired, and which necessitates the addition of fresh quantities of the double sulphate from time to time. Where a current of only moderate intensity is used, and which is uniformly maintained, these difficulties will be reduced to a minimum, and the solution will maintain itself in good working order for a long time, requiring only the occasional addition of a little sulphuric acid to correct any pronounced alkalinity that may be exhibited when tested, as it should be at frequent intervals, with test-paper. As metallic nickel is difficultly soluble, the use of comparatively large anode surfaces is necessary, because the nickel dissolves so slowly that if the anode surface exposed in the depositing vat is not considerably larger than that of the objects on which the deposit is made, the solution will not keep saturated. There is another reason for the use of a comparatively large anode surface, which will appear further on.

From the preceding remarks it will be unnecessary, perhaps, to add that the double sulphate solution commonly used by nickel-platers presents greater difficulties in its em-

* A paper read before the Chemical Section of the Franklin Institute.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$8.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. Envelopes and Writing Papers

THE ENVELOPES and WRITING PAPERS manufactured and sold by the PLIMPTON MFG. Co., of Hartford, Conn., are unsurpassed in quality and styles by any other manufacturer in the world, and their prices are as low, if not lower, and their facilities for furnishing printed Envelopes are unequalled. Address

PLIMPTON MFG. COMPANY,

HARTFORD, CONN.

ployment than the acid solutions of Potts and others.

Again, the strength of the current should be carefully regulated according to the surface of the articles in the bath, as otherwise the work will be apt to "burn," that is, the metal will be precipitated a dark gray or black deposit, which discolours and renders it useless. This is evidence of a current of too great intensity. To obviate this difficulty, the plan is generally adopted by careful operators of suspending a plate of nickel, presenting considerable surface at both ends of the rod from which the articles are suspended in the bath. By thus diverting the current, the "burning" of the work is prevented.

As a general rule, it is well to observe that, other things being equal, the slower the rate of deposition, the more adherent and tenacious the coating of deposited metal will be. Where the metal deposits too rapidly, the deposit is apt to be brittle, and to exhibit, especially in the case of a heavy coating, a tendency to split and flake. This is due to the liberation of hydrogen at the cathode, and which is occluded by the electro-deposited metal. To obtain satisfactory results, it is important that the articles should be "struck," that is, receive a uniform coating immediately after they are immersed in the bath. This is an indication that the articles have been properly cleaned and are in a proper condition to receive the deposit, and also that the bath is working properly. After this first layer has been deposited, the subsequent rate of deposition is much slower, for the reason that the deposit of nickel on nickel does not take place as readily as upon a foreign metal, a rule which appears to hold good of all metals.

GILT-EDGED STATIONERY.

"A thing well bought is half sold."

The speaker was a busy young man in a little den of a back office on Broadway. He was industriously filling large envelopes with stationery and jewelry of imitation gold and gems.

"Now, here you see," he said, "that I place in this envelope, just what I claim to be upon the outside—twenty-four sheets of fine note-paper, twenty-four envelopes, one Milton gold pen, one good lead-pencil, one penholder, one key ring, one finger ring and a pair of sleeve buttons. The retail price of these articles in any store is \$1.05, yet the envelope and its contents are sold for twenty-five cents, and I furnish it to agents for ten cents. Leaving out the jewelry, which comes much cheaper than I would care to mention, though I leave it to you if it is not good-looking, and it certainly wears well—there is more than ten cents' worth of stationery in a package, speaking from the wholesaler's standpoint. I never could live in this business a moment if I didn't keep my eyes well open and jump for the bargains. It's wonderful what good things a man can strike in this big city if he keeps his wits about him. I sometimes get lots of fine paper at prices which would not pay for the raw material. But the joke of it is my customers do not like superfine paper, the surface is not smooth enough for them. Cheap paper takes the best with them."

"Where do these packages sell?" asked a reporter.

"Out West, largely, and along the water front. Sailors buy lots of them, and put on the jewelry they find inside, no matter whether it be sleeve buttons or watch chains or earrings. In the rural regions of the West, many people will not buy stationery unless it comes with some sort of a prize attached. Chromos? No, chromos can't compare with this imitation gold for cheapness. But, as I said before, it is shrewd buying which makes my business a possibility."

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

LOUISVILLE ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., April 12, 1884.

When trade is in a booming condition, it is not readily affected by any such slight impediment as bad weather, but when business needs coaxing to maintain even ordinary activity, and when the commercial temper is conservative instead of rash, an unseasonable course of the thermometer exerts an immediate adverse influence. And so it is here this week that trade which was proceeding only "moderately active" and "fairly satisfactory," has, under the bearish surroundings, been changed to "only fair," and "rather quiet." The favorable weather situation prevailing at the close of last week gave way suddenly to a spell of cold, cloudy and depressing weather. The first days of this week brought gloom and attempts at snow; on Tuesday it was down to freezing point with a wintry breeze of some severity; Thursday and Friday the sun made a start at clearing up, but to-day the rain is pouring in torrents. Spring trade and spring farming operations, which were making a good fight against the weather clerk, have had another unpleasant tussle with retarding elements this week. But while business on the whole has not experienced the long looked for revival, there are several departments of trade that are enjoying a brisk and healthy movement. To-day's local papers report special activity among jobbers of groceries, hardware, dry goods, notions and clothing, and note that country buyers have taken hold as if they had no further time for trifling with the fickle and eccentric moods of this peculiar year. In agricultural circles perishable buds have not developed sufficiently to be damaged by the current frosts, but everything is backward—unseasonably late.

The distillery interests are stagnant, Congress having in its wisdom or prejudice refused to extend the aid of a little special legislation which was expected to revive the trade.

The stationers, printers, blank-book makers and paper-box factories are all busy with an encouraging lot of orders, and the feeling in these lines is very satisfactory.

The Easter card business has been irregular, but in the main, successful with Louisville dealers, for not a stationer's that I passed to-day, whose show-windows were not robbed of the varied displays of cards which have adorned them for a few weeks past, the cards had been

well sold-off, even down to the show-window pieces.

As remarked in THE STATIONER recently, there are so many Easter and other cards on the market that it is difficult to see how any firm, in the face of the varied and unlimited designs in these goods, can claim to have brought out anything new. Nevertheless, there issued from Morton's publishing-house last week a tiny book, so rare and chaste in subject and execution, and so appropriate as an Easter souvenir, as to make it distinctly a novelty. This dainty volume consists of some twenty five sheets, 16mo size, of parchment paper, in white, blue and yellow tints, printed in blue and red ink in alternating sections, with parchment cover, all bound or corded together with a delicate silk ribbon. The printing is on one side only of each leaf; the title-page is at the back of the volume, and the reader begins the story there and proceeds to the left instead of the right in following the pages. The volume, "The Story of a Picture," is written by and its mechanical execution designed by Douglas Sherley, author of "The Valley of Unrest," and is pronounced a refreshing literary and artistic departure. The first edition was entirely exhausted to-day.

A stationer to-day showed me an order of the dance printed on common strawboard, with cord and tassel of hemp twine, which the same will be used at a swell hop at a leading hotel next week.

Among the visiting members of the trade this week were John B. Gunn, for Eberhard Faber; Harry C. M. Conkling, for Louis Dejonge & Co.; and Count Hilmar Stephany, for I. H. Hamburger.

BOURBON.

DAYTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, April 14, 1884.

Warm weather seems to have set in at last, and none too soon to suit us. We hope now for better trade; it has been and is dull and no mistake.

The retailers here all report a good trade in Easter cards and novelties which are rather new goods, as yet, in this part of the country, but the trade increases in them each year.

Crane, Jackson & Crane, of our city, have decided to drop miscellaneous books from their stock and confine themselves more exclusively to art goods and wall papers. They have the finest store in Central or Southern Ohio.

Reynolds & Reynolds have again found their quarters too small, and are having an addition of 35 x 65 feet made to their factory. They

hope, when this is completed, to at least keep within sight of their orders.

The Holden Manufacturing Company has removed its factory to a new building, and, with largely increased space and power, expects to add largely to the sales of its specialties.

R. A. Rogers & Co. are very busy with their specialties, and find a large trade for their grease-proof paper-dishes, which are a new departure.

Traveling salesmen are not very plenty just now, but we manage to survive their absence. Genial Frank Johnson put in an appearance in the interests of Leibenroth, Von Auw & Co., and reports a fair trade. Mr. Marks, of the Dixon Crucible Company, was here on Friday last, and left on the night express for Pittsburg. When a few miles out the whole train was wrecked and Mr. Marks was severely hurt, but not enough to keep him from helping others less able than himself to escape.

The business among the paper-mills is not particularly remunerative throughout the

MIAMI VALLEY.

WILMINGTON WHITTLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., April 15, 1884.

The weather during the closing week of the Easter season was as propitious as could be desired. Its influences were irresistible, and buyers thronged our streets and stores in search of the beautiful cards and novelties so temptingly offered. The designs and execution of this season's stock, were the subject of much favorable comment, and it was difficult to decide whose productions were deserving the most praise. Their sale by some of the trade was far in excess of last year, while others did not do so well, but the trade in general seem satisfied with results.

While writing about cards, I am reminded of a great nuisance met by the trade in general. I refer to the difficulty of obtaining envelopes to fit the various sizes of plain birthday and other cards. The fringe cards are provided for; but it seems strange that manufacturers and importers do not recognize the importance of supplying with envelopes each and every plain card put on the market. The fault lies with them and not with the envelope dealer.

The cost of envelope could be added to the price of card and would not be objectionable to the trade. Some of the more enterprising envelope firms have in a measure met the want, but the great diversity of sizes baffles them.

If improvements are any evidence of a city's growth, a stroll through our streets will con-

vince any one that the spirit of progress is no stranger to our people.

Since a year ago many of the old landmarks in all sections of the city have disappeared and fine structures of more modern design and comfort have taken their place.

Noticeable are the changes among our Market street merchants, whose increasing business requiring more eligible sites, have sought to locate further uptown. To accommodate the demand, property owners have yielded to the pressure and converted many of the old dwellings into desirable stores, and which are readily occupied.

Among those who have recognized the necessity of seeking unexplored localities is the new firm of First & Davis, stationers and newsdealers, who have opened a branch store at 717 Market street. H. E. First has charge of the new enterprise, and his experience of several years with E. S. R. Butler eminently qualifies him to successfully manage it. Geo. H. Davis, the pioneer of the Sunday newspaper trade in this city, conducts the down-town branch, where his knowledge of that particular branch will be invaluable.

Ferris Brothers, printers, have lately added a bindery to their establishment, thus securing better facilities for handling book and pamphlet work. This firm has in press the "Wilmington City Directory," a publication of its own.

The James & Webb Printing Company, on April 5, announced a "new departure" in its manner of conducting business. The innovation was its first annual "clearing out" sale, to continue thirty days, of certain kinds of goods usually carried over from one season to another. The list comprised a large assortment of books, autograph, photograph and scrap albums, and judging from the prices marked in these goods buyers certainly secured bargains. By a liberal use of printer's ink large numbers attended the sale last week and the result was very gratifying to those interested. By this method the firm cleans out odds and ends, which are bound to accumulate and the advantage of placing new goods only before their patrons next season.

The following-named persons have visited the trade since my last letter : H. P. French, French & Choate, New York; D. H. Putman, Geo. B. Hurd & Co., New York; M. P. Bixby, S. M. Bixby & Co., New York; Jas. J. Fitz-Gerald, J. E. Linde, New York; H. P. Beach, Eagle Pencil Company, New York; P. H. Hickman, W. M. Bradley & Brother, Philadelphia.

TRACY.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., Boston, April 15, 1884.

I have had occasion in a former communication to note the proposed opening of an Exchange, where out-of-town printers, stationers, booksellers and paper dealers could rendezvous while visiting the city. Well, the project has been consummated, and the "Stationers and Printers' Exchange" is now open, to which all are invited. Your correspondent has located his "sanctum" in a pleasant corner of this exchange, and henceforth his Boston epistles will issue therefrom. Circulars have been sent out quite freely to the trades, and there is no doubt but in my next I will be able to give mention of numerous visitors.

In my rambles about the city I have had frequent occasion to mention the Exchange to a number of dealers, and I find that they consider

"the point well taken." But then I must admit that I have met two or three whose bump of penetration is not sufficiently developed to enable them to see any further than their money-drawer, and these old fossilized cash-books want to know What's the good of it? What's it for? To accommodate the hundreds of buyers who visit the city every week; to furnish them with a rendezvous in the business part of the city, where the daily papers will be found on file; to furnish also pens, paper and ink with which to write; to provide a ready means of communication by the use of the telephone and messenger service; to offer a room to which the numerous little purchases of the day can be sent and where they can be found altogether by the visiting buyers; and to enable the trades to become acquainted with each other. These, sir, are some of the objects of the Exchange, and for which it is established.

"But the hotels offer all these of facilities," observed my old conservative friend, "and this exchange is going to cost somebody some money."

Certainly the hotels do, but they didn't fifty years ago. This is an age of progress, and although the Stationers and Printers' Exchange will cost somebody a few hundred dollars, there are some few enterprising and progressive men in this town who are trying to let the world know that Boston is not only the "Hub" of the universe, but a "whole cart-wheel." These are the men who bring trade to the city. It is to this kind of men that Boston owes her commercial standing.

These are the men who have built the Boot and Shoe Exchange and who have made of Boston the shoe market of America. Among the stationers and paper dealers of this city are men of like calibre and enterprise, and the spirit of progress has prompted the opening of the Stationers and Printers' Exchange. For the facilities and conveniences offered there is no charge. Letters of introduction are not necessary. The password is "Welcome."

Under the mild influence of pleasant weather the retail trade are taking on a little more activity. A few weeks of sunshine will also brighten up the countenances of the jobbers. Still the trade of the past few weeks has been very good, considering the atmospheric drawbacks, especially in Easter goods.

J. P. Perry, a West street stationer who closed his business a year ago, storing away his stock in trade, closed out the whole lot last week to Ward & Gay. This stock consisted of fine papers and envelopes, menu cards and fancy boxes, which were bought at a very great reduction from first cost, and Mr. Ward is offering these goods to the trade at correspondingly low figures. This house has also in stock 27 tons of memorandum blocks in numerous sizes and qualities of paper. There are good bargains in this line and the trade should note the fact.

Mr. Gay, who manages the card department of this house, reports that the Easter trade was very satisfactory, fully up to the business of previous years, and very little stock in the Easter line is carried over. For the Christmas trade Mr. Gay is already making preparations, and something in advance of the old recognized styles may be looked for. In the meantime the sample-room is being stocked up with an extensive line of cards for album and birthday uses. Such of the trade who can make it convenient should visit the sample-room of Ward & Gay, when bargains in cards are wanted. The stock is too varied and extensive to expect their travelers to fully represent it with samples.

A. G. Mead, designer and builder of station-

ers' stamping-presses, is receiving numerous inquiries from leading stationers in the larger cities. This is good evidence that stamping-presses are wanted, and so soon as the value of Mead's presses becomes known, sales will be only the more frequent. These presses are really just what are wanted; they do a class of work that cannot be done by some other makes, and though a little higher in price than the common press, they are cheaper in the end and give greater satisfaction. Those whom I see using them are fully satisfied with the results. I don't know of a better press in the market.

The house of Winkley, Thorp & Dresser have dissolved, and two separate firms will in future carry on the business. This change was effected on the 12th of April. Mr. Thorp retires from the house which he assisted to establish, and under the firm-name of Winkley, Dresser & Co., the general jobbing trade will be continued. The manufacturing business of the house, which has grown to such large proportions, will be carried on by the Thorp Manufacturing Company. This company is incorporated under the laws of Massachusetts with a capital of \$75,000, and is officered as follows: Gurdon Bill, president; E. G. Thorp, treasurer; J. E. Speare, secretary.

With the several lines of scrap-books and albums which the old house has, during the past few years, presented, the trade generally is familiar. To more fully carry out the plans contemplated in connection with this growing trade, and to give the business that personal attention which it demanded the above change was deemed necessary. Mr. Thorp, treasurer of the new company, is also its general manager, and brings to the company a trade which he has personally developed, as well as an extensive knowledge of the manufacturing business itself.

It is only ten years ago that Mr. Thorp first cast his fortunes with the business interests of Boston, starting on the road as a traveling representative of the old house of Nichols & Hall. He remained with this house four years, at the end of which time he was associated with those enterprising gentlemen, Messrs. Winkley & Dresser, and the house of Winkley, Thorp & Dresser was founded. This was in 1873, and since that time, or during the short period of six years, the business of this house has continued to increase, until its diversified interests have become so extensive as to necessitate this change. The success of this firm is due in no small degree to the personal efforts of Mr. Thorp, and he leaves the old house to seek a wider field in the manufacturing branch of the trade. For the fall trade the Thorp Manufacturing Company will present a line of scrap-books and autograph albums which will compare most favorably with anything of the kind yet presented, and the trade should make a note of it.

A. L. D.

Many persons wonder why they cannot obtain as cheap a paper in colors as they can in white. The reason is very simple; the stock of which low-grade papers are made cannot hold the colors. The same rule holds good in regard to paper as in manufactures of silk and wool; the purer the material the more perfect will be the color obtainable from the dye. Combinations of different materials, or of different qualities of the same material, do not take the color evenly.

Reception cards are square, with the name and address and the reception day, and sometimes the hour, engraved in the left hand corner as heretofore.

OLD BERKSHIRE MILLS

No. 295,767. Automatic Registering Inking Apparatus.—Joshua W. Jones and Albert Cooper, Harrisburg, Pa.

No. 295,768. Counting-Register.—Joshua W. Jones and Albert Cooper, Harrisburg, Pa.

No. 295,799. Tag or Label.—William P. Patton, Harrisburg, Pa.

In an address tag or label, a binding-hook pivoted forward of the longitudinal centre of the bight of the hook.

No. 295,809. Coin and Letter Scale.—Charles Richtmann, New York, N. Y., assignor to H. Richtmann & Co., same place.

A scale for coins and letters, comprising a supporting-standard, a horizontal supporting arm attached to said standard, provided with a hook-shaped guard having an inward projection or index at the centre of the hook, a scale-beam pivoted in said bearings, one end of which is provided with a weight and adapted to oscillate within the hook-shaped guard, being in alignment with the index thereof when balanced, the outer end of said beam being graduated, a slide-link on said scale-beam, and a scale-pan suspended from said link.

No. 295,834. Tension Device for Tapes of Paper-Folding Machine.—John H. Stonemetz, Erie, Pa.

The combination of a spring-pressed bracket or frame, carrying a tape-spool and provided with guide-stems, with a paper-folding machine frame adapted to receive and hold said bracket or spool frame and a conveyor-tape passing around the spool mounted in said frame.

No. 295,845. Toy.—John Alonzo Ward, Sharpsville, assignor of one-half to William V. Byard, Sharon, Pa.

The combination, in a toy, of a figure detachably mounted in position and provided with devices for projecting objects, and a standard carrying a target and detachably mounted in position.

No. 295,853. Engraving Machine.—Ira R. Beam, Dryden, N. Y., assignor of one-third to Brown M. Barnes, same place.

No. 295,870. Combined Bouquet and Ticket Holder.—William H. Hogan, Boston, Mass., assignor of one-half to Edward W. Pasture, same place.

No. 295,878. Machine for Making Matrices.—Robert L. Kimberly, Philadelphia, Pa., assignor to the American Matrix Machine Company, of New York.

No. 295,923. Pencil.—Thomas M. Kenney, Cambridge, Mass., assignor to Francis Edgar Mason, same place.

In a pencil, the combination, with the pencil-body, of a lead-feeding device longitudinally movable in the body, having a series of projections or shoulders to successively operate upon the lead, and the holding device, resisting without positively preventing the longitudinal movement in either direction of the feeding device and lead under moderate pressure.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Thomas Coar, paper-stock dealer, Philadelphia, Pa., is dead.

Arthur L. Smith, dealer in wall-paper, Fort Smith, Ark., has assigned.

Frank H. Rogers, picture dealer, Wauseon, Ohio, is closing out his business.

St. Jacques & De Blois, bookbinders, Sorel, Que., have made an assignment in trust.

Mrs. M. J. Arnold, bookseller, &c., Alleghany, Pa., has sold out to Woodworth & Evans.

Brown Brothers, paper manufacturers, Colchester, Conn., have been burned out. Partly insured.

Execution has been issued against James Eachus, manufacturer of binders' board, Coatesville, Ohio.

L. J. Norvo, newsdealer and stationer, Fall River, Mass., has sold out to the Fall River News Company.

Agüero & Neurenberger, publishers, St. Louis, Mo., have dissolved partnership. M. Agüero continues the business.

The Palmer Art Company is disposing of its stock of fine art cards, souvenirs and fancy plush goods with the intention of going into liquidation. Dealers who are looking for bargains in fine art goods should not let this opportunity pass.

C. Oliver Powell & Co., wholesale stationers, Baltimore, Md., have dissolved partnership. The business is continued under the same style.

Judgments aggregating \$2,372 have been secured against Henry Levy, paper and twine dealer, Scranton, Pa., and execution has been issued.

The Thorp Manufacturing Company, of Boston, Mass., has been incorporated with a capital of \$75,000. Gordon Bill is president, E. G. Thorp, formerly of Winkley, Thorp & Dresser, treasurer, and J. E. Speare, secretary. This company will engage in the manufacture of scrap-books, albums, &c.

August Lammrich, a lithographer, aged 42 years, committed suicide last Thursday morning at 57 Butler street, Brooklyn, by shooting himself twice. One bullet passed through his heart. Mrs. Scharer, his sister, heard both shots, and found him dead in a rocking-chair, still grasping his revolver. He was a chronic sufferer from neuralgia in the head.

H. G. Gear was for twelve years general manager of an artists' materials store at 102 Fulton street, New York. He was formerly a wealthy importer, but lost his money. He lived at Bayonne, N. J. On Wednesday he said he was not well, and he did not go to business. About 3 o'clock in the afternoon his wife heard the report of a gun, and running to her husband's room found the closet full of smoke. Mr. Gear was lying dead, with the top of his head blown off. He had placed the muzzle of a loaded shotgun in his mouth, and had pulled the trigger with a forked stick. He was 45 years old and usually of a cheerful disposition. He had complained recently of sleeplessness, but was supposed to be in very fair health.

The Roache Manufacturing Company has introduced a very useful "Scholars' Companion," which comes in three forms of case, viz., a strong paper box, with handsomely decorated exterior, an oval tin box, with a hinge cover and a tin box with a sliding cover. The "Companion" contains a slate pencil, lead pencil, penholder and ruler. The company also puts up boxes containing one dozen fancy paper-covered slate pencils and also boxes containing a half-dozen of this style of pencil.

Dealers who wish to fill a great demand at this season of the year should not fail to supply themselves with a stock of Chadwick & Miller's ornamental shelf and lace papers. Their line consists of shelf, ceiling and box papers, paper napkins, book-marks, lambrequins, lace curtains, wall protectors and perforated card-boards. Also gilt, glazed, marble, paraffine, fancy colored and tissue papers, tin-foil, card-board, morocco, &c.

The Gollner Manufacturing Company has a novelty in the form of a compound microscope which magnifies 1000 times. Looking through its powerful lens one can see the animalculæ in a drop of stagnant water, the corpuscle in the blood, insects in old cheese or the dust on a butterfly's wing with as much accuracy and satisfaction as under a microscope of much greater cost.

A monthly journal, designed for pupils, teachers and parents, has just been started in St. Louis, Mo. It is entitled the *School and Home*. It is ably edited, neat in typographical appearance, and is filled with matter admirably adapted to the readers it is intended for. The publishers are Thomas & Patek.

J. C. Darling, dealer in rubber stamps, &c., Topeka, Kan., has been succeeded by Darling, Coates & Johnson.

Wales & Co., dealers in wall-paper and pictures, Minneapolis, Minn., have dissolved partnership.

Libby & Scales, publishers, Dover, N. H., have been burnt out. Insured.

Samuel Marfield, publisher, Circleville, Ohio, has sold out to H. E. Lutz.

William Barnes, paper box manufacturer, Philadelphia, Pa., has been sold out by constable.

G. D. Pitzipio, of the firm of Pitzipio & Co., importers of paper-stock, &c., New York city, is dead.

The World Printing Company (incorporated), Toronto, Ont., is advertised to be sold out by the sheriff.

Penn & McCleary, publishers *Democrat*, New Castle, Pa., have dissolved partnership. The firm is now T. J. McCleary.

Slack & Brink, paper-stock dealers, &c., Springfield, Vt., have dissolved partnership. W. H. H. Slack continues the business.

R. E. C. Divver & Co., printers, Memphis, Tenn., have dissolved partnership. The Memphis Printing Company succeeds to the business.

The third and fourth floors of 146, 148 and 150 Centre street are being handsomely fitted up for the Acme Stationery and Paper Company, which will remove into them on May 1. The company will have plenty of elbow room there and hence will be able to turn out some more of those mammoth orders for which it has become noted in the past.

Judgment was entered by William Weightman, of the firm of Powers & Weightman, in the Philadelphia Common Pleas, on Tuesday, against Edmund E. Claxton & Co., No. 930 Market street, on three notes, given July 2, 1880, amounting with interest and costs to \$305,616.54. Execution was ordered. The advances made by Mr. Weightman cover a period of nearly ten years, and were loans principally negotiated during the existence of the firm of Claxton, Remsen & Haffelfinger, which preceded the house of E. Claxton & Co. The firm of Claxton, Remsen & Haffelfinger was dissolved in 1880 by the death of Mr. Remsen and the retirement of Mr. Haffelfinger, and upon the formation of the present firm, which consists of Edmund E. Claxton & Son, Mr. Claxton gave his notes for the entire loan, amounting at that time to \$244,810.87. During the past five years frequent attempts were made to settle the indebtedness, but without success. "I ascribe our failure," said Mr. Claxton, "to the strained and unprofitable condition of the 'legitimate' book trade, which for five years past has made the publication of bound volumes a practical loss to the publisher. The immediate cause for this has been the cheap paper book publications of standard works at low prices, the dearth of new and striking literary works, and the suicidal practice of dry-goods houses retailing high-price publications at wholesale prices for the purpose of drawing trade. With a normal condition of the trade our indebtedness could have readily

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wave Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

(WARRANTED.)

been liquidated." Mr. Claxton's career as a publisher dates from 1846, when he became a member of the firm of Grigg, Elliott & Co., which gave place in 1850 to Lippincott, Grambo & Co., Mr. Claxton remaining in the firm as the company. In 1855 he became a member of the firm of J. B. Lippincott & Co. The house of Claxton, Remsen & Haffelfinger was started in 1868.

Fire broke out in the building occupied by Dickerson & Co., subscription-book publishers, and the *Daily Times* newspaper office, Detroit Mich., on April 11. The editorial and composing rooms of the latter were burned. Dickerson & Co.'s premises were damaged by fire and water. Dickerson & Co.'s loss will amount to several thousand dollars. The loss to the *Daily Times* cannot be ascertained.

THE STATIONER has received from Keuffel & Esser, 127 Fulton street, New York, a very handsome show-card made by the blue print process and designed to show the perfection of the process when done on their justly celebrated "Helios" blue process paper. It is a card that every stationer should have in his window, as it will greatly facilitate the sale of the "Helios" blue process paper, while proving a very acceptable ornament to his show-window. The show-card is furnished with every order for heliographic or blue process paper.

The Family Bibles, published by the National Publishing Company, Philadelphia, are said to be very superior in letter-press, illustrations and contents, while selling at as low prices as inferior editions.

The *Times* Publishing Company, Detroit, Mich., was burned out last week. Loss estimated at \$2,500; insured for \$4,000.

Those who use "Caw's Black Fluid Ink," no longer cling to the popular error that all black inks are thick and gummy. There is good authority for saying that, although this ink writes a deep black at first, it is very limpid and free flowing, and when it becomes thick by long exposure, a little water added will make it as good as at first. Another very important feature of this ink is that a steel pen can be used, without wiping, for months without gumming or corroding the pen in the least. These facts, although new to some, are familiar to all who daily use "Caw's" ink, and the rapidly increasing demand for the ink shows that they are appreciated.

Fire was discovered on Tuesday morning in the lithographic works of Wolff & Kuffner, on the top floor of the five-story brick building at 39 and 41 Centre street. The fifth and fourth floors were destroyed by fire, and the lower floors were drenched. Among the losers are Wolff & Kuffner, \$5,000; H. E. Sackmann's Sons, bookbinders, \$1,500, and other parties, \$6,500. The loss on the building, which belongs to the A. T. Stewart estate, is \$10,000.

Among the tradesmen in town during the past week were Mr. Field, of Smith, Clearwater & Co., Pittston, Pa.; Mr. Lockwood, Buffalo, N. Y.; John A. Schlener, of John A. Schlener & Co., Minneapolis, Minn.; S. T. Daunis, New Orleans, La.

T. L. Johnson, commercial traveler for Keuffel & Esser, has just returned from his regular Western trip. He reports trade rather quiet, but thinks that there are prospects for an early improvement.

F. B. Dickerson & Co., book publishers, Detroit, Mich., have been burned out. Loss estimated \$20,000; insured for \$3,000.

J. H. Buffords' Sons have a new line of fans. Charles M. A. Twitchell & Co., printers, Boston, Mass., have failed.

A. A. Abbott, stationer, &c., Kalkaska, Mich., has sold out to C. E. Rumsey.

A. C. Culver, publisher, Bear Lake, Mich., has lost \$1,000 by fire. Not insured.

The Wimbush-Powell Printing and Lithographing Company, Kansas City, Mo., has been incorporated with an authorized capital of \$30,000.

The book publishing establishment of M. W. Ellsworth & Co., Detroit, Mich., has been burned out. Loss estimated at \$2,000; insured for \$1,000.

J. F. Hitchcock, superintendent of the Holyoke Envelope Company's papeterie department, has resigned that position and will soon leave Holyoke. He has been there only about a year, having been first in the employ of the Whitmore Manufacturing Company till his branch of the business was sold to the Envelope Company.

A fellow about 35 years old, calling himself G. D. Morgan, swindled J. H. Buffords' Sons and the Wakefield Rattan Company, at Boston, on Thursday of last week, with forged checks on the Park National Bank of New York. He bought \$35 worth of goods of each firm, paid for them after business hours with \$100 checks, and received \$65 in change in each case.

There is a very active demand just now for Globe files and file boxes. They have become a great favorite with consumers and are giving general satisfaction. These goods are made of the best material and are among the most useful and convenient articles in their line in the trade. They should be in every stationer's hands.

Charles Towne, publisher of the *Echo*, Petaluma, Cal., has been attached.

C. C. Young, Jr., stationer, &c., Pensacola, Fla., has been burned out; insured.

F. M. Weiler's Liberty Machine Works will be removed on May 1 from 49 Chambers street to 51 Beekman street, New York.

The *Racine Manufacturer* got out a set of Easter cards of pleasing design and execution, which it presented to each of its advertisers.

The National Blank-Book Company, under the management of H. S. Dewey, is about to extend its business by the addition of a full line of writing papers and envelopes to its regular stock of blank-books.

Henry Levy, paper dealer, Scranton, Pa., has been sold out at sheriff's sale. Among his creditors are Russell & Armstrong, \$600; Hollingsworth & Whitney Company, \$300; F. B. Hobart, \$100; Megargee Brothers, and others.

F. J. Walker & Co., printers and publishers, Visalia, Cal., have dissolved partnership. W. W. Bornes has retired from the firm and E. J. Griswold has been admitted to membership. The style of the firm is Walker & Griswold.

F. H. Loss, Jr., 46 Murray street, has a great novelty in his "Unique" bird-cage awning, for the top of any round or square cage. They are in fanciful shapes of three beautiful tinted colors. Descriptive list on application.

The Easter display at J. H. Bufford's Sons' Art Emporium on Broadway was magnificent. That the public fully appreciated it was apparent from the attention which they gave to it. The satin cards and sachets, designed with exquisite taste and decorated in the highest style of lithography, drew the fullest share of notice. This firm will have its Xmas card samples ready in July, and it will be worth while to wait for them.

The copartnership heretofore existing under the style of Winkley, Thorp & Dresser, Boston, has been dissolved by mutual consent, and the blank-book and stationery business heretofore carried on by the firm will be continued by William W. Winkley, Edwin D. Dresser, and Sumner Dresser, under the style of Winkley, Dresser & Co., at 111 Devonshire street, Boston; who assume all liabilities and will settle all accounts of the late firm. The manufacturing business hitherto carried on by Winkley, Thorp & Dresser will be carried on under the style of the Thorp Manufacturing Company.

On Saturday last H. V. Butler, of the firm of H. V. Butler, Jr., & Co., individually, and as representing his firm, made an assignment to James Jackson, president of the Second National Bank, of Paterson. Mr. Butler's liabilities amount to \$65,000. The assets are the bonds of the Ivanhoe Manufacturing Company, valued at \$51,500, and other things, which are said in a fair valuation to make the total assets \$52,000.

Following is a list of the creditors: Charles O'Neill & Sons, \$4,907; J. H. Lyon & Co., \$3,759; Edward Hill, \$3,227; P. Dougherty, \$2,949; Woodruff Paper Company, \$2,915; Joseph P. Bradley, \$700; Pennsylvania Salt Manufacturing Company, \$2,310; J. W. Lyon & Co., \$2,283; J. M. Varnum, \$3,000; Society of Useful Manufactures, \$6,030; J. S. Rogers, \$5,000; Fuller's Express Company, \$1,169; W. S. Anderson & Co., \$863; A. Collier, Jr., & Co., \$742; J. C. Todd, \$405; Dundee Chemical Works, \$207; Ashmun Screw Plate Company, \$170; Mortimer Clark, \$135; Paterson Iron Company, \$113; Rogers Locomotive Works, \$101, and others. Mr. Butler's assignment to James Jackson on Saturday is only a continuation of the prior failure, he having been compelled to make the assignment to protect all of the creditors, some of them having taken judgment, and the object being to prevent the enforcement of execution and give the creditors generally the benefit of the assets. The offer to give the creditors, whose claims aggregate \$60,500, an equivalent in bonds of the Ivanhoe Manufacturing Company at 6 per cent. interest has been accepted by a number of those holding claims amounting to \$17,000. H. V. Butler owns only 1,456 shares in the Ivanhoe Manufacturing Company, or a minority of the stock. The former statement of the amount of stock held by Mr. Butler (about 3,900 shares) was founded on the fact, that the difference was held by him as trustee and administrator of an estate for other stockholders. The assignment of H. V. Butler and of H. V. Butler, Jr., & Co. does not affect the affairs of the Ivanhoe Manufacturing Company, nor does the assignment of the firm have anything to do with the Ivanhoe Mill, which is running on full time, filling orders and working under the old management.

John B. Lewis, Walla Walla, W. T., made a handsome display of Easter novelties according to the report of the *Daily Union* of that place. Mr. Lewis' selections were from the designs of the most prominent houses in the trade and of the costliest as well as cheaper qualities. This is commendable enterprise.

W. D. & D. Van Slyke, bookseller, &c., Medicine Lodge, Kan., have sold out to C. E. Wainscott.

Henry S. White, printer, Pensacola, Fla., has been burned out; insured.

A receiver has been appointed for W. B. Burke, bookseller, &c., Atlanta, Ga.

George T. Williams, publisher, Ida Grove, Ia., has been succeeded by Williams & Holcomb.

Thorndike Nourse, book printer and binder, Detroit, Mich., has been burned out. Loss estimated at \$15,000 to \$20,000; insured for \$15,500.

The May number of *Cassell's Family Magazine* has come to hand, replete with the usual quantity of interesting reading matter of fiction and fact, fancy and suggestion, which always marks this household journal. The illustrations are numerous and bright.

The tide of immigration setting toward our shores is subject to fluctuations, but there exists no reason to anticipate that during the life of the present generation it will fail to reach the average height of the past ten years; immigration, therefore, continues to be one of the great economic questions of this country, and it involves a political problem of the highest importance, that of naturalization. That our naturalization laws are defective in many respects is notorious, and the demand for their revision will no doubt acquire added force from the publication of an article by Justice William Strong upon that subject in the *North American Review* for May. In the same number of the *Review*, Edwin P. Whipple offers a candid judgment of Matthew Arnold, as a thinker and as a man of letters. Richard A. Proctor, under the title of "A Zone of Worlds," writes of the vast multitude of the pigmy kindred of the earth, known as the asteroids. In "The Railway and the State," Gerrit L. Lansing essays to prove that the multiplication and extension of railroad lines, and the establishment of low rates of transportation, are hindered rather than helped by governmental interference. Prof. Henry F. Osborn, of Princeton College, has a highly interesting article on "Illusions of Memory." Helen Kendrick Johnson contributes an essay on "The Meaning of Song." Finally, there is a joint discussion of "Workingmen's Grievances," by William Godwin Moody and Prof. J. Laurence Laughlin, of Harvard University.

A reverend sportsman was once boasting of his infallible skill in finding a hare. "If I were a hare," said a Quaker who was present, "I would take my seat in a place where I should be sure of not being disturbed by thee from the first of January to the last day of December." "Why, where would you go?" asked the sportsman. "Into thy study!" replied the Quaker.

CINCINNATI CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, April 14, 1884.

The ill-wind that blows nobody good was not in the riot which made Cincinnati famous as the "wind-up" in a history of so-called judicial proceedings in criminal cases, which if even brought out into the full light of day, will make Cincinnati infamous in that one particular spot. That was an ill-wind indeed which wafted here that epoch marked by blood and fire, but not so ill as to blow nobody good. That old proverb about the wind is only an assertion of the law of compensation. Fire and blood have been called purifiers, and now the people are holding their breath, listening and looking for some good to come out of the awful results of those mad nights, when in the glare of the burning court-house the pavements were slippery with human blood. Some legislation has come of it, and people hope it is good. A firmer sense of duty and responsibility has taken hold of citizens, and everybody knows that is good and everybody hopes it will be permanent. But to descend as gently as we can to a lower grade of what, relatively speaking, may be called "good," coming from it to the stationers, let us suspend memory for a moment and think of the work it is making for the manufacturing stationer and the expert clerk and draughtsman. Tons of blank-books will have to be made immediately for the use of all of the offices to supply not only the places of old records as far as they can be reproduced but to serve for the current needs of the various offices. All of the records of the courts extending back to the beginning of the century were destroyed except those in the Recorder's office, nearly all of which were saved. Already the manufacturers of blank-books and the county commissioners are mutually besieging each other, the former to get contracts at as near living figures as possible and the latter to get them at as near starving prices as possible. This is perfectly natural; only it is to be hoped that the stationers here will not go to cutting each other's throats in the struggle to get the contract. Really this matter is occupying the thoughts of manufacturers of blank-books almost to the exclusion of thoughts about other matters. The giving out of contracts for this work will be the occasion for lively competition before it is all over.

Just imagine the work it will heap upon the shoulders of the county stationer, Max Mosler, and the responsibility it will pile on his head. Aren't we all glad that we are not in his fix! Mr. Mosler is aware of the gravity of his situation, but he is not the man to shirk the responsibility.

The sales of Easter goods were quite large, but the excitement of recent events diverted attention from such things and so far injured the sales, causing some disappointment.

Books in some houses are a drug just now. The Methodist Book Concern report sales light beyond precedent, and job work wonderfully short.

Robert Clarke & Co., George Stevens, Peter Thomson, Davie & Co., James & Warren and other dealers in miscellaneous books, report fairly good sales.

Wilstach & Baldwin, Bradley, A. H. Pounsford & Co., J. R. Mills & Co., T. C. Woodrow, and in fact all of the manufacturing stationers, report fairly good orders—enough to keep them out of mischief.

W. B. Carpenter & Co. are proud of a job

of work on the cover of a blank-book, made for the use of that house. It is a true picture of the house wrought in gold by "tooling"—no embossing about it.

New York has just been represented here by the following-named trade visitors: J. B. Gun, with E. Faber; Frank Johnson, of Liebenroth & Von Auw; W. L. Marks, Dixon Pencil Company; Geo. Freeman, American Pencil Company; A. Heyman, Eagle Pencil Company;

Mr. Maddock, of the Hectograph Company; "a representative" of Morris Rubens.

Philadelphia has been represented by E. Schwartz, of Schulte Brothers & Co. E. A. Bush, of the Continental Manufacturing Company, Boston, has had a "representative" of Frost & Adams, and James P. Franklin has been here in the interest of the Beebe & Holbrook Company, Holyoke, Mass.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 17, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE Lowell bankruptcy bill is now under discussion in the Senate, and it will probably meet its fate there before other important measures are acted upon. There seems to be more than ordinary divergence of opinion upon this measure, which ought, it seems to us, to command the united support of the business community. That there is some honest difference we have no doubt; but in many cases the opposition to the bill is due to considerations not of the most honorable kind. Should the Senate pass it, the opportunity to advance the measure through the House ought not to be neglected, inasmuch as the House bill of the same character, although favorably reported by the Judiciary Committee, is so low in its order on the House calendar that it will not probably be reached this session. Now that the subject has been squarely brought to an issue, it devolves upon business men and commercial organizations interested to see that every effort shall be made to insure speedy action and success.

INVITING attention to the numerous inquiries from the trade to which we are called upon to give frequent and ready response, we must express our surprise that there are so many people who are slow to keep their names prominently before buyers. We print under our "Answers to Correspondents" in this issue a number of replies to queries which ought to have found their answers in our advertising columns. While we are cheerfully ready at all times to give the fullest information to our readers, we ask that pains shall be taken to impress upon parties whose addresses are sought by our medium the fact that the intelligence was derived from our columns and that our friends should distinctly state to those with whom they seek to deal, that the trade paper is the proper place for the man to advertise his goods. This is a fair request, and the only return that we ask for the trouble to which we are sometimes put to give proper replies. But it must be understood by our readers, that we are always glad to help them to whatever information it comes within our power to give.

It has been charged that one of the effects of the reduction in the rates of postage would be to create a deficiency in the postal revenue which would compel a large appropriation from the general revenue to make up. At the time that the proposition to reduce postage was pending THE STATIONER, while not claiming any prescience or superior judgment on this score, expressed the opinion that the result would be otherwise, and that cheap postage would tend rather to increase the work and at the same time enlarge the revenue of the Post Office Department. This was also the opinion expressed by those who favored the bill in Congress. But certain statements lately made in some of the newspapers have invited a more critical examination of the working of the new postal rate,

and while it has been found that the sale of postal cards has decreased, there has at the same time been a gain in the sale of stamps. The Hon. John Hill, to whom the country is chiefly indebted for reduced postage, having had his attention called to the report that the change has been adverse to the interests of the Government, has been at pains to ask the Post Office Department for a statement of its sales of stamps. This statement has been furnished and is given by Mr. Hill to the public through one of the daily papers. It shows that for the first quarter ensuing the change the sales of stamps showed an increase of more than 23 per cent., as compared with the corresponding quarter of the preceding year, and that in a like comparison for the quarter ended March 31 the increase was more than 27 per cent. The decrease in the sales of postal cards for the last nine months has been less than 1½ per cent., but for the two quarters of the current fiscal year, since the adoption of the two-cent rate, the falling off in the use of postal cards has been in greater proportion, and for the last quarter was 9 per cent. A small decrease of revenue is estimated, but in view of the facts above set forth, it is not likely to be sufficient to call for consideration as an argument in opposition to cheap postage. Mr. Hill presages a further reduction to one cent—a consummation for which we hope. It is obvious that the use of paper and envelopes has been encouraged and greatly increased, and the effect upon the stationery trade has been and cannot be anything else than beneficial.

ROUNABOUTS.

BY THE TRADE LOUNGER.

How sweet a thing it is to live together in unity. This reflection is prompted by the fact that Phil. Kearney Post No. 10, G. A. R., of Richmond, Va., and R. E. Lee Camp No. 1, C. V., have united in an appeal to the people of this country for help to establish a home for disabled ex-Confederate soldiers. Now, as a veteran of the late war, and as one who did his level best for the red, white and blue, I am not opposed to this movement. I would like to see it enlist something more than sympathy and secure substantial aid. I don't "go back on the record"—not one bit; but I can see how all prejudices being laid aside, we can feel for the helpless, and particularly for those who were not afraid to stand up and suffer for their opinion, wrong as we believe that opinion to have been. What can the stationery trade do for this humane object?

* * * *

I was very much pleased with the display of Easter goods last week at the Broadway store of a well-known Boston firm having a branch house in this city. In satin goods, exquisitely designed, I haven't seen anything more varied or extensive in all my perambulations. There were many others who inspected the line, and there was unanimous admiration. The ladies seemed especially to be critically satisfied.

* * * *

There has been an attempt to pass foreign

law books, published in monthly parts, through the customs as periodicals exempt from duty; but the Treasury Department thinks that this will not do, and instructs that they are dutiable as books.

Somebody has been coloring crayons with arsenite of copper. This was discovered after a child had been made very ill by swallowing a bit of green crayon. The trade ought to get a guaranty for non-poisonous crayons. Should death ensue from a child's careless use of a colored crayon there might be a claim for damages and a charge of manslaughter.

A new thing in drawing models consists of shapes of animals cut out of white cardboard and pressed or embossed. A shape is set in a holder which is placed in front of a black background, thus making an excellent relief study. A box contains a dozen or two models and is sold at a low price.

The Travelers' Protective Association, which is composed of commercial men, will hold its second annual meeting in Detroit, Mich., on June 13 and 14. The objects of the association are worthy of attainment, and the association should receive the encouragement of all business men as a reduction of the expenses of the commercial traveler will not only benefit him, but directly benefit the house which he represents.

Manufacturers are receiving many complaints from retail dealers who allege that jobbers are cutting into their profits by selling below list prices. It is said that a leading jobber is selling for fifty cents an article which should cost the consumer seventy-five cents. This is lower than the retailer can afford to sell at, as he orders in small lots and hence does not have the advantages of the jobber who buys in large quantities.

American Cards in England.

39 DEY STREET,
NEW YORK, April 15, 1884.

To the Editor of The Stationer:

We notice in Mr. Charles J. Cohen's letter to you from London under date of the 24th ult. the rather erroneous assertion that the British public do not take readily to round-cornered playing-cards. In justice to the said British public and the American manufacturers of the round-cornered playing cards we deem it our duty to inform you that since the introduction into England some seven years ago of the cards made by the New York Consolidated Card Company our London house, Lawrence Brothers, has annually increased its sales of the Squeezer cards and that they are in great favor with all of the leading clubs there, and were it possible for the American manufacturer to produce as bad a "shilling" card as those made in England, and which are round-cornered there, the sale would be enormous.

As it is, since we first introduced the American round-cornered cards, every English manufacturer has purchased American round-cornering machines, and round corner, even the lowest grades, as well as the better qualities; and what is more, they are gradually following

the American idea of a card more like a card than a "sharp-cornered stiff board."

A glance at your export list, 10th inst., shows "Playing-cards to Liverpool, 8 cases."

We apologize for intruding on your valuable space, but make our excuse that we have long felt both a pride and primary interest in the competition of American with European makers.

LAWRENCE & BAXTER.

ANSWERS TO CORRESPONDENTS.

H. S. inquires: Who makes fine club parlor skates?
Ans.—Olympian Club Skate Company, Sixty-third street and Third avenue, New York; James L. Plimpton, 30 Stayvesant street, New York; W. A. Sutton, 524 West Twentieth street, New York.

F. wants address of B. B. Hill, formerly of Springfield, Mass.

Ans.—B. B. Hill Manufacturing Company, Philadelphia, Pa.

B. S. & Co. want to know who makes the "Helios" drawing-paper.

Ans.—The "Helios" blue process paper is made by Keuffel & Esser, New York.

R. H. M. wants to know where to get "Cabinet" inkstands described in THE STATIONER of November 22, ult.

Ans.—Landers, Frary & Clark, 298 Broadway, New York.

M. M. asks: 1. Headquarters for gummed labels. 2. Manufacturers of paper tags. 3. Manufacturers of Kimball's pin tickets.

Ans.—1. Dennison Manufacturing Company, Boston, Mass.; A. C. Cunningham, 338 Broadway, N. Y.; Anthony Eisner, 17 Bond street, New York; M. J. Anderson, 117 Fulton street, New York. 2. Dennison Manufacturing Company, Boston; A. C. Cunningham, New York. 3. A. Kimball, 6 Murray street, New York.

L. W. B. wishes addresses: 1. Of dealers in music. 2. Dealers in musical instruments.

Ans.—Wm. A. Pond & Co., 25 Union square, New York; Ed. Schuberth & Co., 23 Union square, New York; Oliver Ditson, Boston; Root & Sons, Chicago; B. Hitchcock, 166 Nassau street, New York. 2. Wm. A. Pond & Co.; J. Howard Foote, 31 Maiden lane; John F. Stratton & Co., 49 Maiden lane; C. A. Zebisch & Sons, 46 Maiden lane; A. Pollman, 58 Maiden lane, all in New York.

McC. & Co. ask for manufacturer of "Westlock" brand of writing.

Ans.—This same inquiry was replied to a few weeks ago. Keith Paper Company, Turner's Falls, Mass.

S. & F. want to know where to get Pierce's standard letter-file and binder.

Ans.—It can be had of Hooper, Lewis & Co., Boston, Mass.

The correspondent who made inquiry lately about the "Ring" mucilage bottle is informed that Joseph E. Crosby, the patentee, has sold it out to the Dennison Manufacturing Company, Boston.

THE TRAVELERS' PROTECTIVE ASSOCIATION.

The Travelers' Protective Association of the United States will hold its second annual meeting for the election of officers and the transaction of other business in Detroit, Mich., on June 13 and 14. The association was organized on June 12, 1882. In November last the membership was only 383, but since that date it has increased to nearly 2,000.

The objects of the association are: 1. The elevation of the commercial and social standing of

of the merchant traveler; 2. The repeal of all laws whereby commercial travelers are unjustly taxed for selling goods; 3. To obtain cheaper railroad rates and a greater amount of excess baggage and to procure from hotels accommodations commensurate with the prices paid. The membership fee is only \$1.

The president of the association is J. H. McKinstry, of Cleveland, Ohio; secretary, J. R. Stone, 110 Dudley street, Cincinnati, Ohio.

T. L. Johnson, representative of Keuffel & Esser, is chairman of the New York State Committee. Forms of membership and all information can be had on application to him. An effort will be made to make the association a national organization.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, April 16, 1884.

THE MONEY MARKET.—The supply of money seeking employment continues largely in excess of the demand, and rates have scarcely fluctuated a fraction. Money on call has been available at $1\frac{1}{2}$ @2 per cent., and prime commercial paper quoted $4\frac{1}{2}$ @ $5\frac{1}{2}$ per cent. discount. There has been rather more activity in the stock market, but with prices generally lower, and speculation left off tame at the decline. Government bonds are a trifle higher for $4\frac{1}{2}$'s, but easier for 3's; State bonds quiet; railroad bonds in moderate request, with no important changes. Sterling exchange has ruled quiet and firm, but without any quotable change in rates.

THE PAPER MARKET.—The absorption of supplies is not up to what is considered an average volume of trade for this time of the year. The policy of carrying moderate stocks and buying only sufficient to supply actual requirements, still seems to be quite generally in vogue, and this naturally imparts a dull aspect to the market. The recent bad weather in various parts of the country has delayed the spring movement generally, which, under more favorable circumstances, would necessitate replenishment of stocks, and business would, no doubt, assume more satisfactory proportions. Mercantile credits, as a whole, seem to be improving and failures have fallen off, and although there is a wide margin for commercial and industrial improvement, it is satisfactory to know that there is a very gradual, if slow, amelioration of things. There are no heavy reserves of paper held at any of the large distributing points of the country, as wholesale and retail dealers alike having been unusually careful not to encumber themselves with greater stocks of goods than they have felt sure they could dispose of, and having bought a little at a time, find it necessary to replenish often, and have thus put themselves in good condition financially. It is not likely, therefore, there will be anything approaching the losses by bad debts for the ensuing six months that there has been during the past half year. As regards prices, no changes whatever have been made since last week, quotations throughout being held fairly steady.

THE STATIONERY MARKET.—The general trade shows a little improvement over last week. Business has steadied up somewhat and is quite up to expectations, although there are still a few grumblers. The demand for spring goods has opened up very fairly, the movement being quite brisk and likely to continue so for the remainder of the month. There has been a good demand for school stationery, but the bulk of this trade was done in the early part of the month, and just now the demand has fallen off. A return of business is looked for in July. Dealers are agreed in expressing satisfaction with the Easter trade. Several complaints have been made to manufacturers of stationers' specialties by retail dealers, who allege that jobbers are cutting into their profits by selling below list prices. This is likely to cause a falling off in orders for these goods if the evil is not remedied. There is practically little doing in the envelope trade, but there is an improvement over a week or two ago, and dealers generally anticipate a good season.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
" $6\frac{1}{4} \times 3\frac{1}{4}$ " \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN & CO.,
Sole Proprietors and Manufacturers,
60 WILLIAM STREET, NEW YORK CITY.

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. The patented device for reversing the die and counter saves time. Have been in use by many of the principal Stationers for the past twelve years.

Prices and other information given on application.

A. G. MEAD, Machinist,
No. 364 Atlantic Avenue, Boston, Mass.

Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

THE LAW OF COPYRIGHT.

(Continued.)

Protection by copyright is given only to an original work. An abridgement of a previously existing work is considered as original if it displays invention and judgment; otherwise, if it is merely colorable, or consists merely in the omission of certain parts. It is not permitted to use in an abridgement the language of the original work. No matter how commonplace the subject, if the matter be reduced to systematic form, it is valid for copyright purposes. Copyright can only exist for what is already in existence. If a title be registered for a work substantially complete in manuscript, the inchoate right to copyright will extend to the work immediately upon registry of the title; but a mere title of an imaginary work will not hold. In encyclopedias the copyright vests in the proprietor. It has been held that articles copyrighted separately in the United States for use in a foreign work, open to all to publish in this country, will not protect the articles from being included in a reprint here of the whole work. In England translations were held by Lord Eldon to be original works, but this has been modified by legislation and the general tendency in the other way. An author may reserve to himself the right to translate his work. This is covered by the phrase "all rights reserved."

The Constitution embraces inventors and authors in one and the same paragraph, and the intended benefit is the same for one as for the other. Therefore forms, other than writings, embodying intellectual conceptions, may be protected provided they involve the exercise of the inventive faculty in their production. Here we see where invention shades off into literary or artistic expression and vice-versa, one intellectual product may as a writing involve little or no invention and yet as a writing be the subject of copyright. On the other hand, another intellectual product may not be a writing at all, but involving invention, as a bust, picture, or work of art, may also be the subject of copyright. The distinction is, to a great extent, an arbitrary one. Congress has decreed that the results of intellectual efforts shall in some cases have a protection, called copyright, and in other cases a protection called letters-patent. Sometimes the distinction rests upon the intended use of a product and not upon its intrinsic character. If purely artistic, or relating to the fine arts, it is a subject for copyright; if for use as an industrial or utilitarian article, it is a subject for a design patent.

International copyright is justified not only on the ground of justice to authors, but as a means of promoting science and literature by opening up to American writers the advantages of copyrights in foreign countries, which would benefit American authors just as American inventors have been benefited by the protection afforded by foreign patent laws.

Concerning the proposed "Copyright on News," the legal obstacles appear insuperable. In the first place, it is only the "writings" of an author which Congress is authorized by the Constitution to protect. There can be no copyright on news alone. The copyright must be on the verbal form. Further, if such right exist, it must be a matter of public record and must exist as a grant before a right of action could accrue. Further, the author is the person who gives verbal form to the writing, not the newspaper owner who publishes it, and before the latter could avail himself of the right, he would have to show a written assignment from the author. The time proposed is so short that no

application for an injunction could be made, and if there were, and there were several alleged owners of the right, all would need to be joined as complainants. If an action for damages was brought, there would need to be the same joinder of parties and actual damages would need to be proved. All this on the supposition that the matter would be copied verbatim. But as a matter of fact, it would be as easy to abridge or to put the ideas or information in totally different and original language, and this would constitute a new and distinct writing wholly independent of the other, and which the other could not reach. A hundred words are about twelve lines, or less than half a page of ordinary cap paper, and can be written out in long-hand in about five minutes, or dictated to a stenographer in sixty seconds, and the author of this independent "writing" would be just as much entitled to a copyright for his writing as the first writer would be for his. The scheme, looked at from the legal standpoint, could not be carried into effect without a most astonishing upsetting of all accepted principles of copyright law and practice.

BLOTTING-PAPER.

This is an improvement in the manufacture of descriptions of paper which are used for absorbent purposes, the purpose being to substitute for a portion of the paper stock now used a material which shall be cheaper than the stock, and which will also improve the quality of the paper containing it.

The substance used is what is known as "infusorial earth," which may be incorporated with the paper stock during the ordinary process of manufacture in suitable quantities.

In the case of papers for absorbent purposes—as blotting-paper—the addition of infusorial earth will improve the absorbent qualities, for it is well known that this material will take up about three times its weight of water. Another advantage of the use of infusorial earth in absorbent paper is that after the paper containing it has been once wet and then dried, it does not become hard and brittle, with diminished absorbent qualities, but remains unchanged, and may be used much longer than papers which contain clay or kaolin or similar material. It is evident, therefore, that infusorial earth may be substituted for a portion of the rag stock with great advantage to the quality of the paper, and as it is very much cheaper than the rag stock a corresponding saving is effected. The peculiar cellular structure of infusorial earth will greatly assist in its incorporation with the paper stock in the process of manufacture, for it allows the particles to engage or felt in with the fibres of the stock in a very complete manner. The stock will thus not only hold a much larger quantity of the earth than it could of kaolin or other ordinary clay which is of smooth crystalline structure, but will hold it more firmly and without the use of sizing or any other binding material. From this it is evident that the infusorial earth is well adapted as a filler to be used in the manufacture of paper generally, as well as being peculiarly qualified to be used in absorbent papers, as before described. The quantity of the earth used will in any case depend upon the description of paper that is desired, and is limited only by the amount which the stock used will hold and the skill of the user.

All kinds of invitations are engraved or written on clear white paper, except invitations to gold and silver weddings.

— No. 18 High Street, Boston, Mass. —

25c. A GENUINE STYLOGRAPHIC. This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful **POLISHED NICKEL CASE**, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address **GOLLNER MFG. CO., 222 Centre St., New York.**

OBITUARY.

DANIEL GODWIN.

Daniel Godwin, of the old firms of Baker & Godwin, book and job printers, No. 25 Park row, and Baker, Voorhis & Co., law-book publishers, No. 66 Nassau street, died at his residence in Ridgewood, N. J., at one o'clock on Wednesday morning. Mr. Godwin had enjoyed good health until early last week, when he was delayed at his office and ran to catch a ferry-boat so as not to miss his usual train home. As a consequence of this violent exertion he was attacked with a disease of the heart, which prostrated him. He was able to be out on Sunday, however, but he then caught a cold, which resulted in pneumonia, from which he died. He leaves a widow, two sons, and two daughters, all but one of whom are married.

Mr. Godwin was one of the most familiar figures to be seen daily in Printing-house square, and one of the oldest printers in the city. He was born in Bath, England, in February, 1815, but came to this country when a lad of 13, with a sister and two brothers. He learned the printer's trade, and after working as a journey-

man for some time entered the firm of Baker & Godwin, which has been in existence for over 40 years. The business was conducted in the old *Tribune* Building until that structure was demolished to make room for the new building, when it was removed to No. 25 Park row. During the draft riots of 1863 the *Tribune* Building was attacked, and an attempt was made to clean out the office of Baker & Godwin, but the rush was repulsed by the police, under the command of Captain (now Inspector) Thorne.

In 1866 Mr. Godwin became a member of the firm of Baker, Voorhis & Co., in which business he continued until his death. He was also a stockholder in the New York News Company. Mr. Godwin was a Mason, and for a long time a very active one. He formerly belonged to the Methodist Episcopal Church, which he left a few years ago to become a member of the Reformed Dutch Church. He delighted to supply country pulpits during the temporary absence of pastors and engaged largely in mission work. Like his old friend, Horace Greeley, his ear was always open to the appeals of the needy, and he will long be remembered in Ridgewood for his many deeds of unostentatious charity.

THE PICTURE CARD AS AN EDUCATOR.

"These things are a nuisance and should be abated," said an outside dealer at a certain jobbing house the other day, pointing to a fresh arrival of picture cards and bright chromos. "They are the curse of trade. Every child in town constitutes itself a committee of one to make the rounds of the stores every day on a begging expedition, and every time a woman goes to a store for 25 cents' worth of anything she expects a half-dozen cards of different design. For one, I'm tired of catering to the demand for such things."

A city dealer happened to be in the store at the time, and overheard the vigorous denunciation.

"I beg leave to differ with you," said the city dealer, "for I consider the men who disseminate picture cards public benefactors. Aside from a discussion of their merits as an advertising medium, I hold that they have cultivated a taste for better things. They are bright, and generally cheerful, and bring joy to the hearts of many a poor child, and even to older people with young hearts. The seamstress gets a chromo at the tea store to take the place of the shadow she used to thank for falling on the bare wall. A chromo is much more exhilarating than a shadow. People who go into the rooms occupied by the very poor find the walls less repulsive than formerly. Especially is this true in rooms occupied by the thousands who have known better days."

"But how can an unreal picture cultivate taste?" asked the outside dealer.

"Indirectly, of course. Suppose they are unreal. They are bits of bright color. The housewife and the children arrange them on the walls. Pretty soon some one notices that the color of one does not match well with its neighbor. A re-arranging follows with an improved effect. That has been a lesson in art to the wife or daughter or son, or all three, of a hod-carrier, perhaps. Cultivation has begun at the roots. You will see the result in the next generation. From free tea-store advertisements, the housekeeper is led to admire cheap chromos, and from chromos finally turn to oil-paintings and engravings, and in the course of time the latter succeed the imitations of works of art. In my opinion, the picture card's chief mission is among the poor, and is fulfilling its mission beautifully and effectively.—*Eco.*

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

WHITEMORE BROTHERS & CO.,
172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE. Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1832.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

SPECIAL ATTENTION GIVEN TO THE MANUFACTURE OF FIRST-CLASS MOURNING GOODS.

Our line of BRISTOL BOARDS, both Pasted and Mill, are unsurpassed in quality, being made by Z. CRANE, Jr., & BRO., to match their paper. We manufacture from this stock VISITING CARDS, in Plain and Gilt Edge, Plain and Gilt Bevel, and can furnish any special size desired.

Decorated Note Paper in Colors, Bronzes, Etc.

GENERAL AGENTS FOR Z. CRANE, Jr., & BRO.

DAVIDSON PURE RUBBER BANDS,

BY WEIGHT.

WE CALL ATTENTION TO OUR RUBBER Bands, put up in cartons, containing one pound, and sub-divided into eight 2 ounce boxes.

We SELL ALL SIZES AT ONE UNIFORM PRICE, which is a great convenience, and will be appreciated.

These goods are of the VERY BEST QUALITY, and, being put up under our name, are fully GUARANTEED, as are those which we sell in gross, and great gross packages.

MANY OF THE GOVERNMENT DEPART-ments have had so much trouble with poor, worthless Rubber Bands, that they now call for "DAVIDSON BANDS" in making proposals for stationery, &c., &c., which is a sufficient guaran-tee for their quality.

PRICE LISTS AND SPECIMEN BOOKS FURNISHED ON APPLICATION

THE THREE WRITES.

Under the above head a writer in an exchange gives some good advice in regard to writing. He says: "Some (indeed, *too many*) people use pale ink, and write a very fine hand, with "down strokes" almost as light as "hair strokes," thus severely, painfully and injuriously trying the eyes of their friends and correspondents. The ink is closely shut up from the air, and thus grows watery pale—or it gets frozen and deposits its coloring matter—or they water it to fill up the inkstand, until there is more water than ink! This is all wrong, and does more injury, sometimes, than the writers are aware of. Use *good ink*—ink having a deep, decided color *when it flows on to the paper*—and those who read your writings, whether correspondents or editors or compositors, will bless you in their hearts. If your ink is only a little pale, let the air into it (keeping out the dust) and it will grow darker. And then put your pen down on the paper and move it as if you felt what you were writing, and your writing will look all the better and plainer for it.

Use good ink and a good pen, and make your letters with good legible strokes, and of the best ordinary shape in use by good penmen, and your writing will be easily read, and you will be saved the annoyance of mistakes so often made over semi-illegible penmanship.

To avoid obscurity of good penmanship, omit all flourishes and ornaments in your common writing. I have often seen what would have been very plain penmanship rendered difficult to read by the writer adding some uncouth loop to his b's, l's, f's, &c., a twist to his y's, g's, q's, and a "querlequew" to every s, and interminable and involved turns, bulbs and flourishes to his capital letters, until the letter was absolutely hidden and lost in its ornamentation. All this is in very bad taste—showing a petty vanity and trying to the patience of the reader. Many a good article has been consigned to the waste basket, or the fire, *unread*, because of such folly. Write as plainly as you can.

When writing a proper name, or a numeral, or a word or phrase from a foreign language, not only spell it correctly, but be careful to make every letter so plain that it cannot be mistaken for some other letter of similar shape—as c, e, o; b, l; m, n, u, and others. I once had occasion to rebuke myself for neglect of such care in an *important record*, made about thirty years before. I am usually careful in such matters; but then (cause unknown), I wrote "Oneida Co." so that it was mistaken for "Overdales"—"Oneida" for "Overda," and "Co." for "les." Written as one word, and loosely, it might easily be mistaken and *was* mistaken; but fortunately I was yet in the body to correct it!

An engineer on nearing a bridge, or bad crossing, or curve, usually "slows the train," to "be sure all is right." So, when you come to write a proper name, or a foreign word, or a figure, "slow the pen" and "be sure" that every character is "all right." Then may you expect "a clean proof-sheet," accompanied with the printer's blessing and the editor's "write again."

It is reported from London that a new process is about to be introduced for making pulp paper from straw. Not only is a larger percentage of pulp obtained from the raw material by it (and as high as 45 per cent. is claimed), but the pulp itself is much superior, making a paper more like that usually obtained from soft cotton rags, and altogether free from the hardness and brittleness characteristic of straw paper. The process has so far been kept strictly secret.

INVENTORS AND THE PUBLIC.

BY JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

I.

The anti-patent sentiment annually displayed by the House of Representatives, and this year embodied in some peculiarly objectionable bills, adds cogency to the question of the real relation of the inventor to the public. When legislators regard the creators of wealth as subjects for invidious restriction, it is time for those who make legislators to investigate the question for themselves. A brief survey may be best conducted from the three points of view of the relative reward of the inventor, the utility of even small improvements in promoting the interests of capital and labor, and the true source of the perennial assaults made upon the rights of inventors and patentees.

As concerns the first of these, the history of every industry furnishes proofs by the score. A few examples from different industrial arts will illustrate the truth that the profit to the inventor is only a fragment of that which falls to the share of the public at large. A patent railway brake, largely litigated a few years ago, was shown to have saved \$62,000,000 to the railway companies during the term of the patent, and, of course, this economy continued after the expiration of the patent; but the inventor is understood to have received practically nothing.

During the late war the government saved four millions of dollars in the cost of horse-shoes from Burden's machine for making them. This was only one item of the saving to the public. But Burden worked at horse-shoe machinery for twenty years before the successful machine of 1857 was completed. He, however, was more fortunate than most inventors, for he at last made some nine hundred thousand dollars out of the business. The copper-toed shoe saved from six to twelve million dollars annually, to the public in wear and tear of foot gear. After fourteen years of waiting, the inventor made \$67,000 out of it. The Waterman process of tempering wire reduced the cost from \$3 a pound to three cents. A paper folding-machine saved two million two hundred and forty odd thousand dollars in fourteen years to the book and newspaper trade. In these cases the inventors' profits were a small percentage of the total benefits conferred. Nearly forty years ago a fourteen-year patent was granted for an improvement in lead pipe. The inventor made \$14,000 out of it all told, but the public has profited about a quarter of a million every year. An inventor made \$22,000 in fourteen years from a patent on stoves; in that period the invention saved to the users \$275,000 in fuel. The wire bottle-stopper fastening yielded the inventor \$20,000 in nine years, and saved \$9,000,000 to manufacturers of soda water and other bottled liquids in the same time. While the inventor was making \$1 from the patent, the public was making \$450 from the invention. The open slot iron tie for cotton bales netted the inventor less than five thousand dollars, while in thirteen years it saved the cotton trade a million and a half. Stewart's sugar process yielded him less in fourteen years than the sugar manufacturer made from it every six weeks. The Cahoon lamp burner saved the public \$3 in lamp chimneys for each solitary cent it yielded the inventor. The Bigelow carpet loom profited the patentee only 10 per cent. of what it profited the public during the life of the patent. Years ago the Hoe press saved in twelve months \$260,000 in one New York newspaper office alone.

Such are the results of inventions and it is men like these inventors who are singled out by the House of Representatives for plunder and persecution. It may be remarked in this connec-

tion that the data above given are derived from sworn statements in recorded patent proceedings.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and runs up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, April 22, 1884.

The winter dies hard here. On this twenty-second day of April we have weather that would fit into January or February and cause no surprise. It answers a purpose, however. Business men are laying the dullness of the times on it. A scape-goat is necessary, and several have been selected at one time or another, and it's the time in rotation to make one of the weather. A prominent business man here says that all of this trying to cipher out the cause of the present dullness is an unprofitable employment. He says that when business is dull the way to do is to look it up—go out after it into the hedges and highways and compel it to come. It's all very well for a man who can do such things to talk in that way, but we who can't, must be permitted to philosophize on the causes that brought about this present situation.

A recent death in the trade here was that of William L. Mallory, of the firm of Mallory & Webb. He passed away suddenly while riding in the cars to his home in Avondale. There is some talk now about a change in the firm of Mallory & Webb. It will be effected soon, if at all.

The following-named trade visitors were the latest here: A representative of the Albany Perforated Wrapping Paper Company, Albany, N. Y.; Mr. Closson, Plimpton Manufacturing Company, Hartford; J. W. Sinclair, Morgan Envelope Company, Springfield; C. M. Braden, Crane Brothers, Westfield, Mass., and last, but by no means least, Gamaliel Hunt St. John Graves, of J. D. Whitmore & Co., who, this time with tears in his eyes and big bandana (red) is saying farewell to his customers, announcing this to be his "last trip on the road." Good-bye, Gamaliel (called George for short), we shall miss and weep for you.

Mr. Sanders, of the Dennison Manufacturing Company, has returned from an Eastern trip.

John Holland reports an excellent trade in staple goods. His new line of pencils is having a fine run.

A. H. Pounsford & Co. report that they closed out their large stock of fine Easter goods, in spite of the drawback of the "late unpleasantness" in Cincinnati.

Robert Clarke & Co. have their show windows adorned with beautiful etchings, engravings and photographs. The latest subject for the scenic photographer is the mob.

By the way, there have been fifteen convictions of criminals during the last week. That is about four times the rate of speed that prevailed prior to the mob.

Max Maslen, the county stationer, is overwhelmed with business, and he shows it in his appearance.

Wilstach, Baldwin & Co. have had for many years much of the county work in blank-books. They have copies of all of the forms used in the county offices, and are able to supply books ruled and printed in every respect like those that have been destroyed by fire. This is a great good fortune for the county, and is likely to be of advantage to the firm in securing the contract for making many of the blank-book that will be required.

PRINCE WILLIAM.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, April 22, 1884.

Just as soon as this section of the country is favored with a week's fair weather, business will possibly assume its expected spring activity. Although the volume of trade is not up to the season's average, a very fair amount is doing, considering the disadvantages of continual wet weather. Manufacturers of stationers' specialties report a very good business, but the bulk of it is mostly in supplying the Western and Southern trade, where spring makes its appearance according to the almanac. Collections generally are very good, but I hear of some complaint in relation to city accounts which are being too long delayed.

The trade generally are beginning to feel a little exasperated because some of the dealers continue to cut prices on leading staple articles, and I would not be surprised to hear of some action taken on the subject. In two or three cases I know of certain dealers having addressed the manufacturers, complaining of the injury done to their trade by having these articles retailed at prices below legitimate rates. Now, manufacturers generally are very apt to look at these individual complaints from a narrow standpoint. They reason thusly: "Whole, Hogg & Co. are ordering quite largely of our goods, for which they pay our regular rates, and even if they do undersell their neighbors, Deal, Fair & Profit, it isn't policy to do anything in the matter. We have a larger trade with one house than with the other, so we will write Deal, Fair & Profit that the matter is beyond our control." Now the complainant getting no redress, ceases to push these goods, and when the stock runs out, wants no more. But

how would it affect the manufacturer if the majority of the city dealers, who keep store for a profit, would unite in a protest of this kind? Would it not carry more weight? Manufacturers might under such conditions find it advisable to protect the trade from the ruinous folly of rapacious individuals. So long as manufacturers seek an outlet for their goods through the hands of the hundreds of dealers, some little effort should be made to maintain uniform rates, and not have the same line of goods sold at a dozen different prices by as many different dealers.

While the leading representatives of the stationery business of Boston continue to house themselves behind their own counters, unmindful of the general good of the trade, very little improvement can be expected in this direction, but there are some few who are anxious to see the trade come together occasionally and talk over matters in which all are interested. This sentiment may some time become general, and then an organization of the trade will be possible.

Talking with a prominent jobber the other day I had occasion to mention the name of a business neighbor, and was much surprised to learn that, although they had both been doing business for years within a stone's throw of each other, they had been strangers until a few days before, when at a social gathering they became acquainted. "And," said the jobber, "Smith is a clever fellow. I'm glad I know him." There are a number of very clever fellows in the trade who, in my weekly rambles, I am always delighted to meet and talk to, and I sometimes think that it would be a mutual benefit if they could meet each other occasionally and have a social chat together.

I am reminded here of a little story told me by an old sea captain who desired to impress upon my mind the difference between New York and Boston. "Both are big cities," said he, "and everybody is on the make, but the New Yorker is more social than a Bostonian. If a Boston man can't make anything out of you he drops you just as soon as he finds it out; but in New York, if one man fails to find you profitable he takes you around and introduces you to his friends, and gives them a chance. So if you have any money you are bound to leave it in New York, though you might escape with it in Boston." There is a moral to this story which might be easily committed to memory, and if put into practice, prove profitable.

Dropping into the spacious salesroom of the Dennison Manufacturing Company, I observed considerable activity. The numerous specialties which this concern manufacture for the

trade, and for which there is such a continued demand, give a good business the year round. The perfumed sealing-wax, which this company presented to the trade some months ago, is having a very large sale. Fancy tissue paper for ornamental work is another specialty that the house is having numerous calls for. Shipping tags are in big demand, and this line of goods will continue active for some time. Travelers abroad and seaside tourists consume tons of tags every year, and the summer travel will soon open.

John A. Boyle, manager of the Boston School Supply Company, showed me something novel in the way of a globe designed especially for school use, and known to the trade as Betts' Portable Globe. This globe consists of a framework of steel wire, covered with cloth, on which is printed a map of the world. The cloth covering is of a durable material made expressly for the purpose, and the coloring is produced at the press with varnish color. The globe is about 15 inches in diameter and four feet in circumference, and can be expanded or collapsed in a second like an umbrella. A ring is fastened at the top end of the axis by which it can be suspended when desired. A neat deal box is provided in which the globe is kept when not in use.

Methods of teaching geography, by Lucretia Crocker, one of the supervisors of the Boston public schools, is now ready. This work has been anxiously waited for, and it will be found a valuable aid to school teachers. The Boston School Supply Company will supply the trade.

Thomas Groom & Co., State street stationers, were damaged by fire on Saturday night. The fire is supposed to have been started in the coal bin in the front part of the basement and the stock in the basement was seriously damaged by fire and water. The bindery, located in an upper story, was much damaged by smoke. The building itself was but slightly injured, although the loss to Thomas Groom & Co. will not be less than \$5,000, which is fully covered by insurance. The salesroom was but little affected and no interruption of business will be experienced.

The Stationers and Printers' Exchange, although only open a week and not yet very generally known, was visited during the week by quite a number who expressed themselves as well pleased with the facilities offered. Among the visitors were E. P. Call, New England representative of the New York *Tribune*; Chas. F. Keith, Whitcomb Envelope Company, Worcester; J. H. Franklin, Fall River; W. A. Cheney, Worcester; Fred F. Green, Quincy; Albert F. Hunt, Newburyport; Geo. B. King, Geo. W. Brooks, E. A. Jones and Edmund W. S. Jones, city. Besides the leading city dailies on file, the Exchange has been kindly favored with copies of the following publications: New York *Weekly Witness*, Putnam County *Journal*, Florida; *Veteran's Advocate*, New Hampshire; Springfield *Globe*; Marblehead *Messenger*, Massachusetts; THE AMERICAN STATIONER, *Paper Trade Journal*, *Millers' Journal*, *American Mail and Export Journal*, and the *Country Merchant*, all of New York city. A. L. D.

A SOT'S MASTERPIECE.

At a recent sale in London a book bound by Roger Payne brought over six hundred dollars, mainly on account of the binding. Payne is one of the curiosities of English literary history. He was a drunken workman who spent most of his life in a cellar in St. Martin's Lane, creating works of art of almost priceless value in the in-

tervals of his debaucheries. Apprenticed when a boy to a bookbinder, Nature had endowed him with extraordinary talents. He possessed a pure taste, a rare faculty of invention and unrivaled ingenuity, and he soon made the discovery that it was in his power to stand alone in his profession, and to control the market by the great superiority of his performances.

Without money, but strong in the consciousness of his peculiar talent, he withdrew from the workshop and from all intimacy with the comrades of the craft, and established himself in a cellar. Here he wrought in secret, never on any pretense allowing either friend or stranger to witness his operations, or even get a sight of the implements he used. In order that no one should even guess the means by which he produced results altogether new in the art which he pursued, he contrived and manufactured his own tools; and he astonished the book-selling world, and rapidly raised a reputation for himself by the truly marvelous productions of his inexplicable skill. The prices paid to him for binding a single volume were such as had never been dreamed of before, and have scarcely been equaled since. There is a copy of "Eschylus," bound by him, in the library of Earl Spencer, for binding which the Earl paid him fifteen guineas.

He grew so proud of his popularity that he would rarely work for a bookseller, and never for one who, being also a bookbinder, sought a profit by employing him. But with his reputation his laziness and drunkenness increased, and at length it became a sheer impossibility to induce him to work while he had a penny remaining in his pocket. If he bound a volume for ten pounds—a very common price with him—he would purchase the materials for completing another, and then sally forth and drink up the balance.

The books that he bound were mostly scarce and valuable works, and are chiefly to be found in the collections of the titled and wealthy. They are remarkable for their chaste and elegant style of adornment, and for such substantial workmanship as seems to bid defiance to time. Thus Payne could earn, with his nondescript tools, in his dingy cellar, ten guineas in a few days, but in twenty years of his besotted career he could not lay by as many shillings to purchase a coffin for his haggard remains. He died a pauper and was buried by the parish.—*Proof Sheet.*

INVENTORS AND THE PUBLIC.

BY JAMES A. WHITNEY, LL. D., COUNSELOR-AT-LAW.

II.

The advantages arising to the community, even when the term is used in its widest meaning as including the denizens of all civilized countries, from successful inventions is not denied by the most hardened sinner or the most reckless casuist, against the rights of property in ideas; nor can any one indicate any method of inciting invention or rewarding inventors which will more readily secure its object than the granting of patents, or which will more assuredly avoid any undue tax upon the public. But it is frequently urged that "patents" are granted for "frivolous" inventions, and that in some unexplained manner community is tormented thereby. As the assertion has a kind of plausibility, it may be, to the unthinking, a few paragraphs may be fitly given to the delusive averment. Reference to a few instances derived, like those in a previous article, from

sworn records in the Patent Office, will illustrate the utility of little things, and the further fact that the aggregate of small things which secure the protection of patents must have no small share in providing business opportunities and employment for large numbers of people who otherwise would swell the ranks of sharp competition in worn and crowded fields of industry.

Some years ago the writer by chance met an itinerant vender of what the irreverent would call a "rattletrap," so slight was its structure and so commonplace and humble its use. It was designed to assist the hand in peeling potatoes, and its object was to insure a thinner peeling than is commonly obtained by the unassisted fingers. It was merely a curiously shaped piece of wire slipped on the back of a common case knife to gauge the depth of the cut. Inquiry as to the history and introduction of the invention revealed that this little thing was the subject of no less than three patents, which left only a narrow margin for invention in each one. But that apparently trifling device gave employment to twenty men in different parts of the country. That little crooked wire took this number of men away from the sharp competition of labor; by so much it prevented the reduction of wages, and, in addition to this, it made an actual saving and cheapening of food, which, though slight in each instance, was large in the aggregate, for it not only peeled the potato quicker than by an ordinary knife, as before remarked, but it took a thinner peeling and made less waste. It is true that this was a little thing by itself, but when it is considered that thousands of such small devices are patented, it is manifest that the aggregate result may be very great and constitute a positive benefit to the community.

Nearly twenty years ago, the writer prepared the specification for a ventilated shade for the eyes. The novel feature was merely an opening so arranged that air could pass upward near the forehead instead of being confined as "dead air" under the shade. Other business occupied the attention of the inventor and the patent lay unworked and unappreciated for years. At last a reverse of fortune cast the patentee upon his own unaided efforts for subsistence, and the sale of the ventilated eye-shade made him independent of the assistance of others, enabled him to maintain his self-respect and gave cheerfulness and content under what otherwise would have been conditions of unusual hardship. Long ago—the patent has by this time expired—the writer prepared the papers for the inventor who had contrived an arrangement of studs on the inner end of a cast-iron sap-spill, so that the spill would hold better in the bore formed for the outflow of sap from the sides of the sugar maple. The patent was issued and from that day to this every spring-time was seen the wide-spread advertisement of the business built up on this little thing. It saved, in a measure, the mutilation of the maples and secured them a longer lease of sugar-bearing life. It saved labor, and it prevented a waste of the saccharine sap. Trace the results of even the least important device that comes into use at all, and its benefits conferred upon the world will be apparent. If it does not come into use at all, no one can be harmed by the issue of a patent to its originator. If it is useful to the public the latter should be willing to pay the originator for its use, and there is no way in which this can be done with so fair a chance of justice as by a wise and judicious system of patent laws.

(To be Continued.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure. at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE GAME OF ENCHANTMENT.

The new lawn game, "Enchantment," is illustrated in the engraving. It is, as may be imagined from the drawing, a lively and elegant game, which will be ornamental to the lawn, while its unique design and light athletic character are likely to make it a general favorite. This is adapted to persons of all ages and is easily learned; the materials are compact and light and may be utilized on uneven ground. The game educates the eye, develops the muscles of the arms and chest, strengthens the lungs; every facility is afforded for active exercise and yet every motion may be graceful, and a lady in full dress can participate in the game with comfort and safety.

"Enchantment" is made and controlled by Milton Bradley & Co., Springfield, Mass., who were the first in this country to make a business of manufacturing croquet, but of late years have given it up. They have, however, been seeking for something which they could fitly offer as a substitute, and which, while not following on old lines, would be equally as attractive and meet the demand for something novel and interesting. This they seem to have achieved in the new game.

The game consists in the casting of light hoops from one side of the ground to the other by means of the guarded wands, and the attempt by the opposing players to catch the hoops on their wands, or failing in that, to prevent them from falling within the designated bounds constituting their "field." The implements for the game consist of eight light plaited hoops of bright colors, four guarded wands, eight boundary posts, with eight colored flags to be inserted in the tops of the posts; the whole packed in a neat box.

NEW PATENTS.

No. 295,940. Letter and Bill File.—George W. Plummer, Brooklyn, N. Y., assignor to Andrew Jacobs.

No. 295,941. Copy Book, Copy Case and Movable Copy Plate.—Daniel A. Radley, Lawrenceburg, Mo.

A case recessed, to receive the copy book, and provided with hooks in combination with the copy plates, by which the paper is held down smoothly.

No. 295,949. Paper Wallet.—Alfred L. Sewell, Evanston, Ill.

In a paper wallet, one or more pocket divisions having its ends inserted within the wallet and attached to crimped portions, and the edges successively cut away at lower lines, so as to expose each of the separate pocket divisions.

No. 295,955. Apparatus for Feeding Sheets of Paper.—Frederick C. Thielscher, Boston, Mass.

No. 295,990. Type-Writer.—Thomas A. Edison, Menlo Park, N. J. Patented in England, October 29, 1875, No. 3,732; in France, May 6, 1876, No. 112,719;

in Belgium, May 8, 1876, No. 39,502 in Austria, August 23, 1876, No. 26,935; in Italy, August 26, 1876, No. 8,733, and in Canada, September 6, 1876, No. 6,508.

A method of producing printed impressions in duplicate, consisting in impressing upon paper types in succession, each of which has a surface of points, so as to perforate the paper, and then forcing ink through the perforations upon the sheet to be printed.

No. 295,994. Paper Ruling Machine.—Jonathan C. Forman, Cleveland, Ohio.

In paper-ruling machine, an annular movable arm provided with an adjustable sleeve, supporting a socket in which is fitted an annular movable head in which is inserted the adjusting-

ENCHANTMENT.

screw of the pen-beam, and susceptible of being arranged at various angles in respect to the pen-beam, for adjusting the pens of the beam to the head-line on the paper being ruled.

No. 295,996. Book-Cover.—Ellen S. Getchel, Boston, Mass., assignor to Anna M. Coudrey, same place.

No. 296,012. Game-Board Dice-Box, &c.—Abbie Amelia Jackson, New York, N. Y.

A muffled game-board and dice-box.

No. 296,018. Educational Appliance.—Albert H. Kennedy, Rockport, Ind.

An illustrative apparatus for showing the volume of symmetrical solids, consisting of a hollow cylinder and cone of the same diameter and height, the cone being secured inside of the cylinder, and a hollow hemisphere of the same diameter as the other parts, all adapted to be used together.

No. 299,049. Method of and Apparatus for Drying Matrices for stereotype plates.—George Pearce, Riversdale Road, Highbury New Park, Islington, County of Middlesex, and Edward Hughes, Anstey Road, Camberwell, County of Surrey, England, assignors to Stephen Davis Tucker and Robert Hoe, Jr., New York, N. Y. Patented in England February 27, 1890, No. 863.

No. 296,054. Combined Knife and Pen-Holder.—Isaac Phillips, Silver City, Idaho.

No. 296,056. Printer's Quoin.—John Polhemus, New York, N. Y.

A printer's quoin having the following characteristics: a wedge-shape body, with vertical concave ends and recesses with curved ends on each of its parallel sides.

No. 296,061. Device for Locking Removable Stereotypes.—Edwin E. Pratt, Chicago, Ill., assignor to the A. N. Kellogg Newspaper Company, same place.

No. 296,092. Slate Washer.—Howard L. Weed, Grass Valley, Cal.

In a slate-washer and wiper, a hollow trough or cup to receive and hold the pad or wiper, with its lower end provided with clamp or hooks to receive and hold a sponge or washer, in combination with a box or holder for the washer.

No. 296,117. Paper Bag.—Geo. O. Blowers, Canajoharie, N. Y., assignor to William J. Arkell, same place.

No. 296,122. Receipt, Check, Draft and Similar Books.—Warren M. Brinkerhoff, Auburn, N. Y.

A series of superposed leaves secured in substantially the form of a book and having weakened lines of separation, the line of succeeding leaves being in advance of the line of preceding leaves.

No. 296,179. Combined Calendar and Paper-Weight.—Louis Keller, New York, N. Y.

No. 296,184. Paper-Cutting Machine.—Herman T. C. Kraus, Brooklyn, N. Y., assignor to George E. Sanborn, Chicago, Ill.

No. 296,191. Paper Cutter and Die-Press.—John H. Lawlor, Baltimore, Md.

In a paper-cutting machine, the combination of a cross-head adapted to slide vertically in the frame without lateral movement, and a removable cutter connected to the cross-head, and adapted to reciprocate laterally by the vertical movement of the cross-head.

No. 296,235. Blotter.—Alfred N. Sill, Philadelphia, Pa.

No. 296,257. Paper-Box Covering Machine.—Lon Weston, Brockton, Mass.

The covering-strips have paste applied to their lower surfaces, are overlapped, united and then forwarded to the box-form by a rotating pneumatic cylinder, the end of the covering material, when it reaches the form being blown from the cylinder to the box by the reversal of the exhaust mechanism. When the proper amount of material has been fed to the box, a cutter operating against the cylinder severs the strips. The box-form is mounted on a hollow shaft, connected with pneumatic mechanism, that holds the box on the form by the exhaustion of air while being covered, and automatically expels it from the form when the box is finished by compressing the air. The covering is pressed on the box, laid over the bottom and brushed across and within the open end of the box by rolls and rotating brushes.

No. 296,277. Electrotpe and Stereotype Casting-Pan.—Calvert B. Cottrell, Stonington, Conn.

No. 296,278. Electrotpe and Stereotype Casting-Mold.—Calvert B. Cottrell, Stonington, Conn.

The mold for casting electrotpe or stereotype plates, in which the cover is made up or composed of sections which are provided with perforations adapted to receive pins.

A wash of one part nitric acid in ten parts of water will impart a stain resembling mahogany to pine wood that does not contain much resin. When the wood is thoroughly dry, shellac varnish will impart a fine polish to the surface. A glaze of carmine or lake will produce a rosewood finish. A turpentine extract of alkanet root produces a beautiful stain which admits of French polishing. Asphaltum thinned with turpentine makes an excellent mahogany color on new wood.

Pads, Tablets Blotter Tablets

FOR THE MILLION.

THE rapidly increasing demand on us for our POPULAR lines of goods has made our present facilities and quarters too limited. In order to fill our orders more promptly, and to enable us to still further reduce the cost of manufacturing, we will

E. P. DONNELL & CO., Chicago, Ill..

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

FOR THE COMING SEASON, WHICH WE THINK WILL EQUAL OUR FORMER SUCCESSFUL EFFORTS.

SAMPLES WILL BE READY TO SUBMIT TO THE TRADE EARLY IN JUNE.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Porter & Nye, publishers, Silver City, N. M., have dissolved.

F. W. Francis, publisher of the *Herald*, Juniata, Neb., is dead.

Kursz & Co., publishers, Manzano, N. M., are closing out their business.

Kurtz & Minear, booksellers, Athens, Ohio, have sold out to Putnam & Fletcher.

The Citizens Publishing Company newspaper, Silver City, N. M., has been discontinued.

George French, publisher of the *Times*, Clinton, Mass., has sold out to G. W. Reynolds.

Flett & Illies, dealers in picture-frames, &c., Galveston, Tex., have dissolved partnership. The firm is now J. H. Flett.

The Red River Paper Company, paper manufacturer, Jamestown, N. Y., having its mills at Fergus Falls, Minn., has failed.

G. W. Baldwin & Co., stationers, &c., San Antonio, Tex., have dissolved partnership. G. W. Baldwin continues the business.

Leopold Sonn & Brother, paper box makers, have removed from 28 Prince street, New York city, to Canal street, corner of Eldridge.

Dining & Bumiller, publishers of the *Millheim Journal*, Millheim, Pa., have dissolved partnership. R. A. Bumiller continues the business.

Irenberg, Brothers' paper mill at Louisville, Ky., was burned on April 15. Loss on building, \$3,000; machinery, \$7,000; stock, \$2,500; partly insured.

William E. Winslow, printer, at No. 49 Beaver street, New York city, on Monday, made an assignment to H. P. Hildreth, giving preferences for \$2,246.

Persons familiar with the stationery and paper trades, and wishing to form new connections, are referred to an advertisement under the head of "Business Opportunity," which appears in another column.

The copartnership heretofore existing under the firm-name of Fitzgibbon, Messer & Co., dealers in straw boards at 65 Crosby street, New York city, has been dissolved by the retirement of Arthur J. Messer therefrom. A new firm has been formed, consisting of Maurice Fitzgibbon and Culver Barcalow, under the firm name of M. Fitzgibbon & Co., who will carry on the business of the late firm in which they were partners.

The following proposals for furnishing the necessary blanks, schedule A; books, schedule B, and stationery, schedule C, required for the use of the Department of Police and Excise of Brooklyn, were submitted on April 16: Brooklyn *Daily Eagle*—Schedule A, \$125.50; schedule B, \$592. Sureties, Patrick J. Gelson and Jacob B. Carpenter. Joseph Keller—Schedule A, \$132. Sureties, R. R. Appleton and J. J. Vail. John M. Bulwinkle—Schedule A, \$113.59; schedule B, \$424.84; schedule C, \$559. Sureties, Alva W. Hafl and R. J. Ledgewood. James P. Rappelyea—Schedule A, \$121.72; schedule B, \$479.95; schedule C, \$672.93. Sureties, Charles F. Rappelyea and Thomas Purcell. Broun & Green—Schedules A, B and C, \$1,100. Sureties, T. J. Moore and E. A. Warren. George B. Martin—Schedule A, \$132.75; schedule B, \$452.50; schedule C, \$573. Sureties, William Metz and Kannart Mess. An interesting fact about the competition was the closeness in the bids made by John M. Bulwinkle and Broun & Green, the difference being \$2.57.

Clague, Wegman, Schlicht & Field, Rochester, N. Y., the proprietors of the Shannon file have begun suit in the United States Court at Boston, against parties selling the so-called "best" file, also against other parties making a similar file with two parallel arched transfer wires. It will be remembered that Judge Blodgett of the United States Circuit Court for the Northern District of Illinois held in 1881, that this class of files were infringements of Shannon's patent, and the owners are determined to put a stop to infringements.

A fire was discovered at an early hour on Sunday, in the basement of the building, Nos. 80, 82 and 84 State street, Boston, Mass., occupied by Thomas Groom & Co., importers of fine stationery and wholesale dealers in writing materials. The fire was quickly got under control, but it was necessary to pour a large quantity of water into the lower floor, where a valuable stock was stored. The loss is estimated at \$1,500 or \$2,000, which is covered by insurance.

C. T. A. Hinrichs has received a large invoice of toys. Among the novelties are the Jewel doll, which comes in rubber, is dressed in either male or female attire, representing papa and mama; new styles of toy watches; a fine line of hand-painted plaques, with plain ebony frames; the choral toy, which sings in four keys; a great variety of plush goods, &c.

Ladds Brothers & Woods, paper manufacturers, at Skowhegan, Me., have failed and offer 20 cents on the dollar. Liabilities, \$5,500; nominal assets, \$1,140.

A dissolution has taken place in the firm of Moller & Emmerich, wall-paper commission merchants, New York city.

Mrs. Francis Morton, dealer in toys, &c., Halifax, N. S., is closing out her business.

Edward O. Jenkins, printer, New York city, is dead.

A base-ball factory has been started in Brunswick, Me.

J. B. Dryden, newsdealer, &c., Frankfort, Ky., has sold out.

Cochran & Young, paper dealers, Erie, Pa., have been closed by the sheriff.

William E. Winslow, printer and stationer, New York city, has made an assignment.

Henry Will & Co., manufacturers of baby carriages, Chicago, Ill., have been succeeded by Conrad Nebele.

Lerow & Bronson, manufacturers of blank books, &c., Chicago, Ill., have been succeeded by W. F. Lerow.

Hall & Bill, publishers of the *Willimantic Journal*, also printers, Windham, Conn., have been succeeded by the Hall & Bill Publishing Company.

Among the out-of-town tradesmen in the city during the past week was A. H. Christian, secretary of the Richmond Paper Manufacturing Company, Richmond, Va.

The *Newsman* is the title of a new monthly paper, published in Boston and devoted to the interests of publishers, newsdealers, booksellers, stationers and fancy goods dealers. John J. Daly is editor and publisher.

William Hesser, publisher of the *Westport News*, Westport, Cal., has consolidated with Charles B. Huse, publisher of the *Westport Argus*, under the style of Huse & Hesser. The new paper is to be known as the *News-Argus*.

A weekly publication, devoted to improvements, real estate, architecture, building and general progress in the Northwest has been started in Minneapolis, Minn. Its title is the *Northwestern Improvement Record*. There is a large field for a journal of this kind, and the paper starts out with a good showing. The publishers are Baldwin & Bruce.

An ingenious device for bookkeeping, intended especially for country merchants, consists of a series of coupons, perforated so as to be easily separable from each other, and of denominations corresponding with United States currency from one to fifty cents. These coupons are neatly bound together in convenient book form, that the customer can carry in his vest pocket, and are furnished by merchants to their customers for five or ten dollars respectively. The coupons make no mistakes; give customers no chance to dispute accounts; cause no delay in the excitement and hurry of business; save the expense of bookkeeping; do not require pass-books to satisfy suspicious customers, and make business a pleasure rather than a task. These coupons are payable in merchandise only, and are not transferable or good if detached. Upon receiving the book the customer signs a receipt

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c. &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

for the same, and pays the amount called for by the coupons at the end of the month.

The *Como Headlight*, Como, Col., has sold out to a stock company.

Cochran Brothers, publishers, Del Norte, Col., have sold out to Scribid & Glover.

Leslie A. Jordan, publisher of the *Russian River Flag*, Healdsburg, Cal., has sold out to J. W. Ragsdale.

Newman & King, paper dealers, Harrison, Ark., have dissolved partnership. The firm is now Newman & Liebow.

The Union Hardware Company, manufacturer of skates, &c., Torrington, Conn., has lost its treasurer, J. F. Calhoun, by death.

Wm. C. Boning, dealer in books, stationery, &c., Baton Rouge, La., would like to receive catalogues from different publishing and stationery houses.

Millington Lockwood, of the firm of Lockwood & Ough, stationers, &c., Buffalo, N. Y., was in town this week. The firm named was only recently formed.

Marcus Ward & Co., Limited, will bring out in a short time a new line of Christmas and New Year cards. They will be first-class in every respect, and dealers should wait and see them before ordering.

French & Choate have secured the control of the Lambie dictionary holder, and they propose to push its sale vigorously during the coming season. French & Choate claim that it is the best dictionary holder in the market, and, judging from the fact that its sales have been twice as large this year as last, they are right. Dealers who handle it are universal in speaking in its praise.

Shortly after ten o'clock on Monday morning fire broke out in the cellar of Boorum & Pease's paper mill, Nos. 7 and 9 Elm street, New York. The flames extended to the floor above. The building is insured for \$8,000; the loss on the structure will not exceed \$500. Mr. Pease, one of the firm, said that he thought the loss might be estimated at \$2,500 on the stock and machinery, which are fully insured in the London and Liverpool and Globe Company. The fire is supposed to have originated in the breaking of an electric-lighting wire in the basement, which was occupied by the United States Electric Light Company.

George H. Sanborn & Co. will remove from No. 51 to No. 69 Beekman street on May 1, in order to accommodate their increasing trade. They will have on exhibition at their new place much new bookbinders' machinery never before carried by the firm, and their line of cutters will be very complete, embracing all sizes, from a twenty-three to a forty-eight inch machine—in fact, everything used in making a book will be kept on permanent exhibition at their new place.

J. L. Shoemaker & Co., Philadelphia, are giving special attention to the manufacture of book roans of a superior quality. They carry a full stock of standard colors and finishes, and will make special colors to order.

The May number of *Our Little Ones* (Russell Publishing Company, Boston,) is out. It is an unusually attractive number even for this bright little periodical, and will be welcomed by the "wee ones."

Calkins & Watrous, publishers of the *Sunday Telegraph*, Milwaukee, Wis., have dissolved partnership, E. A. Calkins having retired from the firm.

W. J. Hughes, bookseller and stationer, Denison, Tex., has been attached.

A. Thomas, publisher *Record*, Springfield, Tenn., has sold out his business.

William Kay, publisher of the *Courier*, Embro, Ont., has sold out to D. C. Sullivan.

The receiver of Schmidt & Trowe, lithographers, Baltimore, Md., will hold a sale on the 24th inst.

Elijah L. Hubley, paper-stock dealer, Utica, N. Y., has been damaged by fire. Fully insured.

Henton & Walther, manufacturers of bags and pocket-books, New York city, have dissolved partnership.

The Ocklawaha Manufacturing Company, manufacturer of paper boxes, pails, &c., Dayton, Ohio, has sold out.

W. E. Rice, dealer in paper-hangings, Lawrence, Mass., is offering to compromise with his creditors at twenty cents on the dollar.

W. W. Findley, agent for artists' materials, &c., Kansas City, Mo., has been damaged by fire and water. Loss, \$1,000 to \$2,000; insured for \$2,500.

The *Magazine of Art*, Cassell & Co., publishers, is out for May. It is a beautiful example of illustration and printing. The articles are instructive and full of interest. This magazine deserves well of the public.

F. H. Loss, Jr., 46 Murray street, New York, has just received his spring consignment of "artistic carved wooden goods," inkstands, photograph easels, penholders, paper racks and knives, card receivers, flower vases, thermometers, book slides, stamp boxes, glove, handkerchief and jewel boxes (satin lined) with and

without music, in great variety. Inspection invited.

D. C. Sullivan, publisher of the *Telescope*, Walkerton, Ont., has sold out to Isabella Stephens.

Hurly Brothers, publishers of subscription books, Toronto, Ont., are advertised to be sold out by the sheriff.

Ferrell & Fellows, booksellers, &c., Sedalia, Mo., have dissolved partnership. The firm is now Ferrell & Muir.

De Wolf & Hays, publishers of the *Review*, Fostoria, Ohio, have dissolved partnership. J. P. De Wolf succeeds to the business.

Frank E. Little has retired from the firm of Burd & Little, manufacturers of glue, &c., St. Louis, Mo., the firm having dissolved.

Charles S. Borden, dealer in artists' materials and chromos, Philadelphia, Pa., is advertised to be sold out by the sheriff on the 21st inst.

The firm-name of the Adair & Brown Company, booksellers, &c., Peoria, Ill., has been changed to the Brown, Page & Hillman Company.

D. Morrison, fancy goods dealer, and H. C. Tait, photographer, Bowmanville, Ont., have formed a copartnership under the style of Tait & Morrison.

The papeterie department of the Holyoke Envelope Company will, for the future, be under the personal charge of James T. Abbe, the treasurer of the company.

John A. Schlener and Winecke & Doerr have formed a copartnership at 425 Nicollet avenue, Minneapolis, Minn., for the transaction of a blank-book and general jobbing stationery trade.

Phil. Hake is slowly getting things to rights in his new quarters, on the ground floor of the building at the southwest corner of Ann and William streets; but the workmen are still busy with paint and putty renovating the place, which will look as bright as a new penny in a few days, when Mr. Hake will present to the trade as fine a line of Christmas goods as the best of talent can devise.

Everybody knows that Carter, Dinsmore & Co. have one of the most ingenious perpetual calendars that have yet been invented. The firm gave away \$50,000 worth of these calendars when they were first brought out, but when the trade found out what a good thing they were getting for nothing they were glad when the opportunity was offered to pay a small sum for the calendar. It is made with the name of any dealer ordering a lot, thus becoming a very effective advertisement.

It cannot but be a matter of pride to the producers of fine art cards in this country to learn how their goods are regarded abroad, especially when such information is as highly complimentary to them as that frequently seen in the foreign trade journals. The *British and Colonial Printer and Stationer* prints in a recent issue a lengthy article eulogistic of the lithographic publications of J. H. Buffords' Sons. The following is an extract: "British and colonial printers and stationers should, we think, be better informed concerning the peculiar merits of Messrs. Bufford's publications. They enjoy a high reputation in the States, indeed this is the oldest litho house in America, but are less known on this side of the Atlantic than they deserve." Referring to the firm's Easter cards it says: "We cannot imagine an 'Easter card' of a more attractive appearance, nor one which would be more welcome to persons of refined taste. These goods certainly deserve a proper introduction into this country, and when adequately known must command great popularity." In concluding this reference it may be well to say that the firm has in preparation a line of Christmas novelties which will surpass anything it has yet produced, and the trade are invited to take note of the advertisement in another column.

The *European Tourist Gazette* has entered on its fourth year. It is a handsomely illustrated quarto of fifty-six pages, containing descriptions of a number of inexpensive and interesting tours through Europe, with a list of European hotels, baths and watering-places, United States consuls and a great deal of other information, together with a number of interesting illustrations. It is published by C. B. Richards & Co., general passenger agents of the Hamburg-American Packet Company.

In the notice given in a previous number of THE STATIONER of the new sample book of George B. Hurd & Co., a slight error was made in stating that the number of samples shown was only 149 when there were 177.

Ladd Brothers & Woods, paper manufacturers, Skowhegan, Me., have failed. Liabilities, \$5,500; nominal assets, \$1,140. An offer of twenty cents on the dollar has been made the creditors.

Lloyd & Magnus, importers of toys, fancy goods, &c., New York city, have formed a limited partnership, with special capital of \$10,000, to April 30, 1887.

A sheriff's sale of the stock, &c., of F. H. Drake & Co., stationers and dealers in agents' supplies, Toledo, Ohio, is advertised to take place on the 12th inst.

Keim, Egan & Co., bookbinders, St. Louis, Mo., have dissolved partnership. The business is continued by Henry Egan.

The *Sunday Critic*, Wilmington, Del., after a brief existence of four months, ceased publication on April 20, with its outfit under attachment.

J. F. Hitchcock, late of the Holyoke Envelope Company, has accepted a position with the Whiting Paper Company, and will call on his friends in the near future, and will show a new line of "Standard" eighths and quarter-ream goods. The trade are invited to keep their orders in reserve until they see Mr. Hitchcock.

Tuttle & Co., publishers, printers, booksellers and stationers, 11 Centre street, Rutland, Vt., have organized into a stock company, to be known as "The Tuttle Company." It is a close corporation, as only the old partners of Tuttle & Co. are stockholders, with Harley C. Tuttle, president; Egbert C. Tuttle, treasurer, and Fred G. Tuttle as secretary. They have a paid-up cash capital of \$39,000, with a charter for \$60,000, to which sum the capital will be gradually increased, as their requirements demand. There will be no change in the make-up or management of the house.

NORTHWESTERN COMMERCIAL ASSOCIATION.

A meeting was held in Minneapolis, Minn., on the 19th inst., for the purpose of organizing an association for merchant travelers to be called the Northwestern Commercial Association. The constitution and by-laws having been prepared, a number present subscribed their names to it. The organization is to be incorporated. The object of the association, as set forth in the articles of incorporation, is declared to be to "aid the family, heirs and legatees of deceased members, by collecting from the surviving members, whenever a member dies, such sum of money as may be determined by the by-laws." The assessments shall be graded according to the age, as follows:

18 to 30 years.....	\$2.00
30 to 35 years.....	2.25
35 to 40 years.....	2.50
40 to 45 years.....	2.75
45 to 50 years.....	3.00
50 to 55 years.....	4.00

The amount paid to beneficiaries shall not in any case exceed \$5,000. All jobbers, retailers and their employees in the following territory are eligible to membership: Minnesota, Iowa, Wisconsin, Dakota, Nebraska, Montana, Wyoming, Idaho, Oregon, Washington Territory. W. C. Corbet was elected president; D. B. Finch, St. Paul, first vice-president; George H. Wendell, secretary and treasurer.

APPARATUS FOR FEEDING SHEETS OF PAPER.

This invention has for its object the production of an efficient apparatus by which to automatically feed sheets of paper singly from a pile to another place where it is desired to use them, and is said to be especially adapted to automatically place thin sheets of paper between printed cards or sheets as delivered from a lithographic press of usual construction; but it will be understood that the mechanism may be used in other places and for other purposes, as, for instance, to feed sheets of paper to a press.

The apparatus consists of mechanism for supporting the pile of sheets, picking-up mechanism to lift sheets singly, and feeding mechanism to take each sheet from the picking-up mechanism, carry the same forward, and discharge or drop it.

The supporting mechanism for the pile of sheets consists of a bed on which the pile of sheets rests, means to raise and lower the bed as each sheet is picked up, and means to adjust the bed automatically to the decreasing thickness of the pile of sheets.

The picking-up mechanism includes two or more suction tubes connected by suitable pipes with a suitable exhaust chamber or air pump, and a valve between the suction tubes and exhaust chamber or air pump, to permit the top sheet of the pile to be retained in contact with or to be held by the tubes, as may be desired.

The feeding mechanism includes two pairs of nippers—one for each edge of the sheet near its leading end—a carriage to move the nippers forward, and means to open and close the nippers so that they grasp and release each sheet at the proper times. When the carriage arrives at its forward position, the nippers are opened automatically to discharge the sheet held by them, and they are then locked and held open as the carriage is moved back, during which times the supporting table for the pile of sheets is raised to place the uppermost sheet of the pile against the ends of the suction tubes of the picking-up mechanism, and the valves between the tubes and the exhaust chamber or air pump is then opened, causing the uppermost sheet to adhere to the tubes, from which the air is then exhausted, and the table and pile of sheets descend, leaving the sheet held by the tubes. The open nippers, in their backward travel, pass over the end of the sheet thus held by the tubes of the picking-up mechanism above the pile of sheets, and, having reached a position opposite the tubes, are closed upon the opposite edges of the sheet of paper held by the tubes, and the valve between the tubes and the exhausted receiver or air pump is then closed, so that the tubes cease to hold the sheet. The nippers, having been closed upon the sheet, are moved forward, and, reaching their forward position, are opened automatically to discharge the sheet held by them on a suitable table, or on another sheet at the top of a pile of sheets. If the apparatus is to be employed to place thin sheets of paper in succession between printed sheets or cards as they are delivered from a lithographic or other press, the apparatus will be located at the rear side of the press, so that the nippers may travel forward over the delivery-table of the press.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 24, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WE are in the midst of confusion, and whatever shortcomings may be charged against us by our readers must be attributed to the fact that we are moving. On and after May 1 our publication office, editorial rooms and printing establishment will be located at 126 and 128 Duane street, southwest corner of Duane and Church streets, where the Lockwood Press will have twice the space that it now occupies, and will utilise three floors, 48 feet wide by 110 feet deep. This change is enforced by the increasing demands of business, and it will be effected without a moment's intermission or suspension of work. THE STATIONER will appear, as usual, on time. The publication of the 1884 edition of Lockwood's Directory of the paper and stationery trades has been delayed by the cramped condition of the printing office and the changes which are being effected, but it will probably be ready for subscribers within the next two weeks.

A BILL has been introduced in the House of Representatives providing that any corporation or officer of a State or municipal government interfering with commercial travelers should be deemed guilty of a misdemeanor, and be liable to indictment before a United States Grand Jury in the district in which the interference occurred, and upon conviction, to pay not exceeding \$100 fine, or be imprisoned three months, or both. The Committee on Manufactures, to which the bill was referred, reports that the laws of the several States imposing taxes on commercial travelers are in effect taxes upon the people of other States seeking to extend trade between the States; that they are passed in the interest of local jobbers and unscrupulous informers, and are not for the purpose of raising revenue for the States, and that they are in direct conflict with the Constitution of the United States. The committee also finds that several of the States, notwithstanding their laws have been pronounced unconstitutional by the Supreme Court of the United States, continue to enforce their fines, penalties and taxes, relying upon the belief that the trouble and costs of redress through the courts will protect them from the law. As these cases, when carried to the Supreme Court, take three years of time and at least \$1,000 in money to defend, it can be seen at once why business houses submit to the imposition. The committee is, therefore, of opinion that Congressional action is necessary, and that the bill is a step in the right direction, in order that the commerce between the States may not be restricted and the citizens of the several States debarred from the exercise of that freedom guaranteed them by the Constitution. We concur in these conclusions of the committee, for they are such as we have always proclaimed to be our opinions. If license fees are necessary as a source of municipal revenue, they should be required of the local dealer as well as of the visiting salesman; but we do not think that this is

either necessary or wise. We are sure that the trade generally will recognize the justice of this act of Congressional intervention, even if it shall seem to be adverse to their interests; but the fact is that they are called upon in one way or another to make good, in the long run, the license fees exacted of traveling salesmen.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

The trade may not be generally aware that for some time quite a business has been done by a set of scamps in counterfeiting the inks of well-known manufacturers. These parties buy up empty bottles, the labels of which have not been destroyed; they then refill the bottles with a counterfeit ink and sell the ink thus put up to the trade at a price far below the cost of the genuine article. Dealers have been known to buy this ink with a knowledge of its spurious character, and palm it off on their customers as genuine.

* * * *

A short time ago a party was arrested in Philadelphia for counterfeiting inks and is now under sentence; and the dealers who bought inks from him are being prosecuted for damages by the firm whose inks were counterfeited. I was reminded of this matter the other day when I learned that a leading Boston manufacturer lately had six dozen bottles of ink returned to him by parties who claimed that it was not up to the standard. The seal of each bottle did not bear the stamp of the firm and it was quickly discovered that the inks were counterfeited. Buyers, in ordering inks, should get them from reliable makers, and retail buyers should always scrutinize the seal to see that the ink sold to them is what it is represented to be.

* * * *

Among the very pretty designs in ink-stands and writing-sets are those of olive wood with single and double cut-glass ink-bottles and pen-brush in nickel and gilt mounts. They come in a variety of styles, one series having grotesque hand-cut rabbits, pigs and other animals. In brass, there are single and double stands with pen-tray, painted with leaf designs in black. Another stand with large cut-glass ink has a boar in brass with the hog's bristles as a pen-brush.

* * * *

A novelty in clocks is in the form of a horse-shoe ornamented with a fox's head and crossed whips at the top. It is made of bronze, nickel or hammered oxidized silver. Goods of this kind are of English make.

* * * *

A pocket pen holder and ink reservoir combined has recently been introduced. Its reservoir works on the principle of the syphon, and the holder will work with any steel, gold or other pen, and can be filled with any fluid ink.

* * * *

Odd designs in candlesticks seem to be in demand nowadays. A late novelty consists of a candlestick made of iron and bronze. The iron is forged with a neat surface, and gives an artistic appearance in conjunction with the bright surface of the bronze. The design, too, is very novel. Iron and bronze spill bowls are also now made in odd designs.

* * * *

Frames for pictures now come in brass, richly enchased and highly ornamented. These

frames have easel attachments, and are very pretty.

Mr. Hastings, of the firm of Wilbur & Hastings, who has suffered for some time from an attack of erysipelas of the eyes, has been obliged to succumb temporarily, and is now confined to his residence. It was only because of sheer pluck that he was not laid up before.

Edward Ellis, well known among the book trade, formerly member of the Board of Education, of Trenton, N. J., has been elected superintendent of that body. Mr. Ellis is an author of some note and a man of fine attainments, and he deserves his promotion.

The Treasury Department decided this week that paper-bags are dutiable at 15 per cent. ad valorem as a manufacture of paper, and not at 40 per cent. as for bags composed wholly or in part of flax, hemp, jute, gunny cloth or other material.

ANSWERS TO CORRESPONDENTS.

J. and W. want to know who import Blanz, Poure et Cie pens, and if they can be found in New York.

Ans.—All leading numbers are imported by Henry Bainbridge & Co., New York and Edward Kingston, No. 48 John street imports No. 801.

Sub. asks: Who makes or controls fixtures for unperforated toilet-paper?

Ans.—Union Cabinet and Paper Company, Moulton & Goodwin, agents, 114 Milk street, Boston, Mass.; J. S. Shannon, Chicago, Ill.; Albany Perforated Wrapping Paper Company, Albany, N. Y.

H. & Co. ask for address of manufacturer of Lambie's dictionary holder.

Ans.—R. S. Lambie, 103 Fourth avenue, New York, for whom French & Choate, 4 Bond street, are the sole agents.

F. & C. want address of manufacturer of Dovell's inks.

Ans.—Lewis Dovell, Newark, N. J.

K. & M. want to know where to find W. E. Bradner, formerly of Newark, N. J.

Ans.—We believe that he is still to be found at 55 Railroad avenue, Newark, N. J.

W. & K. are informed that there was an error in printing the name of the manufacturer of the Duplex letter-clip. It should be H. B. Thistle, 761 Broad street, Newark, N. J.

STEREOTYPE PLATE.

This is an invention applicable to stereotype-plates for the printing of newspapers or other columned matter, which it is frequently desired to transpose by columns or parts of columns, or wherein substitution of column for column has frequently to be made, and wherein it is desirable to make such changes, transpositions and substitutions without removing the forms from the press, and particularly without unlocking the forms or otherwise materially disturbing them.

The object is to provide a type-high plate of columned stereotype matter having grooves with transverse ribs under the column-rules, so that the plate may be the more easily subdivided, and the parts when brought together the more easily and securely fastened in the form.

The page-plate is made with the anterior grooves, as described, by providing the lid or cover of the casting-box with longitudinal ribs, in the position and of the size and shape of the desired grooves; and at the points at which the cross-necks or bridges are wanted these ribs are cut away. For the purpose of causing the metal to relieve easily from these ribs, they are made slightly wedge-shaped, and corners and edges are slightly rounded, or at least blunted, as sharp angles in the pattern do not relieve easily from the metal. In use such columns as are to be transposed are sawed out from the page, the saw cutting out the stereotyped column-rule as originally cast directly over the rift through which the saw runs. The saw-cut edges of the columns are then dressed to remove the roughness left by the saw, the amount of metal taken out by both processes—sawing and dressing—being precisely equivalent in thickness to the independent column-rules, which replace it in the form made up with the divided columns. It will be seen that when full columns are set the cross-cut end of the necks or bridges of adjacent columns will abut against the column-rule directly opposite each other, and will so bind the column-rule securely between them and

brace the columns in such manner as to prevent them from bulging upward. If fractional columns are used, so cut that when set together in the form these cross-cut ends of the neck of metal do not abut against the column-rule at points directly opposite, they will, nevertheless, serve to prevent any bulging of the page, since, the bridges being cast not more than six inches apart, the greatest distance by which any two opposite bridges could be separated in any manner of subdividing the columns would be three inches, and inasmuch as the column-rule is securely bound all along the upper edge, its own stiffness is sufficient to afford the necessary bracing.

It is evident that the same method may be employed when transverse subdivisions are to be made.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, April 23, 1884. }

THE MONEY MARKET.—The money market continues to rule easy, and borrowers on call are still able to supply their wants at $1\frac{1}{2}$ per cent. on Government bonds and $1\frac{3}{4}$ per cent. on other securities and time loans have been made at $3\frac{1}{2}$ per cent. The latter have been in rather more request, with lenders still disposed to scrutinize closely. Prime commercial paper $4\frac{1}{2}$ per cent. discount. The stock market has presented no new feature. Speculation has been moderately active and prices are again a shade lower, and the market left off last evening barely steady. Railroad bonds have been in moderate request and ruled strong. Government bonds a trifle lower for $4\frac{1}{2}$'s and 3 's. State bonds neglected. Foreign exchange has ruled strong but quiet.

THE PAPER MARKET.—General business does not make the progress expected at this time of the year, and in fact there is scarcely a single line of trade whose aggregate is not below what is considered the average. This is due in a great measure to the backwardness of the spring weather. That an improvement has not been experienced sooner is no doubt a disappointment to many who confidently counted upon the spring months as likely to bring about a better condition of things, but there is no cause for discouragement or despondency in view of the fairly prosperous condition of the country. As contrasted with some other lines, the paper trade presents some very favorable features, notwithstanding the comparatively moderate demand, small margins and the keen competition. Except for the lack of confidence, which has been a feature among the trade and an incentive to more conservatism in the extension of credits, in view of the number of failures during the past few months, the outlook presents many hopeful signs, and although the waiting for more prosperous times may become tedious and somewhat discouraging, it is satisfactory to know that the improvement when it comes will undoubtedly rest upon a sound and healthy foundation. Respecting prices, the only change we hear of is an advance of 2c. per ream on the small sizes of straw wrappings, equal to about 5 per cent. all through, heavy paper on the basis of weight having been put up to \$1.90 per 1,000 pounds.

THE STATIONERY MARKET.—While there has not been a high degree of activity in trade during the past few days, there is more steadiness shown, and the demand generally for staple goods is quite fair. There has been an encouraging influx in town of out-of-town dealers, while local dealers also report more steadiness in the receipt of orders by mail. The trade in spring goods is very fair, and enterprising dealers have no reason to complain. The blank-book and envelope trade is moving slowly with, perhaps, a slight improvement. Dealers are ordering with less reluctance than a few weeks ago, and the indications are, if anything, more encouraging. The trade in cards, of course, is over, with the exception of birthday cards, for which there continues to be a fair demand. There is quite a healthy movement in fine stationery, the demand being mostly for fancy papers, and the best qualities of linens and parchments. The novelties in papereries thus far introduced this season are decidedly pretty and tastefully gotten up, while at the same time they are remarkably low in price. There is a falling off in the trade in steel pens, but dealers report quite a steady call for inks, for which there is a good export request.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
6 $\frac{1}{4} \times 3\frac{3}{4}$ \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

PLIMPTON MFG. COMPANY,

HARTFORD, CONN.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the **CHEAPEST and BEST** outfit for hand printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$4.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

OBITUARY.

ALVIN J. JOHNSON.

Alvin J. Johnson, the publisher, died on April 22, at his home, No. 9 East Sixty-fourth street, New York, of Bright's disease. He was born in Wallingford, Rutland County, Vt., on September 23, 1827, and was the eldest of twelve children. After working on the farm until the age of sixteen he went to school at Black River Academy, at Ludlow, Vt., and the next winter taught school. Mr. Johnson, in 1853, became a canvasser for C. C. Colton's atlas, and after the panic of 1857 succeeded to the business. He brought out Johnson's "Family Geography," with Guyot's "Physical Geography," and 160,000 copies were sold. Mr. Johnson published Dr. West's "Analysis of the Bible," which was reconstructed by the Rev. Dr. R. D. Hitchcock, and over 425,000 copies of the work were printed. "Johnson's Encyclopædia" was produced at the suggestion of Horace Greeley, and the work, in four volumes, selling at first for \$51, cost \$350,000 for its publication. Mr. Johnson amassed a fortune estimated at \$1,000,000. He was a member of the late Dr. Chapin's church, and was an intimate friend of Horace Greeley. He leaves a widow, a son, and two daughters.

EDWARD O. JENKINS.

Edward O. Jenkins, the publisher, died of pleuro-pneumonia at his residence, No. 137 West Forty-fourth street, New York, on April 20. He had been ill about a week. Mr. Jenkins was born in Abergavenny, Wales, September 18, 1817. His father, John Jenkins, came to this country in 1820, and settled in this city. Edward entered the printing-office of the New York *Evangelist*, as an apprentice, in 1832. After learning the printer's trade he entered the employ of S. W. Benedict, one of the leading printers at that time, and became the manager of the establishment. In 1844 he began business as a printer on his own account at No. 114 Duane street. He published the *American Review*, conducted by George H. Corbin, the American edition of *Blackwood*, and many law reports, and rapidly acquired an extensive business. He removed into more commodious quarters, in Frankfort street, in 1858, but his establishment was soon afterward destroyed by fire. He next purchased the printing establishment of Billings Brothers, 20 North William street, which he conducted until his death.

Mr. Jenkins was an ardent Republican in politics, but persistently declined to accept nomination for office, and particularly disliked the use of the "machine" in politics. He was a member of the Board of Education in 1872 and 1873, and manifested a deep interest in the cause of education. He became a member of the Rivington Street Presbyterian Church at an early age, and remained in that congregation some time after its removal to Second avenue and Fourteenth street. Subsequently he transferred his membership to the West Presbyterian Church, of which the Rev. Dr. Thomas S. Hastings is pastor, in West Forty-second street. Mr. Jenkins leaves a widow, three sons and three daughters. The funeral will take place from the West Presbyterian Church to-morrow at 3:30 P. M.

CALVIN WHITING.

Calvin Whiting, superintendent of the Massasoit Mills, Holyoke, Mass., died of pneumonia on Thursday, April 17, at his home on Pleasant street, that city. He has been in broken health since January 2, when he had a slight apoplec-

tic attack. He was a veteran among the practical paper makers, having been in the service as superintendent since 1850, when he took that position at D. & J. Ames' mill at Chicopee Falls. He was engaged by the Greenleaf & Taylor Manufacturing Company in 1853 to oversee the building of their mill at Huntington, the Chester factories. He remained there till 1867, when he went to West Cummington, and then to Philadelphia, and has been connected with the South Holyoke Company and the Massasoit Company since 1871. Mr. Whiting was a native of Amherst, where he was a tanner, and was for some years a clerk for the Connecticut River Railroad Company in this city. He was a member of the Episcopal Church, of steadfast honor and integrity in every relation of life. He leaves a widow, a son and two daughters.

METHOD OF MAKING LITHOGRAPHIC PRINTING-PLATES.

This has reference to an improved method of making lithographic printing-plates by moistening the surface of the metal foundation plate with a saturated solution of bicarbonate of lime, then heating the plate so as to evaporate the solution, and repeating these steps until a coating or deposit of bicarbonate of lime is obtained on the plate, so that the same can be used in the same manner as a lithographic stone.

In carrying out this invention a saturated solution of bicarbonate of lime is first prepared, which is obtained by dissolving hydrate of lime in water and then introducing carbonic acid into the solution until it has an acid reaction. In this manner a saturated solution of bicarbonate of lime is obtained, which forms a clear liquid, that is then drawn from the remaining undissolved hydrate of lime. A carefully cleaned foundation-plate of metal is next moistened on its surface with this solution, preferably by applying the solution in the form of a spray by means of an atomizer. The metal plate is next slowly heated, but only to such a temperature that the formation of spheroidal drops thereon is avoided. By the heat the water of the solution is evaporated and the lime contained in it is deposited on the surface of the plate. The moistening of the metal surface and the evaporation of the solution are continued at proper intervals until a firmly adhering deposit of lime is obtained on the plate, which deposit possesses all the properties of the lithographic stone, and which can be used as a substitute for the lithographic stones heretofore employed, either for transfer-work or for direct work or by engraving thereon.

The prints are made in the same manner as in lithographic printing, prints of a high degree of perfection being said to be obtained from the plate.

SANBORN'S' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat.

Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers', and Paper-Box Makers' Machinery,
No. 51 BEEKMAN STREET, NEW YORK.

Manufactory: Standard Machinery Company, Mystic River, Conn.

L. L. BROWN PAPER COMPANY,

ADAMS, MASSACHUSETTS, U. S. A.

Manufacturers of First-Class

LINEN LEDGER AND RECORD PAPERS

WHICH WILL STAND THE SEVEREST TESTS OF ERASURE AND RE-WRITING

being double Sized and Loft Dried. These Papers possess unusual strength and beauty, and contain a sizing that resists the severest erasure and re-writing tests. Every ream is Water-Marked with Name, and put up with Binders' Boards, trimmed perfectly square, and ready for Ruling Machine.

"OTTO" GAS ENGINE.

OVER 10,000
IN USE.

Working without Boiler, Steam, Coal,
Ashes or Attendance.

STARTED INSTANTLY BY A MATCH, IT GIVES
FULL POWER IMMEDIATELY.

WHEN STOPPED, ALL EXPENSE CEASES.

No explosions; no fires nor cinders; no gauges; no pumps; no engineer or other attendant while running. Unsurpassed in every respect for hoisting in ware-houses, printing, ventilating and running small shops.

SIZES: 1, 2, 4, 7, 10, 15 and 25 horse-power.

WHITTEMORE BROTHERS & CO.,
172, 174, 176 Lincoln Street, Boston, Mass.,
WHOLESALE MANUFACTURERS OF
SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready to use*, and is the *only Mucilage* that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.
Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

NEWSPAPERS COUNTED BY ELECTRICITY.

George Rosquist, the machinist of the New York Sun, is the inventor of an electrical apparatus by which papers are counted and registered as they leave the steam presses. It is simple and complete, and has been in successful use on the Sun's presses for several months. Unlike the other paper-counting apparatus now in use, which registers the revolutions of the cylinders whether the paper is running over them or not, Mr. Rosquist's apparatus only registers the actual number of impressions made.

On the male cutting cylinder of the press is fastened a bowed strip of brass about three inches long and one inch broad. On it is a button which connects with a bell crank, which works a small rod connecting with a circuit switch in a box on one of the cylinder's journals. The switch connects, by wires from a small battery, with an electro-magnetic apparatus constructed on the principle of the Morse telegraphic instrument. The pressing of the button works the switch, which flies back to its original position when the pressure is removed. This works the bar on the electro-magnetic apparatus, which connects with the register by a lever. The lever moves a geared wheel, which registers either two or four papers, depending on the size of the press. The registers for the double presses register as high as 999,000, and those for the single presses register 99,000.

In order to prevent the registering of revolutions of the cylinders when papers are not printed, there is a small canal cut into the female cutting cylinder, into which the bowed strip of brass with its button sinks when the canal is not covered by the paper on which the impressions are made. The registers can be placed at any distance from the presses. Those used by the Sun are in the office of the superintendent of the paper department, on the floor above the presses.

Ragged edge note paper is still a favorite among English ladies.

tion and prices given on application. Ruling Attended to.

ACKERMAN, Envelope Manufacturer to the Trade, 33 Beekman St., New York.

THE HOLYOKE ENVELOPE COMPANY.

The manufacture of paper was begun in Holyoke, Mass., about thirty years ago. It originated like all industries in a very small way, gradually developing, until to-day Holyoke is a great paper-making centre of the United States. Not only has there been a steady growth in the Holyoke paper-making industry of itself, but it has given birth to and fostered other industries of nearly as great importance. Among these may be mentioned the manufacture of cardboards, envelopes and papeteries.

In the manufacture of envelopes, the Holyoke Envelope Company has shown marked enterprise since its organization in the spring of 1881. It began with a small production of staple goods only, but its business rapidly increased, rendering necessary the addition to its factory of envelope-making machinery and appliances of the most modern and approved make, some of which are of its own manufacture and invention. These additional facilities increased the company's capacity from a few hundred to a million envelopes a day.

From the making of ordinary envelopes the company branched out into new enterprises, one of which was the production of an extensive line of fine papeteries. This embraces over five hundred styles of rich and rare goods, packages, boxes and cases of every imaginable shape, size, style and kind. In the manufacture of its papeteries, the company uses paper, ivory, zylonite, leatherette, leather, satin and plushes, and its varied productions are made up in the most finished manner, are ornamented with rich designs of flowers, fruit, figures, landscapes, birds, &c. The eye tires in looking over its mammoth collection of specimens prepared, as it is, for presentation to an admiring public, in full detail of both plain and elaborate attire of fine embossed or illuminated work. There is shown in these specimens much originality of design and artistic genius. The line of samples has been prepared early for the convenience of those who wish to order for the autumn and holiday season of 1884-5.

Another departure, which has placed the company at the head of Holyoke's industries in the production of fine art novelties, is that of metal work, in the shape of plaques, armors, medallions, figures, flowers in bronze and imitation bronze, brass, tile, plain and inlaid, with frames of plush, satins and other rich fabrics. These goods embrace a large variety of novelties now becoming popular for interior decoration and range in prices to suit the purses of all classes. So extensively has the firm engaged in the development and commercial treatment of its fine-art department, that it has constructed a room in its Cabot street mill manufactory, with stained glass windows, rich carpeting and appropriate drapery, for the exhibition of what it has to present to the public in this field of enterprise.

Both oblong and square paper are fashionable.

ELECTRO-PLATING WITH NICKEL.

BY WILLIAM H. WAHL.*

[Continued.]

Nickel solutions are feebler conductors of electricity than those of gold, silver and copper which is one of the reasons why its electro-deposition is attended with more difficulties than are experienced with the metals named. On this account, also, it is necessary to employ stronger depositing solutions than those used for gold and silver, and a stronger current. To make up for this want of conductivity it is advantageous to use a much larger anode surface than is customary with other metals, and it is necessary to place an anode on both sides of an article to be plated. The usual arrangement with a large vat is to have two rails of brass the whole length of the vat, resting on the edges of the same, from which two rows of cast or rolled nickel anodes (to which copper wires are soldered) are suspended. Between these outer rods is placed a similar one also running the whole length of the vat, and from this, by means of suitable slinging wires, the articles to be plated are suspended in the bath. The ends of the rails nearest the battery or dynamo are suitably connected therewith in the usual manner. The work thus hangs between the two rows of anodes.

Watt very properly calls the attention of the operator in this connection to the importance of having the wire supports from which the articles are hung in the depositing vat, of a gauge suited to the character of the work. Small articles will require but a very thin wire, while larger ones will require correspondingly thicker "slinging wires." On the same point he cautions the operator that the difference of conductivity in the metals to be plated is to be considered, "for, whereas, a steel, brass or copper article would become readily 'struck,' even if suspended from the conducting rod by a thin wire, articles of lead, Britannia metal, pewter or even cast iron would not receive the deposit so readily." It is obvious, therefore, that in suspending articles in the plating bath, the operator must be guided in the matter of the thickness of the "slinging wires," by the nature of the articles, as well as by their dimensions.

It cannot be too strongly impressed on the operator that the attainment of success in nickel plating depends very largely upon the perfect cleansing of the articles before they are immersed in the bath. Important as this operation is in plating with other metals, it is even more so in the case of nickel. Gilding, silvering, bronzing, &c., are usually effected with solutions having a decidedly alkaline character (reference is made here to the double cyanide solutions commonly used) and the presence of minute traces of oxide from careless exposure to the air after cleansing, or of grease from the fingers, &c., on the surface of the articles to be plated, is not necessarily fatal to the success of the work, as the free cyanide always present in those baths, being a solvent of greasy substances and of metallic oxides, may remove trifling quantities of such impurities. With nickel, however, the case is different. The solutions employed for its deposition are either neutral or weakly alkaline or acid. Their chemical character is such, therefore, that they can have little or no solvent effect on the grease or oxide left on the articles by careless cleansing, or improper handling or exposure before immersion; and if such articles are plated the nickel coat-

* A paper read before the Chemical Section of the Franklin Institute.

ing at the unclean places will be found to have little or no adhesion to the metal beneath, and will almost certainly flake or strip at these places in the subsequent operation of buffing. Unless the surfaces to be coated are chemically clean an adherent deposit of nickel is simply impossible.

On account of the hardness of the deposited metal nickel-plated articles cannot be burnished. In order, therefore, to obtain upon the finished work that superb metallic lustre which characterizes this metal, it is necessary to polish the surface of the articles upon the buffing-wheel before immersion in the plating bath, in order that the deposited metal may be as smooth as possible; thus reducing the amount of subsequent buffing, required to finish the plated articles, to a minimum.

The operation of cleansing articles differs somewhat in various establishments; the following methods, however, are those usually followed:

For copper, brass, Britannia metal, tin, pewter, &c., the articles are first steeped for a few minutes in boiling potash solution to remove greasy matter; they are then removed, dipped for an instant in cyanide of potassium solution of moderate strength, rinsed in water, again rinsed, then thoroughly brushed with the finest pumice powder (precipitated chalk and other fine powders are also used); again rinsed in water, dipped again for an instant in the cyanide, well rinsed, and then hung at once in the nickel bath. The time of immersion in the boiling potash solution will depend on the strength of the alkali and the amount of greasy matter present. Tin, Britannia, pewter, however, should be left in it as short a time as possible, as the alkali exerts a solvent action on tin and alloys containing this metal. When rinsed in water after removal from the potash, the water should wet the surface uniformly; should any cloudy patches be visible these indicate that the grease has not been completely removed, and the article must be immersed again in the boiling potash.

Steel articles are first treated to the potash bath; rinsed in water, scoured with pumice powder (or its equivalent), rinsed, dipped for a moment in dilute hydrochloric acid, again rinsed, and at once hung in the depositing vat.

Cast iron is first placed in the potash bath to remove greasy matter, well rinsed, then allowed to remain for some time in a pickle of dilute sulphuric acid to partially dissolve off and partially soften the scale that covers it, rinsed, then thoroughly brushed with pumice, rinsed, dipped for a moment in dilute hydrochloric acid, again rinsed, and immediately placed in the nickel bath.

Many operators vary the above methods of cleansing somewhat, but they are followed substantially as given, by the majority of nickel-platers. With Britannia-metal, pewter, and other compositions of comparatively low conductive power, it is to be recommended to give them a preliminary coating of copper, for which purpose the cyanide bath is commonly employed. Many operators prefer also to copper articles of iron and steel preparatory to nickel-plating. The advantages secured are a better conducting surface upon which to lay on the nickel, and a more tenacious deposit, having in the case of a heavy coating of nickel less tendency to flake. Where a substantial and durable nickel deposit is required on iron and steel, and especially where the articles are to be exposed to the atmosphere, or will be subject to much handling, a preparatory coating with copper is almost indispensable. In the earlier days of nickel-plating it was the almost universal practice to first copper all iron and steel articles.

(To be continued.)

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

RECEIVED. LIBRARY. 1884 PATENT OFFICE

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.—NO. 18.

NEW YORK, MAY 1, 1884.

WHOLE NO. 462.

Correspondence.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, April 29, 1884.

And so THE STATIONER and the whole family are going to move. Want larger quarters, eh? Room to turn around? Times must not be so awful hard as some folks would make believe. I heard a prominent and very successful Cincinnati merchant say, "Business dull. Why, business is always dull for men who don't look it up. We find when we neglect our business it falls off. We have always made it a rule when we found our business falling off to look about and see where the neglect is, and we have seldom failed to discover it somewhere. I tell you the growling about dullness is very boshy. If, instead of croaking, men would stir about and hunt up business there would be no time for grumbling and less falling off in trade."

Edwin Hoole, of Snider & Hoole, has been off to Chicago for a week. He has a warm side for Chicago. No one need be surprised if the main office of Snider & Hoole should pack up and go off to Chicago some day.

Max Mosler, the official county stationer, has been compelled out of self-respect to resign his position. His pioneer work in this office has been valuable to the county. No one denies that. But faithful and efficient service, you know, doesn't always count, unless it is of service to the party, rather than fidelity to the duties of the office. Now that Mr. Mosler has resigned, a new man must go in at the most critical moment and learn the business.

N. Biedinger has sued J. Diem for a dissolution and settlement of the partnership of Biedinger & Diem, paper dealers, 71 Walnut street, and for a receiver. Biedinger claims that he owns \$20,500 of the \$37,000 assets of the firm, but that Diem refuses to recognize him in the business. The partners also own two-thirds interest in the Hydraulic Paper Mill, Dayton, Ohio.

The storm of Sunday made some trouble among the paper mills near Dayton, but did not seriously disturb business.

Van Antwerp, Bragg & Co. have gone out of the blank-book business. It grew rapidly until the question of providing better facilities came up and the decision was made to let it drop and devote everything to the school-book publishing establishment.

The Globe Files Company in its new quarters is receiving not only letters of inquiry from

persons abroad but a good share of calls from mercantile visitors to the city.

Charles Stewart, of the C. Stewart & Co. paper warehouse, keeps up his avoirdupois admirably for one who keeps on the go so constantly.

Louis Snider's Sons maintain a barricade in front of their warerooms on Walnut street that would turn a 30-pound Parrot gun shot. There is neither riot nor revolution in progress here now. This barricade is a commercial necessity—goods coming in and going out.

The firm of Mallory & Webb is likely to be changed in consequence of the death of William L. Mallory.

C. F. Bradley keeps his presses all moving on his customers' demands for job mercantile work, &c.

William J. O'Neill was defeated in the race for City Clerk a few ago. That doesn't mean anything. "Billy" wouldn't have accepted the position had he been elected. The business of J. R. Mills & Co. requires his attention and he was nominated for the position of City Clerk by some councilman who didn't want to vote for any other candidate put up. W. J.'s consent was never asked.

General business is fairly good here—that is, it is no duller than it has been for three or four months past. PRINCE WILLIAM.

BOSTON BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., Boston, April 29, 1884.

Trade during the past week has been like the weather—very spasmodic. As a general rule, trade drops off a little during the last week of the month, as out-of-town dealers don't like to increase their monthly accounts just before the eve of settlement. Manufacturers of specialties report a very fair trade for spring novelties; and some of them are already on the road with samples of fall goods.

Easter cards and novelties have been stored away, and the trade in "decorated pasteboard" is now confined to visiting cards, embossed pictures and album souvenirs. These classes of goods find ready sale the year round, and a large amount of business in this line is done.

J. Baird, who makes a specialty of the card business, is displaying a very extensive line of birthday souvenirs, albums, cards and embossed pictures. His catalogue, just issued to the trade, cover some three hundred different designs. Among the embossed shape novelties presented by this house are several new designs which are having a very large sale. One of

these, "Jersey Cows," is a very faithful presentation. The "Artiste" is another shape novelty, which makes an agreeable impression upon the eye. "George Washington" mounted upon an iron-gray charger shows up the immortal hero in true colors. A very beautiful picture is "New Year's Eve," presenting a scene with which all good Christians are familiar—a snow-capped church, the lights within shining through the ecclesiastically stained glass, a merry party just alighting from a sleigh, towering trees on either side, and the whole picture lit up by a silvery sheen from fair Luna above—just such a tableau as the eye loves to dwell upon. The "Young Critic" is another production into which the artist has thrown considerable life and color. The expression of the child as he stands gazing upon the canvas before him shows deep interest, while the artistic blending of bright colors gives animation to the scene. For cheap shape goods these are somewhat above the ordinary line usually offered the trade, and owing to their beauty are meeting with a very extensive demand.

In answer to "Sub," who in last week's issue of THE AMERICAN STATIONER makes inquiry concerning "toilet paper and fixtures," I would say that the Union Cabinet and Paper Company is manufacturing a line of goods which is giving general satisfaction in this section of the country. The company started in only last August, since when its goods have had such a local demand that the company's facilities were taxed to the utmost to supply this limited trade, and, in consequence, was unable to seek a more extended market. The mill of the company, situated at Lebanon, N. H., where the cabinets and "Perfection" paper are made, have lately been considerably enlarged and an effort will be made shortly to acquaint the trade generally with the merits of these closet cabinets. Comparing these goods with such as are now in the market, it is safe to say that the Union cabinets are the most complete articles of the kind ever introduced. They are elegantly finished in bronze, brass or nickel, as well as different kinds of wood ends to match the closet, making them an ornament as well as a necessary convenience. The Union cabinet is covered by four different patents. One is on the "lock," which is a very simple device, designed to pass through the roll of paper, holding it in the cabinet and preventing its removal until entirely consumed. The cutter, by which so much paper as may be wanted is quickly severed from the roll, is another ingenious part of the cabinet covered by special patent, and this prevents waste of paper. For hotels, factories, public institutions and private houses no better toilet cabinets can be found.

They never get out of order and prevent waste. All the public buildings and hotels of this city are furnished with them, as well as the leading commercial houses. The company was incorporated February 6, 1883, and is officered as follows: Charles A. White, president; N. F. Davis, vice-president; C. C. Rogers, secretary, and F. B. Kendrick, treasurer. The selling agents are H. C. Robinson & Co., and Moulton & Goodwin, of Boston.

John A. Boyle, manager of the Boston School Supply Company, is introducing to the trade Philips' Historical Readers, a serial story of English history, in four books. In this series of historical readers the history of England is presented in such a clear and interesting manner that children can readily understand what is written, nor will what is written fail to interest them, so entertainingly are the events of that nation told. Children of even a larger growth will find these historical readers quite absorbing in their narratives, and much valuable information can be gained by their perusal. "Stories from English History," "Early England," "Middle England," and "Modern England," are the divisions the work is divided into, one epoch being treated by each book. The text throughout shows originality of thought, freshness and simplicity in style. The illustrations are unusually numerous and attractive and are designed especially for object lessons, that they may aid the youthful reader in remembering the text. The readers are carefully edited, clearly printed on good paper and strongly bound. Such books as these, if placed in the hands of girls and boys, will interest and entertain them fully as much as those cheap yellow-back publications of "Billy the Kid" series; and the results of such reading will be beneficial.

With the approach of the summer season, seaside hotels are looking up menu cards, and trade in that line is on the increase. There are several establishments in Boston that make this class of goods a specialty. Among them is the house of John A. Lowell, whose reputation for first-class work is second to none in this country. This house is displaying an extensive line of menu cards. The cards are all steel plate, and a number of new designs are shown.

Chas. H. Whiting reports a very fair jobbing trade in the book line. Among the novels of the season that are having a good run is "Bethesda," by Barbara Elton. The *Gazette*, one of our leading literary society journals, in its review of "Bethesda," says: "It is a thoughtful and well-written novel, somewhat diffuse in the treatment of its plot, but interesting generally, refined in point of taste, and spirited in its character-drawing. A strong devotional tone pervades the story, but it is not obtrusive, and rather heightens than clouds the dramatic intensity that characterizes the latter portion of the work." A. L. D.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, Pa., April 28, 1884.

Should the people who inhabited this burgh thirty or even ten years ago arise in our midst and witness the very many and handsome buildings erected since they left this sphere, they certainly would say that their descendants were progressive and had an eye for the beautiful. The year 1884 will see more large and fine buildings put up and more of the old houses remodeled than any previous year. The McCandless block on Wood street, the elegant Y. M. C. A. building on Penn avenue, and on the same avenue Danziger's new store and Jackman & Sons

magnificent livery and carriage repository, and the Petroleum Exchange on Fourth avenue, which is a most beautiful structure, are among the finest just finished. The old St. Clair Hotel is being torn down and a large and finely equipped hotel will immediately be commenced, to cost \$125,000; the old Court House is about razed, and the contracts will soon be let for a \$2,000,000 Court House, the plans, &c., having been adopted by the commissioners; the Government buildings are progressing finely and hundreds of other smaller buildings are in course of erection. I must mention one other, viz., the handsome Law building on Grant street. The first story is of iron, the remainder of Philadelphia pressed brick. We will all soon be proud of our buildings, as well as our steel, iron and glass works.

W. G. Johnston & Co., the well-known stationers, printers, bookbinders, &c., have bought a lot on Penn avenue, and at an early date will build a large and handsome structure for their own use. This is one of the pioneer firms of Pittsburg and it does an immense business. The senior member, Mr. Johnston, is one of the wealthy men of this city, and is connected with a number of banks, insurance companies, &c. The firm is so well and favorably known it seems almost unnecessary to make any mention of the prosperity of such an establishment.

Very recently I called on most of the leading stationers and book-men to learn the state of trade. The general opinion seemed to be that it has been exceedingly quiet for the past three weeks. Indeed all kinds of retail trade—trimmings, dry goods and carpets excepted—have been dull and the outlook for quickened business pulses is not as bright as one would like to see it. It is hoped that May and the first part of June will see better sales among the retail merchants.

The iron profits have been small and the present skill in using steel for so many purposes heretofore made exclusively of iron, causes the owners of iron works to wear rather long faces.

Last week W. W. Edgar buried his only son, and his friends truly sympathize with him in his sad bereavement.

Lee Mason, better known to the trade as "J. R. Welden & Co.," has been confined to his bed for several weeks with pneumonia. He is now convalescent.

R. S. Davis & Co. are still in the midst of carpenters and painters, but hope to have their room finished within the next ten days. Their new stand is near the post-office and Smithfield street, and is a better situation than the old one.

The past few days have been exceedingly pleasant, the sun showing himself more brightly than for many days. The sunshiny days consecutively make a rich treat for the inhabitants of this smoky place.

The following named well-known traveling gentlemen have called on our stationers recently, viz: Mr. Wirth, of Wirth, Owens & Co.; Mr. Anabel, of Obpacher & Co.; Mr. Foster, of C. Taber & Co.; Mr. Graves, of T. J. D. Whitmore & Co., and Mr. Crowell, of T. Y. Crowell & Co. G. W. H.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING,
CHICAGO, ILL., April 26, 1884.

Your readers, very likely, have supposed that the Chicago climate was too much for your correspondent, and that he had succumbed to the inevitable; but such is not the case. He is alive

and kicking, and after a short visit to the neighboring villages, has returned to the rush, bustle and activity of this great city.

Notwithstanding the rainy weather, trade was very good in Easter novelties and cards, and most dealers are congratulating themselves on their success.

The Tablet and Ticket Company is having quite a demand for its goods, especially for its cut numbers, which are by far the best thing it has yet introduced.

C. M. Barnes, 151 and 153 Wabash avenue calls the attention of the trade to his large stock of new and second-hand school books and school supplies. He claims to have a larger stock of these goods than any other dealer, and guarantees satisfaction.

The Novelty Card and Advertising Company is as busy as bees, and is working night and day. It has got in some very taking novelties lately, which are selling well.

Pulsifer, Jordan & Wilson, paper dealers, of Boston, have opened a branch in this city in La Salle street, under the management of W. A. Fowler, long and favorably known to the Western trade.

Geo. Sherwood & Co., school-book publishers, at 130 Adams street, will remove on May 1 to more enlarged quarters at 307 and 309 Wabash avenue.

Rand, McNally & Co. are very busy now, running on their fourth edition of "Fedora," by A. Beloit. The sale of this book, I am informed, has been enormous.

A. H. Abbott & Co., 50 Madison street, show among a great many new things, quite a novelty which they call "Essex" ware. It comes in different shapes, and is becoming very popular.

Another novelty which is destined to be quite popular is the McCandless patent adjustable covers and renewable insides for cash, check, memorandum and shipping books, which are for sale by the manufacturer's sole agents, H. E. Sidall & Co., 183 Clark street, who will be pleased to give further particulars.

L. W. Noyes, 99 West Monroe street, is pushing the sale of his new patent adjustable book-holder, which he claims is the best article ever gotten out for the purpose. GARDEN CITY.

SCHENECTADY NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

SCHENECTADY, N. Y., April 27, 1884.

With the end of March came also the end of the stormy and disagreeable weather. The heat of the sun has melted the snow on the hills about the city, and the keen, cold edge has been taken off from the spring breezes. The drying-up of the roads has given the farmers fair roading to town, and their coming has been welcomed by the tradesmen of the city. The shops have started up again and the prospects for our city are much better than they were a few weeks since.

An instance of how much may depend upon one man in the financial world has just been experienced here. At the time of the Jones Car Manufacturing Company's failure the City Bank, of this city, was a creditor to the amount of \$108,000, which was put in a judgment on the day that the company's troubles became known. Thos. W. McCamus, the president of the bank, was also personally a creditor of the Jones Company for \$15,000. At the time there was a run on the bank, and considerable money was withdrawn, but after a time confidence was restored.

One day the community was startled by the

(Continued on page 568.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 566.)

news that Mr. McCamus had been compelled to resign, and that Chas. G. Ellis, president of the Schenectady Locomotive Works, had been elected president of the bank. At the same time it came out that Mr. McCamus, who had always been considered a man of means and business capacity, was ruined financially. A day or two afterward the firm of John Cantine & Co., operating a foundry on Fonda street, made an assignment with liabilities of \$73,500, and assets of less than \$7,000. Mr. McCamus had been the backbone of the concern for a long time, and his failure caused its fall, although it had been considered weak for a long time. Among its creditors are Schenectady people of small means in various sums to the amount of \$20,000. These are second preferred, and will get about ten cents on the dollar. The cause of Mr. McCamus' downfall is said to be unsuccessful stock operations. The City Bank held \$25,000 worth of the Cantine paper. In the Olley assignment, about \$2,400 was realized, not enough to pay first preferred creditors.

Henry M. C. Daley is trying to make arrangements through his assignee to settle up and go on with his business.

The passage of the bill by the Legislature providing for the study of physiology and hygiene in the schools has caused some attention to those subjects in educational circles and the school authorities are receiving copies of text books. I have heard Brand's "Lessons on the Human Body" well spoken of as being both cheap and simple in its style. Steele's work on Hygienic Physiology is well spoken of as a more advanced work.

Our booksellers are now engaged principally in getting out their wall-paper stocks. There seems quite a preference this year for gilt paper with flowers and vines in preference to blocks, &c. The taste seems to run somewhat to large and bright patterns. The sales of Easter cards was not large and hardly up to expectations.

The job printing and publishing establishment of Clute & Burrows, recently formed, is dissolved, and Charles Burrows continues the business. G.

OUR LONDON LETTER.

(FROM OUR REGULAR CORRESPONDENT.)

5 LUDGATE CIRCUS BUILDINGS, }
LONDON, E. C., April 19, 1884. }

The advent of spring is bringing with it some, at least, of those signs of improvement in trade for which we have been so long waiting. A greater activity seems to be discernible in most branches of the stationery trade and still more so in the trades more or less intimately connected with it. The only question is whether these signs and portents are indicative of a greater demand on the part of the public or only of a larger supply on that of the manufacturers, because supply and demand do not always bear that harmonious relation to each other in these matters which they certainly should. "We must keep on producing new things," said a big provincial manufacturer to me recently; "if we did not, the trade would think we were done up, and then we very soon should be; but the fact is that the best thing that could be done would be for a lot of us to stop producing for six months, so as to let things find their level. As it is, we bring out things that nobody wants, force them on the shopkeeper on any terms, while he, in his turn, sells them at any profit, sometimes at merely that which is represented

by selling for cash to the public and getting nine months' credit from the wholesale man." Not only is this no exaggeration of the hollowness of much of the trade that is done, but I may add that in London and some other large towns there are shops being run in the interest of manufacturers, where goods are sold at just what they will fetch, that is to say, an article for which the retail price is nominally five shillings is offered at four, and if it does not go off at that price it comes down to three shillings; if that will not fetch the buyers, a further reduction is made, until a figure is reached which probably represents about half of the supposed wholesale price. These "put up" shops are a comparatively recent contrivance, but are evidently on the increase and add another straw to the back of that overladen camel, the unfortunate retail shopkeeper.

Under all of these circumstances, therefore, it is somewhat difficult to determine the question of whether the appearances of increasing business prosperity are genuine or illusive. We can only hope that at last we have arrived at a turning in a very long and weary lane.

Of the towns to which I have paid flying visits since my last letter, there is but little to record. Manchester was quiet but hot, and like Birmingham, fiercely discontented. Liverpool, Bradford and Leeds were doing better than for some time past. Nottingham, decidedly less; Sheffield, very poorly; Derby and several other towns of second and third rate importance, seemed fairly well off and confirmed my impression that, as a rule, business is better—taking into account the amount of energy displayed and of capital invested—in the provincial towns of smaller size than in the big centres. Perhaps this is owing to the more primitively honorable modes of doing business prevailing in them.

At Leeds more than in any other large town, there seemed to be a good solid business doing, but that was not in the stationery lines but in the chromo poster, calendar and border work for which that town is noted. The works of Alfred Cooke, who is well known as the printer of bright-colored hanging calendars, will well repay a visit, the building itself being one of the handsomest in the kingdom devoted to printing.

Taylor Brothers have also a fine establishment in the town, wherein some excellent work is produced; several samples of school certificate cards, almanacs and calendars were of remarkably high character as regards both design and printing. There are also several other large firms of chromo printers each having its specialty and all appearing to do fair business—in fact, a visit to Leeds is calculated to revive the drooping hopes of English manufacturers.

The next subject to which the attention of the trade will be invited will be the Christmas card designs of the various publishers. I cannot help expressing a hope that they will not exceed even if they equal in number the patterns of last year. The examination of the books of the many houses in the trade is nothing less than a species of refined torture. The brain grows giddy with the effort to discover the beauties and pronounce upon the merit (?) of the thousands of "varieties," which seem for the most part to be wonderfully alike. I hear that some really new things in cards are to be shown shortly, which in the language of a London trade journal, will be far ahead of anything yet produced. I think, however, that I have heard that remark made before. One thing ought to be certain, namely: that the shopkeepers who were bitten by the coaxing travelers last year will be somewhat more careful in their dealings with them in the present one and will demand for themselves as

good terms as those offered to the drapers and other outsiders, or else leave the thing alone altogether. It would be better, perhaps, for them to take the latter course if there is any truth in a rumor that has reached me to the effect that one large manufacturer of Christmas and New Year cards is seriously considering the offer of a well-known universal provider to take all the cards he produces for this season's sales. Perhaps this is the logical outcome of modern trading, but some people would probably prefer a more primitive mode of doing business and may be inclined to think that "Live and let live" is a motto that has not altogether lost its significance.

W. F. C.

OLD MASTERS' METHODS.

The "grounds" of the panels or canvases on which the old masters painted were usually a deep Venetian red, on which they drew their outlines in white. One very strong argument in favor of black writing-paper and white ink will occur if you recall the process of etching. Your plate is covered with a ground of varnish, which you smoke over the flame of a taper until it assumes a glossy black, or, at least, a very dark brown hue. I have been able, with great care, to smoke my plates quite black without burning the ground. Then, with a shade of tissue-paper strained on a wire frame between the daylight and your plate, you begin to etch; and each scratch you make through the varnish on to the copper gleams like a thread of gold.

If you are etching on steel the thread looks like one of silver. Now, etchers are a very long-lived and strong-sighted race. George Cruikshank, who had been etching since he was eight, went on etching to within a year or two of his death, which took place at the age of eighty-three. Thomas Landseer, the engraver, is alive, and over eighty. About old Mr. Pye's—the engraver—eyes, who lived until nearly ninety, I have no information.—*Ex.*

The editor of the Caledonia, Minn., *Argus* writes us: "Was there ever a purer Hibernicism than the following card sent to my paper for publication by the bereaved daughter of an Irish subscriber: 'A card. To the kind friends and neighbors who gave us their assistance and sympathy during the death of our mother. We only wish to be able some day to return the compliments.'"

BURGLARY!

The store of Rowley & Horton, Utica, N. Y., was entered April 24, and the following property stolen: About 200 gold pens and 50 pencils and holders, all of the "Mabie, Todd & Co." make; a few stylographic and caligraphic pens; 250 fine pocket knives of "Empire Knife Co." and "Joseph Rodgers & Sons" make, and other minor articles. Liberal reward offered. Address all communications and send all information (telegraphic if important) to Robert McElwaine, Chief of Police, Utica, N. Y.

Mfrs. of Bookbinders' Machinery and Tools.

BOOK-BINDERS' WIRE-STITCHING MACHINE

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

NEW PATENTS.

No. 296,280. Game-Table.—Frank R. De Foy, Danemora, N. Y., assignor to himself and C. H. Stackpole, same place.

No. 296,302. Pencil, Pen, or Tooth-Pick Case.—Alfred Havilah Woodward, Birmingham, County of Warwick, England. Patented in England November 2, 1883, No. 5,224.

In a pencil, pen or tooth-pick holder, the combination, with an exterior casing and a movable cap, of a movable mount adapted to be projected from the holder, and means whereby the mount is automatically locked in such projected position by depressing the cap, and to be released from such locked position by revolving the cap.

No. 296,337. Stencil-Plate.—Romeo E. Ghezzi, New York, N. Y.

No. 296,350. Type-Case.—William Piel, St. Louis, Mo. A type-case having slots formed in its bottom, and wire-gauze covering the bottom in combination, with division-strips, of a four-prong fastening, two of the prongs extending down through the bottom of the case, and the other two being quite short.

No. 296,351. Toy.—Michael Raughtigan, Norwich, Conn., assignor to Edwin Oldfield, Edwin A. Tracy, and Emma J. Raughtigan, all of same place.

No. 296,352. Game.—Alfred C. Rex, Philadelphia, Pa. No. 296,353. Envelope-Folding Mechanism.—Francis H. Richards, Cleveland, Ohio.

In an envelope-folding mechanism, in combination, a series of plates, mechanism adapted to move said plates successively into position for envelopes to be folded thereon by the same folding devices, and mechanism, to arrest the motion of said plates at the proper time and place for envelopes to be folded thereon.

No. 296,356. Revolving Book-Rest.—Simon Robin, Cambridgeport, Mass.

No. 296,372. Apparatus for Sawing Printers' Blocks.—Geo. Williamson, Cambridge, assignor to J. O. Hayden, Somerville, Mass.

No. 296,391. Art of Printing by Sunlight or Other Light, and Apparatus Therefor.—Ezra Cope, Hamilton, Ohio.

In a sun-printing apparatus, an envelope provided with an exhaust-aperture, and having one of its layers of proper transparency, and one or both of its layers of collapsible limpness, and adapted to receive a sensitive sheet or a negative, or both.

No. 296,397. Eraser.—George Elsey, Springfield, Mass.

No. 296,404. Autograph Album.—Willis C. Grant, Norwalk, assignor to himself and Robert V. Murray and William Engel, both of Cleveland, Ohio.

An autograph album provided with a series of leaves to receive autographs, another series of leaves furnished with spaces consecutively numbered, said spaces each adapted to receive a sentence of a romance or the like, and provided with two columns—one for the numbers of the spaces and the other for the entry of the page on which the writer's autograph is entered—and a series of leaves divided into spaces suitable to receive sketches, said spaces also being consecutively numbered.

No. 296,428. Method of Flocking Paper and other Fabrics and Machine Therefor.—John McMillen and James McAdams, New York, N. Y.

The method of flocking paper or other fabrics,

consisting in printing with adhesive substance on the fabric, in moving the fabric during and after printing continuously forward, and then upward to a point of delivery, in delivering flock upon the printed fabric as it moves, in subjecting the fabric to a beating operation during its forward movement and after the flock has been delivered upon it, and in subjecting the fabric to a second beating or a shaking operation as it moves upward to the point of delivery.

No. 296,443. Photographic-Plate Holder and Case.—Sebastian S. Peckinpugh and George Jeffery White, Big Rapids, Mich., assignors to said White.

No. 296,456. Pen.—William T. Rightmyer, Meriden, Conn.

A writing-pen, provided with a slitted concavo-convex nib or point, the upper surface of which is concaved longitudinally of the pen, and the under surface or contact-point concaved.

No. 296,459. Selvaige for Hammocks.—Albert O. Rood, New York, N. Y., assignor to Vincent P. Travers, same place.

No. 296,460. Art of Making Hammocks.—Albert O. Rood, New York, N. Y., assignor to Vincent P. Travers, same place.

No. 296,521. Engraver's Bangle-Clamp.—Henry Carpenter, Flushing, N. Y.

No. 296,536. Toy.—Jesse A. Crandall, Brooklyn, N. Y., assignor to E. I. Horsman, same place.

The combination of a clacker having a disk applied on the spindle and an automaton on the face of the disk.

No. 296,537. Crayon-Holder.—Alonzo T. Cross, Providence, R. I.

In a crayon holder, the combination of the carrier-tube, provided with a split end for frictionally holding the crayon, with means for imparting an initial movement to the crayon-stub from the carrier-tube, and a spring for forcibly ejecting the same when the frictional grip of the split end of the tube has become less than the resilience of the spring.

No. 296,538. Crayon-Holder.—Alonzo T. Cross, Providence, R. I.

In a crayon-holder, the combination of a hollow screw and screw-holding tube provided with a slot, the lower end of which is enlarged at one side to form a shoulder, with the carrier-tube provided longitudinally with a slot having a pin-holding notch at its upper end, and the forcer provided with a pin adapted to pass through the slot in the carrier-tube and enter the groove of the hollow screw.

No. 296,539. Crayon-Holder.—Alonzo T. Cross, Providence, R. I.

In a crayon-holder, the combination of the carrier-tube, provided with jaws for frictionally holding the crayon, and means, substantially as described, for laterally opening the jaws of the carrier-tube, with a spring held within the bore of the carrier-tube and adapted to forcibly eject the crayon-stub upon the lateral spreading of the jaws.

No. 296,578. Apparatus for Cleaning Photographs.—Robert H. Jones, Marcus B. Smith and Lars J. A. Roswall, Clarence, Mo.

No. 296,598. Parallel Ruler.—John Calvin Miller, Ickesburg, Pa.

AN OLD PAPER TRADE WORK.

We have received from a Lancashire friend a copy of a peculiar old work by R. Johnson, Stationer. It is called "The Paper Maker and Stationer's Assistant," and contains chapters upon (1) The average weight of paper; 2. The quantity of reams in a day's work; 3. The dimensions; 4. The old duty; 5. The advance duty; 6. The whole duty as altered by the late Act of Parliament. To these are added tables showing the duty on paper, from ½d. to 2½d., ready cast up from 1 lb. weight to 1,000 lbs.

In this interesting old book there is a great deal to interest a reader. Firstly, we find a short "History of Paper." From this we gather that cotton paper was in use in the year 1000, while paper was made of linen rags in 1417. Scarcely any but brown paper was made in this country until 1690, when white paper was first made in England. Sizing in the engine was invented by a chemist who lived near Temple Bar, and was first used at Mr. Fairchild's Mills, Wickham. Blue paper was, it seems, the thought of Mrs. Buckinshaw, the wife of a paper maker at West Peckham, in 1746, and for which the lady benefited to the extent of a "Red Cloak," bought specially. The first blue paper was an ordinary double crown and produced 4s. per bundle clear profit.

The export duties in 1794 were: printed books, bound and unbound, provided the paper contained the water-mark of 1794, 2d. per lb. The same tax was upon all account books, ruled and plain, for export.

The import duties were: 10d. per lb. on the first class, 4d. per lb. on the second class, and 2d. per lb. on the third class papers; on paper hangings 6d. per lb.; and 20s. per cwt. on pasteboard, &c.; on books, 23s. 4d. per cwt.

The home duties were 2½d. per lb. upon all paper used for writing, drawing, and printing cartridges and elephants, 1d. per lb. on colored and white browns, and ½d. per lb. on wrapping papers. Pasteboard, millboard, &c., 10s. 6d. per cwt.

In speaking of the rag duty, the writer remarks, "If I lay out £100 for rags at 3½d. per lb., fit to make double demy or printing paper," &c., &c. This seems funny! In these days double demy or printing paper can be had complete for something less than 3½d.

The book winds up with a list of "Paper-makers' Holidays." A note at the foot of the page remarks that "the over, or sheets made by the odd felts in the year, pay the maker for the holidays." At Christmas there were six days, Easter two days and a half, and the same at Whitsuntide. The little book is printed on wove paper.—*Paper-Making (London).*

Ladies' cards are of generous size, cut almost square, while those for gentlemen are narrow and short.

Pads, Tablets Blotter Tablets

FOR THE MILLION.

THE rapidly increasing demand on us for our POPULAR lines of goods has made our present facilities and quarters too limited. In order to fill our orders more promptly, and to enable us to still further reduce the cost of manufacturing, we will

REMOVE MAY 1, 1884,

To Nos. 146, 148 and 150 Centre Street,
CORNER OF WALKER,

where we have leased **10,000 square feet** for manufacturing and storing purposes. With our INCREASED and IMPROVED facilities we hope to merit the continued confidence of the trade.

March 29th 1884

Richmond Paper Manufacturing Co
Richmond Va.

Gentlemen;

We have used the "Climax" blotting paper for more than a year. About a year ago you requested us to give you our written opinion of this blotting paper. We refused on the ground that we had not used it for a sufficient length of time to judge of it critically. I am now prepared to say that we have tried the blotting paper of various manufacturers and there is but one other maker, as far as my experience goes, who produces as good an article as yours. As his prices are higher, and his paper is certainly no better, we shall continue to give your paper the preference as long as its standard of excellence is maintained, and its price is not advanced.

Yours truly,
W. Allen

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

P. V. Goulden, publisher, O'Neill, Neb., has sold out.

R. H. Jones, publisher, Lordsburg, N. M., has sold out to F. S. Ott.

The Globe Printing Company, Davenport, Ia., has sold out to Glass & Hoover.

Henry B. Hall, of the firm of H. B. Hall & Sons, engravers, New York city, is dead.

A receiver has been appointed for the Chronometer Stamp Company, New York city.

J. M. Amos, publisher of the *Citizens Press*, Caldwell, Ohio, has sold out to Jennings & Son.

Abbey & Gee, printers, Newark, N. J., have dissolved partnership. The business is continued by Mr. Gee.

F. A. Moriarty, bookseller and stationer, Council Grove, Kan., has sold out to Abray & Shemberger.

The Indiana Paper Company, Indianapolis, Ind., has been incorporated with an authorized capital stock of \$150,000.

George & Walter Parrish, booksellers, stationers, &c., Owensboro, Ky., have been succeeded by George & Otis Parrish.

Molten & Munch, 14 South Seventh street, Philadelphia, are selling agents for the "Leonhardt fibre paper" which is designed for use in checks, notes, drafts, &c.

M. H. Eaton, paper dealer, 723 Chestnut street, Philadelphia, has issued a circular to the trade, notifying that hereafter all paper sold by him will be put up 500 sheets to the ream, unless otherwise ordered.

Bristol, Smith & Freeman, booksellers, stationers, &c., St. Paul, Minn., have dissolved partnership, Russell Freeman retiring. The remaining partners, H. M. Bristol and Wm. T. Smith have formed a copartnership with M. A. McArthur, and continue the business under the style of Bristol, Smith & McArthur, assuming all liabilities and collecting all accounts of the late firm.

The store of Rowley & Horton, Utica, N. Y., was entered on the night of April 24, and robbed of 200 gold pens, stamped "Mabie, Todd & Co.," a number of gold pencils and penholders and pencils, assorted styles, in pearl, ivory, rubber, &c., and about 250 pocket knives, mostly marked "Empire Knife Company." A reward is offered for the arrest and conviction of the thieves and also for the recovery of the goods.

James Freeman Clarke has produced in "Anti-Slavery Days," a volume just published by R. Worthington, a sketch of the struggle which ended in the abolition of slavery in the United States, which is intended for the generation which has grown up since those stormy scenes. Mr. Clarke dwells mostly on the events with which he was personally familiar and the persons with whom he was best acquainted. The scenes are chiefly laid in Massachusetts and the characters are New England men, yet he hints at the way in which men felt and thought in other sections. The story of the emancipation will be as intensely interesting as any series of events in the records of mankind, and those chapters call fitting attention to some of the most important men and actions in that crisis.

The American reprint of Egmont Hake's work, "Chinese Gordon," is a valuable addition to the library table. The English edition in its expensive form has had a very large sale, and the present one just issued by R. Worthington gives all the information of the original, and also brings down the narrative to the present. The daring adventures and the personal character of a Christian soldier are always attractive; and the work comes out at a moment when, abandoned and alone, he is left to his energy and his faith. To have known the true story of a life of such heroic self-abnegation is, as Mr. Hake truly says, an education. The edition issued by Worthington is the only authorized one.

The "Columbian" diary, published by Arthur Christy, Buffalo, N. Y., is salable every day in the year. It has an indicator showing the days of the week for five years, corresponding with the dates of the diary at each opening. It is understood at a glance. The part of the diary not used in one year is good for any other year indicated. Christy's "Mailing Packet" is a neat and simple form of envelope for sending samples by mail. It is made of tough manilla paper and is easily handled.

Mayer & Van Sant have succeeded to the business of Thomas, Mayer & Van Sant, book-sellers and stationers, Dayton, Ohio, Thomas having retired from the firm.

A dissolution has taken place in the firm of Clark & Stevenson, printers, Newark, N. J., the business being continued by Clark.

Razall & Dwinell, printers, Cincinnati, Ohio, have dissolved partnership. John D. Razall continues the business.

Wright & Everett, job printers, Independence, Mo., have been succeeded by the M. R. Wright Printing Company.

An assignment has been made by Ashmead Brothers, booksellers and stationers, Jacksonville, Fla.

Daniel O'Loughlin, publisher, &c., Boston, Mass., has failed.

The *Ranchman* Publishing Company, Colorado, Tex., has been attached.

Charles H. Folwell, publisher of the *New Jersey Mirror*, Mount Holly, N. J., is dead.

Among the out-of-town tradesmen in town during the past week was W. S. Smith, of New-ark, N. J.

R. T. Albertson has succeeded to the business of Albertson & Faulkner, stationers, New York city, the firm having dissolved.

The Scovill Manufacturing Company, manufacturer of photographers' apparatus, New York city, was burned out on Friday of last week.

T. H. Loss, Jr., the pioneer importer in Swiss novelties, is now prepared to show the trade a very extensive line of Swiss carvings, which he has just received. This line is composed entirely of new goods, and is altogether the finest collection of Swiss novelties ever introduced in this country. It will pay to inspect it.

Late Thursday night of last week a fire occurred in the five-story brick and stone building at No. 36 Church street, New York. John J. Ghegan, a dealer in school-books and stationery, was located on the second floor. The three upper floors were devoted to the manufacture of mirrors, picture frames and moldings by Hollenbach & Dieffenbach. In this factory was stored a large stock of wood, acids, paints and other combustibles. The stock of Hollenbach & Dieffenbach was large and valuable, and but little, if any of it, escaped destruction. They estimate their loss at not more than \$6,000; insured for \$4,500. The loss of John Ghegan is \$1,500; insured for \$2,500.

Lawrence & Baxter are doing an exceptionally brisk business this year as importers of stationery and various specialties. The house of Lawrence & Baxter, of whom P. Lawrence, the head of the firm, was the originator, has been for many years interested in the exportation of American manufactures in addition to an import trade. It began the export business at a time when it was believed that America could hardly enter into a competition with Europe in the introduction of her manufactures in the latter country; but the experiment proved successful and led to the establishment in London of the firm of Lawrence Brothers, which now does an exclusively American agency business. Some of the leading specialties which Lawrence & Baxter are introducing into this market are what is called the "J. A. P." paper, which is a Japanese paper used for the various purposes of printing linings for fancy boxes, &c., rubber surgical instruments, "Perfection" copying paper, novelties in pen-wipers, &c. The firm is prepared to execute any orders to import on commission while it is ready to take hold of

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c. Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

any specialty for the purpose of introduction in the European market.

A receiver has been appointed for M. Lindner, manufacturer of toys, Berlin, Ont.

A meeting of the creditors of F. Desjardins & Co., stationers, &c., Quebec, Que., has been called.

Samuel Joyner, proprietor of the Galveston Print, Galveston, Tex., has suspended the publication of that paper.

Kennedy & Beecher, stationers, printers and blank-book manufacturers, Philadelphia, Pa., have dissolved partnership.

Dortch & Wilkes, stationers, &c., Columbia, Tenn., have dissolved partnership. Wilkes, McDonald & Nelley have succeeded to the business.

E. Claxton & Co., publishers, booksellers and stationers, Philadelphia, Pa., have made an assignment to Henry T. Coates and Edward T. Davis.

Watson & McArthur, dealers in wall-paper, Montreal, Que., have dissolved partnership. C. McArthur has retired from the firm and J. C. Watson continues the business.

The Acme Stationery and Paper Company expects to be established in its new quarters at the corner of Centre and Walker streets, on Monday, May 5.

The National Publishing Company, Philadelphia, has a very large demand for its quarto bibles, and has been pushing its immense manufacturing facilities to their utmost. The extent of its orders can be imagined when it is remembered that its manufacturing facilities are nearly double those of any other quarto bible establishment in this country.

An explosion of naphtha occurred on April 22 at J. L. Shoemaker & Co.'s Ninth street leather factory, Philadelphia. The manager of the factory and a workman were severely but not fatally burned, and considerable damage was done to the naphtha house, and a quantity of skins in process were destroyed. J. L. Shoemaker & Co. announce that there will be little or no delay in filling their orders, as things are again in shape at Ninth street, and their up-town factory is running full time on orders.

J. H. Bufford's Sons have brought out a very extensive line of fans, some fifty different varieties being represented. The firm is also prepared to furnish the trade with fan handles in any quantity desired, and at the lowest manufacturers' prices.

Robert H. Ingersoll is about to issue a new catalogue of rubber type, stamps, printing outfits, &c. Mr. Ingersoll has removed to No. 45 Fulton street, where he will have ample facilities for conducting his increasing trade.

Lawrence & Baxter, 39 Dey street, have just received, among other novelties, an elegant assortment of English valentines for 1885, and for which they are taking importation orders only.

John T. Greenwood, paper manufacturer, West Medway, Mass., has failed and been attached.

O'Laughlin & McLaughlin, Catholic book publishers and sellers, Boston, Mass., have failed.

Lee & Peake, printers, Cincinnati, Ohio, have dissolved partnership. The firm is now Jacob Peake.

Mervin O. Cissel, printers, &c., Rensselaer, Ind., has sold out to Antrim Brothers

John T. Greenwood, paper manufacturer, Medway, Mass., has failed. An attachment has been issued against him.

Simad & Forester, dealers in moldings and pictures, Montreal, Que., have dissolved partnership, C. Forester having retired from the firm.

R. R. Watson has removed the wholesale branch of his business to No. 49 Maiden lane. He will continue to carry on a general retail stationery business at his old place, No. 51 Nassau street.

Alvah Bushnell, stationer, &c., Philadelphia, Pa., has sent to his creditors a circular to the following effect: "I am compelled to call my creditors together and exhibit to them a full statement of my affairs. I therefore appoint Thursday next, May 1, 1884, at four o'clock P. M. as the time and 324 Chestnut street as the place for such meeting, and earnestly request your attendance." It is reported that this firm owes about \$7,000, including \$1,900 of preferred claims. The assets are in excess of these figures. An extension of time will be asked and probably given by the creditors, on account of the good reputation of Mr. Bushnell.

The paper-stock store of E. J. Cary, North Adams, Mass., was closed on Saturday of last week by direction of the Keystone National Bank, of Erie, Pa. The property was attached for \$10,000, this amount representing paper of Corcoran & Young, of Erie, which had been indorsed by Cary and negotiated by the bank. It is thought that the property is mortgaged for about half its value, which is estimated at \$25,000, and that it will hardly be possible to make any compromise in the matter, as so many of the heavy creditors are secured. There seems to be little doubt that Mr. Cary will be

able in time to pay off the mortgages were it not for the attachment.

E. E. Hawkes, stationery, &c., Quincy, Ill., has sold out to Lyford & Co.

Proctor, Hamilton & Co., printers, Minneapolis, Minn., have dissolved partnership.

John B. Du Plessis, newsdealer, stationer, &c., Syracuse, N. Y., is closing out his business.

Hazzard & Bates, dealers in wall-paper, Minneapolis, Minn., have dissolved partnership.

Charles S. Borden, dealer in chromos, Philadelphia, Pa., has been sold out by the sheriff.

S. T. Addis, publisher of the *Windsor Locks Journal*, Windsor Locks, Conn., has been damaged by fire.

Crow & Woods, publishers of the *Republican*, Tombstone, Ariz., have suspended the publication of that paper.

Ed. Fletcher has retired from the firm of Reed & Fletcher, publishers of the *Mountain Echo*, Angel's Camp, Cal.

Murphy & Scott, publishers of the *Brooke Local*, Wellsburg, W. Va., have dissolved partnership. The firm is now James F. Murphy.

E. S. Hand & Co., publishers' agents, Philadelphia, Pa., have dissolved partnership. E. C. Stokes and H. T. Pearce have formed a new firm under the style of E. C. Stokes & Co.

H. B. Kendrick & Co., booksellers and stationers, Saco, Me., have dissolved partnership. Mrs. C. K. Burns continues the business under the old style.

James D. Whitmore & Co. report a brisk trade in their extensive line of fine stationery, menu cards, fancy goods, &c. Their trade is ahead of last year. This shows the advantage of selling goods that take with the consumer, whom manufacturer and dealer should study to please.

John M. Brown, late manager for Baker, Pratt & Co., at Philadelphia, has been appointed manager for the Western department of Clague, Wegman, Schlicht & Field, of Rochester, N. Y. Mr. Brown is a gentleman of large experience as a manager and made himself invaluable to his late employers, who parted with him with best wishes. Clague, Wegman, Schlicht & Field contemplate pushing all of their specialties, especially the Shannon filing cabinets and Schlicht standard index, throughout the great Western territory. The sale of the Shannon file is increasing so rapidly and the demand for it by dealers is becoming so great, that the Western business demands the services of so able a man as Mr. Brown to do it justice.

A destructive fire occurred at No. 16 Spruce street on Sunday night last. It broke out in the rear of the fourth floor occupied by the printing offices of Reilly & Son, printers of *Forest and Stream* and *Rod and Gun*. They also occupied the top floor. The building has five stories, and is on the south side of the street, running half way through to Beekman street. The rear of the two top floors was burning fiercely before the fire showed itself in the front. The two upper floors were entirely gutted, and the roof fell in. The water tower in front and a dozen streams from adjoining buildings kept the fire from spreading to the lower floors, but they were thoroughly soaked with water. Lines of hose were run up through the double building, Nos. 12 and 14, and considerable damage was done there by water. It was occupied on the ground floor by C. Potter, Jr., & Co., printing presses, and on the upper floors by James Reilly, printer. Printers were working all day for Reilly & Son, in No. 16. It is conjectured that some one laid a lighted pipe aside carelessly. The building is owned by the Arthur estate, and is damaged about \$7,000. The loss of Reilly & Son is total, and is probably \$10,000. The damage by water to the lower floors is about \$5,000, and in Nos. 12 and 14, \$2,000—a total damage of about \$24,000. In the two cellars of No. 16 a quantity of paper belonging to Charles Hubbs, of No. 36 Beekman street, was stored. The cellar is filled with water and the paper nearly a total loss. The damage is \$7,000. The building is the property of James H. Weller, of Yonkers. It is damaged \$10,000. In the cellars of Nos. 30 and 32 Beekman street, paper belonging to Clement & Stockwell at No. 30, and like stock belonging to Miller & Flynn at No. 32, was considerably damaged. Insurance covers all losses.

A man giving his name as F. S. Weller, and representing himself as agent for Harper & Brothers' Franklin Square Library, visited Waterville, Mass., a short time ago, and fraudulently obtained \$38 in cash, \$13 being paid, by a man named G. H. Ford. The man showed Mr. Ford a list of subscribers who had not paid, and the latter knowing them to be reliable parties paid for them. Weller then skipped. Harper & Brothers replied to written inquiries that the man was a fraud and that they employed no agents.

The Erwin & Lane Paper Company at Elkhart, Ind., has been placed in the hands of a receiver, John Cook. The company was incorporated three months ago, succeeding the firm of Erwin, Lane & Co., whose assets were then appraised at \$105,000. The paid-in capital of the company was placed at \$35,000.

O. B. Havis, publisher, Dandridge, Tenn., has failed.

Howard Staples, paper dealer, Eliot, Me., has been burned out.

D. D. Anderson, dealer in rubber bands, New York city, is dead.

E. D. Beggs, publisher, Madison, Fla., has sold out to C. W. Stevens.

Hailman Brothers, printers, St. Louis, Mo., have advertised to sell out.

J. Blethen Alden has retired from the *Journal Company*, Kansas City, Mo.

Robert P. Nevin, publisher of the *Times*, Pittsburg, Pa., is advertising to sell out.

E. L. Gaylord, dealer in art goods, Bridgeport, Conn., has sold out to S. B. Brewster.

Stremmel & Samuel, paper-stock dealers, Newark, N. J., have dissolved partnership.

William Eicheldorfer, publisher of the *Staats Zeitung*, Grand Rapids, Mich., has sold out.

E. M. Rose, newsdealer and stationer, Hartford, Conn., is advertising his business for sale.

P. P. Bradley & Co., booksellers and stationers, Glens Falls, N. Y., were burned out on the 28th inst.

W. L. Parshall & Brother, dealers in fancy goods at Oil City, Pa., have been closed by the sheriff. They began business last fall.

Execution has been issued against Pearce & Co., paper-stock dealers, Philadelphia, Pa., to recover judgments amounting to \$8,704.

Price & Wedge, dealers in paper-hangings, &c., Waterbury, Conn., have dissolved partnership. John Price continues the business.

M. L. Kline has associated with Leon Pulaski for the manufacture of paper boxes in Philadelphia, Pa., under the style of Pulaski & Kline.

Aguirre, Celis & Jackson, publishers of *La Union*, Tuscon, Ariz., have dissolved partnership. The business is continued by Aguirre & Celis.

A. L. English, the Engrossing Clerk of the New Jersey Senate, and late of the *Atlantic Review* and *Mays Landing Record*, is about to establish himself in the printing, engraving and stationery business at Chester, Pa.

The Holyoke Card and Paper Company, of Holyoke, Mass., has decided to remove to Brightwood, where land has been given it free to locate on, and a spur track from the River Railroad will be laid. Its new building will be of wood, and will be finished by July 15, ready for their occupancy.

L. PRANG & CO.'S CHRISTMAS CARDS.

The popular demand for Christmas cards seems to be ever increasing and long experience enables those who cater for the public taste to discern precisely that which is likely to be most wanted. It is unnecessary to dwell upon the marked improvement in the art feeling of the great mass of the people. This is evident in a thousand directions, but it is interesting to note the influence that it has upon the different branches of trade and industry. The result, so far as Christmas cards are concerned is obvious enough, for second-rate work is not in demand, the public of to-day calling for, and expecting the highest talent of the artist and the greatest skill of the lithographer. Prang's experience in this direction guarantees a proper response to popular expectation, and his publications for the coming Christmas are indicative of complete recognition of the demands of the most refined taste. The list of cards is noticeable for the number of well-known artists who have contributed to it. Benjamin Champney has two landscape designs showing the happiest sunlight effects, brightened still more by the children playing in the meadows. A beautiful frieze of laughing children by Alex. Sandrier is very effective. The late A. F. Bellows' style is recognized in companion landscapes. Dora Wheeler's group of singing girls has the very spirit of Christmas. Giacomelli and Fidelia Bridges have contributed bird and flower designs, delicate in composition and treatment. Four season cards by W. Hamilton Gibson with exquisite backs by Miss Humphrey are mounted in novel style. W. H. and H. Beard are recognized in humorous designs. Miss Comins has a novelty in diamond and triangular shaped cards. One of the daintiest folding calendars is by Miss Humphrey. The success of the Ruskin calendar has been so great that a design by the same gifted artist, Mrs. E. Whitman, has been secured for a Tennyson calendar and H. Winthrop Peirce has an original mount for a Thackeray calendar. The satin prints include most of the designs mentioned besides many more.

TWENTY-FIFTH YEAR.

THE STATIONER,

Printer and Fancy Trades' Register.

QUARTER OF A CENTURY OF SUCCESS.

CIRCULATES IN ALL COUNTRIES.

THE OLDEST AND ONLY RECOGNIZED ORGAN of the British Stationery and Fancy Trades. Circulates over all portions of the civilized globe. Correspondents in all countries.

The American trade should not fail to make itself acquainted with the histories of the rise and progress of the leading manufacturing and wholesale houses in the United Kingdom, now appearing in each issue of this journal, and pronounced to be the most valuable of their class.

As an Advertising medium for the American trade, especially to those who wish to cultivate an English, Colonial or Foreign connection, it will prove itself to be unequalled.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, MAY 1, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

CONGRESS does not appear to be in any hurry about the tariff. The discussion of the Morrison bill proceeds leisurely, and every day or two a few speeches on one side or the other are got off. Presumably the House will dispose of the bill before the dog days; but each day's delay only proclaims the greater impossibility of the adoption of any tariff measure at the present session of Congress.

As indicated last week, the publication office and other departments of the Lockwood Press, including THE STATIONER, have been removed to Nos. 126 and 128 Duane street, at the southwesterly corner of Duane and Church streets. Our friends will find us there, and will please address their communications accordingly. In remarking about the new quarters in our last issue we understated their dimensions. The building is 50x117 feet, and three floors of this size are devoted to the uses of the Lockwood Press.

ONE of the treaty questions with which the United States Senate has to deal is that agreed upon at a conference of representatives of twenty countries and signed by eleven of the conferring States, the purpose of the treaty being to confer upon the citizens of the countries concerned the same rights of property in patents, trade-marks and commercial titles in any of the contracting States, as they may be entitled to in their own country. This is intended to form an international industrial union, giving reciprocal advantages to inventors, business firms, &c. Some question is raised as to the desirability of such a union from our standpoint, and we are not sure that it will not serve to extend privileges to foreign manufacturers which they might not be able to secure under our own laws. We invite attention to this treaty, and intend to give it further consideration ourselves, for the purpose of arriving at definite conclusions as to its scope and effect upon the industrial interests of this country.

THERE is not, at present writing, an unpromising outlook for trade. The current volume of traffic of all kinds is large, but owing to the desire to keep stocks down, competition is exceptionally sharp, and in consequence thereof business in most branches of trade is being transacted at a small margin of profit. With the promise of good harvests as the season progresses, business confidence will be very apt to increase, and if the crops are generally and finally good, a very active trade and a liberal "stocking up" by merchants throughout the country may be reasonably expected to follow. It is commonly asserted that there is overproduction in all of our industries, and this view of the manufacturing situation is assumed from the fact that there is a surplus of goods offering in almost every line; but the deduction is not accurately made. The wants of the people are in excess of present

takings, and under-consumption more than overproduction is the cause of the slowness in trade. There is a very conservative tendency in all classes throughout the country, and the disposition is to go without things which can be dispensed with until pressing need compels their purchase. There is an undoubted prudence, if not "scare," weighing on the mind of consumers which restricts purchases, and there is an evident disposition to hoard pennies, so that they may become available if dollars fall short. For this phase of public economy we are indebted to a variety of inciting causes. Experience has given many bitter lessons, and flush times, when extravagance was rampant, are no longer supposed to exist. The condition of our stock market is sufficient proof that people have begun to think and to reason more seriously than they have been wont to reason on the futility of chances. The general speculative troubles brought conviction to many, kept the more timid aloof from ventures, and finished up the bolder and more weakly confident. There is no great distress apparent, except among the victims or intermediaries of speculation. It is just as well that it should stay there if it shall not progress further.

ROUNABOUTS.

BY THE TRADE LOUNGER.

It may be one of the new fashions, but I think that it will be difficult to put into practice on living beings unless it is intended for use on one of the traveling sign-boards which frequent our principal streets. I refer to a newly patented invention which is described as follows:

As a new article of manufacture, an ornament for personal wear, consisting of a box or frame of any desired form, and constructed of pasteboard, thick paper, or thin sheet metal, and having an opening preferably of the same form as the box, the sides of the box being formed with slits, the ends of the sides being bent and secured upon themselves, and a strip of the same material, having its end bent and adapted to be inserted in the frame or box to form the bottom thereof, the box being trimmed or ornamented.

The nearest suggestion of known use and ornament, which seems to be covered by the foregoing description, is a coffin. No other "box" intended as an "ornament for personal wear" is likely to hit it off so nearly.

A gentleman engaged with a prominent house on Duane street is devoting his leisure hours to the study of duds. He intends to prepare a monograph on this highly interesting subject. He discovered a rare specimen of the species on the Brooklyn Bridge the other day. If he has not yet come across a shaded variety I can direct him to a valuable contribution from Thompson street.

Some very novel designs in fancy cloth penwipers are in the market. They come in great variety and many very pretty ones are made up with bisque figures, which form hand-

some ornaments for the writing desk. These are imported.

Swiss carvings seem to be in renewed demand and many new things in this line have appeared. Among the novelties are nut-crackers representing true likenesses of Bismarck, Gambetta, and other characters, besides animal figures.

A gentleman of long and profitable experience as an exporter of American goods says that there is a great deal of room for the increase of our foreign trade, but that it is essential that stability of prices is of prime importance—in fact, indispensable to success. He is surprised that greater interest is not taken in this direction. The suggestion about prices is one which must be regarded. The American manufacturer who seeks a foreign market must strive to avoid sudden and undue fluctuations in his quotations.

The stationery and paper trade base-ball nines have been consolidated and are ready to receive challenges from similar organizations in other sections. The club will cross bats with the Greenville (N. J.) Athletic Club, on the grounds of the latter, on Saturday afternoon, May 3. The acting captain is at present Mr. Cushing. A meeting will be held soon to perfect the organization of the club and for election of officers.

John Habberton has been writing a biography of Washington. I haven't read it yet; but have seen extracts. It must be something out of the usual run, as witness the following:

"Washington rode into Boston on a magnificent charger; even his colored servant was well mounted. The young Virginian 'took the town' at once; the natives could not show him Bunker Hill Monument, the burnt district, or the Back Bay improvements, as they now would do within an hour of his arrival, but they gave him what they had—heartiness, patriotism and beans. Concerning the latter his letters are painfully silent; nothing but silence can do justice to some topics; but the people's hospitality and public spirit pleased him greatly."

Evidently Mr. Habberton has struck a new view of biographical research, and presents the Father of his Country in a new light. A Boston critic says that "the work is a sturdy piece of history and biography combined," and that while the book "sparkles" and has "a sort of champagne effect on the reader, it keeps the solidity of a veracious record in all essentials." Let us all read it!

Embossed satin prints are to be *les pièces de résistance* for the holidays. Well, let 'em come. More may be said about them when samples are shown. Some people think that the chromo souvenirs are stale and no longer available. Don't you believe it. There is no end of conception for these things and people generally like them. There are a great many persons yet to whom the finer works are revelations of beauty.

Trade is generally "easy," but there doesn't seem to be any gloominess about it. There is a steady call for goods, although the requirements of consumers seem to be limited, and this more due to prudence than absolute necessity. People are improving in their habits to the extent that lavishness and extravagance are much more restricted than formerly. This is evidence of the existence of common sense and the practice of good judgment.

ANSWERS TO CORRESPONDENTS.

C. & C. ask for headquarters of the J. A. P. imitation silk papers.

Ans.—Imported by Lawrence & Baxter, 39 Dey street.

A. H. E. & Co. want to know who makes portable blackboards or slating in rolls.

Ans.—New York Silicate Book Slate Company.

B. S. & Co. want names of manufacturers of wax paper.

Ans.—Chase & Co., Boston, Mass.; C. Hamerschlag, New York.

W. asks why importers and dealers in musical merchandise don't advertise in THE STATIONER, and wants list of dealers.

Ans.—To the first part of your inquiry we reply, that it is because they don't know what is good for them. As to the last, see list given in this column a few weeks ago.

As THE STATIONER goes to press, it is learned that Wm. C. Dunton, of the firm of Bulkley, Dunton & Co., paper manufacturers and dealers, of this city, has died suddenly of apoplexy. Mr. Dunton was a man much liked and esteemed.

Sexton & Jacques, Indianapolis, Ind.	800

Henry E. Wedelstaedt, who for the past seventeen years has been identified with D. D. Mer-

rill and the St. Paul Book and Stationery Company, and since the organization of the stock company has filled the positions of secretary and treasurer, as well as superintendent of its retail department, has sold out his interest, and on May 1 will sever his connection with the firm. His plans for the future are yet unsettled, but his many friends will wish him success in whatever business he may engage.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, April 30, 1884. }

THE MONEY MARKET.—The money market has undergone little or no change since last week, the tendency, however, appears to be toward a firmer market, and a disposition has been shown to scrutinize more closely. Time loans have been negotiated at 4@4½ per cent., and discounts are still quoted 4@5½ per cent. Call loans on bond 1½@1¾, and on mixed collateral 2@2½ per cent. The stock market has presented no new feature, the trading having been of moderate proportions, and the tendency toward a lower level of values. Government bonds dull but steady. Railroad bonds weak. State bonds and bank stocks quiet. Foreign exchange has ruled quiet and steady, with the demand covered chiefly by gold exports.

THE PAPER MARKET.—The situation with most of our city dealers is still characterized by quietude and an absence of that nervous energy which usually attends the active and profitable employment of capital. There is a continued disposition shown among the small dealers throughout the country to buy cautiously, and thus throw the onus and expense of carrying supplies upon the large dealers and manufacturers at the primary sources of supply. Some of the most careful and conservative men in the trade, whose long experience gives weight to their opinions, do not look for any radical or permanent improvement during the spring or summer months. They think that a better adjustment of the supply and demand will no doubt be found necessary, but while the existing conservatism of trade is very aggravating they hold that it is a healthy and encouraging feature. In the line of print paper, while the season of the year is close at hand when the demand usually slackens, there is an exception in a year of Presidential election, and although there has been no improvement resulting from this cause as yet, manufacturers and dealers are hopeful that the political campaign will help them out considerably. The large daily papers have not of late duplicated their orders for paper to the extent that had been expected, but no doubt this will become quite pronounced before we enter on the summer months, and the consumption will be kept up to good proportions until after the election in November, which will bring us almost to the close of the year. Whatever changes in prices have been made during the past week have been unimportant and values throughout rule fairly steady, the most apparent weakness being in wrapping papers and straw boards.

THE STATIONERY MARKET.—The movement in staple goods remains steady, but shows no improvement over last week. A fair amount of business is done in orders received by mail, but few out-of-town dealers are in the city and the local trade is light. Dealers in various stationers' specialties are having the lion's share of trade just now as goods of this character have an active demand at present. Particularly is this so in respect to fine writing pads. These pads are so admirably adapted to fill the wants of consumers that they are preferred to ordinary stationery and manufacturers have all that they can do to fill orders. There is a lull in the movement in steel pens, but this is not unusual for this season of the year. The manufacturers of fine art cards are busily engaged in the preparation of goods for the holiday trade. The competition in these goods is so extensive and active that some very fine things in this line may be looked for. Goods already shown have a remarkable degree of artistic merit, while the general treatment of the various subjects is peculiarly striking and original. It is said that in satin prints embossed goods will be leading specialties this year.

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, *Full weight*, as marked in *figures* on bundle.
- 2d, Absolute uniformity as to quality and color.

TRADE ITEMS

The very large facilities of the National Publishing Company, Philadelphia, enable it to give prompt attention to all orders for its popular line of family bibles. The company will be pleased to have members of the trade visiting Philadelphia call and examine its establishment.

The Cincinnati *Price Current* of last week issued a supplement consisting of the Thirty-fifth Annual Report of Pork Packing in the West and elsewhere in the United States, accompanied with provision and grain trade statistics for the year ending March 1, 1884. The supplement is a neat pamphlet of thirty-two pages, and its contents cannot fail to prove of great value to those engaged in the industries named.

Cochran & Young, paper and paper-stock dealers, Erie, Pa., have been closed by sheriff on judgments for over \$90,000 entered in favor of local banks. Liabilities about \$130,000. They have been prominently identified with the paper-stock business for the past ten years. They discontinued the paper branch of their business about a year ago, but were obliged to take back their mill property at North East. The assets are nominally \$120,000, consisting of real estate, bills and accounts receivable and personal property.

The attention of the readers of THE STATIONER is called to the *fac simile* letter, in another column, of the Equitable Life Assurance Company setting forth the merits of the Climax blotting paper made by the Richmond Paper Manufacturing Company. As will be seen by reference to the document alluded to, the company, when first asked to recommend the paper refused on the ground that it had not had sufficient time to test its merits. After using the paper a year, buying it through parties other than the manufacturers, and thoroughly testing it, the company states that it prefers to use the Climax blotting.

Among the noticeable features in the new show room and office of Phil. Hake, on the ground floor of the building at the corner of William and Ann streets, is the elegant private office of George A. Raisbeck, which is fitted up in the most tasteful manner. The window on William street is of stained glass of a handsome pattern, and, altogether, the place is as cosy as one could wish. Mr. Raisbeck will start out on the road soon with as fine a line of fall goods as

has ever been seen in this market. This will be ready for inspection at the show room of his firm, in a week or two. Among the great variety of novelties to be seen will be some embossed satin goods, the coloring of which will be done by hand.

John Gibson has brought out a decidedly attractive line of art cards for the holiday trade. The line is remarkable for freshness of design, beauty and harmony in the blending of colors and general artistic merit. It is largely composed of the productions of Julius Bien & Co., whose cards were so popular during the past season. This company has far exceeded this year anything it has yet produced. Its cards show a rare degree of artistic merit, and each design in the matter of coloring, &c., is treated in a way entirely original. The line is very extensive, and the fringing is rich and elegant. Among the great number of varieties are three numbers of frosted cards, showing beautiful landscape scenes in pretty colors. The trade should examine these goods.

A good article of manufacture scarcely needs a word of commendation. It advertises itself

—* THE LATEST! *—
PARISIAN WONDER COMPOUND MICROSCOPE.

(MAGNIFIES 1,000 TIMES.)

This is the latest and most important discovery in Optical Science. It unfolds the Mysteries of Nature.

Looking through its powerful lenses, one can see the Animalculæ in a drop of stagnant water, the corpuscle in the blood, insects in old cheese, every particle of dust on the wing of a butterfly in the form of a feather, a fly like an elephant, its trunk and the sponges on its feet being shown, the peculiar construction of a flea and the scales on its body. In fact, any imaginable minute object can be examined with as much accuracy and satisfaction as under any \$100 Instrument, and without the waste of time and skill used in mounting the object. The Compound Microscope is constructed of a peculiar grade of pebble-lenses, being a recent discovery and a secret, and is contrived so simply that any child can use it.

It therefore will, no doubt, interfere with the sale of high-priced microscopes, and take their place.

Samples by mail, prepaid. 25 cents; one dozen, \$2; one gross, by express, \$20.

GOLLNER MFG. CO., office 222 Centre St., N. Y.

and is a thing that consumers are bound to have. These remarks are suggested from the extended popularity which the "Climax" blotting paper has secured. Orders for this blotting-paper have greatly increased, and is is needless to say that it is giving general satisfaction. A dealer who carries it once will have no other. Among the strong points in its favor are that it is put up in packages of full weight and count; it is absolutely uniform as to quality and color; it does not harden with age; it is cheap and of a superior quality. The agent for its sale is N. H. Furness, of Nos. 5 and 7 Beekman street, New York. Mr. Furness has a full line of white, buff, blue, pink and salmon colors, put up in 60, 80, 100, 120 and 140 pound packages. Quarter ream packages of assorted colors, will be sold as a sample, if desired.

M. Daudet takes his note-book everywhere. Once, it is related, he had a sentimental and dramatic scene with his wife, concerning which he remarked, "This seems, my dear, like a chapter that had slipped out of a novel." "It is more likely, Alphonse," was the reply, "to form a chapter that will slip into a novel."

Doctor: "Well, Frau Koppen, and how have the leeches I prescribed done for you?" Patient: "Well, Herr Doctor, I boiled them and I roasted them, but do what I would I couldn't swallow them."

The Paper and Printing Trades Journal.

(QUARTERLY.)

Subscription: Two Shillings per annum, post free. Postage Stamps received in payment.

EVERY Printer, Stationer, Papermaker, Bookseller, Author, Newspaper Proprietor, Reporter, in fact, everyone interested directly or indirectly (and who is not?) with Printing and Paper ought to subscribe. Useful Trade Tables, Trade Information, Heaps of Wrinkles, and Amusing Gossip in every issue.

WHAT SUBSCRIBERS SAY.

I could not do without it.—J. SPRINGER, Iowa City, U. S. A.

We are delighted with the Journal.—S. F. CHERITT, Grahamstown, South Africa.

In my establishment the Journal is devoured with avidity.—J. JENNINGS, Gloucester.

It does not take a long time to see that it is worth its price.—S. B. SCHANTZ, Bethlehem, Pa.

Imparts the right sort of information, and every printer ought to have it.—B. PRICE, Bilston.

The Journal has a wonderful knack of making one understand what good printing is.—W. PERRETT, Glasgow.

Thanks to the invaluable services of the Journal to the world of typography.—W. WINGET, Torquay.

WHAT ADVERTISERS SAY.

CROWN POINT PRINTING WORKS, LEEDS. Piles of applications for samples resulting therefrom. A. F. COOKE.

OXFORD WORKS, CHELTENHAM. Your capital notices have brought in a large number of orders from printers. THOMAS HAILING.

3 KING ST., FINSBURY SQ., LONDON, E.C. From the first advertisement, I had over two hundred inquiries, most of them leading to good orders. J. D. CARTER.

4 FALCON STREET, LONDON, E.C. From one advertisement alone I had over thirty orders for wood letter and metal type. F. WESSELHOEFT.

ELECTRO-PLATING WITH NICKEL.

By WILLIAM H. WAHL.*

[Continued.]

The enormous extension of nickel-plating of late years has caused its application to an endless variety of articles of trifling value merely to enhance their beauty, and this, together with the severe competition among those in the business has combined to cause a very general deterioration in the quality of nickel-plated work. The necessity of doing cheap work is responsible for the fact, therefore, that thousands of articles are turned out of the nickel-plating works with the merest wash of nickel. The want of durability exhibited by these inferior goods has had the consequence that many have formed a low estimate of the utility of nickel as a protective coating for metals, which it is far from deserving.

It is important that the work should be examined very shortly after it has gone into the nickel bath, to observe whether it has been "struck" and its general appearance. Should dark streaks exhibit themselves upon the work, they may indicate either that the current is too intense, or that the work has not been properly cleansed. Such streaks will often be observed starting from joints, seams, or rivets, where the grease from the buffing-wheel may have secured lodgment, and from which it is difficult to perfectly remove it. In such cases the work must be removed and given another thorough pumice brushing and rinsing, and again immersed in the depositing vat.

As has already been briefly noticed, the hardness of electro-deposited nickel renders it impossible to finish the plated articles by burnishing. It is therefore necessary to prepare the surfaces of the articles to receive the nickel deposited before they are plated, in order to reduce the subsequent finishing operations as much as possible. On this account it is customary to polish the surfaces of articles to be plated on buffing wheels. In case the surface is very rough, as is sometimes the case with articles of iron or steel, it may be necessary to grind it smooth upon the emery wheel. The work when removed from the nickel bath, is dipped for a few moments into boiling water, and then rapidly dried in sawdust. It is now ready to be polished on the buffing wheels when it is finished.

The length of time required to produce a sufficiently heavy deposit of nickel will depend on the strength of the current, the condition of the bath, and the character of the articles. Brass and copper articles usually receive a sufficiently heavy coating in half an hour; for wares on which an extra heavy coating is desired, the time of immersion is extended to an hour or even longer. Iron and steel, Britannia-metal, pewter, &c., require a longer time of immersion than brass or copper, even though given a preparatory coating of copper, because of their comparatively inferior conductivity. A good coating of nickel, properly laid on, possesses great durability, and with ordinary usage will last for many years.

Old nickel-plated work which it is desired to replating should first be "stripped," as is found necessary with the precious metals. For this purpose a mixture of sulphuric and nitric acids is commonly employed. Watt recommends the following mixture, which will be found very serviceable, viz.: "4 pounds strong sulphuric acid, 1 pound nitric acid, and about 1 pint of water." By volume, these proportions would

*A paper read before the Chemical Section of the Franklin Institute.

be approximately: Strong sulphuric acid, 2 parts; nitric acid, 1 part; water, 1 part. The acids should be added to the water under constant stirring. This stripping liquid may be used either cold or slightly warm. It acts promptly, removing a light coating of nickel in less than a minute, and a heavy one in a few minutes. To insure contaminating the solution as little as possible with the metal of the wares the operation should be closely watched, and the articles removed from the acid just as soon as the nickel has been dissolved. The preparation of the stripped articles for renickeling should be the same as for new work. Articles may be stripped in the nickel bath by the ordinary artifice of connecting them as anodes, but the practice is reprehensible, as the purity of the bath will thereby become impaired by the solution of the metals composing the wares. Where the current is used for the purpose, therefore, a separate solution should be used, and for this purpose Watt's suggestion to use as a stripping solution dilute sulphuric acid which will dissolve nickel readily without appreciably affecting brass, may be recommended. Under all circumstances, however, the articles should be looked at from time to time, and removed as soon as they are free from nickel. It is important, however, that the old nickel be thoroughly cleaned off, to prevent the peeling of the subsequent nickel deposit.

PLATING WITH NICKEL BY IMMERSION.

Stolba describes the following simple process for nickel-plating without the battery, which may be usefully applied in the case of small objects. He dilutes a concentrated solution of chloride of zinc with twice its volume of water. This mixture he boils in a copper vessel, adding a few drops of muriatic acid should there appear a precipitate of basic chloride of zinc. He thereupon adds a small quantity of powdered zinc. This addition causes a deposit of zinc upon the vessel. Thereupon sufficient chloride or sulphate of nickel is added to the bath to give it a distinctly green color, and the previously cleansed articles are then immersed in the liquid in contact with zinc, and allowed to remain there for about fifteen minutes, the temperature being maintained at boiling during the operation. If the coating is found to be insufficient the articles are again immersed until a deposit of sufficient thickness is obtained. In this way, he claims to be able to coat satisfactorily, articles of zinc, cast and wrought-iron, steel and copper.

By an analogous process described by C. Mène, it is affirmed that metallic articles may be plated with nickel by immersing them in contact with zinc, in a boiling neutral solution of chloride of zinc, in which is contained fragments or a plate of nickel. Should the solution be acid the plating, it is asserted, will be dull. By this procedure the author claims to be able to coat articles of iron, steel, copper, brass, zinc and lead.

Where electrotypes of type or engravings are to be printed with colored inks that are disposed to become chemically affected by contact with the usual copper surface (as for example vermilion, which becomes brownish) it is customary to give the copper electrotype a thin coating of nickel in the usual manner. This nickel renders the electrotype proof against the above-named difficulty that printers experience with electrotypes not so protected.

By methods and solutions analogous to those described for nickel, electro-deposits of cobalt may be obtained. The electro-deposits of this metal equal, if, indeed, they do not surpass, those of nickel, in whiteness and brilliancy of lustre. The costliness of the metal, however, prevents its use for this purpose.

(To be continued.)

WARRANTED.—WALKE'S FLEXIBLE FOUNTAIN PEN.

Patented Dec. 14, '80, and March 27, '83, by H. A. WALKER. We warrant our pens and will refund price paid us for any pen not entirely satisfactory after ten days trial. Our fountain holders are made of the best hard rubber. Absolutely certain in flow and action. We make, for use in these holders, different styles 16 karat gold pens, diamond pointed. Also, cheap pens of iridium and silver, diamond pointed, and various styles of superior steel pens, gold plated; all of which are perfect as fountain, or dipping pens. Used and approved in every civilized country in the world. Descriptive price-list and terms free. Address, The WALKER PEN MFG CO., Hamilton, Ohio, U.S.A.

Sole Proprietors and Manufacturers,
60 WILLIAM STREET, NEW YORK CITY.

DECORATIVE METAL WORK.

Mme. de Long's invention of machinery for the cutting of all kinds of metals, which has for some time past been familiar to the French, was conceived at the time when, as a jeweler-worker, nearly twenty years ago, she was stricken with paralysis of the right arm, and would have been at a loss for a means of livelihood for herself, invalid husband and son had she not sought some means to reverse the usual process of her art, and work the saws and other tools by machinery, while the hand guided the metal. After many and great difficulties, Mme. de Long succeeded in perfecting machinery worked by steam which cut with the utmost precision through the hardest and the softest metals in any design of fine or bold character. By it articles as small as a brooch or as large as a pair of heavy park gates can be produced, and that by the mere process of cutting, without any of the usual molding and filling operations in vogue. In 1867 the inventor received her first recognition by the award of two medals at the Paris International Exhibition.

Since then, year by year, she has received medals of progress and gold medals, her two last being the great gold medal from the Paris Exhibition of 1878 and the gold medal from the Paris Artistic Exhibition three years ago. Last summer she exhibited a most artistic little *boudoir* fitted up with all the varieties of her new industry at the Engineering Exhibition, and now her works are on view in Regent street. Four great branches of her art are now successfully worked, and are familiar to the frequenters of the chief hotels, the Grand Opera House, and several theatres, churches and other large buildings of Paris. The first, which replaces the casting of designs in molds, is applied to the production of gates, doors, panels, fire-guards, banisters, balconies and architectural purposes generally. The power of the machinery will be somewhat realized by the fact that brass and most other metals, with the exception of steel, to the thickness of one-twelfth inch can be cut through to produce an open lattice-work of varying design, without retouching or subsequent finishing. The design in the Louis XIII., Louis XVI. or more modern character, is simply drawn upon paper firmly pasted on to the metal, and the whole passed under saw bands or ribbon saws worked by machinery as the hand guides the plate of metal. Two or three dozen articles of moderate thickness can thus be turned out at one cutting, and a further advantage results from the method, since those who can afford to pay for a special design, and wish to have something unique, can have their own design carried out without the expense of casting. Examples of door panels and partition screens bearing initials and family arms are shown by the inventor, one especially artistic door being on view, the framework of carved wood inclosing a handsome pattern in zinc and iron, with a raised monogram of copper in the centre. It is extremely light and yet very solid. The *chef d'œuvre* of this branch is, however, a small 2-foot-high door panel wrought in the most intricate design, with small balls in relief added to various curves of the pattern intended to display the capabilities of the machinery.

Another branch of the new industry, which is destined to supersede the ordinary leaden framework for colored windows, is the lattice-worked metal filled in with glass, the advantages secured being lightness, delicacy of appearance and ease in replacing any broken portions. The metal is joined by small screws,

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. The patented device for reversing the die and counter saves time. Have been in use by many of the principal Stationers for the past twelve years.

Prices and other information given on application.

Envelopes and Writing Papers

THE ENVELOPES and WRITING PAPERS manufactured and sold by the PLIMPTON MFG. Co., of Hartford, Conn., are unsurpassed in quality and styles by any other manufacturer in the world, and their prices are as low, if not lower, and their facilities for furnishing printed Envelopes are unequalled. Address

PLIMPTON MFG. COMPANY,

HARTFORD, CONN.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$8.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

which, in the event of an accident to the glass, can be removed and the new glass easily let in. Some examples of decorative windows suitable for staircases, conservatories, &c., into which prismatic slips and frosted and plain glasses in varying patterns have been wrought, are proof of the inventor's capabilities in this direction. Some beautiful plush and ebony jewel cases, inlaid with red and yellow copper, steel, silver, &c., belong to the third group of the branches of the art, the incrustation process and its results showing great durability and excellence. Lastly, beyond these more solid works is the section "*articles de Paris*," letter trays, card baskets, photograph frames and *bonbonnières* mounted in satin. In addition to the numerous medals mentioned, the first laureate crown ever offered to one of her sex was awarded by the Central Society of French Architects in Paris.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

SCHLEICHER, SCHUMM & CO.
PHILADELPHIA, PA.

THE GOOD SAMARITAN.

On the occasion of the recent disaster on the Pan-Handle Railway, Wm. L. Marks, traveling salesman for the Dixon Crucible Company, was a passenger in the train which met with disaster. His presence of mind saved him from more than slight injury, and his first effort on escaping from the wreck was to render aid to others less fortunate than he. Among those to whom he rendered assistance was the Rev. Dr. Long, President of Antioch College, who, subsequently, writing to the Dixon Company, expressed his sense of Mr. Marks' action and his appreciation of the traveling fraternity in the following words:

ANTIOCH COLLEGE, YELLOW SPRINGS, Ohio, }
April 23, 1884.

Joseph Dixon Crucible Company, Jersey City, N. J.:

* * * * Your agent, Wm. C. Marks, made a host of friends in Ohio by the gentlemanly manner in which he showed himself to be a hero the night that witnessed the "Pan-Handle horror" on the banks of the Little Miami River. I was a passenger on the ill-fated train, and will never forget his kindness to myself, though it was our first and last meeting. I congratulate you in having such a noble specimen of manhood in your employment. Years ago, on my first visit to this State (I was born in North Carolina) I remarked in a temperance lecture at Soneford that the good Samaritan was a commercial tourist (drummer). "Burdett" ought to be surrounded by the agents at all times. If he ever wakes up about midnight with the bottom side of his coach in the direction of the stars, he will think that I am right. The drummer of Samaria had the best of oil and wine. The drummer of Jersey City had the best of pencils and the kindest of hearts. The iron horse will dash and the electric lights will soon flash through the land where Christ and His Apostles once held sweet converse in regard to who was really our neighbor. Methinks I hear the conductor at Jerusalem say, "All aboard for Jericho. Passengers for Moab take a seat in the front car." The train may be wrecked. If so, I venture to say that the ubiquitous drummer will be the first and last to administer to the wounded and dying, while the fat priest and bloated Levite will either be asleep in the Pullman waiting for the black porter to call them up, or whining about the loss of a silk umbrella or gilt-edged prayer-book. The Jersey City drummer will never be known on earth as extensively as the Samaritan, but I am certain that his name will stand as high and his reward will be as great in that land where all men will be rewarded according to the deeds of mercy which they perform in this. I know that many of the commercial agents have some habits in error. Yet, I want it distinctly understood that the sexton of the church of which I am pastor must always invite the commercial traveler to a front seat. I am, with many thanks, very truly yours,

D. A. LONG.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

LOUISVILLE ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., May 3, 1884.

The feature of the week has been the advent of something like seasonable weather. Unquestionably, spring trade has been much hampered by the gloomy and unseasonable freaks of the weather this year, and the complaint of "no season" is heard on every hand. On inquiry of leading jobbers I find that some regard the business of the first four months of this year as rather behind that of last year; many represent the volume as fully equal to last year, while a few have experienced a better spring trade than ever, so that, on the whole, the season's movement may be up to a fair average.

The few pleasant days of the past week brought out the city shopping trade in good force, and stationers and fancy-goods dealers secured a prominent share of the activity. The book and paper trades are having a quiet, regular demand, affording no just grounds for boasting or complaint.

The clearing-house exchanges of this city in April were \$19,923,000, as compared with \$16,064,000 for the corresponding month last year; the clearings for the four months of the current year are \$75,905,000, being 10,500,000 in excess of the same period last year. Local authorities contend that while a considerable percentage of this increase is referable to the enforced with draws of whiskeys from bond, it nevertheless indicates also an increase in the volume of general business here. The money market is steady and firm, the loanable funds of bankers being well employed and the demand for discounts active and comfortable. Farming operations are making irregular and not altogether satisfactory progress; the wheat prospect is good, but spring-sown crops are backward in development. General country trade, both North and South, is reported dull and disappointing.

A new afternoon two-cent daily, the *Times*, made its appearance on the 1st inst. It is published by the *Times* Company. Emmett G. Logan and E. Polk Johnson, editors; W. M. Redman, business manager. It claims the exclusive use of the day report of the Western Press Association, all of the mechanical facilities possessed by the *Courier-Journal*, and its proprietors' years of experience, clear consciences, healthy livers and a determination to live and

let live. It is a clean, eight-column sheet, of good promise.

The paper mill of Isenberg Brothers was burned about two weeks ago; insurance, \$12,000, which will not cover the loss. This is the mill formerly operated by the Brannon-Justi Paper Company.

A. C. Caperton & Co. are advertising a clearance sale of their miscellaneous book and stationery stock, intending to hereafter do less of a general and more of a special business.

Subscriptions to the additional capital stock of the Southern Exposition at Louisville have reached the amount needed to insure the reopening of this mammoth enterprise, and the official announcement has gone forth that we will have in this city, beginning August 15, 1884, and continuing seventy-five days, the grandest exposition that ample capital, boundless energy and exceptionally strong commercial, geographical and mechanical influences can produce.

Main street, which means the leading wholesale houses, is endeavoring to inaugurate early closing on Saturdays from now to the end of summer. "This Store will Close at Three O'clock on Saturday Afternoon" is a placard the clerks have successfully introduced all along the line. Now, let everybody live up to it.

J. O. Shoup, of the Dayton Paper Novelty Company, Dayton, Ohio, is in the city to-day.

BOURBON.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., Boston, May 6, 1884. }

Spring has had a hard fight, and a long fight, too, but at last its gentle influence have toned down its stormy predecessor, and nature is beginning to array itself in brighter colors. Trees are putting forth their tiny leaves, and the daily pedestrians traveling through the "Commons" are warned by numerous placards to "keep off the grass." The sympathetic public is quick to take advantage of the "merry, merry sunshine," and as the people take their daily airing in town, no small amount of money passes into the tills of the numerous storekeepers in exchange for the many novelties of the season.

The retail stationers, the booksellers, and the fancy goods dealers have nothing to complain of just now, and, although the jobbers are not doing as heavy a business as they might wish for, they can rejoice to see dealers' stocks growing less. Manufacturers of stationers' specialties

have enjoyed a very fair trade, while some lines of staple goods are having a steady increasing demand.

This is especially so with manifold books, while the Boston manufacturers, Samuel Hano & Co., are most fortunately situated in respect to the trade. This is the largest concern of the kind in the world, and its manifold books are known to every stationer in the country. This firm is engaged exclusively in manufacturing manifold books, making that line of goods a specialty, and its trade is constantly increasing. It will be remembered that in March last the factory of Samuel Hano & Co., situated on Harrison avenue, was burned out and \$18,000 worth of stock was destroyed; but nothing daunted, the enterprising firm quickly resumed operations, and started up again in more spacious quarters. Its present factory is in Ashton, a little town some four miles from the city, and here is found every facility for turning out first-class work. The firm is making over a hundred different styles and sizes of manifold books. Dealers who desire to be posted in relation to this class of goods should address the manufacturers and receive a copy of their trade catalogue.

Another line of goods having a big demand is blotting paper, and if the rest of the manufacturers are as well favored with orders as the Russell Paper Company, that trade must certainly be flourishing. The Russell blotting was presented to the trade some eight years ago, and owing to its excellent quality it readily "caught on," and it has been growing in popular favor ever since. Where once used this blotting will be continually used. One has only to try it to become a lifelong consumer. This is due to the fact that "the best" is good enough for most people. Having established such a reputation for the Russell blottings, the company is determined to maintain its excellence. The trade generally have come to understand this fact, and their numerous orders keep the mills of the Russell Paper Company running to the utmost capacity. Parties looking for testimonials will be furnished with samples of the blotting paper—they will speak for themselves, and loud enough to carry conviction.

The Heath Letter File and Index Company is enjoying a fair degree of prosperity. Counting-rooms, banks, manufactories and other commercial concerns doing a large business, receive during the course of a year thousands of letters. These business communications must be preserved for future reference; not bundled up and stored away in some lumber room, as in olden times, but neatly arranged in some convenient manner, so that from a lot of ten thousand

some particular one when wanted can be quickly found. For just such a purpose is the Heath letter-file. The Heath system is one that is peculiar to itself, and this peculiarity is just what makes the system valuable, and in this peculiarity is the difference of the Heath system from all others. The system is very simple, easily understood and readily applied. In this city alone many hundreds of the Heath letter-files are in use. Ornamental cabinets of cherry, ash or walnut, in which the letter-files are kept, are also made by the company, and hundreds have found their way into the more prominent business houses. In Chicago, Philadelphia and Raleigh agencies are established, and they are frequently heard from in the way of orders.

Ledger indexes, compiled upon the same system as that of the letter-files, will be found very valuable by those whose business accounts cover an extensive range of names. In referring to accounts even in an index containing 40,000 names there is no delay; the system is so simple and perfect that a school-boy would master it in ten minutes. These indexes are made as voluminous as occasion may require. The Dennison Manufacturing Company, the Atlantic Cotton Mills and Walker & Co., shoe manufacturers, have each one of these Heath ledger indexes arranged for 12,000 names. For the Grand Lodge of Knights of Pythias a 24,000 name index was made; while a larger one, indexed to accommodate 56,800 names, was furnished to the Boston Title Company. Illustrated catalogues, giving full particulars, are furnished upon application to the Heath Letter File and Index Company.

Carter, Rice & Co. are presenting to the trade some new lines of cover paper, which, for uniqueness and novelty, take the lead. A demand for something new and novel in cover paper has for some time been felt, and to meet this want the "imperial and royal antique" covers are introduced. This line of paper is very tough and firm, a strong linen middle being coated with a soft stock, and the spongy surface gives to the paper its peculiar striking effect. Besides covers, this paper is being largely used for circulars, programmes and menu cards, and it is found quite effective for such uses. The "imperial" papers are the rougher and more novel, while the "royal" are a little smoother. These papers are put up crated in ream packages. Five colors are carried in stock; old gold, brown, green, blue and terra-cotta. Those of the trade who appreciate novelties might find samples of the imperial and royal antique covers very useful to have on hand for customers' inspection. Write for them to Carter, Rice & Co.

John A. Lowell & Co., steel-plate printers and engravers, suffered some damage from fire on Sunday morning last. The fire originated in the press-room from some unaccountable cause. The stock and machinery are damaged to the extent of some \$500. No interruption to business is experienced, however, and orders for menu cards or steel-plate folders will suffer no delay.

Isaac L. Kidder, one of Boston's oldest stationers, died suddenly at his home in Newton, on Saturday last, of diabetes. Mr. Kidder was fifty-nine years of age. He had been connected with the stationery trade all his life, entering the employ of Benjamin Loring when a boy, and serving further time in the house of John March and other old-time stationers. For the past twenty-six years Mr. Kidder was a very active partner of the house of Cutter, Tower & Co., and when that concern was incorporated some four or five years ago as the Cutter-Tower

Company, he was elected the treasurer, which position he continued to hold until his death. Mr. Kidder was also president of the American Tool and Machine Company, of this city. He leaves a wife and one daughter, a Mrs. Claffin. Mr. Kidder was held in high esteem by all who knew him, for he was a kind, generous hearted man.

A. L. D.

WILMINGTON WINKS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., May 6, 1884.

Few of the trade have visited our city since I last wrote you, and those who came, were not rewarded with large orders.

The dashing Mr. Harrison, of W. D. Wilson & Co., New York, "just dropped in to look after their large ink trade."

Our genial friend, Dave Weingarten, of S. Trier & Son, New York, "stopped over a train" to show something new in card stock.

O. R. Wilcox pleasantly introduced himself as a representative of W. S. Hicks, New York, and desired to "stock up" the trade in gold goods.

Our old townsman, S. E. Hilles, desired to acquaint the trade here with a line of copying presses, &c., made by Samuel C. Tatum & Co., Cincinnati, Ohio.

Victor Heilbrunn, of French & Choate, completes the list. I am amused at the stereotyped question of visiting salesmen: "What about the license law here?" Some of them really seem frightened and look over their shoulder as if expecting to find an officer with a warrant of arrest.

For the comfort of the timid ones, I state that for a very long while the law has not been rigidly enforced, and our friends who desire to call need have no fears of being molested.

The trade here are speculating as to what disposition Congress will make with the bill recently introduced "for the protection of commercial salesmen." They think that there are two sides to the case, and that only one has been stated.

Recognizing the convenience in buying goods as offered by the wholesale jobber, they do not desire to withhold any privilege belonging to him; but for good reasons they protest against an open field to firms in an adjoining State to peddle goods among consumers.

They simply ask that they shall pay the same license required of residents.

The law demands a payment of \$25 tax for each vender of goods.

A failure to procure such license subjects the offender to the payment not only of the tax mentioned, but of a fine of not exceeding \$500, or imprisonment for a term not exceeding two years, or both, at the discretion of the court.

Another section includes "every person who shall travel from place to place within this State procuring or soliciting orders of sale, for goods, wares, &c., either by wholesale or retail, unless made within the bounds of this State."

Now, gentlemen of the trade, if this item is of any interest to you, cut it out, and when you enter the land of whipping post and pillory, it may remind you of the possible danger that menaces you.

The announcement of E. Claxton & Co.'s failure excited much sympathy among the trade for them, and hopes are entertained that an adjustment of matters will lead to an early resumption of business.

Much interest has been added to their case since the generous offer of William Weightman,

who, as judgment creditor, willingly waived his claim that his boyhood friend might be unconditionally released.

The Jessup & Moore Paper Company, to increase its facilities, is erecting another bleaching house at its Delaware Pulp Works.

On May 2 a serious accident occurred at the Augustine Mills, by which C. W. Johnson, an employe, will probably lose a hand. His left was caught between the calender rolls, and held firmly there until the taps could be unscrewed and the rolls raised.

Our printers are exercised over the rapid increase of amateur concerns, who are making considerable inroad in the business of the legitimate craft. Only two steps are necessary to cripple if not "rush out" these botches. First.—Demand that the law shall be enforced, and that they shall be required to pay the license tax for carrying on a business. Second.—Refuse to buy stock from any firm which fails to protect legitimate trade by selling to amateurs.

The promise of a business harvest with the advance of "gentle spring" has not been fulfilled as yet. Contrary to expectation, the fine weather has not proved a harbinger of busy times, and there is no denying the fact that trade is dull.

Printers are receiving few orders, and are working a reduced force.

The depression affects the stationery trade as well, and sales are light. Few orders are given for goods, the trade preferring to wait until a marked activity in business will warrant "stocking up."

The present situation does not present them with any cause for alarm, but, on the contrary, it finds them hopeful of an early improvement.

TRACY.

CINCINNATI ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, May 15, 1884.

The Cincinnati stationers are going to give their employees a little surcease from labor each week—that is, some of them have already agreed to do so—during the coming summer months. Commencing with next Saturday, May 10, and continuing until September 1, the following named firms have signed a paper to close their places of business at 3 o'clock on Saturdays, instead of at the usual hour, 6 o'clock, namely, C. F. Woodrow, J. R. Mills & Co., and W. B. Carpenter & Co. Others are likely to follow suit.

The late firm of Mallory & Webb has been changed to that of W. A. Webb & Sons since the death of W. L. Mallory. The sale of Mallory's private library was one of the events of last week. It was in many respects a rare collection.

A. E. Harding, of the Harding Paper Company, was stricken with paralysis last Tuesday. He is reported as improving. His is a case of overwork. The absence of such a man from his business—one so genial, so capable and so devoted—is sorely felt by his associates.

Trade visitors have been few and far between. This is about the only respect in which their calls resemble angels' visits. W. C. Kimmey, of Knight, Adams & Co., Boston, has been here. Thomas James has represented Daniel Slote & Co. An able and zealous representative of the Morgan Envelope Company, of Springfield, Mass., made his appearance in the person of Mr. Handy. J. Holzinger, of Kahn & Holzinger, was here in person, and the envelope manufacturers of Holyoke had an active represen-

(Continued on page 615.)

OLD BERKSHIRE MILLS

CHARLES Q. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an
air-tight reservoir kept by atmos-
pheric pressure, at the bottom of a
metal tube screwed on to the neck,
and passing nearly to the bottom of
the stand. The brush is always in-
serted in about one-half inch of
fresh mucilage, just supplying
enough to keep it moistened suf-
ficiently for use. The handle and
mouth are always clean.

NEW PATENTS.

No. 296,689. Toy Bank.—Henry C. Hart and James W. Cross, Detroit, Mich., assignors to the Henry C. Hart Manufacturing Company, same place.

In a toy bank, an illusion object, a glass through which a coin deposited may be observed, and means for converting said glass into a mirror adapted to reflect an image of the illusion object.

No. 296,718. Advertising Card.—Benson D. Baldwin, Chicago, Ill.

An advertising card composed of paper or other suitable material, having the design of a flower thereon, a part of the face of the card being adapted to receive advertisements, the card being cut through at points on or over the flower, in combination with a bottle adapted to contain perfume, inserted in the card through the cut portion, so that the body of the bottle forms the stamen of the flower, the bottle being secured to the card by a ribbon or string.

No. 296,722. Fire-Proof Paper.—D. Austin Brown, Boston, Mass.

As an improved article of manufacture, a fire-proof or non-conducting paper composed of asbestos and infusorial earth.

No. 296,724. Toy and Advertising Medium.—Lee S. Burridge and Newman R. Marshman, New York, N. Y.

No. 296,730. Combined Pencil Sharpener, Eraser, &c.—John A. Cook, Buffalo, N. Y.

An improved article of manufacture, consisting of a tube having a knife-blade rigidly secured on one end thereof, the blade being fixed to one side of the end of the tube and projecting beyond the end, whereby the pencil may be inserted into the knife end of the tube, the pencil secured, and the edges and point of the knife protected.

No. 296,751. Pencil Sharpener and Holder.—Thomas Holdsworth, West Winsted, Conn.

No. 296,762. Bill File.—Joel H. Louder, Chicago, Ill.

No. 296,766. Tag and Tag-Fastener.—George W. McGill, New York, N. Y.

A paper-board tag combined with a metallic staple-fastener, having pointed legs passed through the tag in two separate perforations, bent toward each other and parallel to the head, so as to clamp the tag between the folds of the staple-legs and the head, and bent outward at right angles to the head.

No. 296,767. Book Case.—Peter Elyea McIntosh, Rochester, N. Y.

No. 296,772. Post-office Box.—Enoch Osgood, Washington, D. C.

No. 296,773. Addressing Machine.—Hiram Parker and James T. Drummond, Mount Pleasant, Ia.

No. 296,777. Reclining or Hammock Chair.—Frank H. Plummer, Henniker, assignor of one-half to G. W. & M. L. Stearns, Lebanon, N. H.

No. 296,783. Toy Building.—Wm. S. Reed, Leominster, Mass.

1. A toy building representing the Capitol of the United States, composed of one or more portions, substantially as set forth. 2. A toy building representing the Capitol of the United States, having one of the portions of which it is composed of a size sufficient to serve as a receptacle for the remainder of the toy. 3. A series of strips, sheets or tablets of suitable material, bearing the miniature representation of the architecture of the original Capitol building, in combination with grooved or other connections for assembling them together.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with amples in order to secure proper notice.

Hays & Church, publishers of the *Texarkana Democrat*, Texarkana, Tex., have sold out.

Wilkinson & Smith, paper box manufacturers, Hamilton, Ont., have dissolved partnership.

The Palmer Art Company having gone into liquidation on May 1, will be closed out below cost.

F. E. Grady & Co., bookbinders, New York city, advertise that a dissolution of their firm took place on April 21.

Hagemeyer & Brunn, importers of paper stock, have removed their office from 47 Pearl street to 34 Bridge street, New York city.

Dampf & Schussler, picture frame dealers, San Francisco, Cal., have dissolved partnership. Louis Dampf has retired from the firm, and Hy. Schussler has been admitted to membership. The style of the firm is now Schussler Brothers.

A fire broke out in the printing rooms of the *Wayne County Journal*, Palmyra, N. Y., on May 2, which resulted in the loss of the type and presses and nearly the destruction of the entire building. The loss is \$6,000, which is covered by insurance.

The firms of McCarty & Hasberg and Hall, Nicoll & Granbery have consolidated under the style of the McCarty & Hall Trading Company, Limited. The officers of the new company are J. Barclay McCarty, president; Bolton Hall, treasurer, and Benjamin Nicoll, secretary.

The St. Louis *Druggist* announces its intention of opening a department of therapeutics, to be conducted by Dr. Frank L. James, who is a graduate of the University of Munich, Bavaria, Germany, and was a student of Liebig, the scientist. This feature will no doubt greatly add to the interest of the *Druggist*.

The trade in New York are more or less interested in the failure of the Erwin & Lane Paper Company which was reported last week, and it is authentically stated that the embarrassment will be only temporary, and that the concern has large assets in excess of its liabilities and that the creditors will be paid in full. The concern has considerable stock on hand and in process of manufacture, which when marketed will place it in a comparatively easy position. Among the creditors here are Sergeant Brothers about \$2,500, Train, Smith & Co. \$1,800 to \$2,000, John L. Taylor \$1,500, Perkins, Goodwin & Co. about \$600 and H. C. Hulbert & Co.

The liabilities of Alvah Bushnell, stationer, Philadelphia are: Preferred creditors, \$3,391.00; common creditors, \$11,372.06—total, \$14,763.06. The nominal assets are given at \$11,400. The majority of Mr. Bushnell's creditors held a meeting on Thursday, May 1, and decided, after a careful examination of the books, to accept 25 cents on the dollar, payable in notes at six, twelve and eighteen months. It is probable that all of the creditors will accept this proposition because the assets, if sold by the Sheriff, will only cover the preferred claims. If the arrangement meets with the approval of all, the preferred creditors are willing to give Mr. Bushnell ample time to settle their claims.

Marcus, Ward & Co., Limited, have brought out a new Bible text book, entitled "Bible Immortelles," the texts being for mourners. It was compiled by the author of "Morning and Night Watchers." The book is very tastefully gotten up in two styles of bindings, plain black cloth with colored insides and illuminated end pieces, and white forel with colored insides, illuminated end pieces and gilt edges. On the left hand page is an appropriate text for each morning and on the right a text for the evening. The texts are inclosed by illuminated wreaths of immortelles.

The document envelopes of the Cincinnati Paper Novelty Company are having a steady demand. Stationers find them a salable line of goods and are very generally carrying them in stock. The compact form in which the envelopes come, enables a very large stock to be carried in a small space. The envelopes are adapted for the general trade, being both plain and printed forms for legal purposes.

The *American Journalist* for April is thoroughly entertaining. The article on "Women Journalists" tells, in a very interesting and interesting and instructive manner, of the achievements of the fair sex as newspaper workers. There is, as usual, a large amount of gossip concerning the journalistic world, and this is written in a most entertaining style.

The Keystone National Bank, of Erie, Pa., has given up its attachment on E. J. Cary's paper-stock establishment, North Adams, Mass., as the managers found it so heavily mortgaged that they could not realize anything out of it. The bank still holds an attachment on some of the personal property.

The Parke Manufacturing Company, manufacturer of paper bags, &c., Philadelphia, Pa., has been dissolved. John T. Palmer continues the business.

A. Wuensch & Co., manufacturers of paper boxes, New York city, have dissolved partnership. August Wuensch continues the business.

F. Desjardins & Co., stationers, Quebec, Dominion of Canada, have made an assignment in trust.

Thomas Jones, stationer, &c., Durham, Ont., is dead.

Mrs. M. A. Lewis, stationer, St. Paul, Neb., has sold out.

J. G. Lee, publisher, Grand Haven, Mich., has been attached.

Wood & Co., stationers, San Francisco, Cal., have sold out.

Clark & Stevenson, printers, Newark, N. J., are reported insolvent.

The Pearl Paper Company, South Hadley, Mass., is reported to have failed.

Michaels & Bates, publishers, Grand Island, Neb., have dissolved partnership.

Mary G. Armstrong, manufacturer of paper bags, Trenton, N. J., has assigned.

L. Cover, publisher of the *Standard*, Milan, Mo., has been burned out. Partly insured.

The liabilities of E. J. Cary, paper-stock dealer, North Adams, Mass., who failed last week, are \$22,000.

Houghton, Mifflin & Co., publishers, &c., Boston, Mass., have admitted James E. Hurd as a member in their firm.

Morgan & Donaldson, publishers of the *Courier*, Terre Haute, Ind., have dissolved partnership. Dick T. Morgan succeeds to the business.

Ashmead Brothers, booksellers, Jacksonville, Fla., who assigned last week, were damaged by fire March 24 about \$3,000, their insurance amounting to only \$3,000. They were sued for \$4,000; the insurance money was garnished, and claims against them for \$15,000 were placed in an attorney's hands for collection.

A fire occurred in the building occupied by J. B. Harrison, bookseller and stationer, and the *Sun* printing office, Pittsfield, Mass., on Thursday morning, May 1. Mr. Harrison's stock of books, valued at \$15,000, it is estimated, was damaged \$5,000; insured for \$10,000. The loss in the *Sun* printing office was from \$300 to \$300.

The National Publishing Company, Philadelphia, is receiving orders from every section of the United States and Canada for its elegant quarto Bibles. One of the best recommendations of its line is that dealers who have given its Bibles a trial find them so salable and attractive that further orders are assured.

An unoccupied store belonging to Edward and Amasa Howe, book and stationery dealers, Presque Isle, Me., was burned on May 1, and Goodlove & Lane, dealers in paper-hangings, &c., at the same place also sustained damage, together with a number of other concerns. The buildings were all occupied in the second stories as residences, and were nearly all large and valuable, and contained unusually large stocks.

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

The losses are estimated to be not less than \$125,000; insured for \$50,000.

J. D. Maxfield, publisher of the *Sentinel*, Waterville, Me., has sold out.

A receiver has been appointed for Maurice Lindner, toy dealer, Berlin, Ont.

B. G. Price, publisher of the *Colleton Press*, Walterboro, S. C., has been burned out.

Fire, on May 4, damaged the establishment of Fielding & Mosyow, dealers in books and musical instruments, Newburg, N. Y.

Arthur & Bonnell, stationers, New York city, have renewed their limited partnership to April 30, 1887, with special capital of \$10,000.

Leonard & Co., dealers in fine art goods bric-a-brac, &c., New York city, have succeeded to the business of William P. Moore and the Moore & Clark Company.

George Uibel reports, a falling off in the trade in sea bean and alligator teeth jewelry, but he is making extensive preparations for the fall trade, and will be ready to fill all orders and show buyers a full line of his goods as soon as the fall trade opens up. Sea bean and alligator teeth jewelry are novelties which take well with consumers, and a great many stationers are handling these goods.

The New York Silicate Book Slate Company has just issued an illustrated catalogue giving prices and engravings of various sizes and styles of wall, house, school, bulletin and roll blackboards in such a way as to be very convenient for reference. This catalogue is furnished in quantities of one thousand or more copies, with the business address of customers printed on them for distribution among consumers.

Alles & Conant have brought out a new line of writing desks and ladies' work-boxes, comprising fourteen different styles. These goods are made up in mahogany, walnut and polished maple, with marquetry and other styles of decoration. A design especially noteworthy is the combination roll-top writing-desk. This desk is made of walnut, and is 12½ inches long, 9 inches wide and 9 inches high. The outside is nicely finished, and the inside contains a folding-desk, furnished with inkstand and divided into compartments for stationery, &c.

Fire broke out on Friday evening of last week in the drying room of the Eagle Pencil factory in Fourteenth street, between Avenues C and D, New York. The wooden extension of the pencil factory was burned to the ground. The loss was estimated at \$10,000; fully covered by insurance.

George B. Hurd & Co. are showing five new tints of Crane's extra-super grade and super grade writing papers. The tints are termed mytho, tonquin, marron, etain and shell-rose, these being the French designations. They are very pretty, and will, no doubt, prove popular.

Wm. H. Woglom manufactures the Van Horn letter clips which for years have had a substantial reputation. He also makes the Van Horn files, binders, &c.

The E. S. Judd & Co. art store, Danbury, Conn., has been sold to Theodore Raymond.

E. N. Ratcliff, bookseller, &c., Tehuacany Tex., has admitted a partner to his firm.

Jenkinson & Foulke, publishers, Richmond, Ind., have sold out to Isaac Jenkinson.

F. B. Moulton, dealer in fancy cards, Providence, R. I., has assigned.

S. L. Wilson, publisher, Manning, Ia., has sold out.

F. A. Blake, publisher, Socorro, N. M., has sold out.

L. P. Tozer, stationer, &c., East Brady, Pa., has sold out.

Schnable & Brown, printers, Chicago, Ill., have dissolved partnership.

L. A. Barker, publisher, Lake City, Mich., has sold out to H. N. McIntyre.

C. E. Judd, printer, St. Paul, Minn., has sold out to the Minnesota Type Foundry.

L. E. Motter, art emporium, St. Joseph, Mo., is advertising to close out his business.

Edward O. Jenkins, printer, &c., New York city, has been succeeded by Edward O. Jenkins' Sons.

Receivers have been appointed for Biedinger & Diem, wholesale paper dealers, Cincinnati, Ohio.

The Phoenix Printing Company, St. Louis, Mo., has been incorporated with a capital stock of \$3,000.

Mallory & Webb, printers, Cincinnati, Ohio, have dissolved partnership. The business is now carried on by William Webb & Sons.

The New York News Company has brought out a new cigar called the "Union Club." It is very diminutive and has a very pleasant flavor. It is, in a word, a "baby cigar."

John Murphy & Co., publishers, booksellers, stationers, &c., Baltimore, Md., opened on May 1 a branch house at No. 11 Murray street, New York. The manager is Mr. Kilner, a member of the firm, who will permanently reside here. There will be kept in stock a full line of the firm's publications and those of other houses,

and all orders will receive the same attention as at the Baltimore house.

C. Towne, publisher of the *Echo*, Petaluma, Cal., is reported to have sold out.

Mrs. J. E. Conant, newsdealer, &c., Orange, Mass., has sold out to N. B. Morrill.

N. D. Birds' y dealer in window-shades, Louisville, Ky., has made an assignment.

E. A. Weed, publisher of the *News and Recreation*, Los Angeles, Cal., has sold out.

The Clark-Neergaard Company, paper dealers, removed on May 1 to No. 14 Beekman street.

An attachment has been issued against J. C. Perry, dealer in wall-paper, &c., San Francisco, Cal.

Rawlings & Brunner, bookbinders, Baltimore, Md., have dissolved partnership. Brunner & Lyon succeed to the business.

Henkle & Polkinghorn, printers, Washington, D. C., have dissolved partnership. Edward A. Henkle succeeds to the business.

A dissolution has taken place in the firm of Kolle Brothers, manufacturers of picture frames, &c., Chicago, Ill. John Kolle continues the business.

There is much mystery concerning the whereabouts of Henry B. May, son of S. S. May, of E. & S. May, paper manufacturers, of Lee, Mass. The matter has caused considerable excitement at his home, and has given rise to all sorts of rumors. He has not been heard from for over two weeks. He is known to have gone to Philadelphia, where all trace of him was lost. His friends have had detectives and other officers looking for him for some time and hoped he would be found before the matter became public. A rumor was circulated that he had been murdered. His father, S. S. May, has been in New York and has made every effort to ascertain his son's whereabouts. There are very few who think there has really been any foul play, as Mr. May had not a very large sum of money about him. The report was circulated, a few days ago, that a telegram had been received from him in Baltimore, stating that he was on his way home, but it did not prove to be true. He registered at the Metropolitan Hotel in New York on April 19, and stayed there for three days, and then, having paid his bill, left presumably for his home. About a week after this his friends, becoming alarmed at his absence, wrote to the proprietor of the hotel for an explanation. A detective discovered his trunk and overcoat at the Hotel Royal, Fortieth street and Sixth avenue, where he registered

the very day he left the Metropolitan. At the Royal he did not even go to the room assigned to him, but at once departed with a friend. He was traced to Newark, N. J., and from there back to New York, and he departed again almost immediately for Philadelphia, where he arrived on the 24th of April, and put up at Greene's Hotel, at Eighth and Chestnut streets. From the moment that he left that hotel all trace of his whereabouts has been lost. It is reported that while in Philadelphia he transacted some business with a Mr. Eden, at Seventh and Chestnut streets, in that city. He completed his business and is supposed to have returned to New York the same evening. In the general alarm sent out by the police authorities, Mr. May is described as being about thirty years of age, 5 feet 8 inches in height, and weighs 220 pounds, having light hair and a small mustache. When last seen he wore a blue suit and a cutaway coat, and his underclothes are marked "H. B. M." He was only known to have a small amount of money with him when he disappeared. He wore a miniature steam fire-engine in gold as a scarf pin.

The stock of Lyman & Curtis, who failed some time ago, is being removed from No. 23 Murray street to an auction salesroom. Mr. Lyman has taken an office at No. 47 Murray street where he will be located until a settlement with the creditors is reached. At present the movement toward a compromise remains the same as a few weeks ago. In speaking of the firm's affairs to a reporter of THE STATIONER, Mr. Lyman was very reticent, and when asked whether the firm would eventually resume business, he replied that it was possible but not probable. A portion of the stock had already been disposed of, but what portion he could not tell.

J. B. Lippincott & Co., publishers, Philadelphia, Pa., have issued their Bulletin of New Publications for May. The Bulletin contains a list of new publications and importations of the firm, with brief notices of their contents, &c., together with announcements of works in press.

Frederick Zoerb, manufacturer of pocket-books, No. 177 Bowery, made an assignment yesterday to William Zoerb, giving three preferences to relatives, for \$710. He has been in the business about ten years.

William C. Stevens & Co. have succeeded to the business of Stevens & Co., picture dealers, Chicago, Ill., the firm having dissolved.

James Hennesey & Co., paper-stock packers, have removed to No. 534 Pearl street, corner of Elm.

Wm. E. Jackson, stationer, &c., has removed from 62 Duane street to 46 West Broadway, corner of Thomas street, where he will be pleased to see his friends.

The Milton Bradley Company's new game of "Enchantment" is likely to prove a great favorite at the summer resorts this season. This game was lately described in THE STATIONER, and is illustrated in the advertisement in another column.

The firm of Bushnell & Brackett, stationers, Council Bluffs, Ia., was on April 30 dissolved by mutual consent. D. W. Bushnell will continue the business at No. 19 Pearl and 20 Main streets, Council Bluffs, and L. C. Brackett at Nos. 224 and 226 Broadway, of the same place. All claims against the firm will be paid on presentation to D. W. Bushnell.

The Harvard Pen Company has removed to its new store, 152 Broadway, this city. This company is the manufacturer of the Harvard fountain pens. The company also manufacture a full line of fountain and stylographic pens, and it guarantees every pen to give satisfaction. It has not spared expense in its efforts to give the trade an article which will meet their demands, and its orders and increase in business are proof of its ability to supply what is wanted.

The business of Wheeler & Osborn, publishers, manufacturing stationers, booksellers, &c., Nashville, Tenn., has been incorporated under the style of the Wheeler, Osborn & Duckworth Manufacturing Company. A. J. Wheeler is president; Dr. Richard Douglas, vice-president; R. F. Osborn, secretary, and W. S. Duckworth, treasurer. The new company will be pleased to receive notice of any new books or goods which publishers and manufacturers contemplate bringing out, together with cash quotations.

James D. Whitmore & Co. having found that the increasing lines of goods which they manufacture necessitated larger quarters for showing them, have made considerable additions to their sample-room, and have redecorated it in a very handsome and tasteful manner. They have displayed, in very tasteful style, samples of all of the various tints of paper and the accompanying envelopes, also a box of each paper in plain and stamped designs, card cabinets, orders of dance, menu, guest and dinner cards and an endless variety of new and striking novelties for the fine trade. This house has made a special feature of designing and engraving steel-plate headings for letter, note and billheads, and will furnish estimates to any parties desiring this class of work.

(Continued from page 602.)

tative in this field. None of them remained long, however.

A general conviction prevails here that trade is dull. Men know that they are only selling goods in "drips" and that is about all. Discreet dealers are not pushing trade to any great extent. They look upon discretion now as the better part of valor. The number of traveling men not members of the firms which they represent is relatively small, and the number of members of firms who are out with grip-sacks is relatively large.

There are some symptoms of a slight revival of business with the advent of real spring weather. But real spring has only peeped in and then withdrawn. Such spring days as we have had have come sandwiched between half wintry days. When real seasonable weather comes there will be disappointment if business does not improve at least for a season.

The County Commissioners—that is, the majority of them—have refused to accept the resignation of Max Mosler, who for two years or more has served so efficiently as the official county stationer, whose business has been to purchase all of the stationery used by the county and see that it is not consumed extravagantly. He has had opposition from one member only of the Board of County Commissioners who wants the place vacated in order to give it to a political friend. Mr. Mosler has pressed the Board to accept his resignation, and thus far the majority of them have refused to do so.

Nobody in the stationery business is building this year. In fact, the manufacturers appear satisfied to fill orders and wait before extending their business or increasing their facilities. Many of them think that it is wise not to incur much expense just at present pushing their trade. Dull times came when margins of profit were small. Perhaps that was why they came. Their tendency is to clip down margins still more. Many business men argue that it is bad business policy to incur expense in pushing trade under such circumstances, and the better way is to be content with holding trade already secured till better times come.

Railroads are cutting rates on everything and in all directions. This they never do in brisk times; but nevertheless they are preparing for numerous excursions during the coming summer, which they seldom do when business is flush. Only recently round-trip tickets from here to New Orleans, good for a month, could be bought here for \$12.

Dealers in plants and seeds and in agricultural implements—in fact, in every want and appliance for rural industry—are making extensive sales. Producers are busy, especially those that till the ground. A few manufacturing industries are comparatively quiet. A great many boot and shoe operatives are idle, and the shoe factories are not over busy. The manufacture of cheap carriages, for which this city became famous, is languishing for the first time in the history of that business. But the cigar makers are on a strike and have been in many of the shops for weeks. Building is going on briskly, but it is chiefly in tearing down old structures and building better in their places. Speculation is dead, apparently very dead, but somehow it always has a resurrection when good times come.

PRINCE WILLIAM.

Among the out-of-town tradesmen in town during the past week were G. R. Hanford & Co., Watertown, N. Y.; James Young, Bridgeport, Conn.

This journal aims to be a medium of information for a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE fate of the tariff bill has been decided. The enacting clause was struck out in the House of Representatives on Tuesday, and reasonable assurance has been thereby given that the agitation of an economic question, which has undoubtedly been one of the influencing uncertainties upon trade, is done with for the present. This result has been achieved quicker than we expected that it would be, knowing the great desire of political men and legislators to set themselves in what they consider the proper light before their constituencies. Now, may we hope that Congress will devote attention to matters which have deferred to the tariff controversy? There is some desirable legislation which needs furtherance, but the statement has gone forth that the session has now progressed too far to admit of much more being done. Generally, we think that the country is overcome with too much law-making, and indeed we could dispense with much with which we are favored, but there are important principles which need statutory strength. These belong to the sphere of statesmanship in which we have unfortunately more tyros than adepts, more professors than scientists.

A CORRESPONDENT brings up the subject of patent claims, and wants advice which will suggest protection against the demands of parties whose patents are infringed upon. There is always an element of uncertainty in trade, as our correspondent well knows, but perhaps one of the greatest uncertainties exists under what are known as patent rights. We are told that there is "nothing new under the sun," and in frequent instances, where patents are involved, we find that the application of principles or the form of mechanism has been utilized previously, and sometimes unconsciously. We do not believe in the warfare that is being projected against inventors, nor do we think it desirable that protection should be withdrawn from inventions. On the contrary, we think that every new and desirable improvement in processes or machinery should be the source of profit to its originator and that the public ought to willingly pay for the privileges which it acquires from such sources. But, on the other hand, we think that means can be devised to save intelligent and honest buyers—innocent parties—from the consequences of infringements on patent rights. In the first place, however, it is a part of the duty of the dealer to satisfy himself so far as he can be reasonably expected to do of the validity of the claims for a patented article. In some lines of goods—notoriously such as our correspondent speaks of—there is an unending round of competition and it does not take the most brilliant intellect to discover where points of similarity between competing articles exist, and whether the principles of construction and application are identical. It is a matter of business judgment with which the trade has as

much to do as with any other. Then follows the question of priority of invention, and as a general rule, the genuine article will show the date of its patent. Infringing parties are always slow to exhibit proof of knavery, and we are sorry to say that inventors sometimes take advantage of the innocence of the public and prepare pitfalls into which the unwary may tumble, so that they may exact penalties and recover small amounts from parties who would rather pay even an unjust demand than incur the cost and trouble of a contest. Buyers and dealers who handle goods which are said to be patented can demand to be indemnified against counter-claimants. If this course is followed in every case where uncertainty exists or where the question is likely to arise, they can quickly find out the strength of the position of parties offering them articles which come within the category of patented goods. There ought to be, we believe, some prescriptions as to the manner in which patented articles should be put upon the market. This is one of those trade suggestions which apply to every trade interest; and while it is possible to conserve the rights of inventors, it is equally possible to afford a reasonable degree of protection to the public from claims which may be onerously prosecuted.

ROUNDOABOUTS.

BY THE TRADE LOUNGER.

The shock of the death of William C. Dunton, announced by you last week, is not easily overcome. Such sudden events are distressing, more so to those nearer and dearer to the dead than the ordinary friend, but they are impressive, and warn people that they must so live that death will not be a terrifying visitor. In Mr. Dunton, the business community has lost a member which it held in high esteem. His friends more bitterly feel his taking away. Of gentle, kindly instincts, of honor and probity, of business judgment and acumen he was distinct among his associates, from whom no better man could have been taken away.

* * * *

The popular event of the week has been the rain, which indeed was much needed, since forest fires throughout the country have been doing much damage. The city has been parched and something was needed to lay the dust. But the city has had perhaps too much of it. We are not so much addicted to water as people in the country, and therefore a little goes a long way with us. But should the showers—May taking upon herself the functions of April—bring about abundant crops and help to further Nature's bounty, we shall have no cause for regret. Trade will be better for it, by and by.

* * * *

The tariff has had to "hump," hasn't it? Now, for a time, "give us a rest." Let us have peace. The incident of the suspension of a New York bank and the failure of a firm of brokers for over half a million, doesn't seem to trouble people much. Perhaps the country, generally, would not be disturbed if the whole bottom fell out of Wall street. The public is ready for it.

* * * *

Up in Vermont a man has been perfect-

ing a roller for the popular roller-skate. He utilizes paper in making it. The roller is hung so as to reduce friction, and it is said to be a "novel and useful improvement." I suppose we may as well concede the useful. As for the novelty part, I am prepared to say that I shall not look upon any application of paper as novel. I am ready to see it used for anything and everything.

Criticism is made of the fact that one of our popular magazines which retails here at thirty cents is retailed in England for twenty-four cents. This doesn't seem exactly the way to treat the American public to which the periodical alluded to owes so much, and to whom it is really indebted for its existence. The publishers of the magazine ought to have some consideration in this respect.

Geo. A. R.—, well known to many of the trade, has associated himself with a new company which has been formed. He takes charge of the department of clocks and bronzes, a line of business in which he is known to be *au fait* and in which the trade are likely to look for him early and often.

One of the happiest men about town has just come on from New Orleans. F. S. H—, of that city, has lately been married and of course he couldn't do better than to make a trip to the North. He came to this city by way of Montreal, and has been doing a little buying, taking in some bargains while here. He ought to see the elephant before he goes home. Find him at *Pisle des conies*.

When will the changes in tints come to an end? New colors are coming out all the time. The dry-goods people have got an El Mahdi shade. I haven't seen it yet, but expect that the stationers will "catch on" to it pretty soon. Probably it is a mixture of shades—*ethiopienne et rouge*—and I should imagine it to be a coffee-color, saffron and red with an ashen-grey lustre.

Trade is not so bad. There is considerable doing—largely in a small way, to be sure—and the aggregate shows that there is a fair consumptive demand. Looking in upon two or three retail stationery stores on an uptown avenue the other night, quite a full attendance of buyers was discovered. There are some things that people cannot get along without, and the trade knows it. Stick to consumptive requirements.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinion of correspondents attaches to this paper.]

Protection from Patent Claims.

To the Editor of The Stationer:

We feel like inquiring if the Patent Office *does* patent.

We have had two letter-files offered us, similar in construction, both marked "patented," and apparently straight goods, as both were handled by reliable jobbers.

After selling both for two years or so, along comes a notice that No. 1 is an infringement, and that stock on hand must be withdrawn from sale, and a royalty paid on those disposed of previously.

Now, buyers are not infallible, nor are they

usually patent lawyers, and to investigate the validity of every *patented* article before purchasing would seem superfluous, unnecessarily expensive, and would involve the loss of valuable time.

What protection has the trade under circumstances of this sort?

In the instance cited above, it *might* have been No. 2 that was the infringing article. Please enlighten A BUYER.

ANSWERS TO CORRESPONDENTS.

M. & H. ask for manufacturer of shelf oil-cloth.

Ans.—F. Kling & Co., 94 Duane street, New York.

G. C. H. asks for addresses of parties manufacturing paper-box cutting and scoring machines.

Ans.—Marshall, Son & Co., Boston, for whom Hoole & Gorenflo, 58 Centre street, are agents, and whose machines are made by the Brown & Sharpe Manufacturing Company, Providence, R. I.; H. G. Bigelow, New Haven, Conn., makes another machine.

Subscriber asks: 1. What ingredient must go into steam-made flour paste to make it keep for a year or two without souring. 2. Is there anything to keep it moist.

Ans.—1. We have had a few drops of carbolic acid recommended, but would suppose that salicylic acid would serve the purpose better. 2. A little cold water poured over the top of the paste is said to prevent the formation of a "skin" and the drying out.

F. asks for the address of the Benton Manufacturing Company, making the "O" register.

Ans.—We have been told that it is in New York, but cannot locate it. The company's name does not appear in the Directory.

Subscriber sends drawing of an "eye" for attaching gum-cord to sample boards, and wants to know where to get the article.

Ans.—We cannot find any one who recognizes your drawing; but the "eyes" will be made for you if you give an order to either the Brass Goods Manufacturing Company, 85 Chambers street, New York, or the Union Hardware Company, 87 Chambers street, New York.

NEW AUTOMATIC ENGRAVING PROCESS.

The *Australian Graphic* has discovered an automatic engraving process by which its seven full pages of illustration are printed (with type) from relief blocks on glass, at an ordinary letter-press machine.

The inventor of the process, Samuel Henry Crocker, formerly of Railton, Tasmania, but now of Sydney, devoted himself for some years to considering how the pictorial press could be supplied with a cheap, rapid and durable means of reproducing drawings. After careful study of current methods, and almost incessant experiment, he at last resolved to take as the basis of a new process the erosive action of fluorine acid on glass. Various metallic substances suggested themselves to the inventor as the material to be engraved, but were rejected in favor of glass, for the reason that the fluorine acid has a vertical or deepening effect only on glass, while in the case of metals it has a lateral or undermining influence as well. And, in point of cost besides, glass has the very great advantage over all other substances of being inexpensive. To adapt the engraved plate to typographical purposes, it has to be mounted on an iron block, the cementing material being one of the registered features of the process. Thus

fixed, it is type-high and ready for printing from. At first sight glass appears too brittle a substance to pass through the printing-machine, but experiment has proved the contrary, and it was not found necessary to carry out the inventor's first intention to print from electro-types taken of the glass. Not only has experience proved that the risk of fracturing the glass in printing is reduced to a minimum, but it has also shown that the glass has decided superiority over the boxwood used by wood engravers, in that it is not affected by any variation of temperature. The finer portions of wood-engraving are subject, too, to deterioration through the pressure and dampening involved in printing; but the most delicate engraving on glass will appear as vivid and exact as the last copy of a large impression as at the first.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, May 7, 1884. }

THE MONEY MARKET.—Loanable funds continue cheap and abundant, and the money market is without quotable change since the close of last week. There is very little commercial paper making and discounts have ruled steadily at 4 to 5½ per cent. Call loans on good security have negotiated at 2 to 2½ per cent. and time loans at 4 to 5. The stock market has developed a moderate degree of activity, but the tendency has been downward and the close was weak. The suspension of the Marine Bank and failure of Grant & Ward created a little ripple when the announcement was first made, but produced no permanent effect upon the market. Railroad bonds were active and irregular, having been strong early in the week, and thereafter weaker. Government bonds were steady. The market for sterling was fairly active and fully steady without new features.

THE PAPER MARKET.—Trade has scarcely developed any new feature, its general condition remaining much the same as noted in some detail in our last issue. The present course of prices is fairly steady, and although the majority of those who give expression to their views of prices in the near future, or during the coming summer months, favor the belief that prices have touched bottom, the number who think that prices will reach a still lower level is large and augmenting. They argue that, notwithstanding the rapid growth of the country, the production is so large that it is impossible for us to consume it all, and that nothing short of lessening the production will sustain the market against a decline. The competition is so keen and the condition of the market is such that we hear of transactions occasionally talked of at prices which, if they do not entail actual loss to the manufacturer, at least leave him no possible profit.

THE STATIONERY MARKET.—The movement is hardly so active as last week. Although there is the same degree of steadiness; but there is a more healthy condition of business manifested which is partly owing to the fact that everything points to a brisk fall trade, and this serves to increase confidence among dealers. The fact that dealers have been buying more cautiously than for some years past and that they are running short of stock, gives ample ground on which to base expectations of a good trade during the latter part of the season. The movement in toys has fallen off and dealers in this line report an opening up of the demand for fireworks, business in which has started out with a fair showing. There is a steady call for fine stationery, but this is for good goods at fair prices. Dealers, however, are ordering in small quantities. The month of May has opened up quiet in respect to stationers' specialties, but dealers generally have had a good April trade. There is no movement to speak of in blank-books, which is expected to hold off for a month or so yet. There seems to be a fair amount of business doing in envelopes, and manufacturers are maintaining the usual rate of production. Prices are firm, indicating, if anything, a tendency to rise.

NEW DISCOVERIES AT SEVRES.

Monsieur Lauth, the director of the Sèvres State Porcelain Manufactory, has made important discoveries, which will, it is said, render modern china as rich in tone as the ancient specimens of Eastern ceramic art. The results obtained, though officially proclaimed, have not as yet been shown to the public. During the course of this year we shall have the advantage of examining these improvements, for some specimens will be sent to the biennial Exhibition of Fine Arts applied to Industry, to be held at the Palace in the Champs Élysées.

So much has been said concerning the ceramic arts that it is unnecessary to describe the various modes of manufacture or the materials employed to produce plain and enameled hardware, plain and decorated porcelain, soft and hard clay. The hard clay is made of pure kaolin, and its adamantine enamel is due to the admixture of feldspar, while the ordinary tender clay is mixed with silice. In theory special colors are used for these different materials. The coloring oxides which resist the baking of soft clay are volatilized on the hard clay, which is exposed to a heat of 1,500° C. The number of colors that can be used for the latter product is therefore very limited. Nevertheless, the Chinese and other Oriental peoples obtained a richness and depth of tone, a unity and harmony of tint and color, that excelled even the best Sèvres work.

With the assistance of M. Voght, the chief of the laboratory, M. Lauth instituted a series of experiments and researches, so as to discover some mixture which would enable the clay to support the coloring, in spite of the currents of oxygen produced by excessive heat. Success finally rewarded these efforts—not merely laboratory success, but a manufacturing success. The specimens produced are not flat and simple pieces of hardware or porcelain, but large works of art. Nor is the result accidental—that is, unreliable; but the process once known, can be carried out with the certainty of success. This, if anything, is an improvement on the ancients, for their colors did not take in every case, and their successes were always accompanied by a certain number of failures.

The objects, both large and small, that have already been manufactured at Sèvres according to this new method are especially striking by their modern appearance. The colors imitate, or rather reproduce the richness of tone of ancient and Eastern ceramic art, but the designs and ideas are altogether modern and Western. The orange and citron yellows are as vivid as in nature, and the turquoise blue is perfect. This new porcelain, according to Ch. Burty, who has been admitted to a private view, is transparent, and will maintain the high reputation of Sèvres for both cream and milk whites.

OBITUARY.

WILLIAM C. DUNTON.

William C. Dunton, of the firm of Bulkley, Dunton & Co., paper manufacturers and dealers, died suddenly on Thursday last, as announced in THE STATIONER of last week. His death was entirely unexpected, being due to apoplexy. He was sitting at his desk in the firm's office, at No. 74 John street, when he suddenly threw himself back in his seat and called for a glass of water. This was given him and he was removed to a sofa, where he expired in a few minutes. Although Mr. Dunton's death was unlooked for, he was a man of rather delicate constitution and had recently returned from a trip to Florida, whither he had gone to recuperate his health, which had suffered somewhat from close attention to business.

Mr. Dunton was fifty-three years of age, and had been connected with the trade for thirty-four years. He was born at Cortlandt, N. Y., in 1830, where he received a common-school education. When he was nineteen years old he entered the employ of Hiram N. & S. W. Gookin, paper dealers, at No. 242 Pearl street. S. W. Gookin died in 1850, and the other members of the firm was forced to give up business by ill-health, and Mr. Dunton had to close up the firm's affairs. In January, 1851, he went into the employ of Bulkley & Brother, located at 110

John street, and was given a full interest in the firm in 1856, the style of the firm being Bulkley, Brother & Co. The firm purchased the Bancroft Mills at Middlefield, Mass., in 1854, and built the Union Mill at that place in 1858. In 1859 the firm was burned out at No. 55 Beekman street, where it had been located for two years. At that time it generously paid the losses of customers who owned paper stored in its warehouse to the amount of \$25,000, the insurance having been allowed to lapse. The firm was burned out again at the same number in 1864. After being awhile at Platt and Gold streets, it moved to its present site, No. 74 John street. After the failure of Mr. Bulkley's health, in 1876, Mr. Dunton was the active business head, and the firm had one of the largest lines of trade in the country.

No one ranked higher as an authority in trade matters than Mr. Dunton, who was often called upon to act as an arbitrator in the settlement of disputes.

In disposition and general character Mr. Dunton was just and kind, gaining many friends and making few enemies. Speaking of him an old acquaintance said: "I never heard him speak ill of any one, nor did I ever hear any one speak ill of him."

Mr. Dunton was married in 1852 to Sarah Warner, of Troy, N. Y., who survives him. He had only one child, a daughter, who is the wife of Dr. George A. Dixon. Mr. Dunton was a resident of Brooklyn, N. Y., for thirty years, during which time he was a member and trustee of the Rev. Dr. Buddington's church. For the past two years he resided at No. 815 Madison avenue, in this city, and attended Dr. Hall's church. He was a member of the Chamber of Commerce, the Union League, Oxford and Brooklyn clubs, and vice-president of the Homeopathic Life Insurance Company, of this city. He was also a director of the Keith, Montague, Winnipiseogee and Russell Paper companies.

Politically he was strong Republican, although he took no active part in politics. He was very prosperous in his business and gave largely to charitable objects, but in a quiet way, always seeking to avoid notoriety.

The funeral service was held at his residence, No. 815 Madison avenue, at 2:30 P. M., on Sunday. The Rev. Drs. John Hall and Theodore L. Cuyler, of Brooklyn, officiated. Mr. Dunton had been a member of Dr. Hall's church for two years, and before his removal from Brooklyn he had been a neighbor and intimate friend of Dr. Cuyler for twenty-two years. In his address, Dr. Cuyler said that the city had lost in Mr. Dunton some of its best blood, "for he was of that blood that flowed in the arteries of commercial and social life. It has lost a man whose head and heart were always at the service of any who required assistance." There was a very large representation from the paper and stationery trades present, almost every house being represented. Among the large number present were: Hon. William A. Russell and George W. Russell, Lawrence, Mass.; John Keith and George E. Marshall, Turner's Falls, Mass.; L. L. Brown, Adams, Mass.; Thomas Vernon, William H. Parsons, H. C. Hulbert, Edward Goodwin, Jr., John H. Hall, Cyrus W. Field, Albert Pagenstecher, Rudolph Pagenstecher, J. C. Sutphin, J. F. Anderson, Jr., M. Plummer, Isaac Cooke, Alexander Orrs, David G. Garabrant, Moses Bulkley, Jonathan Bulkley, Robert B. Highet, Howard Lockwood, Warren F. Daniels, E. C. Coffin, W. Irwin Martin, Alexander Agar, Leroy W. Fairchild, A.

C. Barnes, S. M. Pettengill, William Wade. The remains were taken to Troy, N. Y., on Monday morning, accompanied by his immediate family, and the interment took place in the family plot at that place.

At a special meeting of the Stationers' Board of Trade the following minute was adopted relative to the death of Mr. Dunton:

We recognize in him who has passed away a man whose friends and more intimate associates truly loved and one whose business acquaintances everywhere honored and trusted and whose name and character were held in the highest esteem by those who only knew him casually or by reputation. He was a straightforward and sincere man, with a high ideal both as applied to personal and business relations, and of most engaging manners.

In his extensive business as a manufacturer of paper, Mr. Dunton displayed rare good judgment and great energy, which were the natural attendants of an eminently successful career. He was thoroughly interested in whatever he undertook to do and was actively engaged in the details of his business up to the last.

The kindly disposition of Mr. Dunton endeared him greatly to us all. It has been well said of him that he was never known to speak unkindly of a single human being; this was, in fact, one of the most marked of his traits. He was tender and sympathetic to the poor and oppressed and was generous in his Christian liberality to all worthy objects.

This board was fortunate to have such a man in its membership, and sustains a severe loss in his death.

Resolved, That the heartfelt sympathy of this board be extended to the family of the deceased and those associated with him in business, and that a copy of the minute and this resolution be spread upon the records of this board and also a copy transmitted to the family of our departed friend.

HENRY B. HALL.

Henry B. Hall, the well-known artist and engraver, died at his home in Morrisania on the 25th ult., in his seventy-seventh year.

Mr. Hall, who probably did more work for American publishers than any other engraver of his time, was born in London on March 11, 1808. He was a pupil of Benjamin Smith, and at the conclusion of his studies was engaged with Henry Meyer, the favorite engraver of Sir Thomas Lawrence, upon many well-known works. Subsequently, for about four years, he was employed by H. T. Ryall, historical engraver to the Queen, engraving all the portraits in the large plates of that engraver, and among them "The Coronation of Queen Victoria" after Sir George Hayter. In the year 1850 he came to New York well introduced to prominent publishers, among whom were G. P. Putnam and the Appletons, for whom he afterward illustrated many publications. His works are very numerous, chiefly portraits, including twelve of Washington, after different artists, and one of Governor Ward, of New Jersey, who died on the same day as himself. Of late years he has been in business with his three sons, devoting his personal attention largely to etchings of historical characters of the Revolution for F. S. Hoffman and Dr. Thomas Addis Emmet, both well-known collectors. He leaves a family consisting of four sons, of whom three were in business with him—the youngest is a judge of the City Court—three daughters, twenty-two grandchildren and seven great-grandchildren.—*Publishers' Weekly*.

In a railway carriage: An old soldier, noticing that his pipe troubled a lady, said to her: "They don't smoke in your regiment, ma'am?" "In my regiment, it is possible," replied the lady; "but in my company, never!"

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
 6 1/2 x 3 1/4 \$1.00
 Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN & CO.,

Sole Proprietors and Manufacturers,
 60 WILLIAM STREET, NEW YORK CITY.

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. The patented device for reversing the die and counter saves time. Have been in use by many of the principal Stationers for the past twelve years.

Prices and other information given on application.

STATIONERS PETITIONING FOR A REDUCTION OF LETTER POSTAGE.

The following petition is being circulated among the members of the Stationers' Board of Trade, and is being quite generally signed :

To the Honorable Senate and House of Representatives in Congress assembled :

Your petitioners, members of the Stationers' Board of Trade of New York, state that

Whereas, there are several bills before Congress relating to a reduction of letter postage, and

Whereas, a reduction from two to one cent would greatly benefit the members of this board and the mercantile community;

We therefore petition Congress to pass the bill introduced in the House of Representatives by William E. Robinson, known as H. R. 1,001.

Which reads as follows :

"That on and after the first day of July, in the year eighteen hundred and eighty-five, the rate of postage on letters to any part of the United States shall be one cent for each letter not exceeding half an ounce in weight."

And your petitioners will ever pray, &c.

MARK TWAIN'S RARE BOOK.

At a meeting of a literary club held in Hartford some months ago, Mark Twain was the essayist of the evening, and, for the purpose of fully illustrating the subject under consideration, he read numerous extracts from a rare book which had been lent to him for the occasion. It was a very rare volume, and it had come into Mr. Clemens' hands only by accident and for a short time. It happened that Mr. Cable was then Mr. Clemens' guest, sick at his house. Mr. Cable had the book, and he had borrowed it from a gentleman in New York who valued it so highly that he had repeatedly besought Mr. Cable to treasure it with the utmost care, and return it without fail. Indeed, Mr. Cable was so careful of it that he hesitated to let Mr. Clemens take it with him from the house that evening and was uneasy until he brought it back in safety.

The reading was a complete success, and the book was heartily enjoyed. It was found that the Hon. Henry C. Robinson had a copy, which had belonged to his brother, Lucius Robinson, but to almost all present the book was entirely novel.

Mr. Clemens determined to have a copy, and he wrote to a New York book-buying house directing them to buy it for him, regardless of cost. He must have it. Time passed but the book did not come; and finally a letter came, instead, saying that careful inquiry and long search had simply demonstrated that the book could not be had. It was out of print and out of existence. That ended the matter.

The Rev. Mr. Twichell, who was at the gathering, remembered that he had seen the book on sale in New Haven when he was a boy in college, and a few weeks ago while in that city he stepped into the old store where he had once seen it on the shelves. The same old proprietor was there and he remembered his visitor. "Do you recall such-and-such a book," asked Mr. Twichell. "Oh, yes," was the reply, "and I remember so-and-so (the author) when he was in college," and a pleasant flow of reminiscences followed. Mr. Twichell timidly asked whether it would be possible to secure a copy of the book now at this late day and hardly dared to hope for a favorable reply.

"Well," was the answer, "I undertook to put my cellar in order the other day, and I found about a cord of them down there, and I think I could supply you if you wanted quite a number."

He inquired the price of the book (for a copy

of which an unrestricted offer had been sent out) and was told that they were ten cents apiece! Tying up six of them he put them in his pocket a few days later when he was going to walk with Mr. Clemens.

Introducing the subject of the rare volume, Mr. Twichell casually inquired of his companion if he had ever found a copy of it.

"Never," said Mr. Clemens. "There are none in existence. The book is something we must go without."

"What would you give for a copy?" asked Mr. Twichell, and the answer was that it wasn't a question of money. He would give whatever was asked. The price was for the owner to set, then he would pay it. But it was idle to talk about it, as the book was unobtainable.

"Well, Mark," said Mr. Twichell, producing the package, "if that's the way you feel, here are six to begin with; and if these aren't enough, I can get you a couple of hundred more."

The unlimited order for one copy at any price has been rescinded and it will take a bonfire to make the book a rare one.—*Hartford Courant.*

BUSINESS LAWS IN DAILY USE.

The following compilation of business law contains the essence of a large amount of legal verbiage :

If a note is lost or stolen it does not release the maker; he must pay it, if the consideration for which it was given and the amount can be proven.

Notes bear interest only when so stated.

Principals are responsible for the acts of their agents.

Each individual in a partnership is responsible for the whole amount of the debts of the firm, except in cases of special partnership.

Ignorance of the law excuses no one.

The law compels no one to do impossibilities.

An agreement without a consideration is void.

A note made on Sunday is void.

Contracts made on Sunday cannot be enforced.

A note by a minor is void.

A contract made by a minor is void.

A contract made with a lunatic is void.

A note obtained by fraud, or from a person in a state of intoxication, cannot be collected.

It is a fraud to conceal a fraud.

Signatures made with a lead pencil are good in law.

A receipt for money is not always conclusive.

The acts of one partner bind the rest.

"Value received" is usually written in a note, and should be, but it is not necessary. If not written it is presumed by the law, or may be supplied by proof.

The maker of an "accommodation" bill or note (one for which he has received no consideration, having lent his name or credit for the accommodation of the holder) is not bound to the person accommodated, but is bound to all

parties, precisely as if there was a good consideration.

No consideration is sufficient in law if it be illegal in its nature.

Checks or drafts must be presented for payment without unreasonable delay.

Checks or drafts must be presented during business hours, but in this country, except in the case of the banks, the time extends through the day and evening.

If the drawee of a check or draft has changed his residence, the holder must use due or reasonable diligence to find him.

If one who holds a check as payee or otherwise transfers it to another, he has a right to insist that the check be presented that day, or at farthest, on the day following.

A note indorsed in blank (the name of the indorser only written) is transferable by delivery the same as if made payable to bearer.

If the time of payment of a note is not inserted, it is payable on demand.

The time of payment of a note must not depend upon a contingency. The promise must be absolute.

A bill may be written upon any paper, or substitute for it, either with ink or pencil.

The payee should be distinctly named in the note, unless it is payable to bearer.

An indorsee has a right of action against all whose names were on the bill when he received it.

The holder of a note may give notice of a protest to all previous indorsers, or only to one of them; in case of the latter he must select the last indorser and the last give notice to the last before him, and so on. Each indorser must send notice the same day or the day following. Neither Sunday nor holiday is to be counted in reckoning the time in which notice is to be given.

The loss of a bill or note is not sufficient excuse for not giving notice of protest.

If two or more persons as partners are jointly liable on a note or bill, due notice to one of them is sufficient.

If a note or bill is transferred as security, or even as payment of a pre-existing debt, the debt revives if the bill or note be dishonored.

An indorsement may be written on the face or back.

An indorser may prevent his own liability to be sued by writing "without recourse," or similar words.

All claims which do not rest upon a seal or judgment must be sued within six years from the time when they arise.

Part payment of a debt which has passed the time of statutory limitation revives the whole debt, and the claim holds good for another period of six years from the date of such partial payment.

A verbal promise to pay, made without conditions, is generally held sufficient to revive a claim otherwise shut out by the law of limitation.

If, when a debt is due, the debtor is out of the State, the "six years" do not begin to run until he returns. If he afterward leaves the State, the time forward counts the same as if he remained in the State.

 Catalogue.

We will deliver one case to
 any part of the U. S., as sam-
 ple, paying all charges.

— AND —

WHITE'S TAR,

Size 5x7,

\$11 per Case,

shown in the cut, which we
 claim to be the most perfect
 FORM or STYLE of package
 ever devised. It is superior
 to the ordinary Package of
 Sheets, because all litter of
 scraps is avoided; and it is
 superior to Rolls, because it
 is certain where the sheet
 will detach from the packages
 and this avoids waste. The
 disinfecting cover is as thor-
 ough a deodorizer as any
 costly apparatus, while the
 artistic design and printing
 gives the book a very neat
 appearance.

INVENTORS AND THE PUBLIC.

BY JAMES A. WHITNEY, LL D., COUNSELOR-AT-LAW.

III.

One of the most common asseverations of the enemies of our patent system is that the arts and industries have already received such development that the stimulus of patents is no longer required for the production of further improvements. There can be nothing more fallacious than this idea. There are some things to be admitted as axioms by all familiar with the history and development of industries. First, there is no art that to-day is perfect and beyond the need of improvement. Every industrial art, as it is applied under new or broader conditions necessitates changes in its methods which call for the exercise of the inventive faculty. Every improvement requires a relatively great outlay at the beginning in trial and experiment which would be wholly lost if others could appropriate the results without paying their cost. And in invention, as in every other department of human efforts, men will not sow if they have assurance in advance that others will reap the harvest sprung from their efforts. How, in the face of these indisputable facts, can it be said that improvements could be made or introduced without the promise of reward held out to inventors and patentees by the patent laws. It is manifest that improvements would cease the moment the patent laws became worthless, and that they will languish just in proportion as the inventor's reward becomes uncertain and delusive.

As most of the so-called patent bills introduced in Congress are designed to weaken the incentives to and the rewards of inventors, a little space may very properly be devoted to the source and agencies of the anti-patent agitation of the past few years.

The systematic assault on patents in this country is the echo of a like movement which began and ended in England. A number of doctrinaires, acting in unison with some noted infringers of patents, raised a hue and cry against what they termed "patent monopolies." They at no time exerted any material influence upon public opinion, and Parliament, instead of doing away with patents or weakening their scope, has, by recent legislation, materially facilitated the granting of letters patent for inventions.

The cry of monopoly as applied to patents was taken up in this country by monopolists and a railroad association composed of corporations, some of which were infringing on important patents, was organized. The object of this association was to fight patentees. Five years ago this association comprised eighty-one railroad companies. From this source has primarily emanated most of the anti-patent agitation of the past few years. At the same time, however, the agricultural interests have been cleverly manipulated into an apparent hostility to inventors. Two or three noted patents, against which a popular prejudice had arisen, were made levers to increase this hostility to patent protection, notwithstanding that modern agriculture owes its advancement and prosperity to patented inventions. There was and is another element, which strangely enough, has afforded conjoint efforts in assaults upon the patent laws. This is the purely communistic one which declares all property to be robbery. The three agencies mentioned have operated together, notwithstanding the obvious fact that the arguments used by one, would, if

carried to their logical conclusions, destroy the rights of the others.

A patent is in no proper sense of the word a monopoly. This term can only be appropriately applied to cases in which something is taken from the public and given to an individual or corporation. In the case of a patent for an invention, the inventor, instead of taking from the public gives to the public, and his patent is simply the means adopted by the latter to pay him for the improvement, or, to quote the axiom of lawyers as to the ethics of patents, a patent is a contract by which the inventor makes an invention public for all time in return for an extensive right for a limited period.

The agricultural interest, objects so far as it does object, upon the slight foundation afforded by a few isolated examples which do not affect this broad and general truth, that every implement now in common and advantageous use in tillage and cognate industries, has been the subject of a patent, and owed its existence and introduction to the patent system. The same reasoning which would deprive the inventor of his patent, would deprive the farmer of his farm. The government provides a homestead to the actual settler, in order to reward him for clearing and tilling the land, and by such means increasing the products and promoting the prosperity of the country. For precisely the same reason the government grants a patent to the inventor for an improvement in useful arts, which may lighten labor, economize time or increase the results of human effort. The same principles of justice that underlie the one case constitute the foundation of the other, and the doctrine that would destroy the one right would annihilate the other. If a farmer, by his own efforts, brings a given area of wilderness under tillage so that it produces annually, we will say ten thousand bushels of wheat, which otherwise would not be grown, he affords a great and valuable benefit to the public. So also the inventor who devises an improvement by which the available labor of the country will produce ten thousand bushels of wheat each year more than it otherwise would, confers a benefit of equal extent upon the community. And the public through its constituted authorities, does wisely and justly and well in protecting both classes of its benefactors.

JAPANESE ETCHING.

Though the art of printing from engraved blocks in several colors was known in China and Japan long before it was known in Europe, the kindred industry of etching was first learned by the Japanese from the Portuguese or Spanish settlers. Knowing the great jealousy with which former tradesmen preserved the secrets of their professions, and the care taken to have a good return for all information imparted, there is not much cause for wonder in the fact that there were, up to the time of the fall of the Shogunate, no etching establishments outside of the imperial city. One of the craft whom we questioned told us he had inherited the art from his father, as a family secret, only to be divulged either to a real or an adopted son, under promise of secrecy. He deplored the opening of the country; though there had been a reduction in the price of the materials he employed, there was a great set-off in the number of men who, by foreign aid, had learned the mystery and who were working in the trade. The removal of several of the best Kioto workmen to Tokio had, however, left him pickings, and he complacently remarked that his family consisted only of daughters—four strapping, pretty and thoroughly good-humored Kioto girls—and he hardly yet thought of adopting a son.

The main features of the process are, of course, the old familiar one of first coating the highly polished copper plate that is to be used with a mixture of wax, resin and other materials sufficiently well to prevent any chance of the acid touching the plate, except where it is required to act, and yet so thin as to allow the gravers to remove it at will. The process at home, by which designs are first drawn with pencil or chalk on paper, and then "set off" on wax, is ignored by the Japanese artist, who has a sufficiently accurate eye to at once sketch off on the etching plate with his etching points the design in front of him. The ease with which the old man we interviewed reproduced the lines he had first roughly dashed off on paper with his brush, and the deftness with which he rectified any slight error in the lines of his first sketch and brought the whole into harmony, was as well worth seeing as a first-class painter or modeler engaged on a "work of love." The plate, when finished, is "bitten in" with strong acid, and handed over to the printer, whose machinery is of a very rude description. Unlike the master etcher, who is almost luxuriantly housed for a Japanese, the man who transfers the designs to paper is but poorly lodged. In the outskirts of the city, where rents are cheap, we found an old man and his son busily engaged in striking off a set of views of parts of Osaka, to be retailed at the price of a tempo each, and our inquiries elicited the information that sixty cents was a very paying price for a plate, and a thousand copies could be struck off in black or blue for about five yen. A very large portion of the business done by the Kioto men consists of the sheets of mythological pictures, &c., which are made up into fans and sold to credulous visitors to Hideyoshi's house, and other sight-seeing places in Kioto.—*The Hioغو News.*

SANBORN'S' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

Correspondence.

RICHMOND BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., May 10, 1884.

"Well, what shall I say of the stationery trade?" has been the inquiry with which your correspondent has saluted nearly every member of that line in the city. "Oh, business is fair," says one. "I have nothing new to report," says another. "We are doing as well as we have any reason to expect at this season," says another. "Tell them we are alive and kicking," says a fourth. "We are selling our usual quantity of paper," says a manufacturer, and when a jobber is approached, who receives his supply from Baltimore, New York, or Massachusetts, he desires to know the pulse of trade reported by his competitor, and if you gave him what you *know* or otherwise you can draw him out and the other fellow will be corroborated. Now, this has been the extent of my research in behalf of the readers of THE STATIONER, and if they are not satisfied with the result of the labor, on behalf of the trade here, I extend them a hearty invitation to come and visit us and spend a portion of their summer vacation, promising them a most cordial reception.

The friends of the movement started by Lee Camp to build a Home for the Confederate soldiers disabled and maimed in the late unpleasantness, feel very grateful to those who wore the Blue for the cordial manner in which they have responded to their appeal for assistance.

The Fair will open in a few days, and there is no doubt of its success or that of the enterprise—if the ball is kept rolling. Those in the stationery line, who have not already contributed to the object and feel a desire to do so, can send their contributions to the Randolph Paper-Box Factory, care N. V. Randolph, who is a member of the Executive Committee.

SENTINEL.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., Boston, May 13, 1884.

Trade is generally reported as "fair to middling," although some lines of stationers' goods are having even a better demand. With the summer touring season close at hand, no small quantities of paper, envelopes, pencils and pens will be needed by the thousands of pleasure-

seekers whose time at the seashores and mountain resorts will be much given to writing to their "stay-at-home" friends. Of course, it is very pleasant for one whose business confines him or her to daily routine duties in the hot city all during the summer months to receive such gentle reminders of cool breezes, rambles by the seashore, moonlight flirtations, &c. But our friends delight in giving us long narratives of their vacation pleasures, while our only joy is in envying them their pleasures and in writing back some wholesome advice relative to the iniquities of summer resorts which we claim to have gathered from past experience. And all the while writing material is growing less, and the stationer rejoiceth.

Coburn Brothers & Snow is the name of a new concern which opened out at 39 Summer street on the 20th of last March. Stationery and printing are its lines of business, and the firm reports that a fair share of trade has come its way. The Coburn Brothers have for some seven years been engaged in the printing business, and the stationery department is only a new branch added. The trade of the house is mostly local, and only a retail city business is catered to, which, the house reports, is steadily increasing.

King & Merrill are busy, as usual, doing a very good trade in staple goods. King's "Nonpareil" pens still continue in big demand, and orders are fully up to the average. The pen business is not expected to drop off much for a month yet, not until the scribes begin to wander off for recreation. I notice that the several Spencerian experts of this house all use the "Nonpareil" pens; even the boss himself uses them. When one takes his own medicine there must be some virtue in it.

The Cross Pen Company claims for this season of the year a very satisfactory trade. The business has been much larger than for the same period of last year. This is due largely to the fact that the Cross pens are becoming better known, not only to the trade who sell them but to the people who use them. The only complaint I hear of is that the factory is not furnishing supplies as fast as the calls of the trade demand. The line of goods manufactured by the Cross Pen Company is very extensive, embracing several patterns of the automatic and stylographic pens. The "Hawthorne" pen, one of this company's make, is having a very big run. The company is now presenting the trade with a new style of pencil. The new feature is that by pressing the head of the pencil the lead section drops into position, and is firmly held in place ready for use. By elevating the point and pressing the head of the pencil the lead section

slides back into the barrel and is ready for the pocket. In this pencil the lead cannot become broken nor the pocket worn out. These pencils are made in three styles, and are beautifully finished. They will undoubtedly have a large sale.

H. H. Carter is offering some good bargains in cards. He has a lot of 100,000 which comprises the choice productions of Marcus Ward Prang and Hildesheimer & Faulkner. These are not soiled or shopworn goods, but a fresh lot of beautiful album cards. I would mention the price but the trade would doubt my assertion, so I refer to H. H. Carter's announcement, to be found in the advertising columns. Found it, eh? They are cheap, ain't they? Well, now is the time, if cards are wanted.

Those of the trade who have calls for toilet paper and cabinet fixtures, and are desirous of handling a class of goods in this line that is giving the best of satisfaction wherever introduced, should see samples of the toilet fixtures and w. c. paper manufactured by the Union Cabinet Company, of Lebanon, N. H. The general selling agents for these popular goods are Moulton & Goodwin, of this city, and they are pushing the goods into new territory as fast as the manufacturers can supply the demand. In commenting upon the merits of these toilet cabinets in a former communication, I neglected to state that Moulton & Goodwin were the general selling agents for these goods. To the trade this is a matter of no small concern, as dealers would prefer to purchase supplies from first hands. Descriptive circulars and price-lists will be furnished the trade upon application to Moulton & Goodwin.

The Thorpe Manufacturing Company is busily engaged in preparing its line of holiday goods for the fall trade. In card, autograph and scrap albums an extensive line of samples, comprising rich and elegant goods, is already being displayed. Blank-books and blotting tablets are other specialties which this house are offering the trade. Messrs. Thorpe and Speare are now on the road traveling through the West, and numerous orders for these goods are being booked.

In last week's issue of THE AMERICAN STATIONER "G. C. H." wants to know who manufactures paper box cutting and scoring machines. In answer thereto I would say that John T. Robinson & Co., Hyde Park, Mass., are extensive manufacturers of paper box machinery, and everything wanted in this line can be had of this house. In a circular before me, which gives illustrations and graphic descriptions of cutting and scoring machines, rotary straw-board cutters, corner cutters and shears, I find

numerous testimonials from prominent box-makers who have had these machines in long use. Among manufacturers of specialties, whose products are presented to commerce in neat card-board coverings, and who make their own boxes, numbers of them have their factories equipped with the improved box machinery made by John T. Robinson & Co. The Holyoke Envelope Company, of Holyoke, Mass.; the Dennison Manufacturing Company, of Boston; the Fanning Corset Company, of Worcester, Mass.; F. Stearns & Co., manufacturing pharmacists, of Detroit, Mich., and the National Paper Box Company, of Boston, are among those who use and indorse the box machinery of the firm mentioned. So if "G. C. H." is interested in paper box machinery, let him address John T. Robinson & Co. and he will get what he wants.

T. W. Ripley, printer, who occupied a floor in the building 138 Congress street, suffered a loss of about \$500 by fire on Thursday night of last week. Loss covered by insurance. Mr. Ripley seems to be a little unfortunate, for on the 4th of last January his establishment, then located at No. 147 Congress street, was burned out, damaging him to the extent of \$4,000. In neither case did the fire originate in his quarters, but in both he was close enough to suffer loss. In the present instance, however, his loss is mostly from water, and he experiences but little interruption to business. A. L. D.

VIENNESE NOTES.

[CORRESPONDENCE OF THE STATIONER.]

VIENNA, April, 25, 1884.

Since I last was privileged to address you, my route has lain from London through France, Germany, and now in Austria. As I shall soon return to Paris I hope to have the opportunity of writing you thence about French stationers. Many improvements have been made here since my last visit; the streets are being widened, and better paved, and general trade appears to be in a fair condition; the taxes are very heavy, and paper money is at a discount of 20 per cent., but, notwithstanding these drawbacks, the Viennese produce superb goods at reasonable prices. I think that this result is due to their good taste, which seems to be inherent and in their marvelous economy. I think that I spoke of this feature of economy as to English people when writing you from London, but that is extravagance by comparison with the strict watch that is kept throughout this country on all matters entering into manufacture and consumption.

Although a Pennsylvanian I cannot say that I am a high tariff man, but I firmly believe in moderate protection, and am satisfied that were the products of these countries to be admitted to the States, with a "tariff for revenue only," it would result in actual starvation to the masses of our work-people. I have visited over four hundred different factories, some hardly worthy of that large title, and in all is apparent that extreme economy, which I want to lay stress on, as the reverse is the rule with us, and in time it will be very detrimental to our interests.

I was in Hamburg during the Easter holidays, and noted everywhere the evidences of wealth and prosperity which have come to the city from her enterprise in trade for half a century. The streets are narrow and quaint, and many of them only canals, but as these latter are in the rear of the great warehouses you can realize how advantageous it is to ship goods by

canal boat either thence into the interior of Germany or to the outgoing ocean steamers.

The shops being closed on account of the holidays I was unable to inspect the supplies of stationery, but learned from my friends that it was mostly English. The old adage runs: "A man is never a prophet in his own land," and this distinctly applies to paper, for while you see "papier de luxe" and other French papers in London shop windows, the reverse is the case in Germany, where "best English cream-laid note" is a familiar sign. At the hotel in Hamburg the paper furnished to the guests was large letter, full sheets, and about twelve pounds weight to the ream. These excellent hotel supplies are always surprising to me, as they form a strong contrast to the three or four-pound note we are accustomed to see at home. The inkstands throughout the length and breadth of the continent are of one universal pattern, oblong in form, made of white china, and about eight inches long by six inches wide; the ink is always purple, and along side of it is the old-fashioned sand-box, of which we now know so little. They do not, however, use sand, but a white powder that looks uncommonly like sawdust.

In many of the hotels your bill is presented each day, not necessarily for payment, but that you may have the opportunity of examining the charges and proving their correctness. As the bill itself is a large affair, I thought the practice must be good for the ruler of such goods, and imagined that James Arnold, my neighbor in Philadelphia, would not object to the introduction of such a practice among American hotels.

The diminutive size of the German newspapers is a feature that I should think would be very apparent to Americans accustomed to the *Herald* or *Times* in New York, or the *Press* or *Ledger* in Philadelphia. The papers in all Germany and Austria are not much more than half the surface size of ours that I have mentioned, and contain, for the most part, novelettes; it is said that the real news is mostly obtained from the great London journals, their enterprise and outlay being very great.

There is one immense improvement that is in use in the post-office department of the German Empire, and which would be a great boon to us were it introduced in like manner, and I hope you will use your influence to bring it to the attention of the proper authorities. We all know the vexations and annoyances which at present attend our money-order system, and I doubt if the recent postal-note is any great improvement, but let me explain to you this simple German system. We will say, for example, that you are publishing a newspaper in Hamburg, and that your address there is No. 5 Colonnade; I live in Hanover, and being a subscriber desire to remit my subscription of ten marks; I go to one of fifty sub-offices—the one that happens to be nearest at hand—fill up a blank with your name and address, pay the amount, with a trifling additional fee, and the next day the letter-carrier in Hamburg delivers to you at your address the ten marks; now compare this with the delays incident to our custom and I am satisfied that you will acknowledge the great and permanent benefits to be gained from its introduction.

The purchases of fancy goods that I have made and am still in treaty for will, I know, be much liked by the friends and patrons of the house; being enabled to order considerable quantities in many lines, I have had the opportunity of getting up special styles that for nov-

elty and attractiveness will suit the most fastidious tastes.

CHARLES J. COHEN.

CINCINNATI CHIT-CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, May 12, 1884.

It is very tiresome harping on one string all the time. Nothing can be more distasteful to the performer, and to the hearer it must be terribly wearing. This cry of *dull*, *dull*, *DULL*, which one cannot escape in rail cars, street cars, on the side-walk, on the hotel rotunda, or even in the club room, is very like harping on one string. But what are you going to do about it should it happen that there is no other string for the business world to harp upon. Depend upon it, as long as mercantile men live they will harp. When they give up that it may be taken for granted that they have given up the ghost. So there is a pretty robust ghost of a chance for business here yet, judging the industry and energy with which that solitary string or chorus of solitary strings (not to perpetrate a paradox) responds "dull, dull" to a perpetual thrumming. The best symptom of this melancholy chorus is that it has none of the qualities of the dirge. There is nothing funereal about it. The music is too spiteful, too suggestive of life for anything of that sort.

Any attempt to account for the situation would be needless in the sense of being redundant. It has been fully explained by a thousand people in a thousand different and often conflicting ways. Let us admit that something that impedes has got into the running gear of trade, and is sticking there. Then let us hope that it won't stick there forever, and drop the dismal subject for the present.

Engraving, as a branch of typographic art, has grown wonderfully in Cincinnati in the last six years—no, in the last three or four years. The daily newspaper has grown to be a steady customer of the wood engraver, not only in the advertising columns, but in the news columns. About two Sundays before the riot one of the dailies came out here with wood-cut portraits of the twenty-three murderers in the Hamilton county jail. By the way, it would have required nearly forty-six wood-cuts had the portrait gallery included the untried murderers walking the streets, out on bail. But, in fact, this Western newspaper enterprise is growing not only in its native soil, but it is moving East. Your own New York *World* is employing it. Well, for the lightning-print-both-sides-of-the-paper-at-once-with-bad-ink-and-bad-paper, it requires a peculiar style of wood engraving to prevent the product from looking like an ugly unmeaning blot. Cincinnati artists have made long strides toward acquiring that style—in fact, they have met the emergency bravely, and are able to turn out open work at short notice that makes a very respectable appearance.

But the woodcut engraver is called into requisition more than ever here in Cincinnati to make original illustrations for newspaper advertising. That business is growing in use in daily newspaper advertising here; but it is also used very much in advertising by mail in the way of circulars. Engraving of fancy letters has become quite an art, and the special orders for that sort of work in Cincinnati are sufficient to employ a large and growing concern which has sprung into existence in the last five years. The extent to which advertising by street dodgers scattered by the wind, or handed out

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triplo Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 634.)

by men and boys, has grown in the last few years, is indeed wonderful. Then in posters there is no less ground for wonder at the improvement in their style. Many of them are really the products of fine art. A mere mechanic, by humdrum mechanical processes, could not turn them out. All these indicate that the demand for skill in the industrial arts is increasing, and that a new era in this sort of work is already dawning. The full day is approaching fast when only the best will be in demand. Old fogies might as well shut up shop now and save themselves, for in the full day of the new era no old fogy can live long and prosper. Only bright, active, progressive men will have an occupation left.

The explosion of a steam drum or drying cylinder in Russell, Morgan & Co.'s playing-card factory on Saturday, caused great consternation among the employees many of whom were girls. Some of them became so nervous that they had to quit work. One girl was hit by a flying piece of the cylinder and hurt seriously. Two or three others were slightly injured, but as there was a panic, some of the injuries may have been received in that.

The manufacturing stationers are reasonably well occupied with work now, especially those that depend mainly on local and immediate vicinity custom. Traveling men are not over numerous. More are expected next week, and I will give you a list of them.

PRINCE WILLIAM.

TORONTO TOOTS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., May 13, 1884.

Since I wrote you last (April 1) numerous changes have taken place, socially, politically, and in business. In the latter I am glad to say there has been nothing of serious character in the Province. Our leading houses of the trade are moving on quietly and safely, and none of them, so far as I know, are disposed to grumble

much. We shall see what some of them have to say as we go on. To me the spring has seemed cold and backward. We have had no end of cold and wet and slush. But from what I can gather from your correspondents we have got off well. In fact, may congratulate ourselves on the salubrity of our climate. It only confirms what I have stated before, that Canada must be the representative country of this continent shortly.

I met to-day E. C. Swayne, of E. P. Dutton & Co., New York, who is looking after the interests of his firm over here, and he reports a very satisfactory state of things in his way. I had the pleasure of running against Mr. Swayne several times last year. After parting in Montreal we came together again at the Russell in Ottawa. At that time he had Mr. Farren, of Griffith & Farren, London, Eng., in charge—that is to say was filling the agreeable capacity of cicerone to his English friend, and I am quite sure filled his office most satisfactorily. At all events, we passed a very pleasant day together in our Canadian capital, and much of it was due to John Durie, of Durie & Son, who secured a carriage and took us to the most interesting points in the city. We rather pride ourselves on our Parliamentary Buildings, &c., and escorted our English friend through the place and grounds, from which there is a grand outlook. Being a resident of the small town of London, he did not seem to be awfully impressed with the magnitude and architectural beauty of our capital buildings. But the huge saw mills were altogether out of his line, and he watched with the most intense interest the great logs which had come down the Ottawa for hundreds of miles, being pulled in at one end of the mill by the half dozen, and going out at the other as quickly in the shape of boards. The Chaudiere Falls, too, impressed him. The great Thames could not match it. While I write, I remember that Walter King, representative of Collins' Sons & Co., accompanied us. Poor fellow, he lost his life on his way home on the ill-fated State of Florida. Mr. King was held in high estimation by our trade, and he had many

warm friends in Canada. I said good-bye to him on the street as he was leaving for New York. He leaves a wife and son in this city.

I must now get to the practical part of my letter, and tell you something about our trade and how the pulse beats. We have had a long and severe winter, a cold and cheerless spring, yet vegetation is two weeks or more ahead of last year; and whatever may be said by some folk, the weather has a vast amount to do with business.

I am glad to state from personal calls from time to time, that all our leading houses of the trade report business equal to, and in most cases ahead of last year, up to this time. Let me particularize, and I will take the firms in order as I called on them.

Barber & Ellis Company say that trade with them has been and is good now, and are quite satisfied. Their representatives, P. T. Perrott and Bouvier, foreman and an operator, sail by the City of Rome from New York for London, England. They take with them one of their Reliance envelope machines, which they purpose exhibiting to manufacturers. This machine, they claim, beats anything made, its output being over 6,000 per hour, gummed and counted. I wish them bon voyage, and all manner of success in the old land.

The Standard Publishing Company reports business satisfactory and ahead of last year.

Davis & Henderson say that they are very busy in their manufacturing department. In other departments they are doing quite as well, in fact, better than last year.

The Methodist Book and Publishing House is always on a rush. It has now in press the following books: "The Heathen World," by Rev. Geo. Patterson, D.D.; "The Old Vice and the New Chivalry," by J. Templeton Armstrong; "Doctrines and Discipline of the Methodist Church." It has brought out the following books, of which it holds the Canadian copyright, viz., "Alderside; a Border Story," by Annie S. Swann; "Jock Halliday, a Grass-Market Hero," by Robina F. Hardy; "Bits from Blinkbury; or, Bill o' the Manse," by John Strathok. C. H.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 296,784. Toy Building.—Wm. S. Reed, Leominster, Mass.

One or more strips or sheets of white or colored transparent material, in combination with a toy representation of the whole or a portion of the exterior of the Capitol of the United States, provided with openings to represent doors, windows, &c., or other apertures through which to exhibit pictures, panoramic or other views or lessons, and with a gas, electric, lamp, or other light, so located as to be seen through the openings or apertures from the outside.

No. 296,868. Copy Holder.—Edward Nunan, San Francisco, Cal.

No. 296,871. Paper Bag.—John P. Onderdonk, Philadelphia, Pa.

A paper bag having a satchel-bottom and inward bellows folds, in which the corners of the inward bellows folds are cut apart.

No. 296,898. Printing-Press.—John H. Utter, West-terly, R. I.

No. 296,900. Game.—Benjamin S. Wheeler, Orange, N. J.

A toy or game apparatus adapted for educational purposes, having a series of grooves and letter or figure bearing blocks movable therein while not entirely separable therefrom, in combination with each other, and with convenient means for holding and exhibiting changeable copies in proximity thereto.

No. 296,921. Seal.—Charles H. Bundy, Middletown, Ohio.

A seal formed of a waxen or resinous compound, and containing a fibrous netting or web.

No. 296,934. Calendar.—John Cussons, Glen Allen, Va.

A calendar consisting of an envelope having a pocket open at the top and closed at the bottom and sides, and provided at one corner with a face-aperture and a sheet bearing numerals adapted to be inserted into and removed from the pocket of the envelope, and when therein to disclose the day of the month through the corner-aperture.

No. 296,935. Process of Manufacturing Cellulose from Wood, &c.—Carl Ferdinand Dahl, Dantzig, Prussia, Germany.

No. 296,940. Frame for Pocket-Books, &c.—Hippolyte Didout, Fils, Paris, France.

No. 296,941.—Toy.—Charles Diener, New York, N. Y.
A fire-cracker toy consisting of an inclosure in which the fire-cracker is to be exploded, the inclosure being provided with images arranged to be deployed by the force of the explosion.

No. 296,945. Fountain Attachment for Marking-Brushes.—Peter C. Forrester, Leavenworth, Kan.

No. 296,963. Fountain-Pen.—James P. Hoyt, Newton, Conn.

No. 296,967. Art of Manufacturing Celluloid and Other Compounds of Pyroxyline.—John W. Hyatt, Newark, N. J., assignor to the Celluloid Manufacturing Company, New York, N. Y.

No. 296,970. Manufacture of Celluloid and Other Compounds of Pyroxyline.—John W. Hyatt, John H. Stevens and William H. Wood, Newark, N. J., assignors to the Celluloid Manufacturing Company, New York, N. Y.

No. 296,974. Machine for Making Matrices.—Robert L. Kimberly, Philadelphia, Pa., assignor to the American Matrix Machine Company, New York, N. Y.

No. 297,017. Method of Producing Roller Surfaces for Printing, Stamping or Embossing.—J. Julius Sachs, Manchester, County of Lancaster, England. Patented in England, July 4, 1879, No. 2,724.

In the preparation of metal rollers for printing, the improvement consisting in covering the roller with chrome-gelatine, placing around it a curved or flexible pattern adapted to transmit light to certain parts and prevent the transmission to others, exposing the roller to light and revolving it to present each portion to the light, and removing the soluble portions of the chrome-gelatine coating.

No. 297,023. Apparatus for Stereotyping.—Frederick J. Smith, Brooklyn, assignor of one-half to James H. Beals, Jr., New York, N. Y.

No. 297,041. Pencil.—George Charles Ward, Girard, Kan.

No. 297,043. Toilet and Wrapping Paper Holder.—Seth Wheeler, Albany, N. Y.

No. 297,044. Toilet-Paper Fixture.—Seth Wheeler, Albany, N. Y.

No. 297,045. Wrapping or Toilet-Paper Fixture.—Seth Wheeler, Albany, N. Y.

No. 297,060. Lead and Crayon Holder.—Claes W. Boman, New York, N. Y., assignor to Joseph Reckendorfer, same place.

No. 297,086. Type-Writing Machine.—Henry Orpen, St. Louis, Mo.

In a type-writing machine, two sets of type-carrying levers arranged so that the types of each set will strike a centre common to the levers of that set, in combination with suitable operating mechanism.

No. 297,094. Bill-of-Fare Indicator.—Eugene S. Sutton, Wildwood, Wis.

No. 297,102. Quoin.—Michael C. Barry, Salem, Mass.

A printer's quoin composed of two side blocks tapered longitudinally on one side, and provided with dovetailed grooves on their tapered sides, and a central wedge-shaped block or key provided on its sides with dovetailed tongues adapted to fit the dovetailed grooves of the side blocks, and on its upper face with a recess having an incline sloping upward toward its narrow end for the bearing of the shooting-stick when locking the form, and a more abrupt incline or shoulder toward the larger end for the bearing of the shooting-stick when unlocking the form, the said side blocks and key being of uniform thickness.

No. 297,106. Device for Holding Pencils and other Objects.—Claes W. Boman, New York, N. Y., assignor to Joseph Reckendorfer, same place.

No. 297,111. Printing Machine.—Andrew Campbell, Brooklyn, assignor to John and Edmund McLoughlin, both of New York, N. Y.

In a printing machine or press, the combination of mechanism, for actuating the grippers, means for electrically controlling the operation of said mechanism for actuating the grippers, an electric generator, wires forming the electric circuit, and front guides constructed in the

form of circuit-closers and breakers, whereby the proper placing of the sheet to the guide closes breaks in the electric circuit, and thus controls the operation of the mechanism for actuating the grippers.

No. 297,112. Form Roller for Printing.—Andrew Campbell, Brooklyn, assignor to John and Edmund McLoughlin, both of New York, N. Y.

A printer's roller provided with a leather cover, and a cushion of cork arranged under and next to said leather.

No. 297,116. Mailing-Machine.—Robert Dick, Buffalo, N. Y.

No. 297,134. Toy.—Louis Keller, New York, N. Y.

No. 297,138. Counter for Facilitating the Transfer of Coin.—Albert Lego, and Henri Dupau, Grasse (Alpes-Martimes), France.

In an apparatus for facilitating the transfer of coin between the public and shopkeepers, bankers, cashiers, and any other persons, the arrangement of a flat tray of approximately-circular form, provided with mouths for the delivery of coin, the tray resting upon a rod consisting of two parts pivoted on each side of the axis of the tray and supported by springs.

No. 297,206. Process of Preparing or Treating Composition or Material to be Used in Making Plaques.—John J. West, Chicago, Ill.

No. 297,213. Engraver's Tool.—Wm. Wildt, Richmond, Va.

An engraver's tool composed of a stock or handle made in two sections, arranged for rotation one upon the other, and in combination therewith of a stationery support or table detachably connected with said handle or stock for supporting the object, a retaining device secured to and adjustable upon one of the handle-sections for securing the object to or holding the same on said support or table, said holding device being likewise made detachable from the hands or stock, and a screw-rod connected with the adjustable holding device and operated from one or the other handle-section.

DESIGNS.

No. 14,957. Ace of Spades for Playing Cards.—Adolph Binkert, Philadelphia, Pa., assignor to Caterson, Brotz & Co., same place. Term of patent, 3½ years.

No. 14,959. Font of Printing Type.—Charles E. Heyer, Chicago, Ill., assignor to Arthur M. and Alson E. Barnhart, both of same place. Term of patent, 14 years.

No. 14,961. Photographic Album Leaf.—Stephen Meers, Brooklyn, N. Y. Term of patent, 14 years.

No. 14,963. Font of Printing Type.—John K. Rogers, Brookline, Mass. Term of patent, 3½ years.

No. 14,964. Font of Type.—John K. Rogers, Brookline, Mass. Term of patent, 3½ years.

No. 14,965. Pencil Case.—Le Roy W. Fairchild, New York, N. Y. Term of patent, 3½ years.

No. 14,968. Pen-Wiper.—Leopold Kahn, New York, N. Y. Term of patent, 3½ years.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with amples in order to secure proper notice.

James Power, publisher, La Coudre, W. T., has sold out.

H. Lusk, of the firm of Lansing & Lusk, printers, Brazil, Ind., is dead.

M. F. Onderdonk, printer, New York city, is advertising his business for sale.

Charles Foster, toothpick manufacturer, Sebec, Me., has removed to Buckfield.

E. J. Fuller, publisher of the *Record*, Gardiner, Mass., is advertising to sell out.

H. Cook, Jr., bookseller and stationer, Newburyport, Mass., is advertising to sell out.

Robert McConnell, proprietor of the *Guardian*, Truro, N. S., has removed to Monckton.

Henry Stanley, president of the Stanley Rule and Level Company, New Britain, Conn., is dead.

J. G. Smith, picture dealer, Denver, Col., has been attached for \$1,300 and the sheriff is in possession.

Williams & Wesley, printers, Attleboro, Mass., have dissolved partnership. Edward Williams continues the business.

Russell & Curtiss, printers and publishers, Philadelphia, Pa., have dissolved partnership, Charles A. Curtiss having withdrawn from the firm.

An assignment has been made by Frederick Zoerb, manufacturer of pocket books, New York city, to William Zoerb, giving three preferences to relatives for \$710.

J. H. Bufford's Sons are just now doing a lively trade in their extensive line of fans and shape novelties. Live dealers having an eye to business are quickly taking up, at this season, goods of this kind, particularly anything new and attractive, and everything that is not of this character is carefully excluded from J. H. Bufford's Sons' line.

The San Francisco *Journal of Commerce* is publishing a series of sketches of the leading towns of California, including surrounding natural scenery as well as manufacturing industries, business houses, agricultural products, society, &c. Its issue of May 1 contained a very interesting full-page article on Santa Cruz, showing it to be a desirable location for those contemplating to settle in the State, while giving much valuable information to those desiring to post themselves regarding a progressive California town.

The directors of the Keystone National Bank, of Erie, Pa., have petitioned the court to place E. J. Cary, paper-stock dealer, North Adams, Mass., in insolvency. They allege that he owes the bank about \$10,000, and they think they have a good case against him. Many of Mr. Cary's other creditors are said to be opposed to having him go into insolvency, especially those who are secured by mortgages on the property. His property is estimated to be worth from \$25,000 to \$30,000 and is about covered with mortgages. The Keystone Bank will have a hearing at the next court of insolvency, and it is generally thought that the petition will be granted.

W. H. Woglom is having a large demand for Van Horn's patent letter and bill clips and files, which he manufactures. These clips come in a small and exceedingly convenient form and are giving satisfaction wherever they have been used. Mr. Woglom also carries a full line of staple goods, including blank books, fancy leather goods, comprising photograph albums, pocket books, &c. He also does an extensive printing business.

F. H. Levey & Co., as a result of their advertisement in *THE STATIONER* of their "\$1 Insurance Policy Ink," report numerous orders from all sections for this superior brand of goods and have on file some very complimentary letters from parties sending in duplicate orders. The ink named appears to supply a long-felt want among printers doing commercial work.

Levi Timpson & Co., dealers in paper stock, Boston, Mass., have failed, and it is thought will pay about twenty cents on the dollar. The merchandise liabilities are about \$9,000, and assets \$2,000.

D. A. Shaw & Co., importers of marine shells, &c., New York city, have formed a limited partnership to May 5, 1889, with special capital of \$20,000.

A dissolution has taken place in the firm of Stair & Burnham, publishers of the *Journal*, Milan, Mich. Burnham continues the business.

E. A. Chasteney, a representative of the firm of Charles F. Zentgraf, sailed on the steamer Alaska of the Guion line on the 10th inst.

Dillman & Westphal, manufacturers of show cases, Chicago, Ill., have dissolved partnership. H. Westphal succeeds to the business.

N. W. Taylor, wholesale paper dealer, Chicago, Ill., has sold out to the Indiana Paper Company, of Indianapolis, Ind.

Krause & Karbach, embossers, New York city, have dissolved partnership. Richard Krause continues the business.

F. B. Moulton, dealer in fancy cards, Providence, R. I., has assigned to H. H. Plant.

William Allen, printer, Winnebago City, Minn., has sold out to A. E. Foss.

J. A. Townsend, newsdealer, Durango, Col., is closing out his business.

George Roe, publisher of the *Times*, Vallejo, Cal., has been damaged by fire.

William C. O'Meara, toy dealer, Washington, D. C., is advertising to sell out.

Robert Marr, stationer, &c., New Albany, Kan., has sold out to R. B. Hogue.

G. W. Shanklin, dealer in wall paper, Leadville, Col., has sold out to G. L. McQuown.

A. N. Marchant, publisher of the *Rhode Island Democrat*, Providence, R. I., is dead.

Robert L. Warren, publisher of the *Republican*, Decatur, Mich., has sold out to A. B. Johnson.

P. W. Campbell, stationer, &c., Ingersoll, Ont., has been succeeded by G. B. Fotheringham.

C. H. Caldwell, stationer and fancy-goods dealer, Marlboro, Mass., has sold out to J. E. Cummings.

Sargent, Farsari & Co., booksellers, stationers, &c., Yokohama, Japan, have dissolved partnership. The business is continued by A. Farsari & Co., who assume the liabilities of the late firm.

Billstein & Son, printers, Philadelphia, Pa., have dissolved partnership. Alexander Billstein withdraws from the firm and Nathan Billstein and Emma Billstein continue the business under the same style.

The second annual meeting of the Travelers' Protective Association will be held at Detroit on June 13 and 14. This association has increased its membership 1,200 during the year. Merchant travelers are invited to attend the meeting. It is proposed to have relaxation as well as business a feature of the occasion.

Among those who have found their premises too small to accommodate their growing trade is the Fountain Ink Company, manufacturer of Caw's ink. This enterprising concern has removed to 82 Cliff street, where it occupies three entire floors, and where a scene of the greatest activity prevails. Probably not in the history of the ink business has an ink sprang into prominence so rapidly as "Caw's Black Fluid."

Notwithstanding the many complaints of a dull trade, most manufacturers of stationers' specialties, fancy goods, writing pads, &c., have had to largely increase their facilities this season, thus showing that although a depression of business has been felt, the prospects for a good trade later on are good. M. J. Anderson, who is among the number of enterprising producers alluded to, has availed himself of the increased room afforded by the removal of the Acme Stationery and Paper Company from the building No. 117 Fulton street, and has filled the same with a large amount of new machinery,

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

thereby doubling his facilities for the manufacture of all of his specialties.

C. R. Clark, of C. R. Clark & Co., printers, Cleveland, Ohio, has assigned.

M. C. Teel & Son, printers, Newburyport Mass., have been burned out. Insured.

Wepf & Cranhead, publishers of the *Times*, Terrell, Tex., have dissolved partnership.

Maurice Lindner, toy dealer, Berlin, Ont., for whom a receiver was appointed, has assigned in trust.

Thomas Wallace, stationer, Oshawa, Ont., has sold out to Chris. Connor, having removed to Toronto.

Knox & Tuttle, printers, New York city, have dissolved partnership. James F. Knox continues the business.

M. L. Howell & Co., publishers of the *Express*, Merced, Cal., have dissolved partnership. J. A. Morrell continues the business.

Glick & Jenkins have established a book, stationery and fancy goods house at Fort Smith, Ark. The firm is composed of William Jenkins and B. Glick.

Colburn, Lowry & Co., proprietors of the Arkansas Methodist Book Concern, Little Rock, Ark., have dissolved partnership. J. P. Lowry & Co. succeed to the business.

Clarke & Walters, stationers, 22 Bond street, New York, have dissolved partnership. The firm is succeeded by Clarke & Co. Its members are M. E. Clarke and C. S. Clarke, Jr.

Van Antwerp, Bragg & Co., Cincinnati, Ohio, have in preparation a work on "Electric Physiology and Hygiene," by Dr. Eli F. Brown. It is prepared with special reference to use in schools and will be out this month.

The stock of books, stationery, pens, &c., of F. H. Drake & Co., Toledo, Ohio, seized by the sheriff under attachment on March 29, appraised at \$1,800, was sold to Thorndike Nourse, of Detroit, Mich., on April 28, for \$890. After the sale, the goods were rejected, and resold on May 5 by the sheriff for \$450, the purchaser being again Mr. Nourse, who has had the stock boxed and removed to Detroit. This amount about covers the costs. F. H. Drake will continue as usual, and also promises to liquidate all indebtedness as early as possible.

Louis Dreka, manufacturing stationer, Philadelphia, Pa., has issued new styles and price-lists of the Dreka Dictionary Blotter. This is a combination of blotting-case with a complete list of words which writers are apt to spell incorrectly. The case folds like a book, and is as convenient for writing on the lap as on the desk.

G. Dean, of the firm of Dean & Son, publishers, stationers, &c., 160A Fleet street, London, E. C., who has been here since the middle of March, departed for Europe on the steamship Alaska on the 10th inst.

Many representatives of the trade attended the Teachers' Institutes, held at Jamaica and East New York, L. I., last week, and at Sing Sing, N. Y., this week.

The Jessup & Moore Paper Company has removed from Room 2 to Rooms 9 and 10, same floor, Bennett Building, 97 and 99 Nassau street, this city.

E. Hall Walter, publisher of the *American Republican*, West Chester, Pa., has sold out to the West Chester Publishing Company.

T. W. Ripley, printer, Boston, Mass., has been damaged by fire. Insured.

J. F. Mitchell, publisher, Greenville, Tex., has sold out.

J. B. Wasson, stationer, New Orleans, La., is asking for an extension.

B. F. Wise & Co., printers, San Francisco, Cal., have been attached.

Walthall & Hudson, publishers, Big Springs, Tex., have dissolved partnership.

W. S. Connor, dealer in photo supplies, Pittsburgh, Pa., has sold out to George J. Pfeil & Co.

The New York Consolidated Card Company has removed to No. 226 West Fourteenth street.

Snyder & Cassaday, publishers of the *Advance*, Canon City, Col., have been succeeded by E. M. Lamont.

F. L. Kidwell, Southern agents, formerly with Baker, Pratt & Co., is now with and will represent D. W. Glass & Co., Baltimore, Md.

E. N. W. Robbins has opened a job printing office at Malone, N. Y., and intends to add other branches in the stationery line as his facilities increase.

John R. Edwards, blank-book manufacturer, Baltimore, Md., has removed to 169 and 171 West Lombard street, in that city, where he will have greater facilities for carrying on his business.

H. W. Meyers, stationer and newsdealer, Hazleton, Pa., has been obliged to remove to more commodious quarters in order to accommodate his increasing trade. Six years ago he started in the stationery line, and although his capital was small and he had to contend with considerable opposition, there being several stores of the same kind in the place, his business

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

grew until now he is said to have as complete a store as can be found outside of the large cities.

Charles L. Busted, the bookkeeper of the Eagle Pencil Works, who was charged with disorderly conduct in Essex Market Police Court, was discharged on Monday.

A fire on the roof of the building No. 504 Grand street, New York city, owned and occupied by R. Hoe & Co., printing press manufacturers, did \$25 damage on Saturday. Insured.

The large freight building of the Weymouth Paper Mills was totally destroyed by fire on May 10 with all the stock. The fire is supposed to have been kindled by boys playing around the building. Damage, \$5,000.

The May number of "Our Little Ones" has come to hand. It contains much that is interesting, considerable that is funny, a great deal that is bright and everything in it is good. A comical feature is to be seen in the advertisement on the back cover.

The Milton Bradley Company, Springfield, Mass., is bringing out a new toy gun, which is styled the "Buffalo Bill." It is entirely new in construction and overcomes many difficulties heretofore met with in toy guns. It will shoot anything—arrows, shot, beans, peas, &c.

The Boston School Supply Company have just issued a new work entitled "Methods of Teaching Geography." It is a text book of seventy-one pages, based on an ingenious system of object teaching. It is systematic in its arrangement, comprehensive and will prove of great assistance to teachers.

The San Francisco *Chronicle* of May 7 contains an interesting description of a display of papeteries made by the Holyoke Envelope Company at the Palace Hotel, San Francisco. The company's productions have received a flattering reception on the Pacific coast. This company's line of holiday papeteries is claimed to be the largest and one of the best in the market, attracting great attention from buyers. The bronzes handled by the company are having a great sale.

Clarke Brothers & Co., 80 Beekman street, New York, call attention to the Gilman "Challenge" letter file, of which they are proprietors. This file comes in the form of transfer cases, while a larger size is provided with hinges for fastening to the wall. The latter is arranged in four to twenty divisions, with twenty-four pockets in each division, thus supplying from ninety-six to four hundred filing spaces, capable of containing from three thousand to sixteen thousand letters, or about thirty-five letters in each pocket.

S. S. Stafford's commercial ink is fast taking the place of leading foreign writing fluids which have for many years had the preference in this country for commercial purposes. This brand of ink writes blue but dries black, holding its color, it is claimed, to the end of time. It is, moreover, an ink of such quality that it will admit of two or more copies being taken from it, and documents written with it have had copies taken after they had been two months written. Mr. Stafford's violet black copying-fluid is rapidly superseding some of the French writing fluids whose superiority over domestic inks has been asserted by consumers for years. He has recently obtained a contract with the English War and Home Departments, London, through Waterlow Brothers & Layton, which shows with what favor his inks are being received by the English people. He has also made contracts with the Cuban Government, the government of Hayti and the New Granada Government, and has received an order for 1,600 dozen quarts of commercial ink from the governments of Uruguay and Buenos Ayres.

L. Maynz, of Edward Posen & Sons, started out on a Western trip this week with a full line of fancy leather goods, comprising albums, pocket-books, card-cases, cigar and cigarette cases, ladies' satchels, &c. The firm has lately been making up several novelties in fancy leather pocket-books, card-cases, &c.; also some new styles of albums in majolica leather, which shows pretty floral designs embossed on its surface and painted in natural colors.

William S. Hicks is showing a new line of gold pens with ivory, pearl and ebony holders in every style; novelties in pen and pencil cases in silver, silver with plated mounting, oxidized silver and gold chased, &c. Also the same goods in solid gold and gold plate, together with a great variety of novelties in watch charms, sportsmen's whistles, tooth-picks, &c.

Langfield, Turner & Andrews have a full line of pocket-books, bill-books, card and letter cases, purses, &c., for the fall trade. Some new styles in pocket-books which the firm is showing is pressed or embossed in imitation of a basket, making a novel and pleasing effect.

The Acme Stationery and Paper Company is located in its new quarters at the corner of Walker and Centre streets, where besides largely increased facilities it will have one of the finest business offices in the trade.

W. H. Hasbrouck has in preparation a large line of new things in writing pads, a full description of which will be given in THE STATIONER later when samples will be ready to show the trade.

C. R. Clark, printer, Cleveland, Ohio, is reported to have failed.

Clague, Wegman, Schlicht & Field have established an office at 27 Franklin street, Boston.

Isaac and Sigmund Kaufman, composing the firm of Kaufman & Brother, manufacturers of picture frames, &c., at No. 84 Duane street, and at No. 14 Vandewater street, made an assignment on Monday to Robert L. Stix, giving preferences to seventy-four creditors for \$9,708.06. The business was established in 1877, and Mr. Stix was a partner from September 1, 1880, to January 1, 1882.

COMBINATION LADIES' WORK-BOX AND WRITING-DESK.

A new thing in fancy boxes is a combination writing-desk and ladies' work-box. It is made up in fancy leather and also in polished maple. The lower part is fitted with a writing-desk, which, when not in use is folded up and pushed into the box. The top of the desk is finished with red satin and the folding part works by a strong pair of leather hinges, rendering it not liable to get out of order. The desk has receptacles for stationery, ink, pens, &c. A large space is reserved in the upper part of the box for ladies' work and neatly arranged on a strap are such articles as sealing-wax, scissors, bodkin, thimble, crochet needle, needle-case with two dozen needles, button-hook and stiletto. The inside of the lid, which is lined with puffed satin, contains a French plate beveled-edge mirror. The combination desk and work-box is finished in the most tasteful manner, and is a novelty that will please every lady who may possess one. The manufacturers are Alles & Conant, 90 Chambers street, New York. In addition to this novelty, the firm manufactures an extensive line of portable writing-desks and fancy work-boxes. Prices are very reasonable. An illustrated catalogue will be sent on application.

The following simple and easy test for glue is given in the *Tischler Zeitung*: A weighed piece of glue (say one-third of an ounce) is suspended in water for twenty-four hours, the temperature of which is not above 50° Fahr. The coloring material sinks and the glue swells from the absorption of water. The glue is then taken out and weighed; the greater the increase in weight, the better the glue. If it then be dried perfectly and weighed again, the weight of the coloring matter can be calculated from the difference between this and the original weight.

TANNING LINEN.

A Belgian inventor, M. Piron, has invented a method of rendering cellulose tissues impermeable and very durable without injuring their flexibility and without much increasing their weight. By examining the bandages of the Egyptian mummies, he inferred that the best preservative would be found in the vegetable kingdom, and he has given preference to the green tar of birch bark, which furnishes the perfume of Russia leather. The tar forms with alcohol, a solution of great fluidity; but when once dried it becomes resinous and resists the solvent power of alcohol. It can be combined with the most brilliant colors. The qualities enable it to penetrate the capillary vessels of tissues, covering them with a varnish of great elasticity, which resists the corrosive action of acids, sea water and changes of temperature. The density is very small, so that the tissues are made impermeable with a slight increase of weight. The prepared stuff can be folded without scaling. The aromatic odor drives away insects. Microscopic vegetation cannot grow, because neither air nor water can penetrate into the interior of the fibres. The invention can be applied to all vegetable tissues, such as sail cloths, cordage, awnings and curtains.

IMITATION ANTIQUITIES.

The civil tribunal of the Seine has lately given an interesting decision affecting the subject of artistic terra-cottas. A group attributed to Clodion, "Satyr chasing a Nymph," after passing through various hands, had finally become the property of a Parisian curiosity dealer. The latter was told by experts that it was not a genuine work of Clodion, and therefore appealed to the courts for the canceling of the purchase. The testimony given by the experts named by the tribunal contains some piquant details as to the practices of falsification now carried on with reference to imitation antiquities. M. Chiancourt said:

"Without a moment's hesitation I attribute this terra-cotta to an artist named Lebroc, lately deceased, who in his youth secretly produced imitations of Clodion's works. His father, who was a carver, had urged him to take up this branch of artistic industry. I knew him intimately, and knew that he sold, both in Paris and in the provinces, his works executed to imitate ancient models. To render his works in imitation of Clodion more salable, he used to break portions of them and then mend them."

Other testimony having been given to prove that the work was not really by Clodion, the tribunal gave judgment for the plaintiff, declaring the purchase canceled.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

REPRESENTATIVE HEWITT has introduced a new tariff bill, in which little interest seems to be taken and which will not probably create any disturbance during the present session of Congress. The details of this bill, as to be expected, tend toward a reduction of duties and the advantage of the importing interest. We do not see that much effort is made to encourage our export of manufactured articles by modifications of duties which would tend to accelerate the outward movement of our industrial products. What this country needs most at present is an enlarged foreign trade, and the question is: How shall this be attained? Some advocate free raw material in suggesting a revision of the tariff; others urge not only free raw material, but the removal of the duties on "half manufactures," which need further conversion before appearing in the form or as parts of finished products. Again, it is suggested that in all lines of manufacture the Government shall allow a drawback equal to the duties paid on any imported product which forms a component part of a manufactured article, when such article is exported. This last is a reasonable proposition and would probably be more readily acceded to by those who are opposed to indiscriminate free trading than any other. It would also have the tendency of increasing our lines of manufacture for export and help us to put our goods into closer competition with the products of rivals.

At this moment the chaldron of stock speculation, risky investment, and fiduciary untrustworthiness is in ebullition, throwing off dross that it is no longer able to contain. It is a purifying process, and good, maybe, goes with the bad. What matters it to the public if thereby needed relief from stock manipulators can be obtained? Generally people will be glad that the outbreak has come, and if there is to be any more of it, will rejoice if it shall reach the limit of purgation. The events of the past few days in financial circles do not conduce to great confidence in the honesty of men to whom large interests are confided, and that there is not irremediable, hopeless ruin all over the country is doubtless due to the fact that such confidence has not been generally secured. In the commercial world there is no reason for excitement or alarm, where prudence has kept men out of the "street," or has induced them to incur no greater liability than they can see their way to discharging. Much has been said about the hand-to-mouth system of trading, and there are those who have chafed under the vexation of a cautiousness which they have thought to be too much stretched. There is cause for thanks that buyers have held well within themselves, and that if profits have been narrow, bills have been small and promptly met. Are the disorders of Wall street to penetrate the commercial body and shake all interests alike? There

has not been, as yet, any indication that they are so to act. As we go to press, it is hoped that the worst of the troubles among the banks and brokers are over and that some of the reported suspensions will prove to be only temporary, relieving the strain of the situation, which if prolonged might lead to greater disaster. The moral of events is so plainly indicated that they who read cannot but understand it. What ought to be done; what will be done with people who appropriate to their own uses money or property which does not belong to them? The man on the Bowery, guilty of misappropriation, is called a thief and judgment is pronounced against him accordingly. Shall Wall Street escape a like verdict?

ROUNABOUTS.

BY THE TRADE LOUNGER.

Have you seen the "Extra?" Of course you have, and so has everybody else, and you and I know and everybody knows, that some banks and bankers are like vessels of common clay, easily to be broken and good for nothing afterward. My! You wouldn't think it though to see what airs some of the "financiers" put on and to what lordliness some of them arrive. When they go to smash, they are not even Sevres ware, but only bits of coarse pottery out of whom very little can be gotten in return for the confidence weakly and mistakenly reposed in them.

* * * *

Well! What is to be the effect? Are our merchants and manufacturers all going on the road to ruin because stock speculators have come to grief? Does anyone suppose that, beyond the caution inculcated by all such examples as we have had during the past few days, we are to be burdened or bound down by the woes of the Stock Exchange? Probably not. The "lamb" have become remarkably grown, and are not affording as much feasting as of yore. The general public has foregone speculation, and may therefore call itself safe. *Gaudeamus igitur!*

* * * *

The President of the Stationers' Board of Trade is going to Chicago next week. He is take a hand in the grinding of the grist out of which a Presidential candidate will be evolved. He will have the chance to help choose our next Chief Executive, or he will miss it. It will be "spoil a horn or make a spoon."

* * * *

I pick up an idea which is said to have originated in Bridgeport, Conn. A genius of that town is said to have invented a portable heater, designed to carry around in the pocket during cold weather. The apparatus is said to consist of a copper boiler, under which is a diminutive lamp, all incased in a nickel box, and balanced something like a compass, so that, no matter what position the outside box is in, the boiler and lamp will always remain in the required vertical position. The entire apparatus is so small that it can be carried in the pocket. After the lamp is lighted, the water in the boiler is heated and circulated through rubber tubes, which run down the legs, around the ankles, up around the back, and back to the boiler.

* * * *

The circulation of the warm water keeps the body warm on the coldest day. A safety-

valve and escape for a higher pressure of steam than the affair is allowed to carry flows off at the back of the wearer's neck. Elaborate heaters are being constructed for ladies' wear. They can be worn inside the bustle and entirely obscured. Before going out of the house the lady's maid can light the lamp, which by the way is gauged to run six, eight or ten hours, and "my lady" walks out under a full pressure of steam, and warranted to keep warm during the promenade.

This thing could also be utilized for getting up a cup of coffee, while traveling around, or how would it do for the "commercial" to have it handy for hot tea?

One of the trade lately had an experience with his office boy, a bright youth of sepia tint. He sent the boy out with a hand-bag containing samples, which he was to take to an uptown hotel, to await the arrival of a representative of the firm. Attached to the bag were several keys, some of which the youth, while waiting, detached and pocketed. The circumstance, as seen, was reported, and the boy, on being charged with the theft, denied his guilt. This led to investigation, and he was found to be possessed not only of keys, but of goods belonging to his employer. Further inquiry disclosed further theft. Moral: Keep an eye on your boys.

A foreign contemporary calls attention to initial letters. Its suggestion may prove of interest to dealers in this country. It says: "It would be as well, perhaps, if the trade were to notice that a large business could be done with these articles if they were pushed a little more than they are at present. When a customer buys an album, bag or other similar article, the shopkeeper should always be ready with his initial letters or monogram."

Base-ball making is becoming a very large industry. Last year 5,000,000 balls were manufactured in this country, and as the makers have a larger number of orders than ever, it is estimated that 7,000,000 will be in use the coming season.

There has been quite a rush of representatives of the trade lately to Europe. Among the passengers of the steamship Alaska, which sailed on Saturday, the 10th inst., was E. A. Chastaney, who will remain abroad two months visiting Germany, England and France for business and pleasure combined. Mr. Richards, general manager of the stationery department of the American News Company, sailed for Europe on the same date.

One of our representatives in Congress presented in the House, on Monday, a petition asking the passage of a bill for the relief from local taxes of commercial travelers signed by the Stationers' Board of Trade.

A leading manufacturer in this city has given away several thousand dollars' worth of samples of his products within the past two months in New York, Boston and Philadelphia. He distributes samples systematically, and says that he finds that it pays, although it is a system of advertising that would deter most dealers.

The Post-Office Department seems to be in need of stationery. Its wants are so urgent that it is advertising for some good stationer to come along and sell it lines just 2½ per cent.

under cost of production. It doesn't say so, but that's the way of looking at it sometimes.

ANSWERS TO CORRESPONDENTS.

E. N. W. R. wants to know where small photos for visiting cards can be had, for regular trade, in quantities of one dozen, and ten or twelve orders at a time.

Ans.—W. E. Pollock, 57 Cedar street, New York; W. E. Purviance, 115 Christopher street, New York.

M. M. & Co. send sample of game-counter, and want to know where it is made.

Ans.—It is a poor imitation of one made by Geo. W. Hyatt, 114 Nassau street. We don't know who makes it.

J. B. C. wants to know who manufactures cotton-sampling paper.

Ans.—Nescocahgne Manufacturing Company, Philadelphia, Pa.; Cowles Paper Company, Unionville, Conn.; Bulkley, Dunton & Co., 74 John street, New York.

A. & V. ask where to get Ames' paper and card scales.

Ans.—Made by Ames & McIlvaine, 96 Chambers street.

S. asks where Lyman's improved laundry lists are to be had.

Ans.—We don't know; are not sure but they are a Cincinnati specialty. Will somebody supply the information?

Rkg. Str. asks for names of two or three manufacturers of Society cards, as Masonic, &c.

Ans.—M. H. Smith, Rochester, N. Y.; C. T. Bainbridge's Sons, 114 William street, New York; Robert Snider, 47 John street, New York.

J. W. S. wants addresses of leading toy manufacturers in New York.

Ans.—Althof Bergmann & Co., 144 Mulberry street; American Mechanical Toy Company; Eureka Trick and Novelty Company, 87 Warren street; Ives, Blakelee & Co., 297 Broadway; Leo Schlesinger & Co., 125 Avenue D; Sun Manufacturing Company, 70 Duane street; A. Wiedmann, 306 Broadway.

OBITUARY.

WILLIAM JACKSON.

William Jackson, of this city, recently deceased, was one of the earliest and best-known publishers and importers of books in this country. He first came to New York in 1832, and for many years was established at 77 Broadway, where he republished *Bentley's Miscellany*, an English magazine of the highest character, which was then brought to him by the Black Ball and other lines of regular packet ships. He was highly esteemed by the leading merchants of his time and without doubt has a place in the memory of many readers.

RARE OLD WORKS.

Ancient specimens of the printer's art are being more highly prized with each succeeding year. At a late auction of scarce old specimens in Paris, a letter of indulgence, printed by Gutenberg in 1445, only a single leaf of dingy parchment brought 5,200 francs. A manifest of Archbishop Diether von Isenberg—in the catalogue it is styled a placard—printed in 1462, found a new owner at 3,350 francs. A catholicon, printed by Gutenberg in 1460, an imperfect copy, one leaf being missing, sold for 2,350 francs. A poor man's Bible, one printed from blocks in 1440, the year in which printing was invented (of this curiously printed Bible only the first portion remains), the fragment sold for 2,020 francs. These rarities were scattered; the new owners will, of course, use every care

to preserve them, and in time they will again come under the auctioneer's hammer.—*Exc.*

North Haven still brings forth its inventor. This time Irving Bassett is the man and a patent envelope the invention. He has found in his card business the inconvenience of sealing and elastic fastenings, and has invented an envelope doing away with these, and for which Uncle Sam will probably give him a patent.—*Springfield Republican.*

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, May 14, 1884.

THE MONEY MARKET.—The troubles in Wall street, resulting in nine failures to-day and the shifting of loans, has made the money market more active, with call loans advanced from 3 up to 5 per cent. The stock market was in a demoralized condition, consequent upon the outpouring of stocks at reckless and indiscriminate prices. At the close, upon the announcement of several Stock Exchange failures adding to the intensity of the excitement, values of stocks dwindled still more rapidly. Government bonds and railway shares partook of much of the feeling or the stock market. There was a disposition shown not to transact any business in foreign exchange, owing to the excitement, in the meantime the market was nominally steady.

THE PAPER MARKET.—The general conditions of the market have not changed in any essential particular since our last issue, and there is very little to note. In fact, the movement is so moderate that there is very little opportunity afforded for fresh comment. Although buying, as a rule, continues of a hand-to-mouth character, yet in the aggregate it is of fair volume. The paper industry or manufacturing industries of any kind are not, as a general thing, actively employed, but production is in many instances being measured by the requirements of actual consumption, this feature, however, is not being nearly so pronounced in the paper as in the textile and other trades. Fairer weather and the prospects of good crops throughout the country promise some improvement as the season progresses, but no great reaction from the moderate movement of the past few months is looked for until the end of the Presidential campaign; in the meantime, dealers and large consumers will be likely to limit their purchases of supplies to actual necessities. As regards the present ruling of prices, while very little strength is shown in any grade, there is that same steadiness to be seen in all lines, with one or two notable exceptions, which have been a marked feature for some time past.

THE STATIONERY MARKET.—Dealers in most lines still complain of dullness, although many producers are busy on orders which were received in the early part of the season. But while there continues to be a depression, the outlook is much better than it was at this period last year. There is less vigor in trade, to be sure, but its condition is thought to be more sound and healthful. There is no indication that the country has suffered or is suffering from overtrading. Dealers have been ordering just enough to supply their needs, and this has not only made collections easy, but has placed buyers, generally, on a much sounder footing than they would be had they ordered what they could not easily have paid for. There is still some demand for fancy leather goods, but business is obtained only with persistent drumming, direct orders from dealers being very scarce. In shape novelties and various advertising devices there is quite a brisk movement, especially in fans, some of which are very pretty and attractive. Shapes are mostly demanded for advertising purposes, chromo cards not being so much in demand as in former seasons. There is a fair trade in inks, but some dealers report a better export than home demand. American inks have a recognized superiority in England, France, South America, Cuba and Germany, and enterprising manufacturers are reaping the harvest. During this period of depression American manufacturers might do a good thing to push the sales abroad of other lines of goods.

CERAMIC PHOTOGRAPHY.

The following paper was read before the London and Provincial Photographic Association, by A. L. Henderson:

To no single individual or country can the credit be given for the discovery of pottery, porcelain, or ceramics. The "hard" is a substance that is brittle or difficult to fuse; the "soft" is quite the reverse, differing only by the amount of solid body or infusible material contained in the flux or glaze. All vitreous substances laid on or supported by metal are usually called "enamel." It is the soft porcelain or enamel that I will have specially to deal with to-night. It is to M. Lafon de Camersac we are indebted for ceramic photography, he being the first to produce the photographs fixed by fire (about 1856).

His method, so far as I can learn, has never been published, and is still considered a secret process. Many operators have called upon me offering their services, and who professed to have been working on enamel in M. Camersac's employ, but in no case have they produced presentable results. His (Camersac's) method, I have little doubt, is what is usually called the "dusting-on process;" that is, a glass plate is first coated with collodion, and then with a mixture of sugar, honey, and bichromate of ammonium. The plate is exposed under a transparency, the affected parts becoming somewhat hardened or less tacky or hygroscopic by the action of the light. The plate is then dusted over with an enamel color finely ground, when the image will appear, the color adhering to the moist portions. It is then placed in acid and water to remove all soluble matter, transferred to the permanent support, and placed in the kiln.

When the carbon process was introduced, at the first glance it seemed as if enamel or porcelain photography would receive a great impetus; but the difficulty in burning off the gelatine was almost insurmountable. Mr. Firling, of Dorchester, about sixteen years ago, showed me some promising results by the carbon process. Some later advances, however, have been made in this direction by using saponaceous substances to prevent the cracking and blistering of the gelatine.

The second method of producing vitrifiable photographs is known as the "substitution process;" that is, a transparency is taken on wet collodion, and various chemicals are allowed to

JAMES A. WHITNEY,
COUNSELOR-AT-LAW.

Special attention given to Patent and Trade-Mark Causes.

140 NASSAU ST., NEW YORK CITY, U.S.A.

JAMES A. WHITNEY,
Solicitor of United States and Foreign Patents and Trade-Marks,
No. 140 Nassau St., New York City.

American, Canadian, British and Continental Patents obtained for Inventors on favorable terms, and in the shortest possible time. Caveats filed, Reissues and Design Patents secured. Trade-marks and Labels protected by registry at the U. S. Patent Office and in Canada and Europe. Rejected Cases investigated and reported upon. Interferences conducted. Opinions on Questions of Infringement, the Validity of Patents, &c., &c.

PERSONAL attention throughout is given to each and every case—a matter of no inconsiderable importance to those who wish strong claims and specifications CAREFULLY DRAWN. Business may be transacted either in person or by mail, and in every detail is kept inviolably SECRET and CONFIDENTIAL.

JAMES A. WHITNEY, 140 Nassau St., N. Y. City.

react on the silver, thereby depositing and substituting medals in lieu of the silver, which, if left in the picture, would give a disagreeable tone. (Silver gives a bright yellow color). Of the two processes named I would give preference to the "dusting on," as a greater range of color can be obtained.

The third and last method is that devised by the author of this communication. It is with some difficulty I can find a name for the method. I might call it a "mongrel process," as it comes between the first two.

Here I have a collodion transparency very thin, as you will see; the high lights are perfectly clear glass and the shadows not heavy—such a transparency as would look best as a lantern picture. It was developed with—

Sulphate of iron..... 5 grains.
Acetic acid (Beafoy's)..... 15 minims.
Water..... 1 ounce.
Saturated with common alum.

I will place it in a solution of a platinic salt prepared as follows :

	Parts.
Bichloride of platinum, or its compound.....	5
" tin, or its compound.....	30
Iodine of potash.....	30
Iodine, to saturation.	
Acid (such as hydrochloric).....	960
Silicate of potash.....	20
Acetate of lead.....	40
Water.....	8,000

Saturate the whole with boracic acid.

The platinum and tin will, to a certain extent, take the place of the silver, as well as depositing on what is already there. I can at any moment apply solvents—say nitric acid—that will not act on the platinum, and remove the silver; and even after its removal the depositing action will still proceed. Should the silver be in a form (say chloride or iodide) that will not dissolve in nitric acid, I can oxidize or reduce them to the metallic state by heat, so that they will be amenable to treatment. It is seldom I have to resort to the removal of the silver, as there is such a small amount present, and it improves the tone rather than otherwise.

As soon as there is sufficient density I remove the picture from the solution, immerse it in a 5 per cent. solution of sulphuric acid and water, saturated with boracic acid, and transfer it to the enamel tablet, dry it, and it is then ready for the fire. If one of the films be left in water for some days, a peculiar action takes place; that is the image will entirely disappear, leaving no trace of its color in the water; and if the enamel, when placed on its permanent supports, be left exposed, unfired, to the air for some time, the coloring matter will become soluble in water. As a rule, it is better not to add any flux or glaze over the picture. Great danger is likely to arise, as the flux or glaze being so much easier fused, blisters might occur; and, although it gives a little greater depth to the shadows, a much deeper print is necessary. One of the secrets of photo-enameling is to put the glaze on the plate first.

Many believe that the whole secret lies in the firing. I will fire one so that it is melting. I will press a knife into it while in the fire, to show what state of fusion it is in, at the same time showing that there is no loss of color. I can place a photograph on, say, a Minton's tile, and allow the image to sink into the glaze. I remove the image, leaving an impression on the porcelain, which might be inked and printed like a copper-plate. These enamels may be colored by any artist with very little practice. Of course a little knowledge is required as to which colors are to be applied first. To touch up an enamel or remove spots in the fired pic-

ture I use a brown enameled color mixed with a small quantity of sesquioxide of iridium, rubbed up with spike oil of lavender, refusing to fix the touching.

I may as well mention a few of the colors pro-

duced by some of the oxides: Tin and arsenic give a white, gold, red or purple; copper, green or red; silver and titanium, yellow; cobalt, blue; iron, reddish yellow; platinum and tin, various tints of brown; iridium, black.

The NOVELTY Paper Fastener.

(Patented in Europe and America.)

Drives and Clinches a Staple or Suspension Ring at a Single Blow.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

SHELLAC SPIRIT FOR HANGING PAPER.

The Germans are utilizing a discovery for hanging paper on damp walls. It consists of coating a lining-paper on one side with a solution of shellac spirit, of somewhat greater consistency than the ordinary "French polish," and then hanging it with the side thus treated to the damp wall. The paper-hanging is then performed in the usual manner with paste. Any other resin that is equally soluble in spirits may be used in place of the shellac. According to the representations this process is found equally effective in preventing the penetration of dampness.

"Now, you must converse in nothing but French," said Monsieur the Professor to his pupils. Silence immediately fell on the class for the space of a quarter of an hour, when the professor exclaimed, "What! Nothing but silence? Zat is the very opposite of French."

Minister: "Well, John, I've nae doot frae your long experience ye cood occupy the poopie for an afternune yersel', should an emergency occur." Beadle: "Hoots, ay, sir, there's nae difficulty in that; but then, where in the hael parish wad ye get onybody qualified to act as beadle?"

The Paper and Printing Trades Journal.

(QUARTERLY.)

Subscription: **Two Shillings per annum**, post free. Postage Stamps received in payment.

EVERY Printer, Stationer, Papermaker, Bookseller, Author, Newspaper Proprietor, Reporter, in fact, everyone interested directly or indirectly (and who is not?) with Printing and Paper ought to subscribe. Useful Trade Tables, Trade Information, Heaps of Wrinkles, and Amusing Gossip in every issue.

WHAT SUBSCRIBERS SAY.

I could not do without it.—J. SPRINGER, Iowa City, U. S. A.

We are delighted with the Journal.—S. F. CHERITT, Grahamstown, South Africa.

In my establishment the Journal is devoured with avidity.—J. JENNINGS, Glos'ter.

It does not take a long time to see that it is worth its price.—S. B. SCHANTZ, Bethlehem, Pa.

Imparts the right sort of information, and every printer ought to have it.—B. PRICE, Bilston.

The Journal has a wonderful knack of making one understand what good printing is.—W. PERRETT, Glasgow.

Thanks to the invaluable services of the Journal to the world of typography.—W. WINGET, Torquay.

We will deliver one case to any part of the U. S., as sample, paying all charges.

— AND —

WHITE'S TAR,

SIZE 5x7,

\$11 per Case,

shown in the cut, which we claim to be the most perfect FORM or STYLE of package ever devised. It is superior to the ordinary Package of Sheets, because all litter of scraps is avoided; and it is superior to Rolls, because it is certain where the sheet will detach from the packages and this avoids waste. The disinfecting cover is as thorough a deodorizer as any costly apparatus, while the artistic design and printing gives the book a very neat appearance.

THINNESS OF GOLD LEAF.

A contemporary says: It is certainly true that gold may be beaten into such extremely thin leaves that they will transmit light. Seen by reflected light such films of gold retain the characteristic golden color of the metal; but by transmitted light they have a decided bluish-green. The thickness of these films must naturally be extremely small. What the limit must be before the film becomes capable of transmitting sufficient light to be appreciable to the eye cannot be absolutely fixed, as this will depend largely upon the sensitiveness of that organ, which quality varies with different individuals. We may state, however, that modern experiments have shown that a single grain of gold can be beaten out so as to cover a space of 75 square inches, which would give the film a thickness (thinness would sound more appropriate) of the one-367,650th part of an inch. This fact affords a striking illustration of the wonderful malleability of gold, a property in which it surpasses all other metals. Microscopic slides containing a small square of gold, beaten out so thin as to be translucent, are favorite objects for microscopists, and may be purchased of dealers in such articles. The ductility of gold—that is, its quality of permitting itself to be drawn out into wire, is quite as remarkable as its malleability. It is affirmed, for example, that when a cylindrical bar of silver is coated with gold (by galvanic means, presumably), and drawn into the fine wire used in embroidering housings, &c., which still exhibit the golden coloration imparted to them, a single grain of gold will cover a length of 345.6 feet of wire. We have no doubt that films of gold might, with modern scientific artifices, be prepared of the thinness of the one-millionth of an inch, since a continuous coating of gold having such extreme thinness may readily be obtained by galvanic means, the only difficulty in the way being the extremely delicate operation of removing the film from the surface on which it is deposited and transferring it to glass, where it may be examined.

GLUE, PASTE OR MUCILAGE.

A liquid paste or glue from starch is made by placing 5 pounds of potato starch in 6 pounds (3 quarts) of water, and add one-quarter pound of pure nitric acid. Keep it in a warm place, stirring frequently for 48 hours. Then boil the mixture until it forms a thick and translucent substance. Dilute with water if necessary, and filter through a thick cloth.

At the same time, another is made from sugar and gum arabic. Dissolve 5 pounds gum arabic and 1 pound of sugar in 5 pounds of water, and add 1 ounce of nitric acid and heat to boiling, then mix the above with the starch paste. The resultant paste is liquid, does not mold, and dries on paper with a gloss.

It is useful for labels, wrappers and fine bookbinders' use.

Dry pocket glue is made from 12 parts of glue and 5 parts of sugar. The glue is boiled until entirely dissolved, the sugar dissolved in the hot glue, and the mass evaporated until it hardens on cooling. The hard substance dissolves rapidly in lukewarm water, and is an excellent glue for use on paper.

"My dear," said an affectionate husband, "I'm surprised that you will consent to the degradation of wearing another woman's hair on your head." "Is that any worse than your wearing another sheep's wool on your back?" retorted the equally affectionate wife.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen hands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

A SPORTING INK MANUFACTURER.

William Ricker, an ink manufacturer of 21 Ann street, is of middle age, but retains the sporting proclivities of his earlier days. On Thursday evening of last week he called at Police Headquarters to report the loss of a valuable diamond horse-shoe scarf pin.

He said that he put on the gloves with a friend in his office in the afternoon for a little gentle exercise. In dodging to avoid a blow he backed up against the sharp corner of a desk. The injury at first seemed to be serious, and a physician was called, who administered morphine hypodermically. Mr. Ricker afterward fully recovered, and on his way home stopped in at an Ann street coffee-house to get a cup of coffee to rouse him from the lingering effect of the morphine.

He remembers getting the coffee, and the next he knew a waiter roused him and told him he must not go to sleep there. As he straightened himself up he missed his scarf pin. He declared that it had been stolen from him in the coffee saloon, and called for the proprietor. That gentleman said that he had no time to bother with him, and ordered him out.

He went across to the Astor House, and, after thinking the matter over, returned to the restaurant to have a talk with the proprietor. The latter was still too busy to converse on that subject, and thought Mr. Ricker had better get out. A policeman was called, who thought so too, and Mr. Ricker soon came to the same conclusion. On his way up town he called at the Central Office and explained.—*Sun.*

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot

WASHINGTON ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., May 25, 1884.

The sins and sorrows of Wall street have not, so far as I have been able to learn, caused any weeping or wailing in the capital of this wicked nation of stock gamblers, wild-eyed tariff reformers and juggling protectionists. Much interest and no little excitement was shown here on the street and in the departments as the telegraph flashed the news of the financial mutterings with occasional crashes in the great metropolis on last Wednesday; but the disasters have in no way as yet affected trade or in any manner molested the smooth channel of business intercourse in this city. Merchants are calm and not at all alarmed, and when talked to about the shake-up in the neighborhood of Wall street, with one accord they all remark that the banks and business houses of Washington cannot be hurt, as they are not within the circle of the cyclone. This city has quite a number of bankers and brokers who deal in stocks, and they, with their patrons, may be pinched a slight bit; but other than this there will be nothing to interrupt the business affairs of Washington.

Horse races and base-ball have been the great attraction for the week just past, drawing to their respective fields of contest a large portion of the male population and a fair sprinkling of the gentler sex. Men cannot vote in the gay capital, but there is nothing known that will prevent them from betting on any game of chance, indoors or outdoors. Cabinet officers and heads of departments jostled government clerks and messengers on the grand stand, while the poor man with his last dollar elbowed the millionaire dude at the pool-box, each anxious to lay his legal tender on the winning horse. The race-horse has gone, and with him the poor man's dollar. A shrewd business man should not look with favor upon such things, and I am sure he will not patronize them, for they are his strongest contestants in the race for the comfortable dollar of our dad. Such things, with the periodical visit of the ever-living, ever-present Barnum, carry out of the city an enormous amount of pocket-money,

and in many places cause a stagnation in the retail trade. A gentleman told me that when the white elephant was here two weeks ago, the colossal old dove-colored humbug carted off \$30,000 for his master, the perennial showman of Yankee-land. Having just passed through such a series of events as described is the reason why several business men of this city told me yesterday that there had been very little doing in trade for the past two or three weeks. The folks have spent their money at the show, the horse-race and the base-ball ground, and now they must economize in order to get the children some school-books, and the wife must wait until her next birthday for a token of affection.

For the past few days the weather has been all that one who loves the beautiful budding May could wish for. The trees have put on their new garments, the parks are bright with blossoms, and Washington, always interesting, is now at her loveliest. The shade trees of this city are the chief attraction in the spring and the summer. They are indeed a living monument to that much-abused benefactor of the Capital, Arthur Shepherd, who has done so much to make this place the pride of the whole country. Washington is said to have more elegantly shaded drives than any city in the world with the exception of Berlin.

Yesterday, while on Pennsylvania avenue, I utilized the time by calling on several of our stationers and obtaining what few points I could in regard to the trade. At Chapman's, one of the best-known places in the city, I was told that there had been very little doing for some days past, but that just at present things were looking a little brighter, and as it is quite near the beginning of the fiscal year there was a prospect of a better trade with the various departments.

G. A. Whitaker was found in his cozy little apartment at the rear of his salesrooms, busy with a fragrant Havana and the great things of the future. He said that he felt too good to complain, though, if he spoke the truth, he would like to see a little more doing in the stationer's line. He informed me that the proposals for furnishing stationery to the various government departments had been made and that many were busy getting in their estimates for the work. As some of these proposals may

be of interest to the trade I place a notice of them before your readers.

Sealed proposals will be received at the Post-Office Department for furnishing wrapping-paper, twine, letter-balances and marking and rating stamps for the use of post-offices in the United States for one year; proposals for post-office envelopes will be received till May 28; proposals for furnishing stationery to the Treasury Department will be received till June 17; the Interior Department will receive proposals for stationery till June 5; the Navy Department until June 11, and the War Department till June 10. The gay and festive drummer has not blessed us with his presence much of late—he may have stopped here on his way to the fair fields of the South, but if he did so he spent his time at the race-track and did not put in an appearance at the business houses. Mr. Veiller, from H. Levy & Son, was here last week and exhibited some very handsome goods for the coming holiday trade. BEN.

LOUISVILLE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., May 17, 1884.

Fine weather for the past week is the cheerful greeting Kentucky sends forth for a change. Several successive days of sunshine (a rare experience here this year) have had a good effect upon the trading and farming community as well. The soil is at last in condition for plowing, and the cultivation of the backward crops has been resumed with renewed vigor. Corn is up sufficiently to show that some of early sown will need replanting, while that planted later has an excellent stand. The oat crop promises a good average; tobacco plants are abundant and a large acreage is now being set out, as the prevailing high prices for the weed make it a profitable crop; wheat is growing luxuriantly all over the State; live-stock interests are in satisfactory shape, notwithstanding that the pasturage was scant during the cold early spring.

Perhaps the reassuring feature of the business situation is the prosperous condition of the agricultural community—the consuming masses the country over—and it is this conviction which prevented the Wall street flurry of the past few days from making any decided

impression on trade here. Louisville is not a speculative centre, and the operations of its business men are almost exclusively in spot stuff for legitimate use, as Chicago reporters would put it; speculation here seems confined to small bucket-shop deals and horse-race pooling. The spring races began yesterday, bringing thousands of visitors to the various hotels, and in consequence limiting the number of eligible rooms for the mercantile travelers. Yet, while there is a crowd there is no crush nor lack of accommodations.

Before me is a finely printed circular from the general manager of the Southern Exposition, at Louisville, containing information for exhibitors. The Southern Exposition of 1884 will open Saturday, August 16, and close on Saturday, October 25, giving sixty-one exhibition days and ten Sundays. This time is selected in deference to suggestions from last year's exhibitors. The attendance in the sixty-one days will be at least as great as the whole attendance of 1883. Profiting by the experience of last year, arrangements are now being made in the way of advertisements and excursions, which will assure a larger and prompter attendance of visitors. A single item of printing costing \$3,000 was contracted for yesterday. The admissions in 1883 were 770,048.

Still greater attractions will be presented in the Exhibition of 1884, and a full million admissions are safely anticipated. It is believed that the tardiness of exhibitors last year was occasioned by doubt of the ability of the Exposition Company to have its buildings and grounds ready at the appointed time. No such question can arise this year, as the buildings and grounds are ready, and it only needs the placing of exhibits to throw the Exhibition open to the public in August in complete order. The citizens of Louisville who contributed nearly a half million dollars of their money to open the Southern Exposition last year have supplemented this with subscriptions of over a quarter of a million dollars more for the purchase of grounds and improvements in the same buildings this year. To the testimony of the exhibitors of 1883 that the exposition of that year was exceedingly satisfactory to those who made displays, is added the significant fact established by the records that out of six hundred car-loads of machinery brought from the East for exhibition, less than one hundred car-loads went back, the remainder having been sold during the exhibition, and at its close shipped to the destination of the purchasers.

As to current business here, there is a quiet order demand for staple merchandise and a gradual sloping off toward the summer season. The markets are unaffected by the excitement in Wall street circles beyond emphasizing the tendency to conservatism and caution that has all along characterized the policy of both buyers and sellers this season. Collections for early spring sales are coming in with average promptness.

In the stationery trade the manufacturing branches report a continued good run of orders, while jobbers, who have had quiet times the past month, report a beginning of activity on the initial steps of preparation for the fall

season. Salesmen are taking the field, and orders for school-books and supplies are starting in from the South. Retailers have been complaining of dullness, not only in books and stationery but in nearly every line, and hope for a continuance of bright weather to make up for lost time.

Among the trade callers of the week were: James D. Ferguson, of the Goodyear Rubber Manufacturing Company; J. Val. Koch, of Koch, Sons & Co.; N. Frank, of Charles Zinn & Co.; H. B. Handy, of the Morgan Envelope Company; W. E. Porter, of the National Papeterie Company, and Fred. Hafely, of E. & J. B. Young & Co.

Frank C. Johnson, of Liebenroth, Von Auw & Co., is expected to drop in to-day.

BOURBON.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 DEVONSHIRE ST., BOSTON, May 20, 1884.

The first thing in order, I suppose, is to have a word on the "panic," and it would no doubt tranquilize the nerves of speculating New Yorkers to hear that the good people of the Hub were badly hurt; but they were not.

Some of our stock gamblers who were playing the "cases to win" lost heavily on the deal, I must admit, but the turn did not affect business in the least. On the contrary, it was a good thing for the trades for it has shown how safely our varied industries are being conducted. It shows that the prices of merchandise are not inflated, and that the selling prices are so close to the cost of production that there was no chance for a sudden drop.

This fact should inspire the mercantile community with confidence, and banish the feeling that some merchants have entertained concerning a disastrous business year.

Mr. Adams, of Knight, Adams & Co., remarked to me, that he would not have known there was a panic if the papers had not said so much about it. He seems to think it was a poor panic for a big city like New York to work up. "It has not stopped collections," said he; "and our business is running along just as smoothly as we want it. Our travelers on the road are reporting good business for present delivery, and orders for holiday novelties are also being numerous booked. Comparing the past four months with the same period of former years, we find the volume of our business to be much greater for this season. Of course, we don't expect to be rushed all summer, but when trade does lighten up we will take a few weeks' vacation and then get ready for the fall trade." Mr. Knight, who is now in Europe looking up novelties for the holiday trade, is not expected back until the middle of June.

Clague, Wegman, Schlicht & Field, who are so energetically pushing the Shannon letter files and cases throughout the country, have found the Eastern States such a profitable field that they have established a Boston agency. Carroll N. Clark, 27 Franklin street, is the agent. A full line of cabinets and files will be constantly kept in stock at the Boston

headquarters, from where dealers and jobbers can supply their wants as cheaply as at the factory. Eastern buyers will even make a saving on freights. This firm has secured injunction against the manufacturers of the "Eclipse" file and the "Best" file, whose several devices, it is claimed, are infringements upon the patents covered by the Shannon file.

The Davidson Rubber Company, of this city, has also been compelled to resort to the courts to protect its "velvet erasive rubber," as other manufacturers, recognizing the popularity of this company's goods, were endeavoring to profit thereby by supplying the trade with a similar article. A decision rendered some months ago fully sustained the claims of the Davidson Rubber Company, and granted damages against the infringers. The court, moreover, ordered the books of the infringing manufacturer to be submitted to the inspection of the Davidson Company, and to prevent such an examination the case was again opened. But a late decision, of two or three weeks ago, was again favorable to the Davidson Rubber Company, and the books, giving the names of all persons to whom the infringers sold goods, with the amounts of the purchase, are now being scrutinized. Whether or not such parties as bought these illegal goods will be prosecuted is a question which the Davidson Rubber Company is not yet prepared to pass upon. Where dealers continue to trade in velvet erasive rubber other than such as is made by the Davidson Company, prosecution must be expected.

Carter, Rice & Co. call the attention of the trade to their new Imperial and Royal Antique cover papers. Their announcement will be found in the display columns of this issue, and wide-awake printers will note it. These novel cover papers have "caught on" quite surprisingly here, and they would certainly take well elsewhere if the trade would only have samples to show patrons. These papers come in various colors, and samples can be had by addressing the firm.

Something new in the way of a handy paper binder is just being introduced, and I see no reason why it should not have a ready sale. As soon as it becomes known, it will be in big demand, for the device is very simple, and its usefulness will be readily appreciated. Its cheapness will, moreover, make it only the more popular. This little device, which is called the "Ready Binder," consists of two parallel wires, which are fastened together, midway of their length, by being twisted one wire about the other. The ends of the wire are bent over, forming small clamps, which are tightened or loosened by moving a small ring along the wires. These binders are made in various lengths, ranging from five inches to two feet, the smaller sizes for office use, the larger for binding newspapers. The ready binder is not cumbersome like many others; it will hold one sheet or fifty; does not mutilate the paper, and is readily adjusted. F. H. Little, wholesale dealer in stationers' specialties, 59 Cornhill, is the selling agent.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 666.)

manufacturers, of this city, report that this season's trade in writing fluids is very large, and, in view of this being a campaign year, the number of inkstands to be kept replenished must multiply, and in consequence a good ink trade is expected for the whole year. The reputation of Carter's inks is too well known to the trade to need testimonials relative to their merits; and if there is a stationer in the United States who has not Carter's inks on his shelf, it must be because he is located in some isolated spot where pens are not in use. With thirty travelers on the road the country is pretty well covered, but the facilities of the house are fully equal to the demands which its traveling representatives daily make upon it, and orders are filled with true business promptness. Mucilage is another specialty of this house, and the same standard of excellence found in its inks has made Carter's mucilage equally popular. Carter's Arabin is a later product of the mucilaginous order, and this is a gum preparation that the manufacturers claim can not be equalled for sticking qualities by anything in the market. This Arabin differs from ordinary mucilage in that all of the impurities are extracted from the gum and only its sticking particles are admitted into the preparation. In appearance, Arabin has the color and consistency of strained honey. This preparation is presented to the trade, not as the cheapest article of its kind, but as the very best, and when the best is wanted, Carter's Arabin is called for.

The new building situated on Columbus avenue, into which Carter, Dinsmore & Co. have lately moved, is a magnificent structure, and is well supplied with every convenience for the manufacture of their inks, mucilage and other specialties. At some future date I will contribute to THE AMERICAN STATIONER a description of this model manufacturing establishment.

A. L. D.

AUGUSTA AUTOGRAPHS.

(FROM OUR REGULAR CORRESPONDENT.)

AUGUSTA, Ga., April 25, 1884.

Business has been very quiet here for the last two or three months in every kind of business, and, of course, stationery goods being a great deal composed of luxuries, have had to suffer. The valentine trade was not so good as usual, according to Pendleton's and Richard & Son's account, although they took as much money, as more high-priced ones were sold. The comic valentines are about played out, as they were mostly used as a medium of spite and vulgarity. The same can be said of Easter cards as to sales. I don't think they take as well now as formerly, and the stationers will be afraid to lay in as good a stock henceforth without they could get them on sale.

Richard & Son say that they have done very well with their printing business, and altogether they have no reason to complain; but from what I have seen business does not seem to have been half so good as it was last year.

We had very bad crops last season owing to drought. I hope it will not be the same again, although we are having about the same weather, raining heavily every few days, causing the Savannah river, that separates this State from South Carolina, to rise very high some nine times since January, flooding a number of river plantations every time, causing a great deal of damage to the grain crop and drowning it out.

We have had a great deal of delightful weather; gardens are crowded with fine roses and other beautiful flowers, as well as plenty of early vegetables. Fine strawberries are plenty at from 15 to 20 cents per quart, and from the appearance of the trees I think that there will be plenty of fruit in this section.

The *Chronicle and Sentinel* have lately connected a paper-box manufactory with the book-binding, and are turning out excellent work from common to very fine papeterie boxes, some as handsome as can be made anywhere. I believe that they are doing very well with them.

The Southern poet, Paul H. Hayne, has been living about sixteen miles from here since the war, and is very popular, being a very pleasant gentleman as well as a fine poet. They have named a literary club after him in this city, which is quite a success, and they gave him a reception on the night of the 22d ult., which was quite a *recherche* affair. A large number of the first citizens of the place were present. Some beautiful floral emblems were presented to Mr. Hayne, among them a lyre bearing his name in white flowers, the background being violets. Recitations and original papers enlivened the evening, besides an address from the poet, which was warmly received. The evening's entertainment was concluded with a plentiful supply of good things for the body, as the mind had been well supplied previously.

I paid another visit to my friend George A. Oates, who showed me a fine oil painting of Perry's victory on Lake Erie, by Gamaray, 1822, who was painter to the Admiral of France. It is the most consistent picture of the affair I have ever seen, showing quite a mosquito fleet, instead of the three-deckers represented in some of the English engravings of it. Some of Commodore Perry's family ought to have it as a memento. It is a fine painting, in first-rate order, sight size 23x34 inches.

Lawton B. Evan, A. M., Superintendent of Public Schools in Richmond County, has written a very full history of Georgia for the use of students, from the earliest discoveries and settlements to through the year 1883. It is a work that is very highly spoken of and is recommended by the highest faculty. The book is concise, easily read, and the author has tried to make it accessible and acceptable to all classes of citizens. It contains 350 pages, numerous fine illustrations and several valuable maps to show the territorial changes. Then it makes Georgia the prominent feature, but keeps the general history of the United States before the reader's mind. It is handsomely gotten up by John W. Burke, Macon, Ga.

MILL BANK.

TORONTO ITEMS.

(FROM OUR REGULAR CORRESPONDENT.)

TORONTO, May 17, 1884.

I parted with you last week at the door of the Methodist Book and Publishing House, and, if you please, we will now step in next door to see Rowsell & Hutchison. Everybody knows this old house. Mr. Hutchison is sure to be there. He is always there, so far as I know, and I suppose that is one of the secrets why this old house keeps on its prosperous way. Rain or shine it is always busy, and, go when you will, you will find it with all it can do.

A few steps farther on is the old standard house of Brown Brothers, a name as familiar to Canadian trade as "Household Words." I don't know whether Mr. Brown ever has any pains or aches, or whether he ever gets fagged or lazy. If he does he manages to hide it, and, like his neighbor above, you are sure to find him around early and late; and if you ever should happen to itch for a growl about the weather and a whine about things being flat, or very flat, don't call here, because these terms are not in their vocabulary.

Now, let us away and have a crack wi' our auld Scotch friends, James Bain & Son. I have told you before that the senior of this firm is from Auld Reekie, and though getting to be an old man, his vigor is not abated, and about now, in the early part of the day, and in the after part, you will find him in his garden and green-house looking after his flowers and plants, of which he has a fine collection. Donald, the son, looks after the business, and he informs me that their trade is as good and, perhaps, a little better than last season. They are publishing a volume of poems by Isabella V. Crawford, a Canadian poetess.

Buntin, Reid & Co. This is another old house whose reputation for solidity and fair dealing stands second to none in the Dominion. Mr. Reid, like his confreres referred to, fulfils to the letter the Scripture injunction, "diligent in business," and you seldom fail to find him around. He informs me that trade is about as usual for this time of year, and that collections are a little behind the mark.

I called in at the Toronto News Company and found Mr. Irving just leaving for Montreal. He had no time to give any particulars, but said, "Our trade is better than last year," and while there I ran across my old friend, T. J. Day, of Guelph, and proceeded to interview him. Mr. Day is from the Green Isle, and sometimes always don't say what he means, or puts his answers in a way that may bother you to get at a right conclusion. Nevertheless, he is one of the most pushing and successful men in the trade west of Toronto. He had no complaints to make.

Williamson & Co. are getting their new place in order, and when completed will have a very attractive store and one of the best stands in the city. They are well pleased with their success so far, and are very sanguine as to the future.

Hart & Co. report business well up to the mark. They have the Canadian agency for the Globe Files Company, and are turning out

some fine work, all made here. They seem to make them move, judging from the number I see going out and coming in. The firm is energetic, and I believe the best in town to push anything of the kind, or, in fact, any special and new lines connected with the trade.

Copp, Clark & Co.—Mr. Clark said to me that their import orders for delivery were very

large, but that in other respects their trade at the present time was quiet, and collections not good. However, he thought this was to be attributed very much to the season, &c., and anticipated a satisfactory change very soon.

W. J. Gage & Co. say that trade is a little quiet, but improving. Prospects ahead are

brightening up. Collections are better, and they look for a good spring trade.

Alexander, Clare & Cable, lithographers and engravers, say that business is very good. They turn out first-class work, and have in hand several good orders for steel engravings, a branch to which they are devoting considerable attention.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

FANCY HAMMERED BRASS LAMPS.

Herewith are presented some new designs in artistic hammered brass lamps. These lamps are made in the best manner, and will meet a demand for a first-class article. Each lamp has a patent filler, which lifts up, permitting the lamp to be filled while burning. The top of each lamp is hand-chased after an elegant pattern. No. 1 has silver ornaments in the shape of a lizard, bouquet, fancy handles and feet. It has also a duplex burner and

No. 1.

No. 2.

No. 3.

melon-shaped globe. No. 2 has a Persian decorated globe, the design of the body being somewhat similar to No. 1. No. 3 has an urn-shaped body, decorated with landscape scenery engraved on its surface. The globe is fine Scotch Malachite glass, which is furnished in various shades.

NEW PATENTS.

- No. 297,217. Case for Tickets.—Phillips Abbott, Brooklyn, N. Y.

 No. 297,349. Ticket Case.—Wm. E. Chatterton, Troy, N. Y.
 No. 297,378. Ink-Well.—John H. Gifford, Springfield, Mass.
 No. 297,379. Toy Pistol.—Ambrose Gilman, Shelburne, Mass.
 No. 297,391. Mucilage Cup or Holder.—Stephen S.

- Harman, New York, N. Y., assignor to himself and Morris T. Lynch, same place.
 No. 297,396. Combined Apparatus for Attachment to Pencils.—James Hickisson and William Lee, London, County of Middlesex, England; said Lee, assignor to said Hickisson.
 No. 297,420. Fountain Pen.—Albert J. Kletzker, New York, N. Y., and Charles H. Court, Jersey City, N. J.; said Court assignor of one-half his right to said Kletzker.
 No. 297,431. Extensible Clasp for Books.—Jacob Munch, Offenbach-on-the-Main, Germany, assignor to Edward Posen & Co., same place.
 No. 297,464. Feed Guide for Printing Presses.—Wm. B. Smith, Orlando, Fla.
 No. 297,475. Game Board.—Louis P. Valiquet, Bridgeport, Conn., assignor of one-half to Louise W. Strong, New York, N. Y.
 No. 297,484. Paper Box Machine.—Phillips Abbott, Brooklyn, N. Y.
 In box covering or trimming machines, the

combination, with the box-form and the support from which the glue or paste coated strip passes to said form, of a single-bladed cutter arranged and operating to act against the unglued face of the strip at a point intermediate between said box-form and support.

No. 297,525. Feeding Device for Ruling Machines.—Emil Larson and Oscar Hammarlund, Chicago, Ill., assignors of one-third to Niles F. Olson, same place.
 In a pneumatic feeding device for paper ruling machines, a vacuum tube supported by telescopic arms adapted to be advanced or retracted, in combination with spring-actuated pivoted arms provided with angular projections, whereby when these arms are thrown up the tube is forced suddenly back and freed from the paper.

- No. 297,541. Dictionary Stand.—Edgar D. Swain, Chicago, Ill.
 No. 297,556. Device for Manifold Copying.—Heman G. Barlow and John B. Barlow, Grand Rapids, Mich.
 An improved blank for manifold copying, consisting of a sheet of paper, divided into three equal sections by lines of perforations, whereby the sections may be folded upon each other with a single sheet of copying-paper, in such manner that matter written upon one section will be reproduced upon the other two.
 No. 297,573. Interest Calculator.—Arnold Davidson, Brooklyn, N. Y.

An interest-calculating device having parts adjustable one with relation to the other, upon which are displayed a table of interest and different expressions of each of the elements of principal, of rate and of time in the interest-calculation problem, whereby such device is adapted to admit of the variation of the value of each and every of such elements, and thus show any amount of interest sought for.

- No. 297,576. Machine for Cutting Straw-Board for Paper Boxes.—George H. Dickerman, Somerville, Mass.

In a machine for cutting straw-boards for making paper boxes, the combination of two pairs of rectangular male and female dies for cutting the corners of the box-blank, a pair of severing dies arranged to be adjusted toward and from the corner-cutting dies, and two crease-embossing blades arranged upon oppo-

site sides of said severing-dies, and adapted to be adjusted toward and from said severing-dies.

- No. 297,577. Paper File.—William D. Doremus, Washington, D. C., assignor to Edmund W. Woodruff, same place.
 A file holder or box, provided with undercut or flanged groove, and a shelf combined with a T-head coupling-plate or its equivalent, permanently attached to the shelf, and engaged with the flanges of the groove, so as to permit a longitudinal or tilting movement of said box without disengagement at any moment.
 No. 297,618. Paper Holder.—Albert Candy Moore, Belkows Falls, Vt.

A knife connected to the bail and provided with a brake to extend from the knife against the roll of paper, and to be borne against it by the draft of the strip of paper on the knife while the latter may be in the act of separating the paper.

TRADE-MARKS.

- No. 10,087. Metallic Pens.—George D. Barnard & Co., St. Louis, Mo.
 "The arbitrary word-symbol 'Vulcan.'"

REISSUES.

- No. 10,469. Treating and Molding Pyroxyline.—John W. Hyatt, Jr., Newark, and Isaiah S. Hyatt, Morrison, N. J., assignors by mesne assignments to the Celluloid Manufacturing Company, of New York. Original No., 105,338, dated July 12, 1870; reissue No. 5,928, dated June 23, 1874.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. E. Phillips, publisher, Irwin, Col., has moved to Crested Butte.

G. R. Griffen, printer, Osgood, Ind., has sold out to W. T. Goodson.

The *Daily Evening News*, San Francisco Cal., has suspended publication.

Kipp & Co., manufacturers of art novelties, Newark, N. J., have dissolved partnership.

A dissolution has taken place in the firm of McHugh & Spor, bookbinders, New York city.

The Vandalia Paper Mill Company, Vandalia, Ill., has increased its capital stock to \$80,000.

An application has been made to force Wood & Co., stationers, San Francisco, Cal., into insolvency.

Leopold Lehmann, paper-box dealer, New York city, advertises that he will do business under the style of Ludwig Lehmann.

Frelloehr & Stohm, fringe manufacturers, San Francisco, Cal., have dissolved partnership. J. Frelloehr continues the business.

A pretended blind pencil peddler, calling himself Charles Adams, hired Adolphus Brechete, a lad of ten, to lead him around Haverhill, Mass., Tuesday of last week, and kidnapped the boy, taking him off on a train.

Nelson G. Hatch, bookkeeper for Root & Tinker, publishers, was arrested on Tuesday at the Grand Central Depot on a charge of embezzling \$1,200 from his employers. He had just returned from an unsuccessful trip to Troy to get money with which to square up his accounts.

Henry J. Philpott, the well-known free-trader of Des Moines, Ia., is the editor of a new weekly paper, devoted to politico-economic matters and called *The Million*. It already announces a circulation of 1,323, although it was only started about a month ago. The editor boasts that it can safely be depended on as a permanent publication. It is promised contributions from eminent economic writers.

L. Prang & Co. are showing the trade a new line of birthday, Christmas and Sunday-school cards for the fall trade. The designs are by the best artists and are perfect in conception and execution. Four charming landscapes are from the brush of the late A. F. Bellows. They are in his happiest manner, with the tender poetic treatment that especially distinguished his work. Joaquin Miller has especially prepared a poem as an accompaniment to Dora Wheeler's picture, "Christmas Morning," and Mrs. E. Shaw Forman, whose card verses are so well known, has completed a set of poems with special reference to Hamilton Gibson's latest design of the four seasons. A leading card is a frieze design of singing children, by Alexander Sandier, which comes in book form with appropriate carols. A satin screen card shows a pretty design of birds and flowers. The form of this card is novel and tasteful, and it cannot fail to achieve universal popularity. Another very attractive card has a shield of cushioned satin with a design in pansies in rich, natural colors. A plush banner card has a design in roses, while a star-shaped card is finished in plush and has a design of apple blossoms in the centre. A very striking design is a fan-shaped card on fancy-colored plush, with a pretty floral landscape or other design, and swan's-down edging. L. Prang & Co. also deserve praise for the excellence of their plain, folding and fringed cards. Nos. 106, 107, 108, 110, 112 and 115 are especially meritorious. The coloring is true to nature and there is a great variety of designs. Their Sunday-school cards are also of tasteful and appropriate designs throughout, and will be largely handled throughout the coming season. Prang's satin cards will appear this season in a great variety of beautiful borderings of plush, satin and fringe in the newest and richest designs.

Pratt & Heckman, manufacturers of crayons, at Nos. 509, 511 and 513 First avenue, New York city, were burned out on the 15th inst. Their loss is placed at \$10,000; partly covered by insurance.

Miller & Thode have succeeded to the business of Miller, Thode & Waite, bookbinders, Minneapolis, Minn., the latter firm having dissolved.

E. (Mrs. H. N.) Harbach, dealer in stationery, Philadelphia, Pa., was advertised to be sold out by the sheriff on the 22d inst.

The National Printing Company, Worcester, Mass., has sold out to A. D. Stone & Co.

An assignment has been made by J. A. Miller, bookseller, Greenville, Ohio.

Page, Booth & Co., paper dealers, New York, have removed to No. 69 Wall street.

William H. Mumler, treasurer of the Photo-Electrotype Company, Boston, Mass., is dead.

M. V. B. Spencer, publisher of the *Journal*, Fort Wayne, Ind., has sold out to the Fort Wayne *Journal* Company.

Biedinger & Diem, paper dealers, Cincinnati, Ohio, have dissolved partnership. The firm is now Frederick J. Diem.

Locke & Robinson, paper-stock dealers, Worcester, Mass., have dissolved partnership. The business is continued by Robinson, Merritt & Co.

Leopold Morse has been chosen president of the *Post* Publishing Company, Boston, Mass., in the place of Charles Levi Woodbury, who has resigned.

G. A. Leavitt & Co. will sell by order of the assignees, H. T. Coates and E. T. Davis, on June 3, the books, bound and in sheets; also the stereotype plates, comprising the entire stock in trade of the house of E. Claxton & Co., of Philadelphia.

George W. Hyatt is meeting with substantial results in the introduction of his game-register and trump-indicator. It takes up no more space than a playing-card, while it shows trumps, points and games. Mr. Hyatt supplies the register with or without playing-cards.

The copartnership of Clarke & Walter, stationers, &c., No. 22 Bond street, New York, having been dissolved by mutual consent, C. F. Walter gives notice that he will continue the business under the style of C. F. Walter & Co. at the same address.

Charles H. Wright and George A. Raisbeck started out on the road this week with a full line of Phil Hake's Christmas cards and New Year calling cards, new papereries, and also some choice designs in birthday cards. The line has been prepared with the utmost care and will certainly be appreciated by all buyers who are looking out for goods that will sell.

The Globe Files Company reports a steady demand for the Globe clips and "Leader" files, notwithstanding the depressed condition of trade. The board clips are a late specialty, the merits of which the trade is appreciating far and wide. They are made in the most neat and substantial manner, and are a line of goods which are expected to give

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

satisfaction. Every stationer should have them in stock.

Brownell & Co., dealers in art tiles, New York city, have dissolved partnership.

An assignment has been made by Joseph A. Merritt, dealer in wall paper, &c., Adrian, Mich.

Wm. W. Johnson, bookseller, New York city, advertises that he will do business under the style of A. J. Johnson & Co.

Laura S. McCall, dealer in paper patterns, New York city, advertises that she will do business under the styles of James McCall and James McCall & Co.

George B. Davids & Co. are exerting themselves in anticipation of the introduction of some new goods. The firm is meeting with a good demand for its green and other chemical inks, which have proved to be excellent for commercial purposes.

George H. Sniborn & Sons have a very fine show-room and office at their new quarters, No. 69 Beekman street. It is on the ground floor, roomy, and, moreover, is filled with the latest devices in bookbinders' machinery. Buyers should give them a call.

The Pearl Paper Company, at South Hadley, Mass., is offering creditors 25 cents on \$1. The capital stock of the company was \$10,000, and the liabilities are about \$10,000 above the capital stock. The secured claims amount to about \$4,000. The company has arranged to go on. It manufactures manilla tissue and runs one machine.

The paper warehouse of L. C. Woodruff & Co., Buffalo, N. Y., has been levied on by the sheriff to satisfy judgments aggregating nearly \$20,000 found against Mr. Woodruff individually in suits brought by the executor of the estate of the late Lot C. Clark, of New York city. The New York judgments grew out of the lease of the Genesee Valley Railroad to the Erie Railroad. The Erie Railroad paid interest on the Genesee Valley bonds till 1875. Since that time the managers have operated the road as usual, but refused to pay the interest. Mr. Woodruff guaranteed the bonds held by the Clark estate, and hence the suits against him. Meanwhile Mr. Woodruff has been suing the Erie Road, and has won his case in the Court of Appeals. He has judgment against the road amounting to \$240,000. If not paid a levy will be made on the road. There is talk of a suit for damages to be brought by Mr. Woodruff against President Jewett. Mr. Woodruff asserts that his business has been injured and his credit impaired by the sheriff seizing his firm's stock because the Erie Road did not pay its indebtedness.

William Schumacher & Co., paper embossers, New York city, have dissolved partnership. Augustus W. Friess continues the business.

Among the dealers in town during the past week was A. Hahn, a representative of R. & T. A. Ennis, St. Louis, Mo.

W. P. Knight, publisher, Petersburg, Ind., has been burned out. Loss, \$1,500; insured for \$1,000.

O. T. Kendall & Co., publishers, Owensboro, Ky., are reported to have sold out to a stock company.

Rodman & Van Deventer, publishers, Atchison, Kan., have been closed out under a chattel mortgage.

The liabilities of J. B. Wasson, stationer, New Orleans, La., who has asked for an extension, are \$3,700; assets, \$6,200.

E. B. Stillings & Co., stationers, &c., Boston, Mass., have sold out to Edward T. Turner, who continues under the old style.

Somerville & Ivey, printers and publishers, Brantford, Ont., have dissolved partnership. Thomas Somerville continues the business.

Corbett & Co., dealers in pictures, frames, &c., San Francisco, Cal., have dissolved partnership. William Corbett continues the business.

Deputy Sheriff Aarons, through Sheriff's Auctioneer Charles Walters, sold on Saturday last, at No. 140 Nassau street and Nos. 13 and 18 Spruce street, the right, title and interest of Joseph Hart and the Local Publishing Company in the newspaper *Truth*. The sale was made to satisfy executions issued by the courts against the corporation which is said to have owned and published the paper. The judgment creditors, in whose interests the property was sold, and the amounts of their claims were: Richard S. Newcomb, \$5,686.43; Alexander Newburger, \$6,017.72; Leopold Lithauer, \$1,130; Maurice Flynn, \$1,949; Theodore Conrow, \$5,652 and \$1,900. The purchaser was William H. Brown, and the

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

amount of his bid, on which the property was knocked down to him, was \$1,500.

R. E. Bennett, representing McLoughlin Brothers, will visit the Western trade shortly.

R. R. Watson cautions people against buying inferior imitations of "Novelty" fasteners and calls attention to reduction in prices.

The mill of the Woodruff Paper Company, at Dansville, N. Y., was destroyed by fire last night. The loss is \$40,000; insurance, \$10,000.

Lawrence & Baxter, 39 Dey street, have just received a large variety of novelties in pen-wipers, for which they are taking importation orders for fall trade.

Dunham's combined tag and invoice envelope is daily increasing in use, and is being sold all over the country. The manufacturers, Joseph T. Dunham & Co., have removed to 12 Cortlandt street.

Lawrence & Baxter, 39 Dey street, have just brought out this week a new toilet article called "La Papillote" (curl paper). La Papillote being soft and silky in texture is admirably suited for curling the hair.

The annual reception of the employees of Dempsey & Carroll will be held at Washington Park on Friday evening, May 23. The tickets of admission, invitations and dancing programmes are tastefully designed and executed. The order of dance is printed on an azure "hammered" paper, inclosed within a beveled card cover of the same character.

J. B. Ferguson, of J. B. Ferguson & Co., Victoria, B. C., is late of Parsons & Ferguson, wholesale stationers, Winnipeg. He made a visit to British Columbia in January and February of this year, and was so pleased with the climate and the prospects of future business that he resolved to become a permanent resident. The firm's store is in a brick block adjoining the post-office, and is said to be the best stand for the business in the city.

An improvement made in the Lambie Dictionary Holder, controlled by French & Choate, consists of an arrangement by which the holder is securely locked when closed, thus holding the book in compact shape and doing away with the friction in opening and closing, which has been an objection heretofore. It is claimed that in its new shape Lambie's Dic-

tionary Holder cannot be equaled, and its steadily increasing sales are a proof of its great utility.

S. S. Stafford's violet black ink is a copying ink from which two copies can be taken. His "Commercial" ink is a dark blue writing fluid, which turns jet black, but does not yield a copy.

About Microscopes.

"The simplest of all simple microscopes," said a dealer, "are the watchmaker's glass, the engraver's glass, the common pocket glass, with from one lens to three lenses, the achromatic triplets for the watch-guard, and the thread counters. In that class is the collector's pocket microscope, like this, consisting of a Stanhope lens in a frame with a glass cover, forming a live box in which the object may be placed. It has a power of about 25 diameters, and is useful on collecting excursions. Animalculæ, diatoms, algæ and other objects can readily be examined with it. In the same class are microscopes with glass cages for holding seeds, and the flower microscope with forceps for holding objects. Of microscopes with stands this is simplest," taking up a compact little instrument. "With its three lenses combined it has a power of 33 diameters, which is sufficient to show many of the larger animalculæ in pond or ditch water, the scales from a butterfly's wing, pollen grains from plants, and thousands of objects. It packs into a box that acts as a base for the upright brass stem. An animalculæ cage, a pair of brass forceps, a watch-glass, two plain glass slips, and a prepared object go with it. It sells for \$3.50. This school microscope is nearly similar, but it works easier, and is adapted for educational purposes. This dissecting microscope, with a large firm stage, you probably do not care to look at. Of the compound microscope, this one, selling for \$2.50, is the simplest. It is, as you see, of polished brass, with one eye-piece and one object glass, magnifying, when combined, about 40 diameters, or 160 times.

"Microscopists understand magnifying power in diameters. The power is calculated by squaring the diameter. Here is a powerful instrument, with a hinged joint, for household use. Its two object glasses magnify from 900 to 10,000 times. Beneath the stage is a con-

cave mirror for the illumination of opaque objects. The prices range from \$5 to \$12. For an amateur a good instrument can be bought for \$23 to \$28, which has a stage with adjustable spring clips, a revolving diaphragm of four apertures beneath the stage, and a concave mirror for use under or above the stage. It can magnify 27,000 times, and with the addition of a fifth object glass, with adapter and cap, 129,000 times. Dr. O. W. Holmes, of Boston, designed a neat little microscope for use by classes. It is very simple, a common lamp furnishing the illumination. A folding microscope of powers ranging from 40 to 140 diameters for tourists can be bought for from \$15 to \$22. For students in histology and vegetable anatomy we have instruments that range in price from \$55 to \$335, and when one of the cheapest is furnished with a condenser, polariscope, camera, lucida, stage micrometer, spot lens, zoöphyte trough, live box and forceps, it is complete for almost any investigation.

"The binoculars have eye-pieces that give 500 diameters, or magnify 250,000 times. This binocular," carefully handling a superb instrument, "was made in England, and I suppose it is the most perfect of all microscopes. It has all the latest improvements in construction and it has every possible adjustment. The stage and all the optical arrangements are carried by the limb, which is sufficiently solid to practically abolish vibration. Vibration, by the way, is one of the worst troubles that a microscopist has to overcome. In using the highest powers of a superior instrument the least vibration will prevent satisfactory examination. Some microscopists have their instruments mounted on tables resting on foundations of stone built up through the house and not allowed to come in contact with floor or ceiling. That gives you an idea of how fine the adjustment must be. This instrument has a compound goniometer stage, graduated on a silvered ring of 360°, with complete rotary and rectangular movements and new centring adjustments. The sub-stage, with centring and focusing adjustments, is removable by a lateral slide for illumination by a mirror. The instrument, with two pairs of eye-pieces, three object glasses, condensing-lens, stage-forceps and hand-pliers, packed in a mahogany case, costs about \$335."

Royal
Antique
Cover

THIS line of paper is very tough and firm, a strong linen middle being coated with a soft stock, and the spongy surface gives to the paper its peculiar striking effect. Besides covers, this paper is being largely used for circulars, programmes and menu cards, and it is found quite effective for such uses. The "imperial" papers are the rougher and more novel, while the "royal" are a little smoother. These papers are put up crated in ream packages. Five colors are carried in stock; old gold, brown, green, blue and terra-cotta.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - - - 10 Cents.

NEW YORK, THURSDAY, MAY 22, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

A NEW dress adorns THE STATIONER this week, and our readers will, we are sure, welcome us in our new attire. A change in the style of the type will be observed, and, as in the past, we shall strive in every way to make THE STATIONER otherwise attractive to its patrons.

THE statistics of our exports of paper and stationery to non-European countries during the fiscal year 1883, compared with the figures of 1880, show that we exported an increase in values of \$79,307, and this, too, despite a great decline in prices. It is proof, therefore, that the increase as to quantities has been in much larger proportion. Although the increase for three years may not seem to be very great, it has been satisfactory, and assuredly shows that there is steadiness and vitality in this branch of our export trade.

THE bankruptcy law has met with a temporary defeat in Congress, and one which seems to indicate its final rejection. On a motion made to take it up there were not votes enough in its favor to bring the bill directly before the House. We confess that we do not understand the exact nature of the opposition to this bill. None of the reports disclose the character of the objections, but it is noticeable that these are most urgent in certain localities where, for the most part, it may seem desirable that an equitable method for the distribution of bankrupt estates should be provided.

OUR Cincinnati correspondent furnishes an example of what can be done by men who really want to do business even at the dullest of times. He cites the instance of a manufacturer who, despite the fact that public confidence in financial security has been shaken, and notwithstanding that others are calling trade dull and remarking upon the slowness with which bills are met, is able to say that he is doing a good business and that he finds collections easy. Now, what is the suggestion which follows? We find it in the remark of our correspondent, who says that the manufacturer alluded to *advertises* in seventy papers. Ah! There you have it! Activity and intelligence combine to make the perfect business man, and it certainly does seem that the combination is found. There is no boasting about this. The statement shows discrimination, and we are sure that the manufacturer was able to place his goods favorably and profitably. If there are those whose prejudices forbid them to see the force of this suggestion, we would not that they should strain for light that will never come to them; but to those who, seeing, believe, and have neglected to take advantage of

means provided for them, we commend the example and advise them to profit by it.

ROUNDBABOUTS.

BY THE TRADE LOUNGER.

This is an old, old story: A young man sent fifty cents to a New York advertiser to learn how to make money fast, and was advised in reply to glue a five-dollar greenback to the bottom of his trunk. Wasn't it worth fifty cents to know this?

An ingenious novelty is called the adjustable calendar and eraser. It is intended to fit any pencil or pen-holder. It accurately indicates the day, month, date and year.

Notwithstanding the dullness in trade since the first of the year, it is pleasant to notice the hopeful view which dealers and manufacturers take of the future. There seems to be no lack of confidence. The production of holiday novelties is as active as ever, and importers of fancy goods are said to have in contemplation the introduction of as large a variety and collection of novelties as the trade have seen. Indeed it would not be surprising if the various novelties offered this season surpassed in abundance and richness those of previous years.

One of our acquaintances recently received a present from his employer of a silver-headed monogram cane. Dealers who can afford to give silver-headed canes to their employees must be prepared to take a hopeful view of trade, notwithstanding this dull period.

Here are some later Treasury decisions affecting the trade: Clasps and ornaments for albums, being, in fact, plated or gilt articles or wares, are dutiable under paragraph 210. Now, what is paragraph 210?

The value of paper boxes or cartons containing artificial flowers and ornamental feathers to be included in the dutiable value. This keeps the box trade straight.

Pieces of horn, cut to proper lengths, and stained or dyed, intended to be made into knife handles, are held to be dutiable at 30 per cent. ad valorem, under paragraph 399, for all manufactures of horn not specially enumerated or provided for.

Shell money bags or purses, being small fancy bags or reticules made of shell, cotton and silk, and intended for use by ladies as purses or receptacles for money and other valuables, are dutiable at 35 per cent. ad valorem under paragraph 410, for card cases, pocketbooks, snuff boxes, and similar articles of whatever material composed; &c.

So-called "flitters," used in the manufacture or decoration of wall-paper, window-shades, &c., as a substitute for bronze-powder, are dutiable by assimilation to bronze-powder, under paragraph 196.

The daily papers announce the death of Horace Taylor, but the deceased—an estimable gentleman, I believe, is not the well-known and respected John street paper dealer, who, although he had a sunstroke last year, is in good health. * * *

Somebody tells me that a dinner is on the tabula (I had almost said tapis, but I hope that it will not go so far,) to-night. I am even told that if I behave myself I can attend. Well, I think that I'll go. Perhaps say suthin' about it next week. * * *

Charles C. Overton is the publisher of *The Brighton Journal*, of which the first number has just been issued. It is to be a weekly publication, devoted to seaside matters. The *Journal* presents a handsome typographical appearance, and is printed on tinted paper. It is full of interesting selected matter, and shows a good advertising patronage. Mr. Overton, it may be remarked, is a brother of R. H. Overton, the well-known paper stock broker.

ANSWERS TO CORRESPONDENTS.

C. asks: Where may Government parchment legal cap be obtained?

Ans.—The brand is owned by Boorum & Pease, 28 Reade street, New York, but, because of the difficulty of making it uniform, it is not now manufactured. Boorum & Pease have on hand a moderate quantity of some sizes of "Government parchment," of which they will send samples, if desired. We don't know of any other house which has a stock of it.

F. lately inquired for address of Benton Manufacturing Company.

Ans.—We have secured it. Office, 171 Broadway, room 21; factory, 291 West Eleventh street. We thank our informant.

M. S. asks if buffalo-horn can be had in sheets about 1-16 inch thick?

Ans.—E. S. Kuh, 67 Pearl street, New York, can supply you; also Bock & Co., 61 Pearl street, New York.

The Booksellers and Stationers' Provident Association.

At the last meeting of the Board of Trustees the following named applicants were elected to membership:

--	-------

Henry B. May, of Lee, Mass., who was missing nearly four weeks, has been found. His father, S. S. May, and his brother, S. S. May, Jr., were telegraphed to from Philadelphia on Thursday evening of last week to go on there from here, which they did, and they telegraphed on Friday that they would return with the missing man on Saturday. He reached home late Saturday night. There were 300 people at the depot to welcome the lost man and guns were fired and whistles blown in honor of his coming. Many went over to his residence and he was called out and made a little speech.

It has been decided by the authorities at the Indian Museum, South Kensington, London, to put up, in a place where it can be conveniently read, Dr. Leitner's key to shawl-writing, as furnishing some clew to the full meaning of the shawls shown in that exhibi-

tion. Dr. Leitner was the discoverer in 1872 of the secret of the language of the weavers of Cashmere, and he has described the numerals and names of colors used in the manufacture of shawls at some length. The subject is of considerable interest in connection with the decay of what used to be one of the most flourishing industries in northwestern India.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, May 21, 1884. }

THE MONEY MARKET.—The money market has reflected an improved condition of financial affairs, returning confidence, and a steadier as well as healthier tone, with the tendency toward greater ease and lower rates for call loans, which have been made mostly at 6 per cent., but at the close money was offered at 2 per cent. on stock collateral. Time loans nominally quoted at 4½ per cent. Commercial paper quoted at 5½ per cent. discount. The stock market is gradually recovering from the effects of last week's gale, and although prices still show considerable irregularity, with frequent fluctuation, a much healthier tone prevails and a good deal of substantial buying is reported of both stocks and bonds by parties who have long kept away from Wall street, as well as upon foreign account. Government bonds advanced early in the week, but left off yesterday a fraction lower. Railroad bonds have been in fair demand, but prices have shown considerable irregularity. Foreign exchange was firmer, until about the close, when it was weak and lower, and actual business was transacted at lower rates. Commercial bills are still scarce.

THE PAPER MARKET.—The past week has been characterized by no greater activity in paper than was recorded for several weeks which preceded it. Dealers' and consumers' wants do not increase, and the production of all grades continues to be more than sufficient to supply existing requirements, yet prices throughout appear to hold to the same steady line of values which have been a prominent feature for some time past. General trade is still more or less under the severe test to which the financial difficulties in Wall street subjected it last week. It is scarcely to be expected that the effects of such a shock as was then experienced would be easily overcome, and although the experience of the past few days amply demonstrates that the commercial and industrial interests of the country have not been seriously affected thereby, it will take some little time for lost confidence to be entirely regained and for the reaction, which will in all probability follow, to become thoroughly established. The first indications of a rising temperature are apparent, but it must not be forgotten that the mercury of finance has been very much depressed, and a great deal of lost ground will have to be recovered before the position occupied two weeks ago is reached. It is very likely that for several weeks to come the movement in every department of trade will be even slower than it was before, and even the ordinary operations of business are likely to be characterized by what under other circumstances would be considered over-caution.

THE STATIONERY MARKET.—The general quietude which characterizes trade at this season is only a continuation of the depression which has been so noticeable in all lines of business since the first of the year. But the dullness is due more to natural causes than an unhealthy state of the market. That the trade generally so regard it is shown by the preparations which are being made for the fall season. Manufacturers have in preparation large lines of new goods and a remarkable degree of confidence is shown all around. The new goods for the holiday season, such as birthday, Christmas and New Year cards will be of unsurpassed beauty and richness, nor will there be any diminution in production in comparison with other seasons. The toy trade shows a fair degree of activity, but it is mostly due to re-orders, the bulk of the business having been done. There is a steady movement in fine stationery and a few dealers are very busy, but trade as a general rule is unevenly divided, the demand being for strictly fancy goods, standard goods being hard to sell. There is no particular activity in school stationery, but business is fair, while the school-book trade is dull.

THE LOCKWOOD PRESS.**Annual Dinner.**

The annual dinner given by Howard Lockwood to the members of his staff was enjoyed at the Lotos Club on Wednesday evening. The special guests of the occasion were: Geo. L. Pease, President Stationers' Board of Trade; B. Richardson, Vice-President Silk Association of America; D. P. Crocker, Treasurer American Paper Manufacturers' Association; Alfred Selman, of the American Watch Company; W. H. Forman, editor of *The Manhattan Magazine*; S. C. Force, of I. & C. Moore & Co.; Francis Spies, Consul for Ecuador, and Edward C. Anderson, of Anderson & Stanton, and Col. Henry C. Lockwood. About thirty in all sat down to the table.

The dinner was handsomely served, and flowers made a beautiful adjunct to the table. Following is the

After the coffee, Mr. Lockwood pleasantly recurred to the fact that this was the annual symposium. He said that at the last preceding gathering he had adverted to the fact that no new journal had been added to the list of publications of the Lockwood Press; but on this occasion he was called on to say that another paper had joined the existing fraternity, and that it represented the most extensive mercantile and industrial interest of the country—the textile industry. But in bringing this forward the first fruits of the Lockwood Press had not been forgotten, and having present a member of the paper trade and a prominent manufacturer, he gave the following toast:

Paper: The waterleaf of civilization; its varied uses and diverse applications proclaim it the most important outcome of industrial production:

Calling upon Mr. Crocker to respond, that gentlemen said:

"I can assure you that I arise with great diffidence, knowing that most of you are engaged in literary life. I feel quite like getting

under the table, and I wish that I could get under the table. I have done my part toward it, and I can only regret that I have not yet gone so far as to attain that position. I was here a year ago, and had the pleasure of meeting you, and cannot say that I regret it, although I have heard a great deal about it, and what I said on that occasion, since. Our host seems to expect that I am a sort of gas-bag, and ready to get off anything at a moment's notice. A friend whom I met on the cars coming here told me that he had only a little while before left my brother's office, where he had taken up a copy of the *Paper Trade Journal* in which he had read a speech made by me a year ago. This is certainly complimentary to the *Paper Trade Journal*, and indicates that it is so much appreciated that it is kept. I have had a square meal. In the present state of the paper-making business, paper makers ought to be entitled to one square meal a year; but without the assistance of our host, I am fain to say that I could not have had even that. You here are ink slingers and I am a rag grinder; but I am not ashamed of my calling."

Mr. Crocker then reviewed briefly the history of paper making from its earliest inception, and went on to say that as paper, in the language of the toast, has been called the water-leaf of civilization, so he might say that but for paper, and the immense advances which have been made, especially of late years, in the art of paper making, in its processes and machinery, and in the securing of the fibres, civilization and literature, the newspaper, and indeed all of the arts, would scarcely have made the progress which they have made, and that this country would not have advanced as rapidly in industrial art and material prosperity as it has. With the introduction of wood as a fibre, we have been able to cheapen paper. Paper makers now utilize from 25 to 75 per cent. of wood in their product—that is, in the commoner grades and in paper intended for newspapers. The finer writings are yet a pure rag product. The paper manufacturers have perfected the art of paper making to meet the demands of the printing press. The lightning press would be useless without the lightning paper machine, which rolls off, at the rate of over 200 feet a minute, a continuous web of paper to meet the demands of the world.

Mr. Lockwood announced as the next toast: "The Stationer; complex in his relations to the public—commercial, legal and political."

Calling attention to the fact that there was present the President of the Stationers' Board of Trade, he invited George L. Pease to respond. Mr. Pease said:

MR. LOCKWOOD AND GENTLEMEN OF THE LOCKWOOD PRESS,—You were very kind to invite me to take part in these festivities and assist in celebrating your twelfth anniversary—especially so as I have been with you on similar occasions twice before. Perhaps my friend Lockwood may have had in mind the old adage, "Three times and out,"—if so, gentlemen, I am far on the home-stretch (and I pray I may not be stretched before I arrive home to-night). In looking back upon these pleasant

reunions I have been pleased to see the great interest existing between the different departments of the Lockwood Press, from the head down through the whole line—and permit me to congratulate you all upon the change of your office lately made—your new quarters are light, airy and spacious; large enough to not only accommodate your present requirements, but room enough for the large increase you are sure to have in the future, if the present growth is any indication. I suppose Mr. Lockwood would like me to deliver a long, dry speech on National, State or Trade matters, but I will not, as it does not require a keen eye to discern that you are full, chuck-full. [Laughter.] Excuse me, gentlemen, allow me to finish my sentence—full of good-humor and good cheer, and not in a state of mind to receive dry speeches.

If I were so inclined and the situation favorable, I should hardly care to undertake the task, with the eye of Colonel Colvin resting on me, as I consider him a great expounder and authority on all affairs pertaining to National, State or Trade matters—a regular magician or hand-organ, capable of grinding out tunes on any subject, by merely setting the switch right and turning the crank. Mr. Lockwood, I will bid adieu to the Colonel, and will only stop to say to you, that your publications need no compliments from me, as they speak for themselves each week as they are spread before your readers. So I will pass down the line, raising my hat to "Dandy" and the "Lounger," and beg of them to be easy in their reports of these festivities and tell no secrets that have happened here to-night. The compositor and pressman need no praise or word of encouragement from me; their praise comes from all readers as their productions are presented weekly. I will now pass out, merely giving the employees of the counting-room a nod, as of late I have but little interest in that department, having ceased to collect steam-power bills from them—and only come in contact with them when they desire to collect an advertising bill. Thanking you, gentlemen, again, for your kind invitation, and wishing you many years of prosperity, and

those of you that are married and entitled to same, large families, not excepting Mr. Lockwood.

Mr. Lockwood then stated that there was a member of his staff who usually participated on occasions of this kind, but who last year was unable by illness to make himself heard. He called upon John C. Gallagher, who would read a poem.

Mr. Gallagher then read a poem which abounded in hits at different members of the party present.

Mr. Lockwood referring to the fact that the development of the American export trade was daily more and more engrossing the attention of American manufacturers and merchants, invited Mr. Selman, of the American Watch Company to make some remarks upon the "Export Trade."

Mr. Selman said that at the outset he would express his thanks for that excellent publication, *The American Mail and Export Journal*, which, emanating from the Lockwood Press, had always given utterance to truthful remarks. He complimented its editorial management, its excellent typography, and its general adaptability to the use of the American exporter. He never had any hesitation in trusting to information gathered from its columns as being strictly authentic, and it had always been gratifying to him to refer to that paper and to abide by its statements as good and solid. He considered it an A No. 1 journal.

As to foreign markets, he desired to say, from quite an extended experience, that the people abroad will not readily accept new manufactures from a new country. In all markets where competing nations have secured a foothold the American merchant and exporter is considered as an unlawful intruder, and his goods are looked upon as illegitimately on sale, as if he had no right to come in and contest the field of commerce with the people of other countries. It was important to satisfy the foreign buyer, and it was the duty of American manufacturers to consider the requirements of foreign markets and to endeavor to meet them. The American manufacturers

THOMAS W. PRICE COMPANY, 505 Minor Street, Philadelphia.

THE NEW YORK NEWS COMPANY,

No. 20 Beekman Street, New York,

Have established a first-class service for the dispatch of **NEW * YORK * DAILY * PAPERS** BY FIRST MORNING NEWS TRAINS. Weekly Periodicals, Monthly Magazines, Books, Stationery and other orders requiring careful and speedy collecting. Correspondence invited.

had two things to fight against. One of these is cheap labor, but in this part of the contest for supremacy he is able to overcome by the better quality, durability and elegance of his goods. It was an old axiom that there is "always room for improvement." Daniel Webster paraphrased it by saying that there is "always room on top." Americans have invariably tried to keep on top, and have been quite successful in so doing. By means of very judiciously-edited papers, among which *The American Mail* is foremost, this country has succeeded in impressing foreigners with the value and usefulness of its products. Several lines of American goods are eagerly sought for abroad, and there are others which could attain equally high favor; and one reason why American manufactured articles have not found proper support abroad is because the American manufacturers have not made the proper effort. The other difficulty against which we have to contend is the lack of direct communication. England is enabled to extend her commercial conquests by means of innumerable steamer lines running to every port where trade is possible. There is a great necessity for shipping direct, and should we be able to obtain the facilities for direct shipment American manufacturers could save enough in the cost of trans-shipment to make it profitable for them to sell their goods, even if compelled to pay higher charges for freights.

Mr. Selman thanked the company for its attention, and heartily wished the Lockwood Press all of the success which it merits.

The next toast was announced as follows:

"Literature and its auxiliary forces as related to popular education," and Mr. Forman, editor of the *Manhattan Magazine*, was asked to respond.

Mr. Forman, returning thanks, said that he was a representative of a philanthropic enterprise which exists solely for the propagation of literature and fine printing, and not for filthy lucre, money not being in his thoughts. His intercourse with the Lockwood Press was chiefly in its upstairs department, and he did not meet Mr. Lockwood so frequently as he did the superintendent of the printing-office; but he generally came in contact with the head of the Lockwood Press when called upon to give his autograph as a reminder that he existed. He said further that he had been associated for eleven years with printers. The prayer of Ajax to the Sun was to give him light. It was light that he wanted, and it is light which the printer gives. He had as much respect for the boy with a soiled check apron, disfigured, perhaps, with ink-stains, who called upon him for copy, as for the man who wore the surplice or the garb of a soldier. He sometimes felt called upon to ask who is the greater, the artist to whom we are so much indebted, or the printer who by his genius and industry brings out all of the results of the artist's work. That the educational power of the artist and printer combined to bring out the best efforts of literary ability cannot be gainsaid. He hoped that the Lockwood Press would live long and flourish, and that the *Manhattan* would be long associated with it.

Mr. Lockwood called upon Mr. Charles K. Hammitt to respond to the toast, "Trade Journals—Their relation to the Mercantile and Manufacturing interests."

Charles K. Hammitt responded to this toast, following out the line of thought suggested. [Mr. Hammitt's remarks will appear next week.—Ed.]

Other remarks were made by Col. Henry C. Lockwood, Edward C. Anderson, and others, and the party broke up with mental and physical content.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

ESTABLISHED 1892.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

OBITUARY.

WILLIAM RADDE.

William Radde, senior member of the firm of William Radde & Sons, importers and publishers of German books at No. 62 Reade street, New York, died on Monday at his home, No. 327 East Fourteenth street. Mr. Radde was well known in German literary circles, and was connected with several German organizations, also the Hahnemann Hospital. He was also quite a well-known local politician, having served one term as an Alderman.

The funeral took place on Thursday afternoon at one o'clock. The services were conducted by Rev. Dr. Edward F. Moldehnke at the Murray Hill Church, corner of Fortieth street and Third avenue.

Bog oak, which the chemical action of the peat water renders perfectly black, is very rarely obtained in a sound state, and in most cases the outer portions of the tree or log are rotten, and useless even for fuel purposes. When laid up for use, care must be taken that it is not placed in the open air, lest it may, from the sun's rays, become open and shattered into chips from end to end. To preserve it, it must be put into some cool place and left to dry gradually, and when properly seasoned it must be cut in lengths of from two to four feet, and these lengths be split again and the sound parts removed from the unsound. It takes from four to six years to season some specimens, as in many instances the wood is found at a depth of eight feet and sometimes ten feet under the surface. The finish is not quite perfect until the article has been for some time in use, and the longer, the finer the article seems to be, no matter whether used as a personal or table ornament.

Among the prizes offered by the French Academy of Sciences are several of peculiar interest to American investigators. In applied mechanics, for example, there is the Fourneyron prize, to be given for the best study, both theoretical and experimental, of the different methods of transplanting force to a distance; also a medal prize, valued at three thousand francs, to be awarded in 1884, for a mathematical solution of the problem "to perfect in some important point the theory of the application of electricity to the transmission of power." The Borden prize, to be awarded in 1885, is also a medal of the above named value, and is offered for a research into the origin of electricity in the atmosphere and the causes of the great development of electric phenomena in storm clouds. As usual, these prizes are open to all nations.

"To produce a fine imitation of crystallization," writes M. F. Carpenter to the *Artisan*, of Chicago, "place a sheet of tin plate upon a smooth, level surface; sprinkle tartaric acid over the sheet, and with a clean cotton cloth wet in clean water, rub long enough to cause the moisture from the cloth to adhere to the plate; immediately drop muriatic acid, which has been diluted with one-third water, over the plate, watching it carefully; as soon as the crystals have formed to a proper shade, wash off with clean water. The work can dry in the shade, without heating, and can be stained or varnished to please the taste. Avoid inhaling the fumes while using the acids. The above plate made up into ware and placed side by side with the genuine crystallized work will sell 50 per cent. faster. At least, I find that the case in my shop."

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, May 20, 1884.

The winter still hangs on. It must be a scorcher of a summer that we are going to have. It will take a great deal of heat to bring up the average of the year to its normal temperature. Winter, you know, was cold, and spring has been nothing else than mild winter. Perhaps summer will be awfully hot. What a blessed thing it will be to have these convenient scapegoats to accuse of causing the dullness of the times!

By the way, the late financial earthquake in New York didn't shake Cincinnati. People heard the rumbling, and that was all. They did not get frightened. Calamities of that sort are not as far-reaching in their effects as they used to be. There is some comfort in that.

I found a Cincinnati manufacturer to-day who said that his sales were good and collections easy. He was not a stationer. He makes wood-working machinery, and *advertises in seventy papers*. Yesterday he shipped a lot of machines to Hamburg, Germany. You see, he advertises, and he is no novice either in advertising or in manufacturing machinery. Men who are making wood-working machines and agricultural implements are really rushed. This indicates that agriculturists and builders are busy everywhere, for machines and implements made in the Cincinnati region go to every part of the country.

Does anybody remember that during the year 1883 nearly \$90,000,000 went out of circulation, for the time, to pay into the United States Treasury the revenue tax on time-cured whiskies, the bonded period of three years on which had expired? Has anybody forgotten that during the year 1884 the amount of money that must, whether or no, be paid into the United States Treasury to take whisky out of bond, will be \$70,000,000?

This comes of overproduction of whiskies. There is no immediate market for this tax-paid whisky, because there is two or three years' surplus of it on hand.

One of the mysteries of this bonded whisky surplus is that this whisky is owned almost wholly by others than the distillers—owned by men scattered from Massachusetts to Texas, from New Jersey to California, from Florida to Oregon. It is owned in quantities of from 50 to 500 barrels. These holders have all they can do to avoid sacrificing it. These facts are not secrets, but neither are they discoverable without search, and pretty careful search. Now, imagine the combined effect of men all over the country thinking and striving day and night, to the exclusion in many cases of all other thoughts and efforts, to save some of their investments from being sacrificed. Then imagine that this state of things exists right after taking millions upon millions out of circulation and putting it away in Uncle Sam's vaults. Think, too, that all this happens at a time when there is virtually no export demand for whisky and other distilled liquors.

But, after all, there is some comfort in the consequences or results of this dilemma. It

is a fact that the whisky makers have quit overproducing. It required a good deal of pinching and squeezing and buffeting (of their customers, to call this halt. They would, of course, overproduce so long as they could find customers to take the stuff off their hands and put it in bond. But a limit to that time has been reached, and a halt has been called. From this time on look for unfavorable influences of this factor upon the general business of the country, to be felt less and less until they disappear.

"The commercial condition of the country

is sound," said a banker last Wednesday, when the news of the New York explosion was heralded over the wires, "and," added he, "the country will not be affected seriously by all the explosions of which New York brokers and speculators are capable."

The trade affords absolutely no news here, not even of the nature of gossip. I won't utter their complaints—not in this letter. I can say that manufacturers and operatives, bookkeepers and salesmen chat and smile, eat and drink, sleep, wake and work as usual.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

- FIRST.**—It handles buckled paper as well as flat, and runs the work through straight.
- SECOND.**—It has the best system for rapid and perfect feed.
- THIRD.**—It has the best system for gauges, and can be more quickly adjusted.
- FOURTH.**—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.
- FIFTH.**—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.
- SIXTH.**—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.
- SEVENTH.**—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.
- EIGHTH.**—Each machine has a scoring cutter attached.
- NINTH.**—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

AMERICAN EXHIBITION IN LONDON.

A movement is on foot to hold an exhibition of American products and manufactures in London early in the year 1885. Gen. C. B. Norton is at the head of the project, and has, it is said, secured the co-operation of a large number of leading American manufacturers. It is difficult to say at this time whether the movement will come to a successful issue, but there is no doubt that an exhibition of American products and manufactures in London would have a tendency to further the interests of American exporters by leading to an increasing demand abroad for goods handled by them. General Norton, who has charge of the movement, is a resident of Boston, where he is well known. He is reputed to be a man of the highest integrity and ability, and has previously been connected with several exhibitions of the kind, having been secretary of the recent Foreign Exhibition in Boston, where he is said to have discharged his duties with credit to himself and profit to the large number of dealers and producers directly interested.

The New York *Herald*, of March 24, of this year, thus alludes to the proposed American exhibition in London:

"The idea is a good one, and General Norton, from his experience in Paris, Philadelphia and Boston exhibitions, should be a good man to prosecute it. The fact is that America has never made a favorable showing at any of the foreign exhibitions. In London and Paris we made comparatively light displays, our railroads not exhibiting at all, and in Vienna our efforts were not commendable, and were rendered abortive by the conduct of the American department. At Amsterdam last year we were represented only by a few sewing-machines and parlor organs. It has been seen, however, at the Centennial and the Atlanta exhibitions and at the Fisheries Exhibition in London, in 1883, that there is almost no department, natural or artificial, in which America cannot offer an exhibition that shall be generally attractive. This is particularly the case in the magnificent show of natural products, which can be organized by our great railroad trunk lines, and which would be entirely new to London or any other European capital. It is to be hoped the American exhibition will make a liberal display in this direction as an encouragement to the emigration of the better class of English farmers, very few of whom have yet come to this country, and who would better themselves by coming, besides being very desirable citizens."

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

Correspondence.

PARISIAN NOTES.

[CORRESPONDENCE OF THE STATIONER.]

PARIS, May 8, 1884.

From Vienna to Paris is a long route and I was glad to break the journey at various points in Germany. After leaving Vienna the road passes through the Austrian Tyrol and alongside the "beautiful blue Danube," making the scenery very attractive. Fortunately for me, there was a sleeping-coach on the train, so I was enabled to get a good night's rest. The company which runs these coaches would be benefited by the infusion of a little American vim; those who had to travel over this route the previous night were deprived of the use of the sleeping-coach because none had arrived from Paris that morning.

In the manufacturing districts of Germany, every effort is being made to suit the American market, and all classes recognize its importance to their welfare. One manufacturer remarked to me that were the American market closed to them, more than one-half of the artisans of the district would starve.

I must again refer to the question of wages for the differences in this respect are so apparent as to challenge criticism. Whole families are frequently employed in one factory, and often have the opportunity of taking the work to their homes. These latter are not what we are accustomed to consider a home, at least not what we have in Philadelphia under that name. As a rule, the family live, work and eat in the one apartment, and that one of very limited dimensions; their food is of the coarsest and most limited quantity, and I confess that class bears every evidence of the life it leads. I need scarcely say that the wages are low, very low; in fact, it is a puzzle to me how they are even able to purchase the very few necessities that keep body and soul together. Notwithstanding the boast that England makes of her free-trade principles, she is suffering very severely from German competition, and I am satisfied from what I have seen and heard that a vote of the English manufacturing districts would be overwhelmingly in favor of some protection for the home industries.

Here, in Paris, there are heavy duties on all

goods coming into the city proper, which is really "tariff for revenue only," although in some instances the rate is higher even than in our much-abused tariff. Paper, for example, pays a tax of *four cents* per pound, but the authorities have the wisdom to refund this when the paper is exported. The stamp tax in Paris is also very onerous, as stamps must be applied to every species of document. If you purchase a ticket at the theatre or opera with a reserved seat it must have a two-cent stamp attached to it, for which the purchaser is expected to pay; if you put up a notice in the window that you have apartments to let or that a boy or assistant is wanted in your shop, it must bear the two-cent stamp, and so it is in every department of commerce and finance. I should think that Paris was quite as expensive a place to live in as any of the chief American cities. The municipality spends annually upward of fifty millions of dollars for its expenses, and then is adding continually to its enormous debt. Of course the city is very attractive and is always full of strangers, who spend much money in the course of their visits, but it possesses few of the permanent benefits for the masses that we, in America, are familiar with—for example, running water is rarely to be obtained above the ground floor and bath-rooms in one's house are exceptional luxuries. Candlelight is chiefly provided in sitting and sleeping rooms, for gas is at the enormous figure of about twenty dollars per thousand feet. The gas company, I understand, has a monopoly with the city that cannot be disturbed for years, and it has the privilege of making its own prices to consumers.

There is a great deal of taste displayed in the arrangement of shop windows in all parts of Paris, and particularly among the stationers and fancy goods dealers. Some of the best shops have the articles marked in plain figures, which I am satisfied attracts many buyers; there are thousands of people (myself among the number) who are unwilling to enter a shop and ask the price of an article that has pleased their fancy; but if it be marked with the price which is within the purchasing power of the onlooker a sale is at once effected, and when the ice is broken the blandishments and excellent selling powers of a Parisian salesman are hard to resist. Most of the shops here are lined with mirrors on all sides, and

in some instances on the ceiling as well; it is surprising to see how very large a small place can be made to appear and the impression on an intending buyer is admirable. Space is not quite so valuable with us as is the case here in the principal thoroughfares, where the retail business is transacted, and every resort for the economical storage of goods has to be adopted. In the wholesale section of the city I went through many paper warehouses carrying enormous stocks of finished goods. One establishment contained over two million reams of paper, and had not as many square feet of space as W. F. Murphy's Sons' well-known building in Philadelphia.

CHARLES J. COHEN.

BOSTON BITS.

FROM OUR REGULAR CORRESPONDENT.

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, May 20, 1884.

The season is fast approaching when a "quiet dullness" will prevail. Already are the summer vacations being arranged, and petitions are being circulated among the several trades, asking that stores be closed at earlier hours, that a little recreation may gladden the hearts of the humble employees. What trade is now doing can be attended to without much mental strain. This state of business is, of course, not unlooked for, and while the coming months of recreation may not prove of immediate profit in the way of cash sales, the trade will be preparing for the fall business. In some lines of goods samples have already been shown, and a large fall trade is confidently expected in stationers' supplies.

E. G. Thorp, treasurer of the Thorp Manufacturing Company, returned last week from a Western tour, and he is well pleased with the promising outlook for the fall business. The Thorp Manufacturing Company is the only concern in Boston which makes a specialty of autograph and scrap albums, and in this line of goods the company are presenting the trade with novelties that will not be surpassed by any publisher in the country. Those who have seen the samples will endorse this statement.

Trade in manifold letter books is good even at this season. Mr. Hano, of Samuel Hano & Co., the most extensive manufacturers of mani-

fold books in the world, is now in the State of New York, canvassing the trade in the interest of his line. A private communication from Mr. Hano to his Boston office, says: "Rush things ahead at the factory; business is good, orders are numerous and large, and we must run the factory to its fullest capacity." Now, that sounds like business, doesn't it?

The book trade for this season of the year is very fair, though mostly confined to the lighter grades of literature. In this line is a new ham-mock series which Charles H. Whiting, the Boston book jobber, reports to be having a very good sale. Mr. Whiting has added to his catalogue the publications of Henry A. Sumner, Chicago publisher, he being the New England agent for this Western house. "Bethesda," by Barbara Elton, is still having a very good sale.

The approach of warm weather appears to have no wilting effect upon the Heath Letter File and Index Company. Its letter files and cases are meeting with that same steady demand that they always had. Its trade in filing-boxes alone is assuming large proportions, and the company's facilities are being constantly increased in order to meet the trade with business promptness. Wherever the Heath system of letter-filing is introduced, and most of the large commercial cities are using the Heath system, there is a growing demand for the filing-boxes, and this branch of the trade is mostly supplied by the local stationers who carry a line of these filing boxes in stock. Each of these filing-boxes has a capacity of 800 to 1,000 letters, and for use in such business where the correspondence is not large, these boxes serve the same purpose as the cabinet-filer, as they are indexed and arranged in the same manner. The utility of these filing-boxes, coupled with their cheapness, is gaining many users. Those of the trade having calls for cheap filing-boxes should acquaint themselves with the terms offered by the Heath Letter-File and Index Company.

Mr. Gilman, the ingenious inventor, whose name is becoming so widely known throughout the country through his several valuable inventions for the counting-room, has lately perfected a new document-holder, for which a patent is asked. It is the best device of the kind that has ever been introduced and will certainly meet with a big demand. As soon as the patent is allowed, these document-holders will be presented to the trade and then the utility and value of the holder will be readily recognized. Several manufacturers of stationer's specialties are negotiating with Mr. Gilman for the exclusive right of handling the document-holder, but the article gives promise of such ready sales that the inventor is inclined to handle it himself.

I see that the Hall type-writer is being extensively used in this section. This is no doubt due in a measure to the energy of the parties pushing the business, but the real merits of the machine itself are doing the most to make it so popular. The Hall type-writer is a simple piece of mechanism, but it does the best of work and is easily operated, while it is by no means a high priced machine. Letters written by the Hall type-writer can be

copied in an ordinary copying-book just as well as if written with a pen, and this fact makes it the more popular with business men.

THE STATIONER looks very handsome in its new dress, and its appearance is favorably commented upon by its host of admirers in this section. But what necessitated so sudden a change of attire? Methinks I read between the lines a tale of a night's racket. If that's the "case" THE STATIONER, no doubt, got into "quad," but a night in the "galley" upon the hard, cold "stone," after a long "chase" by a "slug," has not marred the beauty of its "form."

So, I will drink to King Lockardo,
Though I'm only a pensioner.
Long life to him and his merry men,
And to THE STATIONER!

So say we all, &c. (Chorus by the trade.)
A. L. D.

DAYTON DASHES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, May 26, 1884.

THE STATIONER in its new dress is just at hand. I have only one suggestion to make to you, and that is to have a new heading. The old one is not up to the standard of the remainder of the paper. We who live a thousand miles away, and try to make our living on paper, enjoy the menu set before the Lockwood Press in our imagination; but we do not want to be selfish. Suppose next time that you give your correspondents the substantial, and let the staff of the Lockwood Press browse on their imagination. One thing sure, it will never give them the gout.

But to get down to business. While trade cannot be said to be driving, yet I think that almost all dealers are busy. Talking to R. S. Rogers & Co. about the state of trade, they reported sales for April about 10 per cent. better than in the same month of 1883. Reynolds & Reynolds report much the same state of facts. The crop prospects are good—never better, and when the farmer realizes on his produce, money will be more plenty.

The bank scare in New York has had the effect of making our banks very cautious, and discounts are hard to obtain; but they say that they have plenty of money when confidence gets restored.

Travelers in the stationery line have not been very plenty of late. Mr. Livingston, of Weill, Livingston & Co., showed a nice line of satchels, pocket-books, &c. He says that everyone wants cheap goods this season.

Mr. Johnson, of Liebenroth, Von Auw & Co., was here a few days ago, and exhibited some pretty goods in autographs, scrap-books, &c. Mr. Ritter, with Koch, Sons & Co., displayed their line and was pleased with his sales. Mr. Thorp, of the Thorp Manufacturing Co., was also here, and had some nice goods.

I think that the jobbers will appreciate the net figures at which their goods are sold this season. Nearly every small stationer in the United States had "gotten in," as we say, to the best discounts, and there was not much money in the goods.

Mr. Wright, with Phil Hake, was also here,

and displayed the eloquence of a Clay in describing his line.

I hear special complaint among the blank-book men that cheap books are ruining their business, and there seems to be some ground for their complaint.

The cheaply made Manilla books are coming into general use throughout the West, the users claiming that they answer every purpose as well as the higher priced books. I don't know where consolation can be found. Certainly not in a blank-book—perhaps they would have better success if they would consult Webster's Unabridged.

Our city is becoming somewhat noted as a paper city. There are no less than seven wholesale paper dealers, which would seem an over-supply for a place of 40,000 population; but the number of houses seem to attract trade and all seem to be busy.

The paper mills are all hard at work; but they say that there is no money in making paper in the
MIAMI VALLEY.

TORONTO CONTINUATIONS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, May 23, 1884.

It is not at all improbable that you would prefer that I should spread my correspondence out a little, and not dump a series of letters on you all of a heap. Will show two excuses to offer. One is that I have had something else on hand, and the other is, that I have been more than usually lazy. This I attribute to the enervating effects of our charming spring weather. Whatever the cause may be, I have braced myself up for the occasion, and there is no telling now when I may stop. I might "go on forever," and end ingloriously in the waste basket.

I forgot who I ended with in my last, but I know, from my memorandum, that the next house in order is the old and widely known firm of James Campbell & Son, and this is the gist of what they said to me: Sales for immediate delivery are not satisfactory, but a very decided feeling prevails that, with a good harvest, the year's trade will take a very decided turn for the better. At present we have eight travelers on the road between Halifax and Winnipeg, taking fall orders for books, stationery, fancy goods and Christmas cards, and the indications are, from the returns in the shape of orders they are sending in, that much better times are not far distant.

My interview with Warwick & Son, whose trade in their line is second to none in this city, was much in this wise: Although business is dull it is scarcely more so than usual at this season of the year. Orders have not yet come in from their travelers, of whom they have several just started for the Lower and Northwest provinces. Books of a better class are more in demand than of late—a better kind of binding being looked for, while the cheap pamphlet novels sell less readily. Their increase of general business combined with the government work—for which they have the contracts for another five years—has necessitated the purchase of one of Sanborn's

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.
In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.
All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 698.)

"Smashers" and one of Thompson's heavy wire stitchers in addition to lesser requirements. They are also putting in a new steam engine, with much larger power, and a very fine one too, which signifies that this firm, at least, does not feel any serious stagnation in trade. And that they are awake for the future, which they feel assured warrants all their efforts to meet it.

Grand & Joy are in their new premises, which they propose soon to enlarge. Their business is increasing all the time.

W. B. Blackhall, bookbinder, is one of those happy individuals, who has an assured business, and attends to it.

Now, sir, fortunately for you and for me, I have exhausted my list, and have run ashore. Do not imagine that I have exhausted the entire trade in this city also. There are numbers of others I could mention of good standing, in a somewhat smaller way, and who, if I were to visit them, would tell very much the same story. The statements I have received from the various firms, I believe to be in the main correct, and will give a very fair index of the feeling as to the future, and the condition of trade in this city just now.

I leave for Montreal, &c., in the morning, and it is not improbable that I may on my return have something to say about things and persons in that city and other places. It all depends on how I feel when I get back.

It would be out of place altogether to close this letter, and never a word about the weather. Well, it is neither cold nor hot. People who know—these people never die—say we are two weeks ahead of last year. Perhaps we are. Anyway, the trees are nearly in full leaf, and things have a genuine spring look. Let it come. I have had at all events as much winter with its attendants as I want for the next six months at any rate.

C. H. McDonald, of the Dennison Manufacturing Company, called on me this week, and reports trade very fair. C. H.

Glycerine and Glue.

A German chemist named Puscher, a native of Nuremberg, reported to the trades union of that place that he met with great success in using glycerine together with glue. While generally, after the drying of the glue, the thing to which it is applied is liable to break, tear or spring off, if a quantity of glycerine equal to a quarter of the glue be mixed together, that defect will entirely disappear. Puscher also made use of this glue for lining leather, for making globe frames, and for smoothing parchment and chalk paper. He also used it for polishing; mixed wax with the glycerine is not used. The glycerine has also some properties in common with india-rubber, for it will blot out pencil marks from paper so as to leave no mark whatever. A paste made of starch, glycerine and gypsum will maintain its plasticity and adhesiveness longer than any other cement, and therefore recommends itself for cementing chemical instruments and apparatus used by pharmacists.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

COMBINATION ROLL TOP WRITING DESK.

Fancy writing desks, with roll tops, are attracting attention. The roll top of these desks works on the same principle as a large desk. The accompanying engraving shows a style of portable roll top desk adapted for a lady's boudoir. It is 12½ inches long, 9 inches wide, and 9 inches high. The material is walnut, nicely finished. The inside contains a folding desk, together with fancy ink-stand; while receptacles are reserved for stationery, pens, &c.

NEW PATENTS.

No. 297,651. Pen-Holder.—Oliver S. Warner, Akron, Ohio, assignor of one-half to David E. Warner, Jamesport, N. Y.

A pen-holder having a grip of the triangular type and integral with the penstock, one of the sides of said triangle being convexly curved and one concavely curved.

No. 297,717. Ruler.—Perez C. Rich, Boston, assignor to Charles J. Bailey and Julius M. Clapp, both of Newton, Mass.

As an improved article of manufacture a ruler composed of a roller and a bar loosely connected each with the other by links which hold the pivots for the bar, whereby the ruler may be used at will with either side of the bar uppermost, the under side thereof then resting flat on the paper below it.

No. 297,722. Pencil-Clasp.—Gustavus A. Schlechter, Reading, Pa.

No. 297,752. Mechanism for Raising the Rollers of Printing-Presses.—Andrew Campbell, Brooklyn, assignor to John and Edmund McLoughlin, both of New York, N. Y.

In a printing-press, the combination, with the set of form-rollers and the set of distributing-rollers, each set mounted in movable bearings capable of being moved independently of the bearings of the other set, of the bearings and means for simultaneously lifting said movable bearings to different heights, whereby the form-rollers are lifted from the form and the distributing-rollers from the form-rollers.

No. 297,851. Enlarging-Camera.—Thomas C. Roche, Brooklyn, assignor to E. & H. T. Anthony & Co., New York, N. Y.

In an enlarging-camera adapted to use an artificial light, the camera-box having a lamp and reflector chamber in its rear end, constructed with a series of interior grooves or slideways at or near its forward end, adapted for the reception and adjustment of the condensing and picture slides, and an opening to the grooves to facilitate the adjustment of the slides, said opening being closed by a cover or door.

No. 297,856. Self-Inking Hand Stamp and Dater Combined.—Ernst Schmitz, Chicago, Ill., assignor to himself, J. Frank Tenney, and Richard Schmitz, both of same place.

No. 297,871. Calendar.—Joshua Frost Tannatt, Springfield, Mass.

No. 297,905. Paper-File.—Edmund W. Woodruff, Washington, D. C.

The head and base-boards of a paper-file,

the file-board, and a supporter for the same, the lower end whereof has a sliding connection with the base-board, combined with a brace hinged at its upper end to the file-board supporter, the lower free end of said brace bearing on the base-board, and adapted to clamp and lock the file-board when pushed to a point on the base-board nearly in line with the axis of the hinge.

No. 297,936. Paper Slitting and Winding Machine.—Horace Inman, Amsterdam, N. Y.

No. 297,979. Dividers.—Rowland Folger, Milford, Mass.

No. 297,996. School Slate.—William D. Heyer, Elizabeth, N. J.

A school slate, in combination with a transparent slate hinged thereto, so as to cover or uncover a portion of the opaque slate.

No. 297,999. Device for Filing Papers.—John C. Lang, Boston, Mass.

In a paper file, a follower-board combined with an elastic guide or base-board, and fric-

tional clamping devices connecting the follower-board and guide.

No. 298,030. Automatic Electric Copying and Engraving Machine.—Albert Schmid, Zurich, Switzerland.

No. 298,038. Compasses.—William Stromberg, St. Louis, Mo.

No. 298,041. Base-Ball.—Thomas P. Taylor, Bridgeport, Conn.

No. 298,048. Card or Ticket Holder.—Henry Wilson, Chicago, Ill.

No. 298,084. Stylographic Fountain Pen.—John C. Haring and Charles H. Court, Jersey City, N. J.

In a stylographic fountain pen, a case provided with a part internally screw-threaded, an air-tube having an external screw-thread to engage therewith, said air-tube being cut away in part at its lower end to form a spring, and a needle arranged to bear against said spring.

No. 298,090. Pen Holder.—Stephen A. Holman, Spencerville, Cal.

No. 298,092. Lithographic Printing Machine.—Emile Jaeck, Brooklyn, N. Y., assignor to John M. Fuchs and Julius C. F. Lang. Patented in Germany May 5, 1883, No. 24,875.

No. 298,096. Eraser-Case.—Louis Krob, Zanesville, Ohio.

An eraser-case having a sliding side to which an eraser is attached, and a sliding cover for one end of the same.

No. 298,117. Machine for Sticking Books with Wire Staples.—Ernst Preusse, Plagwitz-Leipsc, Saxony, assignor to Gustav Haunhorst, Leipsc, Germany.

No. 298,124. Blotting Pad.—Edwin A. Scribner, Ridgefield Park, N. J.

The combination, with two wooden blocks or pieces, and means for clamping or binding the same together, of sheets of bibulous paper, laid on and folded partly around one of said blocks, and plates or strips of metal laid on the paper sheets between the blocks.

No. 298,125. Case for Lawn Tennis Implements.—

George E. Shepard, Jersey City, N. J., assignor to Hall, Nicoll & Granberry, New York, N. Y.

No. 298,134. Holder for Ornamental and Fly Paper.—Vurlin G. Tansey, Louisville, Neb., assignor to himself and Truman Hall, same place.

No. 298,147. Inking Mechanism for Printing Machines.—Geo. Ashley Wilson, Liverpool, County of Lancaster, England.

In inking apparatus for rotary printing mechanism, the combination, with the ductor-shaft, of an eccentric loose upon the shaft and provided with a projecting pin or clutch-piece, a sliding hand-wheel splined to the shaft and provided with a pin or clutch-piece, a carrying-roller and interposed mechanism for actuating the carrying-roller from the eccentric of the ductor-shaft.

No. 298,152. Soft-Tie Paper Bag.—James Arkell, Canajoharie, N. Y., assignor to Arkell & Smiths, same place.

A soft-tie paper sack, having both longitudinal and transverse flutes or creasings.

No. 298,153. Method of Making Soft-Tie Paper Bags.—James Arkell, Canajoharie, N. Y., assignor to Arkell & Smiths, same place.

As an improved process or method of manufacturing soft-tie paper sacks, subjecting the paper first to a crimping operation to produce a series of parallel flutes running in one direction, and subsequently fluting or crimping the stock transversely to the first-formed set of flutes or crimps.

No. 298,164. Feed-Guide for Printing Presses.—John Blocher, Franklin Grove, assignor of one-half to Benjamin F. Shaw, Dixon, Ill.

The combination, with a platen of a printing press, of a side-guide adapted to move on the face of the platen toward the centre and side thereof, and connected to the gripping-finger bar of the press by mechanism, whereby said movement of the guide is rendered automatic.

No. 298,177. Bank Check and Draft.—James K. Cleary, Washington, D. C. Filed April 6, 1883.

A check, draft or other similar evidence of value, having imprinted upon it at any convenient locality a series of vertical columns of figures, the first arranged from top to bottom, from one to nine, indicating units, and the successive columns to the left of said unit-column representing multiples of one another by ten, in the usual order of enumeration, while each column increases vertically in serial order, substantially as shown and described, whereby a given amount may be expressed and read from left to right in the usual manner.

DESIGNS.

14,991. Back of a Game-Card.—L. Lum Smith, Philadelphia, Pa. Term of patent 3½ years.

14,992. Christmas-Card.—Robert Snider, Brooklyn, N. Y. Term of patent 14 years.

14,993. Envelope.—Robert Snider, Brooklyn, N. Y. Term of patent 14 years.

14,994. Stationery-Case.—Joshua F. Tannatt, Springfield, Mass. Term of patent 14 years.

TRADE-MARKS.

11,151. Bill or Paper-File Holders and Cases of Shelving for the same.—Edmund W. Woodruff, Washington, D. C.

"The letters forming the word 'Woodruff' or 'Woodruff's.'"

11,157. Apparatus for Producing Fac-Simile Copies of Writings, Drawings and other Delineations.—W. F. B. Massey-Mainwaring, 99 Shoe Lane, County of Middlesex, England.

"The representation of a toothed wheel and the word 'Cyclostyle.'"

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Joseph Harris, paper-stock dealer, Philadelphia, Pa., is dead.

W. S. Boughton, printer, Lawrence, Kan., has sold out to P. T. Foley.

The Cincinnati New Publishing Company, Cincinnati, Ohio, is advertising to close out.

J. L. Keating, dealer in picture frames, &c., Corry, Pa., has been attached by the sheriff on a claim of \$775.

S. C. Whitehead has retired from the firm of John D. Suter & Co., stationers, &c., Lynchburg, Va.

The Acme Stationery and Paper Company has in preparation a new catalogue and price list, which will be ready for the trade in a short time.

Sternberg & Mayer, manufacturers of pocket-books, Philadelphia, Pa., have dissolved partnership. The business is continued by Gustav Mayer.

George T. Bisel & Co., dealers in law-books and blanks, Philadelphia, Pa., have dissolved partnership. The business is continued by George T. Bisel.

The assignees of E. Claxton & Co., publishers, booksellers and stationers, Philadelphia, Pa., have postponed the sale of the stock, &c., of the firm advertised for the 27th inst.

F. H. Loss, Jr., is now offering the finest line of Swiss novelties that has ever been seen in this city. It will pay dealers on the lookout for fresh holiday attractions to communicate with him.

The Silicate Book Slate Company will soon introduce a novelty in ivoryine tablets. It will have the form of a pocket-book, containing two leaves of ivoryine for memorandum purposes. The pocket-book will also contain a pocket for small change, postage stamps, &c., and a neat, ivory-tipped lead pencil. The pocket-book will come in two styles of binding—Russia and ordinary leather. It will be one of the neatest and handiest memorandum books in the market. While it will be gotten up in the best manner, the manufacturer will be prepared to sell it at the most reasonable price.

The New York News Company is introducing a combined paper clip, knife, cutter, gum and ink eraser and graduated scale and rule. This is a very useful article to have on the desk. It is nicely nickel-plated, easy of adjustment and, altogether, a novelty which the trade cannot dispense with. The New York News Company is also offering special bargains in base-ball goods. It keeps in stock all of the standard makes of bats and balls, and its arrangements with the manufacturers are such that it is prepared to sell at the lowest discounts.

Bigelow & Main, of 76 East Ninth street, and James Pott & Co., of 12 Astor place, were elected to membership in the Stationers' Board of Trade at the last regular meeting of the board, and the Prang Educational Company, Boston, Mass.; Anderson School-Book Company, 66 and 68 Reade street, New York, and Roberts Brothers, Boston, Mass., were nominated for membership and will be elected at the next meeting of the board.

W. E. Jackson has much more commodious quarters in his new place at the corner of Thomas street and West Broadway. He carries a full line of staple goods, and is prepared to sell at the most reasonable prices. Out of town dealers and others will doubtless find it to their advantage to place their orders with him.

The large facilities of the National Publishing Company, Philadelphia, enable the company to give prompt attention to all orders. This is a great boon to the trade.

A judgment of \$1,034 has been obtained against Alvah Bushnell, stationer, Philadelphia, Pa., and execution has been issued.

The Mississippi Valley News and Publishing Company, East St. Louis, Ill., has been incorporated with a capital of \$100,000.

C. Munich, gilder and dealer in picture frames, Hartford, Conn., is asking for an extension from his creditors.

J. F. Miller, publisher, Piqua, Ohio, has assigned to Frank C. Davies. Liabilities, \$4,768; assets estimated at \$6,000.

Luke J. Rodgers, of the firm of Rodgers & O'Neill, paper stock dealers, Philadelphia, Pa., is dead.

A. T. Patrick, bookseller and stationer, New Tacoma, W. T., has been attached for \$900.

F. Newman, publisher of the *Democrat*, Crestline, Ohio, has sold out to B. Pope.

C. A. Rothwell, bookseller, &c., Strathroy, Ont., is dead.

C. B. Thompson, publisher of the *Le Roy Gazette*, Le Roy, N. Y., has sold out.

Kaufman & Colby, dealers in book-shelves, New York city, have dissolved partnership.

Ladd Brothers & Wood, paper manufacturers, Skowhegan, Me., are reported insolvent.

Charles A. Barnes, publisher of the *Clarion*, Reed City, Mich., has sold out to L. A. Barker.

The Phoenix Printing Company, St. Louis, Mo., has been incorporated with a capital stock of \$3,000.

John D. Shibe, of the firm of J. D. Shibe & Co., manufacturers of base-balls, &c., Philadelphia, Pa., is dead.

The W. E. Riley Printing Company, Louisville, Ky., has been incorporated, with an authorized capital of \$50,000.

Chandler & Burgess, paper-hangers, Boston, Mass., have dissolved partnership. R. N. Chandler continues the business.

Neumann & Sato, dealers in Japanese goods, &c., New York city, have dissolved partnership. M. E. E. Neumann continues the business.

A dissolution has taken place in the firm of Epstein, Reugosky & Co., paper-stock dealers, St. Louis, Mo., I. Epstein having withdrawn from the firm.

Rufus Adams & Co., 167 Broadway, have taken the sole agency for Bailey's "Victor" copying presses, which are simple, ornamental and compact, and adapted to all classes of business.

A "Short Description of the Egyptian Obelisks," by Commander Gorrings, published by R. Worthington, gives a history of the obelisks in general and a particular account of the one now in Central Park, New York. The work is fully illustrated, and is offered at a low price.

"Chambers's Encyclopædia," new revised edition, 1884, is out. The articles have undergone thorough revision, and have been brought up to the present date, many of them having been entirely rewritten. The reissue is thus virtually a new edition, and represents the actual state of things. The revision has been effected under the careful superintendence of Andrew Findlater, LL.D., who has throughout taken charge of the work and imparted to it

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

that practical and reliable character which has rendered it so universally acceptable.

The *Journal* Printing and Publishing Company, Wheeling, W. Va., has assigned to J. R. Cowden.

F. P. Wormley & Co., stationers, &c., Red Rock, Ia., have been succeeded by Eliza Wormley.

A judgment of \$350 has been secured against J. C. Perry, dealer in wall-paper, &c., San Francisco, Cal., and execution has been issued.

Louis Snider's Sons, Cincinnati, have a new and handsomely gotten up catalogue of their papers, &c. The cover is of very neat tint, set off with lettering, and rules in carmine.

Chadwick & Miller offer special bargains in lace paper. They are the only manufacturers in this country of this class of goods and can sell far below the price of the imported article. They supply lace paper in four patterns varying in size and design. The firm also manufactures a large variety of shelf, ceiling or fly paper, shelf oil-cloth, &c., in new and attractive patterns and it will not be undersold.

H. Cherouny, New York, is the publisher of a new monthly publication entitled *Young Folks*. It contains choice German and English productions in parallel columns. It will be useful to pupils studying the German and English languages, as it will furnish them plenty of entertaining reading matter, and give them the practice required to master these languages. The trade are supplied by the New York News Company.

The new games, "Enchantment," "Magic Hoops," "Pitch-a-Ring" and "Ring Toss," show indications of becoming the most popular games that have ever been devised. They are ornamental as well as amusing and instructive, and "Enchantment" is a game that juveniles not only but older persons never fail to tire of. The manufacturer is the Milton Bradley Company, of Springfield, Mass., and the New York agents are the Wilson Brothers Company. These games are among the most salable toys a dealer can handle, being fresh, reasonable in price and of a highly novel character.

J. H. Bufford's Sons have added two new designs to their extensive line of folding cards for bills of fare. The line is especially appropriate for hotels and summer resorts, each design being illustrated with a pretty landscape scene excellently adapting it to the season. Stationers everywhere frequently have a demand for these cards, and they would do well to be prepared to meet it. Messrs. Bufford's Sons can supply the cards in unlimited quantities. The goods are made of heavy translucent paper in assorted tints. The new designs are known as H4 and F4.

The June number of *Our Little Ones* has been received. The publisher (Russell Publishing Company, Boston) seems to be determined to keep this magazine up to the full standard of children's enjoyment.

The Boston School Supply Company has issued a new catalogue of its geographical and educational works, globes, maps, &c.

An attachment for \$900 has been issued against H. C. Patrick, printer and publisher, New Tacoma, W. T.

Louder & Moss, manufacturers of paper boxes, Chicago, Ill., have made an assignment to H. S. Dietrich.

Butler & Miles, paper dealers, 23 Beekman street, carry a very large stock of manilla papers of all weights, and are prepared to take orders for all kinds of paper to be made at short notice.

E. P. Donnell & Co., manufacturers of bookbinders' machinery, Chicago, have removed their office and salesroom to 158 and 160 S. Clark street, where they claim to have the largest bookbinders' machinery warehouse in the country.

Stafford's violet black copying ink will yield three copies from fresh writings when kept in press twenty seconds, twenty copies when kept in press six hours, and one perfect copy three years after being written with. The Commercial ink is a dark blue writing fluid changing to jet black, but is not intended as a copying ink.

One of the most salable articles in the line of toilet papers is White's tar paper. This comes with disinfecting and deodorizing cover and is especially adapted for public use, its chemical properties making it very valuable for hotel and factory purposes. The manner in which it is put up makes it very convenient and economical. The manufacturers are White & Schermerhorn, whose advertisement appears in *THE STATIONER*. The firm also carries a

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

full line of perforated and unperforated roll and straw closet papers, with which it can supply the trade at the lowest market prices. It is also agent for the Union Cabinet Company's fixtures for toilet papers. These come in various styles and prices.

A bill of complaint has been filed in the clerk's office of the United States Circuit Court, at Boston, by R. Hoe & Co., against the proprietors of the *Boston Herald* for infringing on Hoe's printing machines, and asking the court to restrain the defendants from using the machines during the pendency of the suits; also a perpetual injunction restraining the respondents from further use of the machines. The bill is returnable in July.

The "Unique" envelope moistener is designed to facilitate the work of moistening the gummed flaps of envelopes. It consists of a tin box, provided with a water receptacle and a channel formed on the lines of an envelope flap. A wick packing within the channel and rising to the level of the top of the box is kept damp, and all that is necessary is to touch the flap of the envelope to the wicking, and the gum is dampened sufficiently for sealing purposes. This is controlled by F. B. Clement, 102 Duane street.

The Toronto office of Clague, Wegman, Schlicht & Field is doing quite a large business on Shannon files and cases. Since John F. Lash has assumed the management of that office the business has materially improved, and Mr. Lash now finds that he has difficulty in filling his orders. This firm is about to offer to the trade a new board clip, differing from other clips in the market, in that the board is a combination of ash and walnut which will neither split nor warp, and the clip is of steel, handsomely nickeled.

The *Magazine of Art* for June (Cassell & Co., Limited) is especially noteworthy as to its contents both as to reading matter and illustration. Among the articles specially noteworthy is one on Venetian visiting cards with illustrations of designs dating back to the sixteenth century. The Forest of Fontainebleau is also a subject of illustration for an article panegyric, but not descriptive of its beauties. A dissertation on the Elzevirs and illustrated reviews of the lives and works of Houdon, the sculptor, and of the artist Menzel, are also of interest.

Charles D. Myers, stationer, doing business under the style of Myers Brothers, at No. 62 John street, accidentally shot himself in the abdomen on Tuesday morning last at his residence in Roselle, N. J. He had gone to his barn at the time to shoot an animal that was destroying his poultry. While searching for the animal about the premises he stumbled and partially fell. The weapon he had brought with him was discharged, taking effect in the abdomen as stated. Mr. Myers' bookkeeper did not learn of the accident until Wednesday afternoon, when he hastened to his employer's bedside. The latest information regarding the unfortunate man's condition is very unfavorable to his recovery, as he is said to be very low. Mr. Myers is forty-five years of age. In the latter part of February of this year, in consequence of the failure of Myers Brothers, he assumed control of the business at No. 62 John street, under the old style, and was rapidly building up a prosperous business when the accident occurred.

Marcus W. Wolf & Co., Baltimore, have discovered an imitation wrapper of their brand of "Capitol" writing paper, containing an inferior quality of goods, which the trade are cautioned against, as the wrapper being copyrighted the firm proposes to prosecute any one infringing.

Dager & Cox, whose Eureka Paper Mill at Bridgeport, Pa., was destroyed by fire last week, had only just completed a new addition to it, and had put in new and improved machinery, all of which was completely ruined.

The boiler in Moore & Wilson's Union Paper Mill, Waterford, N. Y., exploded on Tuesday night. A fire alarm was sounded, and the fire department responded. The mill was running full time.

Edward Dekum & Co., Portland, Ore., have opened a book and stationery store in the Council Building. Mr. Dekum was formerly in charge of the retail department of J. K. Gill & Co.

Thomas J. Caystile, of the firm of Francisco, Caystile, Mathews & Otis, publishers of the *Daily Times* and *Weekly Mirror*, Los Angeles, Cal., is dead.

Sinz & Fansel, lithographers, Cleveland, Ohio, have dissolved partnership. Charles Sinz succeeds to the business.

H. A. Croft, publisher of the *Express*, Fort Collins, Col., has discontinued the publication of that paper.

Pierce & Snyder, booksellers, stationers, &c., Chicago, Ill., have been succeeded by Gerald Pierce & Co.

OBITUARY.

HORACE S. TAYLOR.

Horace S. Taylor, who died suddenly Wednesday of last week, in this city, was formerly a printer in Springfield, Mass. He was born in South Hadley, Mass., in 1818, and went to Springfield about 1844. His office was at first opposite Court square, and later on Sanford street. In the former office were printed in pamphlet form the earliest literary productions of J. G. Holland, who had just started in the medical profession and needed the assistance which might come from his pen. January 1, 1847, Taylor printed the first number of the *Bay State Weekly Courier*, a literary newspaper which Dr. Holland began "as a refuge from uncongenial pills and a still more uncongenial lack of opportunity for dispensing them." After three months, the doctor gave up the proprietorship of the paper to Taylor, but remained its editor for six months, when it died. After running a printing-office in Springfield for ten years, Mr. Taylor sold out to G. W. Wilson, and removed to New York, where he continued the printing business, publishing the *Bank Note Reporter* for F. P. James & Co., brokers, with which firm he became connected as a partner.

Charles Lynde, for many years a printer in Boston, and during his last years the proprietor of a job-printing office on Cornhill, died at his home in Chelsea, Mass., on Friday, May 23, aged 47 years and 4 months.

The Theosophical Society, which was founded about nine years ago, by Madame Blavatsky, and Colonel Olcott as her first minister, now has upward of one hundred branches in England and India, and is rapidly expanding. The foundress herself is in one of the least frequented regions of Central Asia, to which the higher initiates have retreated as affording a better field, away from communities throbbing with physical passions and materialistic aspirations, for carrying on their great work. Colonel Olcott is in London on a special mission.

Marine Glue.

"Liquid marine glue" is a compound prepared by digesting one part of finely-cut caoutchouc, during about ten to fourteen days, with ten parts of oil of turpentine at a very gentle heat, and under frequent agitation.

This liquid is used for rendering wood, ropes, tissues, &c., waterproof, by applying one or more coats.

What is usually known as "Marine Glue," without the distinction "liquid" or "solid," is prepared by proceeding exactly as stated above, and then, adding to the solution two parts of shellac, or better, of asphalt (for very one part of caoutchouc employed). The mixture is heated in an iron pot until it has become completely homogeneous, and does not give off volatile vapors. During the heating the mass must be carefully stirred, and the temperature should not be allowed to exceed 140° C. (284° F.). It is then poured out into capsules. For use, one of the latter is heated on a water-bath until the contents are melted, when it is transferred to a sand-bath, and cautiously heated to near 140° C. The edges to be cemented together must be warmed, coated with a thin layer of the marine glue, and then firmly stuck together.—*American Druggist.*

The Colored Press.

There are 120 newspapers in the United States published by colored men. The oldest established colored paper now in existence is the *Elevator* of San Francisco, now in its eighteenth year. Most of these publications are of a much later foundation, the larger number dating back less than five years. Almost all are weekly, although there are a few which appear twice a week or once a month. The usual form is a medium-sized quarto. The typographical character of the prints corresponds generally with the state of job printing in their respective localities. These newspapers are published at most of the centres of population through the border and Southern States, and a very few creditable ones are published in such Northern cities as Boston, New York, Philadelphia, Washington, Indianapolis and Cleveland. A few devote themselves to religious news and discussions, but nearly all deal with politics. It is as yet the day of small beginnings with colored journalism. There are no daily papers, and no effort is made to compete with the prosperous daily and weekly white press in securing news. The circulation of all these newspapers is also limited, although one of them, the Baptist organ in Philadelphia, prints an edition of 10,000 copies. The average circulation is probably under 1,000. Advertisements are few, and taken at low rates, and it is doubtful if any of the publications, beyond a few exceptions, are a source of profit.

Parchment paper may be rendered impervious to oils by steeping in a hot solution of gelatine, to which 2½ or 3 per cent. of glycerine has been added, and drying. To render the same paper waterproof it is soaked in sulphuret of carbon, containing in the solution 1 per cent. of linseed oil and 4 per cent. of caoutchouc.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - - - 10 Cents.

NEW YORK, THURSDAY, MAY 29, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

OUR friend and correspondent who has written us a number of interesting letters from Europe, presents us this week with some statements as to the dependence of European artisans upon this country for the means of existence. That the information thus derived is reliable, no one who knows the character of the gentleman making the statements will doubt, and we cannot deplore the miserable uncertainties to which American workmen would be subject if they had to compete with foreign trade under like conditions. The opinion of some people, that we can adjust ourselves to similar experiences, is too unpleasant to consider. It is very much like a promise of starvation for starvation's sake.

SETTLING down after the excitement of breaking banks and failing bankers, people seem to be arriving at the comfortable assurance that no general trouble is to be expected, and that only those, as a rule, who most deserved disaster, are to suffer. There is plainly a reasonable confidence in trade, but at the same time an equally reasonable degree of caution. It is not desirable that business men should forego the conservatism which they have practised too soon or all at once, nor ought they ever to permit themselves to be swept beyond the bounds of reasonable prudence; but at the same time, while it is better to err on the safe side, it is good judgment to consider the situation carefully, and to take advantage of all favorable opportunities that may offer, and for providing against a possible, if not probable, enlargement of trade.

A NEW combination has been formed, this time by the school-book publishers, and although it may be assumed that self-interest prompts the action taken, we think that if properly carried out, the alliance will be of advantage to the public and to the trade. The facts, as stated to us, are that a syndicate of school-book publishers has been organized for mutual protection against what they call dishonest competition. That they have a realizing sense of such an impediment to trade is certainly auspicious, and it will be hoped that it may be kept alive. An agreement for the purpose assigned has been drawn, and twenty of the leading school-book publishers have affixed their signatures to it. All of the firms prominently engaged in school-book publication, with the exception of Harper & Brothers, Porter & Coates, and A. L. Bancroft & Co., are in this combination.

It is stated, however, that the arrangement is to govern prices as to discounts only. Rival publishers have hitherto been making all sorts of discounts to stimulate the introduction of their books,

but hereafter no publisher in the syndicate will be permitted to concede a discount of more than 10 per cent., except to large dealers with whom special contracts have been made. The method of introducing books into schools has also been changed, and agents will not be permitted to come into personal contact with school boards and teachers. This is a good principle, and it cuts off the perquisite or special commission business. Agents will only be authorized to communicate with teachers by correspondence. Further than this, a "central bureau" has been established to correct all abuses and violations of the agreement, and the introduction of school books is to be left entirely to the judgment of teachers and school boards as to the merits of the books. Further than this, should the officers and teachers of a school decide to change the text-books, the publisher whose books are substituted is to be required to notify the central bureau of the change and to recompense the publisher whose books have been discarded. It is claimed that while the combination is not in the nature of a monopoly, it will naturally have the effect of maintaining prices, the uniform discount having the effect of preventing the tendency to cut under regular rates. A heavy penalty is to be imposed on the publisher who supplants another house in any way but by the methods provided. Now, what do the trade think of this?

ROUNDABOUTS.

BY THE TRADE LOUNGER.

The "Lounger" looked in at the dinner last week. I believe that I intimated something of such a possibility. The menu was choice, and everything was lovely. Of course, somebody had to talk at me, but it was done gracefully, and the hat was so pleasantly touched that I must acknowledge the compliment and return the salute. When great men meet, &c. * * * *

The week has not been eventful in a general trade way. It is with regret, however, that the trade will learn of the serious accident to Charles D. Myers, of Myers Brothers. Your readers will probably get a full account of it from your columns, and it is hoped that you shall be able to report favorably on Mr. Myers' prospects for recovery. * * * *

Orders are small, but more numerous. By and by they will be larger. Conversation with several business men during the past week elicited expressions of cheerful expectation and buoyant hopefulness which are very gratifying. Nobody seems to be disheartened; there is no dismay and a good-humored feeling prevails. Business men are able to whistle, and their favorite air just now is "Wait till the clouds roll by." * * * *

An English stationery firm has invented

what is called an electric pencil. The writer takes hold of the pencil as he would an ordinary one, merely places it in the usual position, and, with finger or thumb, touches a small button, when the lead instantly appears. To repel, the point has simply to be directed slightly upward. As the point locks itself both in and out, it is impossible to disturb it either while writing or when placed in the pocket.

* * * *

A new design in playing cards has been brought out. The change occurs in the form of the court cards, each suit having a card containing eleven pips or spots and the head of a knave, a card containing twelve spots or pips and the head of a queen, and a card containing thirteen spots or pips and the head of a king, together with characters upon the upper left-hand margin of each of these cards, as follows: The first letter of the title of the court card, a pip of the kind contained on the card, and a number corresponding with the number of pips on the card.

* * * *

Another new thing intended for the use of lithographers is an apparatus for damping lithographic surfaces. It consists of a so-called "condensing atomizer" or apparatus for distributing upon the surface of a lithographic stone water in the form of vapor at any temperature and air sufficiently below the dew-point of the vapor to effect its condensation and conversion into a cloud of water particles, which by their propulsion against and attachment to the printing-surface accomplish its damping.

* * * *

A new style of note paper is made in the form of a small square, representing a lady's hemstitched handkerchief and having the appearance of linen cambric. It gives the idea of a person short of writing paper, using a handkerchief as a substitute.

* * * *

Porcelain and ivory cards are very attractive this season. They come with embossed gold mottoes for birthday and Christmas cards, suitable for hand-painted decorations, and with or without mounts.

* * * *

There is said to be the liveliest kind of competition going on in shelf papers. There are some six manufacturers of this class of goods in this country, and although under a proper condition of affairs there would be room enough for all without treading on each other's toes, as the case is now certain, dealers have been trying to monopolize the trade by cutting down prices. Where formerly the business yielded a good profit, it now scarcely pays the cost of manufacture. The only person who is said to derive any benefit from this reduction is the retailer. The consumer continues to pay the price originally asked. The peculiar feature of the thing is that the manufacturers will not combine, and hence are continually at sword's points.

The Chaplin Paper Mill, owned by Fred. L. Case, Chaplin, Conn., was burned on May 21. Loss, \$25,000; insurance, \$8,000.

ANSWERS TO CORRESPONDENTS.

S. Mfg. Co. asks for addresses of manufacturers of checkers in the United States.

Ans.—The Embossing Company, Albany, N. Y.; Milton Bradley Company, Springfield, Mass.; Wellington Pressed Ivory Company, 251 Centre street, New York and Seafeld Manufacturing Company, Broome street, New York.

J. L. says: Can you tell me what are the number of yards or fractions of a yard to the pound on 1 x, 2 x, 3 x and 4 x—36, 40, 44, 48 and 54 inch.

Ans.—We give you the following table:

36 inch.	40 inch.	48 inch.	44 inch.	54 inch.
1 x = 10 ft.	8 3/4 ft.	7 ft.	8 2-11 ft.	6 3/4 ft.
2 x = 8 ft.	7 ft.	6 ft.	6 6-11 ft.	5 3/4 ft.
3 x = 6 1/2 ft.	6 ft.	4 4-5 ft.	5 7-22 ft.	4 3/4 ft.
4 x = 5 ft.	4 1/2 ft.	3 1/2 ft.	4 1-11 ft.	3 3/4 ft.
5 x = 4 ft.	3 1/2 ft.	3 ft.	3 3-11 ft.	2 3/4 ft.

M. W. W. & Co. asks for names of manufacturers of "school companions."

Ans.—Roache Manufacturing Company, 147 Mulberry street, New York; Eberhard Faber, New York.

Wright requests addresses of some manufacturers of papier-mâché goods.

Ans.—James Goldsmith, 2 Astor place, New York; Knok & Co., 324 Washington street, New York.

W. L. A. asks for addresses of dealers in base-ball goods.

Ans.—Peck & Snyder, 126 Nassau street, New York; A. G. Spaulding & Brothers, 108 Madison street, Chicago; New York News Company, 20 Beekman street; John Wilkinson Company, 62 Wabash avenue, Chicago.

R. S. W. asks for address of manufacture or jobber of lamps illustrated in THE STATIONER of the 22d inst.

Ans.—C. F. A. Hinrichs, 29 Park place, New York.

A hard-working young man with his wits about him will make money while others will do nothing but lose it.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, May 28, 1884. }

THE MONEY MARKET.—The money market has worked with comparative ease during the past week, and the supply of loanable funds is ample. The ruling rates for call loans have been 4@5 per cent., although in some instances as low as 1 1/2@2 per cent. has been paid. Toward the close as high as 6 per cent. was paid on call by belated borrowers, but the closing rates were 3@4 per cent. Time loans nominal. Commercial paper firm. The stock market has again experienced a period of feverish activity, and the depressing influences that were used last week with so much effect in depressing prices has prevailed most of this week, but near the close a better feeling prevailed in consequence of the support given by large buyers, and a better feeling was developed and the market left off strong. Government bonds were 1/4 lower for all issues. Railroad bonds were active and strong and prices show an important improvement. Foreign exchange has ruled firmer, the demand for remittance having improved, with commercial bills scarce and no security bills on the market.

THE PAPER MARKET.—Quite in sympathy with nearly every merchandise market the paper market continues to lag in a depressed condition. Production is yet carried on at a rate beyond the requirements of the trade, and the consequence is that supplies in manufacturers and dealers hands show a steady accumulation, which is beginning to be both embarrassing and vexatious to a good many, and there is very little probability of a halt being called and production curtailed in the least, and the offerings, therefore, as must be expected, are constantly increasing. The tone of the general market may be quoted easy; but prices are without quotable change, and the prospects for a reaction from this unsatisfactory condition are not considered very favorable. An improvement in the monetary situation seems to be generally conceded, and a more hopeful feeling with respect to the future is somewhat admitted, which, in connection with the prospect of good crops, ought certainly to be counted as affording some little encouragement. The fact should not be lost sight of that the business interests of the country have been undergoing a severe strain during the past three weeks, and that so long as it continues there will be very little disposition to enter into new ventures of any kind, and that in every direction the tendency is to curtail operations of every description within the limits of absolute safety.

THE STATIONERY MARKET.—There is nothing to indicate a much greater activity in trade than was noted last week; but dealers generally are full of hope and confidence respecting the future, and business is really much more encouraging, for while orders are smaller they show an increase in number. Dealers are buying somewhat more readily and show a greater disposition to re-order. For staple goods generally this season is the duller part of the year, and dealers are mostly engaged in straightening up affairs, making collections and otherwise preparing for the active fall trade. The period of dullness which has marked the opening of the new year has tended to bring trade down to a more conservative basis. Dealers everywhere are showing a disposition to do business on sounder principles. The action of school-book publishers in combining to maintain prices, &c., is not calculated to increase the volume of sales as quickly as if those in the combination were enabled to offer prices that would tend to stimulate sales.

Queer Postal Statistics.

The young lady that was delighted to read in the dictionary because the stories were so short, could add to her pleasures by looking through the United States official postal guide and see some peculiarities in the names of the myriad post-offices. Four of them have each only two letters; they are Ok, Oz, Ai and Po. The lightest town is Pound, in Wise County, Va. The town that holds the least is Gill, in Franklin County, Mass. Two hundred and forty of them commence with Rock, 42 with Stone, 106 with Sand, 68 with Clay and 15 with Mud; 135 are Cedar, 124 Pine, 216 Oak, 25 Chestnut, 100 Maple, 36 Locust, 61 Elm, 28 Apple, 38 Hickory, 27 Poplar and 10 Spruce; 2 are Poor and 106 Rich; 81 are High and 72 Low; 113 are Big and 106 Little; 100 are Long and 11 Short; 42 are Upper and 24 Lower; 600 are New and 42 Old; 16 are Great and 3 Small; 47 are Clear and 15 Muddy; 13 are Wet and 41 Dry; 8 are Hot and 38 Cold; 1 is Violet, 65 are Blue, 230 Green, 27 Yellow, 42 Orange, 123 Red, 300 White, 105 Black, 36 Gray, 200 Spring, 28 Summer, 39 Fall, 17 Winter.

There are from 500 to 630 each named East, West, North and South, 117 are Centre or Central; Prairie has 51, Flat 40, and Level 7, Pleasant 145, Hill 76, Valley 50, River 60, Bridge 51, Saint 257, Lake 121, Mill 217, Bear 34, Liberty 67, Mount 400, Middle 106, Farm 87, Gold 34, Silver 62, Port and Fort 130 each, Fair 116, Kings 75, Queens 7, Beaver 62.

Over 100 post-offices have but three letters to their name, 7 Ada, 6 Ida, Uri, Ayr, &c., Sugar 43, Honey 12, Ridge 50, Smith 95, Brown 81, Jones 43, Williams 70, Adams 42, John 65, Fair 116, Fairview 28, Eden 32, Indian 55, Glen 135, Union 128, Rose 90, Young 31, Sweet 24, Square 1, Round 36, Ash 83, York 43, Coal 35, Church 24, over 200 Mc or Mac. Nineteen of the towns, however prosperous, will always be Owen. People living in Luck, Wis., or Lucky Ore, have a name signifying succeed, Zero in Iowa has a frigid sound. "Energy" and "Clear Grit" will push things, "You Bet."—*American Druggist.*

Stamping Ink.

A good ink for rubber stamps may be prepared thus:

Solid Aniline color.....	parts.	16
Boiling, distill. water.....		80
Glycerin.....		7
Syrup.....		3

Dissolve the proper aniline color in boiling water and add the other ingredients.

It is usual to select either black, blue, or violet, or red aniline colors. Any dealer in colors will know what kinds are suitable. They must be water soluble, of course. Nigrosine, methyl-blue, Hoffmann's violet, methyl-violet, and eosin are probably the best for general use.

A good stamping ink should not dry quickly upon the pad, but on the other hand, should dry rapidly when applied by the stamp to paper.—*Am. Druggist.*

As for the place you were cast, don't find fault with that; you need not be a horse because you were born in a stable.

PRICE LISTS AND SPECIMEN BOOKS FURNISHED ON APPLICATION.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, May 27, 1884.

"Ups" and "downs" in New York stocks make but little difference in trade here, but when there are all "downs" and no "ups" that does make a difference. People begin to take an interest in the situation then and ask, "How many banks in the East hold speculative stocks as collaterals and how much?" Then they reflect, "What if some of these banks should get 'embarrassed?'" But if the trouble in the East should stop with their mere "embarrassment" instead of their going to wreck what need of apprehension by banking and commercial people in the West? People reflect again and reply with other questions "Has not every Western bank some one or several Eastern banks as correspondents?" "If these correspondents should be debtors to Western banks at the moment of their embarrassment would not that to a greater or less degree embarrass the Western creditor banks?" The "what of it" in these implied cases would be the general locking up of money, taking it out of circulation and communicating the bank "embarrassment" to all classes of business. But the prompt criminal proceedings in New York against the crooked ones, who, according to the report by the examiner, brought on calamity by their own crookedness, has tended to purify the atmosphere and make breathing much easier, even here in the West. It shows that the trouble grew out of individual folly and criminality, and not out of the commercial situation, and therefore conserves confidence and softens apprehension.

A bright young business man—one who is alive all over—intensely vital in fact from sole to crown, remarked to "Prince William" the other day, "Do you observe how business in all lines is showing a tendency to concentration? Why go through the galaxy of cities which surround Cincinnati, within a radius of two hundred miles, and see how few of them have a book store worthy of the name. Many of them had better book stores thirty and forty years ago when they had less than one-third as great a population as they have at present. The time was when buyers of books purchased in these little towns and cities, now they come to the business centres personally and buy their books. Outside dealers are limited more and more to small local sales, which requires but a light stock, while they order for customers books that they have not in stock, if the customer does not choose to order directly for himself. I am not saying whether this centralizing of business is better for the country or not, I leave that question out entirely, and speak of the bare fact which is so apparent that every observant man must have noticed it."

Apropos of this, there is a dry-goods palace in Cincinnati owned by a stock company which is capitalized at two million paid in, and this great establishment in addition to dry goods, sells boots, shoes, stoves, furniture, trunks, harness, hardware, books, stationery, and

within a fortnight since this lightness in the money market set in, it has gone to lending money on mortgages on the safest collaterals.

There have been no changes in the book, stationery, or printing firms here in Cincinnati during the past week. The *News-Journal*, a morning daily, with the Associated Press franchise behind it, will be sold at auction to the highest bidder next Saturday, by order of the courts. It has been smothered with the very multitude of its stockholders. It may not be the same old *News-Journal* after its sale, but it will certainly be a daily paper of some sort, for it is not likely that its Associated Press franchise will be permitted to expire.

Business is voted a laggard, lubberly, lazy fellow here just now by everybody who has anything to do with him. They expect him to recover from this "spell" sooner or later. In fact, manufacturers who have special lines of their own, which they have built up patiently by long years of labor, have their hands full of work even now. Robert Clarke & Co. publish more legal blanks, and a greater variety of them, than perhaps any other house in the nation; then they have their law publications and other books, and they are very busy at the present time.

PRINCE WILLIAM.

Names of Type Sizes.

So few printers could give a reason for calling a certain size of type by one of its recognized names, that we are induced to offer the following information concerning the origin of the present designations.

Originally there were seven sizes. The first was called Prima, whence the name Primer, but now this sort is termed Two-line English. The second was Secunda, now our Double Pica; in France, Great Paragon. The third was Tertia, at present our Great Primer. Then there was the middle size still called in German Mittel, but is now our English. After these came the three sizes on the opposite side of the scale—Pica, Long Primer and Brevier. In Germany the names Secunda, Tertia, and Mittel are still retained.

Pica in France and Germany is called Cicero, because the works of that author were originally printed in it. English printers so styled it from being the type in which the Ordinal, or Service Book of the Roman Church, was originally set. This Ordinal was first called the Pica, or familiarly the pie.

Bourgeois was so named because it was introduced into the country from France, when it was originally dedicated to the bourgeoisie or citizen printers of that capital.

Brevier obtained its name from its having been first used for printing the Breviary or

Roman Catholic abbreviated church service book.

Nonpareil was so named because on its introduction it had no equal, being the smallest and finest type produced until that time.

Pearl is of English origin. The French have a type of the same size which they call Parisienne. It was a smaller type than nonpareil, and was thought the pearl of all type.

Diamond is another fancy name given to what was regarded at the time of its origin as the *ultima thule* of letter foundry achievement.

One or two sizes besides have been made and capriciously designated by their respective producers. There is no doubt, however, that the best, because the most scientific and accurate, system of designating types is the French system—according to "points." English type founders naturally object to, and hesitate to, adopt an innovation of so revolutionary a character; hence the present time-honored names are likely to hold their own in the terminology of the printing office.—*Printer's Circular*.

The Art of Sealing a Letter.

There is a great art in sealing a letter, and the candle, the stick of sealing wax, and a daintily engraved seal are now requisites of the fashionable writing table. When the note and candle are ready, do not begin by thrusting the end of the wax stick into the flame and conveying it in a flaming splatter of wax to your envelope. Take plenty of time to do it. First lay the seal right to your hand, so that the impression may be square and not wrong side up. Then hold the wax considerably above the flame of the candle, not close enough to burn. A burnt wax makes a brittle, streaky seal, and is hard to manage. When the wax has gradually softened, apply it with a circular movement of the hand upon the note. Rub it well around and down until you have the proper circle and of sufficient thickness. Then do not apply the seal. The wax has cooled so that it would not take a clear impression. Hold the envelope some little distance from the flame, then lay it upon your desk and apply the seal. The result should be a clear-cut impression.

A wash of one part nitric acid in ten parts of water will impart a stain resembling mahogany to pine wood that does not contain much resin. When the wood is thoroughly dry, shellac varnish will impart a fine polish to the surface. A glaze of carmine or lake will produce a rosewood finish. A turpentine extract of alkanet root produces a beautiful stain which admits of French polishing. Asphaltum thinned with turpentine makes an excellent mahogany color on new wood.

No. 509 Chestnut Street, Philadelphia, Pa.

SPECIALTIES:

LETTERPRESS COPYING BOOK,
Railroad and Bank Supplies.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
Size $6\frac{1}{4} \times 3\frac{1}{4}$ \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN & CO.,

Sole Proprietors and Manufacturers,
60 WILLIAM STREET, NEW YORK CITY.

STATIONERS' STAMPING PRESSES.

THESE Presses are especially designed for the fine illuminated work now required. For convenience, accuracy and durability are not excelled by any Press made for the purpose. The patented device for reversing the die and counter saves time. Have been in use by many of the principal Stationers for the past twelve years.

Prices and other information given on application.

Envelopes and Writing Papers

THE ENVELOPES and WRITING PAPERS manufactured and sold by the PLIMPTON MFG. Co., of Hartford, Conn., are unsurpassed in quality and styles by any other manufacturer in the world, and their prices are as low, if not lower, and their facilities for furnishing printed Envelopes are unequalled. Address

PLIMPTON MFG. COMPANY,

HARTFORD, CONN.

Contains 300 letters, figures, &c.—11 alphabets of. Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$4.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{1}{4} \times 4\frac{1}{4}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

A New Varnish.

A new varnish has been invented in France, according to the *Oil and Colorman's Journal*, the principal ingredient of which is entirely distinct from the gums of ordinary varnish. The base consists of paper treated with nitro-sulphuric acid and camphor dissolved in alcohol. The varnish is composed of this ingredient, with acetic ether, sulphuric ether, castor-oil, Venetian turpentine, methylated alcohol, acetate of amyl and pure crystallizable acetic acid in definite proportions. The varnish is said to have the following properties: It is unaffected by water and humidity, and will also resist weak and concentrated acids and likewise alkalis if contact be not too prolonged; it takes a fine polish.

It can only be applied to surfaces warmed either by the sun, before the fire, or in an oven at the temperature of 35 to 45° of Centigrade. If applied to a cold surface it becomes white, and the coating is wanting in coherence, and possesses none of the qualities of the same varnish applied to a warm surface. Any kind of brush may be used for applying it. It dries in two minutes at the outside, so that twenty-five or thirty coats may be applied per hour. It may be rendered more flexible, and may then be applied to cold surfaces, by adding crystallizable acetic acid and acetate of amyl.

SPECIALTY: THE FINEST LINE OF HALF-BOUNDS MADE.

RELATION OF TRADE JOURNALS TO BUSINESS INTERESTS.

At the Lockwood Press Dinner, Charles K. Hammitt responding to the toast: "Trade Journals—Their relation to the Mercantile and Manufacturing Interests," said:

Trade journals, more or less, intimately concern all present, and, doubtless, all that I can say in this connection has already been fully thought over by you. Their existence is in response to the demands of trade, and should they cease to exist, they would leave a void which nothing yet developed could fill.

The duty of trade journals is to point out defects in systems of trade, and advocate policies of improvement; to ferret out and expose what are commonly known as the tricks of trade, and by earnest and constant denunciation to encourage a sentiment of fair dealing; to study carefully the requirements of trade and present plans for its promotion; to collect news of every description from all quarters, select such portions as concerns the trade represented, and to present it in a full yet condensed and readable form; to seek channels of trade hitherto unexplored, and point out the advantages of and ways to develop them; to draw together members of trade, and secure co-operation where individual effort would not be sufficiently potent; to suggest instruments for a more speedy or more economical method of accomplishing given results; to learn of and give prominent notice to improvements in systems or implements calculated to benefit trade as perfected by specialists; to report the conditions of markets, and record fluctuating prices; to crowd out antiquated wares, and bring forward new and improved styles. This and much other kindred work enters into the duty of the highest type of trade journalism.

Work of this character, vigorously prosecuted, naturally makes the influence of the trade paper very great. Its columns are read closely by those whose interests are of such magnitude as to keep them from searching for themselves through every source of information, to learn what has transpired or is likely to transpire to affect them. The full and condensed form of the information in the trade journal is fully appreciated by them, and their paper becomes to them what the chart is to the mariner—a guide in navigating the sea of commerce.

It is sought after, also, and read closely by the wiser members of trade in all classes, whether manufacturer, distributor or he who sells to the consumer—in fact, by the larger and wiser consumers.

In measuring the influence of the trade journal it will be well to consider the character of the men to whom I refer. Numerically, men of this class, in any single trade, represents only a small portion of any one community, but they are scattered throughout the land, and in their respective communities their opinion has great weight for shaping the opinion of their neighbors, not alone on matters of trade and commerce, but on whatever relates to the general good.

Of necessity trade journals meet with people connected with the trades which they rep-

resent, who antagonize them and try to belittle their influence as every progressive work strikes the personal interests of individuals and awakens opposition, but these men are careful to learn the contents of their trade paper, and are unconsciously influenced thereby, and in common with those who declare their appreciation, seek desired information in its columns. Although, perhaps, it has not been realized, the trade journals of the country have exerted an influence, during the past few years, which has counteracted in advance much of the evils which might have resulted from the recent financial panic in Wall street. The faithful record of the condition and prospects of trade, coupled with the cautions against over-trading and the advice to shorten credits and to avoid excessive indebtedness, acted upon by their readers, has placed the country in such a position that, heavy as this shock was, the mercantile interests have weathered the storm without any important disaster.

A duty of the trade journal not yet referred to, and yet one of its most important duties, is to bring the buyer and seller together. The buyer in reading his paper seeks not only prevailing prices, conditions and prospects of trade, but expects and requires reasonable assistance in directing him to the best sources through which to supply his wants. For this assistance he consults the advertising columns, and this at a time when he is peculiarly alive to his business interests. At such times houses which have shown sufficient forethought and enterprise to secure representation in the advertising columns of their trade paper derive benefit of immeasurable value, even though business did not immediately result, as in the buyer's mind they and their business have become associated with the idea of supplying his present or future wants.

For the convenience of buyers, leading producers and manufacturers congregate in one location, frequently having their places of business adjoining each other so that buyers may complete their purchases without needless delay in going from one to the other; and so for the convenience of buyers leading producers and manufacturers should constantly keep their card setting forth their business and location prominent in accepted trade journals so that buyers may, without loss of time, find the address and name of any firm wanted. This card should be supplemented by seasonable announcements, attractively displayed, setting forth fully the wares manufactured and ability to meet trade requirements.

The trade journal affords an opportunity for this use not presented by any other medium of any character, because all of its readers are interested parties and possible customers, and few but those interested in a given trade would find its trade journal of interest to them, while in the general press it is only the occasional reader who is interested in trade matters.

The value of reaching the readers of the trade journal as compared with that of other mediums is further increased by the fact that the former buy for hundreds or thousands while the latter buy only for themselves.

Some patrons of trade papers have the idea that money spent in advertising in them is so

much of a contribution toward their support, and while they realize the necessity of their existence, they do not recognize their value as mediums of advertising.

The disposition to extend support to trade journals because of their usefulness is commendable on their part, but it is liable to lead to error in that the inferior journal may present the same claim as the superior. Careful preparation of advertising matter accompanied by ordinary watchfulness and proper analysis of results will convince philanthropic supporters of trade papers that those journals which really merit their support bring evidences of their value as advertising mediums fully commensurate with their charges, and they would promote trade interests as well as their own, and secure a higher standard of merit in these journals by patronizing them upon the ground of merit as well as usefulness. Where cheapness in price as compared with others is the reason urged why support should be given, it is safe to assume that support is costly at any price.

Prominent houses sometimes boast that they have always been successful, and that, too, without advertising in trade papers; and while this may be true, it does not follow that they would not have been more successful had they so advertised. Somehow, this boast always reminds me of the aged Christian who, in remarking upon how free Christianity was, boasted that it had cost him throughout his life only 25 cents, and to him his minister, in righteous indignation, exclaimed: "The Lord have mercy on your poor stingy soul!"

Evidently, the Christian had never learned the beneficial influence upon his own character of giving as God had prospered him, nor the richness of experience of those who recognize that they have entered into His plan, and are fulfilling the part allotted to them in His work. Nor have the houses referred to learned the broadening and ennobling influence upon the character of their individual members by realizing their intimate relations to the fabric of trade and the consciousness that they are fulfilling their part in its development.

Also a full assortment of HAMMOCKS, BASE BALLS and BATS, RUBBER BALLS, FOOT BALLS and CROQUET.

Wood Carving.

It may be generally remarked that wood carving offers boundless scope for the exercise of taste and display of skill in manipulation. While light and shadow belong to its effects, it has yet the merit of being in no way deceptive. Its relief is real and not that of the colorist. It allows at once of literalness in treatment of a subject, while affording a fine play to the symbolic style in its representations. There is a vast difference in the pleasure derivable from carving as employed in constructive decoration and forms impressed in plastic material or fashioned by machine work. The labor obviously spent upon carving, and the stamp of individuality expressed in the production, if of any merit, are distinctive elements of value. Nor even if we descend to imitation can the same type or design be exactly reproduced. One cannot but admire the devotion to this art, in the development of its fullest capabilities, shown by the artists of olden time. The evidence of sincere love of beauty, and its realization exists in oaken watching lofts, chantries, shrines, screens, choirs and pulpits, as well as in the delicate carving by which the rooms of mansions were decorated. The ancient masters of the art seemed to know just when and how deeply to incise with reference to artistic expression. Much antique work exhibits especial excellence in contrasted relief, and a consummate knowledge of the different effects produced on qualities of shadows, by under ceilings, edges and sinkings in the centre leaflet of each group, in contrast with the convex forms interspersed here and there, so giving effect of boldness and strength to the details.

It is to be regarded as a hopeful augury of the future of this art, that local individual wealth is in many instances extending to it, for purposes of household adornment, munificent patronage. This aids in keeping up its standard of excellence, encouraging designers and artists to put forth their best efforts, and gives an impulse to popular appreciation of the capabilities of wood carving. It is noticeable that good artistic carving is being extensively introduced into furniture. The Renaissance style, with its varied types and combinations, aids the movement. Free development, as to variety in wood carving, designed to constitute constructional adornment, must be allowed. Dictation on this point is not to be tolerated. Even grotesqueness has always had its place in the art, though in the newer methods this feature is not so prominent as in the old. The greatest triumph in this style, as regards the display of real art in manipulation, was in the mediæval period, when mysteries of religion were thus expounded without the thought of irreverence. Legends of the power of darkness gained in effect by representations of demons, with countenances horribly distorted, as from intense suffering, a portion of their writhing bodies struggling to get free from the mass of wood in which they were carved, the artists being especially free in fantastic renderings of the devil tempting weak-minded mortals. In these extravagances the

execution operates like the play of wit. A fund of lightsome enjoyment is presented in the social caricatures and humorous scenes of the Dutch wood carvers, not only in panels embedded in the walls, but in wooden articles of domestic use. Satires and epigrams of Roman poets were at times directed to the carvings on the drinking cups in use. Both by the Greeks and Romans immense sums were lavished on carved tables. Homer alludes to the historic scenes set forth in the drinking cups of his heroes.

The art would seem to be as ancient as the world, and to have embodied to some extent the mental peculiarities and usages of various nations. Each great movement of the human race in early times is marked by distinctive forms and treatment of ornaments, and carving is included in the record. The Italians seem to have retained that love of minute carving which was introduced by the wandering Greeks of the thirteenth century, but their half Gothic, half Renaissance style, florid in execution, which was developed in the fifteenth century, revealed at least a departure from foreign thralldom in the art. The Dutch carvers have found their delight in literal rendering of homely scenes; French carving has all the lightness of the Gallic spirit; the Spanish, the barbarous magnificence of the Moors, and a plentitude of enrichment, consisting of Alhambra symbols, Arabesque scrolls and Gothic flourishes. English carving, like our own, is eclectic, taking to itself what best suits its purpose.

There have been, as there will always be, among many failures, great amateur successes in producing artistic wood-work. An amateur has been well described as a person who makes a business of amusements; he has not necessarily to study what will please others, or confine himself to what is marketable, and with more leisure possibly at command for any special production than can be bestowed by those who have, in doing ordinary work, to regard the price of compensation. The amateur can afford to make experiments, to waste time and materials, and so may possibly succeed in producing a *chef-d'œuvre*. Practice in this healthful and beautiful art, in which proficiency can be far more easily attained than in painting, may be recommended as possibly calculated to elicit powers that might have been otherwise unsuspected.

The tools required for the practice of wood-carving are flat and skew chisels, shallow, deep and fluting gouges, one flat and one bent parting tool, a chisel with edge turned up to cut away wood, picks with one, two and three points, to break up surface where carved work is done on a level ground, and the ruffler or bent file for smoothing depressed surfaces after the work of carving is completed. The gouges are especially used for hollowing out leaves, leaving the mid-rib in relief, and for scroll work, also for cutting away adjoining wood. Arkansas oil stone may be used for sharpening the tools, using sweet oil, neatsfoot or kerosene. There are two methods of carving open to selection—that in which the design is wrought out as a bas-relief, and that in which it is brought even to the extended back of the piece of wood. The most suitable hard woods for carving are oak, mahogany, walnut and ebony, and Spanish chestnut.—*Art Amateur*.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Oxalic Acid in Lithography.

Oxalic acid we obtain mostly from wood sorrel and the sorrel tree, but it is contained in many other substances. It is manufactured in large quantities from heated sawdust in connection with hydrate of potassium, &c. Oxalic acid is in colorless and odorless crystals, with a strong sour taste. It is soluble very slowly in eight parts of cold water to one part of oxalic acid, but it is easily soluble in hot water. It is very poisonous, and many cases of poisoning have already occurred in lithographic establishments by mistakes when regular or common salt should have been used. It is a sure remedy, when not too late, to give the person who has swallowed oxalic acid large draughts of water, mixed with white chalk.

Oxalic acid is used for preparing stones for engraving, and is greatly preferable before etching with nitric acid when machine ruling is to be applied on an engraving. It only requires a little more weight on the diamond, as the oxalic acid produces a layer on the surface of the stone, which the diamond has to cut through; otherwise, all lines would not have the necessary strength and would look broken; but when the diamond has cut through the layer, the lines will print sharper and more distinctly than in the etching with nitric acid. It also prevents scratches on the stone from taking ink. Oxalic acid is also used for keeping the edges of the stone clean in the steam press. A solution of ten parts of dissolved gum arabic, one part of oxalic acid, and one part of phosphoric acid is the best preparation for stopping out lights and correcting errors on engraving stones. This acid is not effervescent, and does not spread out as nitric or muriatic acid does. It is also the best acid to take off any dirt or scratches from old engravings; but very great care must be taken that no work is touched that is to remain on the stone, for where the oxalic acid is once applied the ink will not easily take hold again. Therefore, it shows what is a good remedy for one thing is a very dangerous thing for another.—*Lithographer.*

The Japanese Lacquer Industry.

The Japanese native papers are crying out at the extinction of the lacquer industry. The tree from which the varnish is obtained is disappearing. Formerly, like the mulberry tree on which the silk-worm feeds, it was protected by law. Each family of the upper classes was obliged to rear 100 trees, the middle classes 70 and the lower classes 40. Since this law fell into desuetude the cultivation of the lacquer tree has rapidly declined. The trees were cut down without care and none were planted to replace them, so that they have become exceedingly rare, while the price of lacquer has enormously increased. Similar complaints, too, are heard of the process of disafforestation going on in Japan since the ancient law, which required every one who cut down a tree to plant two in its place, was abolished.

Truths are first clouds, then rain, then harvests and food. The philosophy of one century is the common sense of the next.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot

BOSTON NOTES.

FROM OUR REGULAR CORRESPONDENT.

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, June 3, 1884.

Just what the volume of business has been for the month of May is a question which city dealers are not yet prepared to answer. Accounts are being made up; but it is safe to say that the footings in most cases will not equal the figures of previous months. Although business for the month of May has shown a slight falling off, dealers generally are inclined to think that the month's trade will compare very favorably with that of last year.

As the summer months draw near, business is expected to grow "beautifully less" until a decided dullness sets in, and then all hands will go a-fishing.

Thomas Groom & Co., of State street, who do, besides a good jobbing trade, a large local business in counting-room supplies, are beginning to feel the depression incidental to the season, and report only a fair local trade. As a member of the firm remarked, "Trade might be better, but, then, it might be worse." Stephens' writing fluids and copying inks, which this house is handling quite extensively, received at the late Foreign Exposition, held in this city last fall, a gold medal in recognition of its merits.

Winkley, Dresser & Co. are enjoying a fair share of what trade is doing, and are not disposed quite yet to complain of any dullness. This house, however, is unexceptionally situated as regards trade, and when one line of business slacks up a little, activity is observed in another. Mr. Winkley, who gives his personal attention to the school-book trade, reports that for the coming season a very large New England business is expected. Mr. Dyer, formerly manager of the Pittsburg News Company, has identified himself with the interest of Winkley, Dresser & Co., representing the house on the New England circuit. This house is also mailing to the trade its circular announcement relative to Christmas cards and other holiday novelties for the season of 1884-'85. In satin decorated goods and hand-painted novelties, an elegant line of about twenty-five different designs is displayed. These goods

are new and original, and are manufactured by the house with the view of meeting the demand for something choice. When the trade are looking up holiday novelties, the line should be examined.

John A. Boyle, manager of the Boston School Supply Company, reports that the "Methods of Teaching Geography," a work by Lucretia Crocker, is meeting with hearty endorsement from all school committees. At the meeting of the Boston School Committee on May 27, it was recommended that such teachers of the Boston public schools as are engaged in giving instruction in geography be supplied with this work. There is little doubt but this valuable work will be placed in the hands of teachers throughout the State. Hughes's series of maps have also been furnished to the city schools by this company.

John Carter & Co. have just been appointed United States agents for the Russian linen ledger papers. These papers are specially manufactured for ledger folios, and blank-book makers might find it advisable to look into the merits of this Russian ledger paper.

Though a little late in the season, the demand for mucilage still holds on. The trade, however, is mostly confined to small orders, showing that dealers are wanting just enough to carry them through the summer, intending to stock up later in the season. In this line of goods, Whittemore Brothers & Co., manufacturers of the "Triumph" mucilage, are filling numerous orders. The "Triumph" mucilage has only been on the market a short time, but it is working its way to popular favor, both with the consumers and with the dealers. The manufacturers of this mucilage know that they have a first-class article, and by keeping its quality right up to the highest standard of perfection, they expect soon to see the "Triumph" mucilage taking the lead. Wherever this mucilaginous compound has been introduced, it continues to hold the trade, and that fact is ample evidence of its worth.

Out-of-town buyers have not been very numerous during the past week, but, of those visiting the city a number have found their way to the Stationers' and Printers' Exchange, enjoying the many conveniences here offered. Among those registered are: Frank W. Stiles, printer and publisher, Springfield, Vt.; W. L. Wardle, publisher, Dedham, Mass.; John P.

Sanborn, Port Huron, Mich.; Wm. A. Currie, stationer, Providence, R. I.; T. C. Eastman, box-maker, Milford, Mass.; Wm. Keith, stationer, Brockton, Mass.; Charles A. King, printer, Milford, Mass., and Frank P. Merrill, Thomas Todd, Fred. L. Coburn, J. F. Turner, T. E. Pearson, representatives of the city trade.

As the facilities offered to the trade become more widely known, the number of visitors to the Exchange is increasing. Let it be remembered that all are welcome. A. L. D

SCHENECTADY ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

SCHENECTADY, May 28, 1884.

There have been no additional failures in business circles here during the past month, and there is a very general feeling that bottom has been reached. Business in general, however, continues dull.

Considerable interest is manifested in the question of sewerage for the city. For a long time the best interests of our city have demanded sewers, and the lack of them, in the opinion of many representative citizens, has greatly retarded the growth of the city. Last year the Legislature authorized the bonding of the city to raise the money necessary for laying sewers, and the Common Council has passed an ordinance regarding the construction of sewers, and that is about as far as the matter has gone. It was expected that the committee having the matter in charge would proceed with the work this summer, but, for some reason, the matters seemed to have been buried by the committee, and the prospects of sewers for another year are growing beautifully less, and the prospects of malaria and typhoid fevers are all that could be desired.

The Schenectady *Daily Union*, since it passed into the hands of George West, shows signs of prosperity and is greatly improved from what it was a year ago. It is now a seven-column paper, and its advertising columns show that our business men appreciate it as an advertising medium. The paper was founded and for a long time owned by ex-Senator Charles Stanford, a brother of ex-Governor Leland Stanford, of California. At one time Mr. Stanford was its editor, but of late years he has had nothing to do with it, except to furnish the means for its support, for it

never was a paying institution. Ex-Senator Stanford sold it to John A. Sleicher, the well-known newspaper man, who in turn sold it to George West, when he became part owner of the *Albany Journal*. Senator Stanford was a stalwart Republican, while Mr. West is a half-breed, and the general tone of the paper is very different from what it was a year ago. It is now, for probably the first time in its existence, self-sustaining.

Schenectady will soon be in the midst of its commencement season. The Adelpic Society, one of "Old Union's" well-known literary societies, holds its exercises in the college chapel this evening. The school exercises will follow about the middle of June, and then college commencement on the 25th. The college circles are somewhat stirred up over the trustee election, this being the first year in which the alumni will be allowed to vote by proxy, and it is expected that a large vote will be polled. Judge Hooper C. Van Vorst, of the class of 1839, and Rev. George Alexander, D.D., formerly English literature professor at Union, and now pastor of the University Place Presbyterian Church, New York, are the candidates.

Since the advent of the flower season the ladies have turned their attention to painting on plaques, and the dealers have quite a lively trade in supplying the demand, which is greatest for odd designs.

An agent has been canvassing the city for Blaine's book, "Twenty Years in Congress," and meets with fair success. G.

LOUISVILLE GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., May 28, 1884.

"A few of the many reasons why a National Bankrupt Law should be immediately enacted by Congress," is a little pamphlet which has been mailed to nearly every business man in this city, by the New York Board of Trade and Transportation. This was followed a few days ago by another and larger document—"Do the United States require a Bankrupt Law?" being a reply to the memorial to Congress by the Louisville Board of Trade, entitled "The Evils of Bankrupt Laws," the reply being prepared by Morris S. Wise, member of the Executive Committee of the National Bankrupt Law Convention of commercial bodies of the United States. Among the prominent reasons urged in the first paper in favor of the enactment of a bankrupt law are the following: Because a uniform, just and national bankrupt law is as essential for the well-being of a commercial nation as any other law involving the protection of life, liberty and property; because it gives security to the credit system, and a protection of the credit system tends to cheapen the cost of all commodities to the consumer; risky credits cause high prices, while secured credits as certainly cause lower prices; because the present system of insolvency laws in the different States are inequitable and breed mischief in their application, especially to non-resident creditors; because the want of a national law is unjust to the honest debtor, who can alone secure relief from dis-

aster or misfortune by the charity or clemency of his creditors; because the representatives of the commercial interests of this country have declared in favor of such a law; because Judge John Lowell's bill, now before the country, has been submitted to competent authorities and received the largest indorsement ever accorded a similar measure; and because, as the prosperity of this country in the future, depends, as it has in the past, on the fostering of our commerce, so it cannot be held as just or equitable to have so vital a problem of protecting the credit system relegated to the States, whose interests are primarily local and not national in their character.

As has been heretofore noted in THE STATIONER, the Louisville Board of Trade is the only one in the United States which declared against the enactment of a new bankrupt law, and Morris S. Wise now replies to the "Evils of Bankrupt Laws" memorial which the Louisville Board addressed to Congress. Mr. Wise in his reply asserts that in the present condition of the State insolvency laws it is very evident that whatever was good in the last bankrupt act was buried with it, while the evil of our present insolvency systems certainly lives, and to the position of the Louisville Board, that "as we are healthy and prosperous we need no relief; all that the business community needs is to be let alone, so that the steady current of commerce be not disturbed," Mr. Wise remarks that in time of peace we should prepare for war, consider such a law now calmly and carefully, and enact it while all clamor, tumult and prejudice is removed from our deliberations. Louisville takes the ground that all former bankrupt laws proved failures. Mr. Wise replies that it is not fair nor just to declare that because these laws, conceived and adopted as they were under peculiar circumstances surrounding their time of adoption, proved failures, that, therefore, a good law, a permanent law, and a needful one, cannot be formulated or devised. To the complaint, that in all bankruptcy matters the proceedings are one-sided, the officers of the courts being present and the creditors absent, hence the creditors the victims, he replies that if the Lowell bill becomes a law the creditors have every facility to protect their interests by their presence.

On inquiry I find the opposition to a bankrupt law here to be founded on the general ground that previous experience in that line was very unsatisfactory, while collections since the repeal of the former law have been much more satisfactory. For the debtor's side it is claimed that creditors will always grant a release where the debtor can show that his failure is honest and unavoidable, and that he is doing the best he can for the interests of all concerned. There is a notion in the minds of many that any system which offers a ready release from debts, such as a bankrupt law is conceived to be, is apt to stimulate recklessness and rascality among debtors. On the other hand, the fear of preferences and complex collection laws, as now presumed to exist, is conducive to prudent business by restraining the granting of wild credits. An old insurance man, who is morally opposed to a bankrupt

law, tells me that as an insurance man he favors such a law, for, said he, there are a great many people with an easy conscience, and when in financial trouble they look for an easy way to slip out; the old bankrupt law afforded convenient means of setting up at the expense of the creditors, but in the absence of any law now to give them relief they must have a fire to clear up things, hence our losses are much heavier when there is no bankrupt law. This may be an uncharitable view, but I find a general sentiment to the effect that the laws should tend to hinder instead of facilitate releases from debt. I also find that the opposition here is to the old law, not the proposed new one; very few business people here have read the Lowell bill, and, perhaps, if its provisions were understood—if it were known that under it fraud would be punished or prevented, and the officials and court costs not consume too much of the insolvent estates—the Louisville Board of Trade would also favor a new bankrupt law. This is not intended as an argument but simply a review of the situation as it occurs to me at this point. And, by the way, I find the readers of THE STATIONER here in accord with its views in favor of the law, and regretting the adverse action of Congress last week.

The general merchandise movement shows a moderate volume, being mainly made up of small orders, which indicate that retailers are, for the present, buying only in hand-to-mouth quantities. Weather clear and cool and crops making encouraging progress. Money market well supplied but firm, under the cautious attitude of the banks. BOURBON.

The Society of the "Old Volumes," at a recent meeting at the Freemason's Tavern, London, devoted special attention to playing-cards, ancient and modern. George Clulow read a paper on this subject establishing, among other things, that playing-cards were in existence as far back as 1377, and gave reasons for believing them to be of much earlier date. A remarkable collection of playing-cards, English and foreign, extending back to the fifteenth century, was exhibited.

The following is a method for coloring soft solder so that when it is used for uniting brass the colors may be about the same: First, prepare a saturated solution of sulphate of copper—blue stone—in water, and apply some of this on the end of a stick to the solder. On touching it then with an iron or a steel wire it becomes coppered, and by repeating the experiment the deposit of copper may be made thicker and darker. To give the solder a yellow color, mix one part of a saturated solution of sulphate of zinc with two of sulphate of copper; apply this to the coppered spot, and rub it with a zinc rod. The color can be still further improved by applying gilt powder and polishing. On gold jewelry, or colored gold, the solder is first coppered as above, then a thin coat of gum or isinglass solution is laid on and bronze powder dusted over it, making a surface which can be polished smooth and brilliant after the gum is dry.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

NEW PATENTS.

No. 298,182. Web-Printing Machine.—Luther C. Crowell, Brooklyn, N. Y., assignor to R. Hoe & Co., New York, N. Y.

The combination, with a form-cylinder, of a plurality of impression-cylinders, and means for causing said impression-cylinders to come into printing contact with certain of the forms upon said form-cylinder, and to keep from printing contact with the remaining forms, whereby one side of a web may be printed from one set of forms upon said form-cylinder and avoid the remaining forms thereon.

No. 298,192. Game.—Robert B. B. Foote, Cincinnati, Ohio.

A base-ball game-board consisting of a number of appropriate rows or sets of differently-colored squares arranged to represent a base-ball diamond.

No. 298,257. Easel.—Thomas C. Vail, Topeka, Kan.

An easel provided with telescopic legs that are all adapted to be adjusted and secured at any desired point, and which are further provided with detachable reversible points at the lower end, said points having one end sharpened and the opposite end rounded.

No. 298,284. Seal-Press.—Edward J. Brooks, East Orange, N. J., assignor to E. J. Brooks & Co., New York, N. Y.

In a seal-press, the combination of a lever-handle, a movable die or dies actuated thereby, and a pawl-and-ratchet device which prevents retracting said die or dies after a pressing operation is begun until the same is completed, as means for insuring uniform impressions and perfected fastenings in pressed seals.

No. 298,289. Toy.—Jesse A. Crandall, Brooklyn, N. Y., assignor to himself and John W. Seaman, same place.

No. 298,290. Alphabetical Toy.—Jesse A. Crandall, Brooklyn, N. Y.

No. 298,354. Card Holder and Exhibitor.—Spencer L. Davis, Minneapolis, Minn., assignor of one-half to Henry Tucker, same place.

A holder or exhibitor for cards, pictures and analogous articles, having rounded or curved sides and a weighted bottom and an upwardly-extending slotted portion for receiving and holding said articles.

No. 298,364. Case for Pencils.—Le Roy W. Fairchild, New York, N. Y.

No. 298,367. Tally-Card Holder.—Robert L. French, Wellington, Ohio.

No. 298,379. Combined Paper-Weight and Pen-Rack.—Isaac W. Heysinger, Philadelphia, Pa.

No. 298,382. Fountain-Pen.—Geo. C. Holt, Hartford, Conn., assignor of one-third to Samuel L. Holt, Mittineague, Mass.

In combination with a writing pen, an ink reservoir plate having its upper end rigidly secured to the under side of the pen above the flexible part thereof, and having a stem or step fitted to the concave of the pen, and formed lengthwise from the foot of said stem or step to fit the profile of the pen, and in cross-section extended flush with the outer edges of the pen.

No. 298,411. Pen-Holder.—Aldis Eddy Sage, Minneapolis, Minn., assignor of one-half to John G. Emery, Jr., same place.

No. 298,425. Machine for Creasing Paper.—John E. Stannard, Springfield, Mass.

No. 298,446. Toy.—Francis W. Carpenter, Harrison, N. Y.

No. 298,450. Letter-File and Cabinet.—Arthur L. Colton, Milwaukee, Wis.

In a file cabinet, a letter file consisting of front and rear boards and intermediate independent movable division sheets bearing index or classification marks, in combination with adjustable supporting cords or tapes passing through holes in the boards and sheets, and securing devices.

No. 298,471. Nautical Parallel Ruler.—Charles Hutchinson, San Francisco, Cal., assignor of one-half to William Bendt, same place.

No. 298,481. Clasp for Traveling Bags.—William J. Large, Brooklyn, N. Y.

No. 298,499. Slate Frame.—Orlando M. Pond, Independence, Ia.

As a new article of manufacture, a paper frame composed of broad and narrow strips of paper or pasteboard forming the side and end bars, secured together by means of double lapping joints and cement, and the joints covered with leather or other soft material.

No. 298,515. Hammock-Support.—George E. Sutphen, Aurora, Ill.

No. 298,549. Tag-Fastener.—George N. Buck, Mattoon, Ill.

No. 298,569. Folding Cash-Box.—Benjamin C. Foster, Baltimore, Md.

OUR TRAVELERS are now on the road, and we bespeak for them a kindly reception by our friends in the trade. Our Xmas and New Year's line, which will be submitted by them, will convince our friends that the field of invention, of originality, of design, and in make-up is inexhaustible, and has been well cultivated by us. Satin prints are well represented and prices have been considered and regulated to meet the requirements of the times, and the interests of our customers. Sample books will be in the hands of the jobbers early in June.

L. Prang & Co.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor : JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

HEATH LETTER FILE & INDEX CO.

The attention of Stationers is called to our system of Letter and Postal Card Filing and Ledger Indexing. HEATH'S LETTER FILES enable one to file letters, bills, invoices, &c., in the most rapid and correct manner, and to **REFER TO THEM AFTER FILING WITHOUT ANY DELAY**, no matter how great the number of letters filed, as

the files are arranged for any amount of correspondence. They are also adapted to any kind of business. Cabinets in cherry, ash or walnut, or fireproof, as desired.

The cut on the left represents a 20 Box Library File; that on the right a Single File. We are prepared to furnish the trade with any of our goods, and would especially recommend our SINGLE FILES as being adapted to the retail trade.

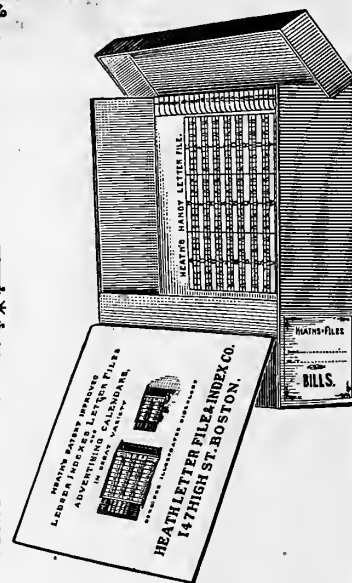

Our Ledger Indexes we guarantee to be the most perfect in use, there being no delay in referring to accounts, even in an index containing 40,000 names. All sizes furnished for from 1,500 names upward. Address,

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. M. McEntee, stationer, Rolla, Mo., has closed out.

The Scribner *News*, Scribner, Neb., has changed hands.

H. M. McCarty, publisher, Paducah, Ky., has sold out to Messrs. Leigh.

Van Wynen & Brother, carvers, Brooklyn, N. Y., have been damaged by fire.

S. S. Stafford shipped 522 dozen quart-bottles of his inks by the steamship Holland this week.

Reiss, Simon & Co., dealers in oil paintings, &c., Chicago, Ill., have been closed by the sheriff.

G. A. Dunn & Co., manufacturers of paper buckets, Chicago, Ill., have lost \$800 by fire. Insured.

Paul J. Howland, printer and stationer, New Bedford, Mass., is advertising to sell out his stationery store.

McKee & Montgomery, publishers, Greensburg, Ind., have dissolved partnership. The firm is now Montgomery & Donnell.

Charles J. Webb has withdrawn from the firm of James G. Kitchen & Co., paper-stock dealers, &c., Philadelphia, Pa.

The book and stationery store of Somerville Brothers, Detroit, Mich., was partly burned on Saturday night. Loss, \$11,000; insured for \$8,000.

The Boston *Star* has lately begun issuing a Sunday edition. It is eight pages, and one of its leading features is illustrations of prominent men of Boston—divines, politicians, &c.

The property of John Russell, the miser printer, who died in New York about a year ago, has all been collected in from the various banks, and amounts to \$37,689.38. About fifty persons from all over the world have put in their claims of relationship. On Monday next, the Public Administration will file a petition with the Surrogate, and notice will be sent to all these persons. After being advertised once a week for six weeks, the case will come before the Surrogate.

F. S. Church's picture, "Retaliation," which attracted so much attention at the recent Academy Exhibition in New York, has been purchased by L. Prang, with a view to its reproduction by lithography. It represents Cupid caged, at the mercy of one of his many victims, who stirs him up with evident zest and amusement. The coloring is good and the execution an advance upon former productions of the artist. Winthrop Peirce also has designed an original back for a forthcoming Calendar from Thackeray's works, and the mount for a Tennyson Calendar now in course of preparation by Prang is from the brush of Sarah E. Whitman.

R. T. & S. Blood, Jr., in addition to their numbering, perforating and blank-book paging, have gone into the business of punching, eyeletting, label-cutting, and the making of memorandum pads of various sizes. The firm has invented an improved composition for writing pads, which it claims is superior because of its great flexibility, which gives it greater strength and durability. It comes in two colors—red and blue.

The Planter's Journal is the name of a very excellent monthly published at Vicksburg, Miss. As its name indicates it is devoted to agricultural objects, but it contains departments of interest to the household as well as general readers. The April number has a very pointed article on the social and political status of Northern men in the South.

Ed. Wolf, of the firm of Wolf & Co., Philadelphia, has gone to Europe, where he will look out for the handsomest things that he can find in the way of "novelties," for which his firm has a great reputation both as a wholesale dealer and manufacturer.

E. Homuth has bought "The Band-box" book and stationery store, at Wyandotte, Kan., from P. P. Hopkins, and will combine it with his other store.

H. B. Childs & Co., paper makers, Grand Rapids, Mich., have dissolved partnership. Childs & Carper have succeeded to the business.

I. R. Speigle & Brothers, booksellers, &c., Greensburg, Pa., have been closed out by the sheriff on executions amounting to \$20,000.

Simcon J. Thompson, printer, Shelbyville, Ind., has sold out to the Shelby *Republican* Publishing Company.

B. F. Smythe, publisher of the *New Era*, Lake Valley, N. M., has been succeeded by B. E. Nye & Co.

The *Journal* Printing and Publishing Company, Wheeling, W. Va., has assigned to J. R. Cowden.

The Detroit *Evening Journal* Company, Detroit, Mich., has increased its authorized capital to \$50,000.

George R. Pond, of the firm of C. V. R. Pond & Son, publisher of the *Herald*, Quincy, Mich., is dead.

The Thomas W. Price Company, Philadelphia, has issued a new price-list of job-printers and stationers' supplies.

Morton, Phillips & Bulmer, Montreal, have published a revised edition of the customs and excise tariff of the Dominion of Canada, corrected to May 4, and combined with other useful information.

The largest blank-book ever made was recently turned out by the Government Printing Office in Washington. It contains 10,000 pages, weighs 140 pounds, and is bound in sheepskin and russia leather.

A very interesting game of ball was played on last Saturday, on the grounds of the New York Paper Trade Base-ball Club, located at 135th street and Southern Boulevard, between the nines of James D. Whitmore & Co. and George B. Hurd & Co., in which the former came out victorious by the unprecedented score of 32 to 18.

The dead body of a young Polish printer, known as John Spender, was found lying on the floor of his room on the top story at 221 Centre street, on Friday of last week. He had shot himself with a pistol through the head and the heart. His real name is believed to have been Nawrotsky. His reason for committing suicide is supposed to have been disappointment in not being able to return to Poland where his parents reside, owing to some obstacle presented by the Russian consul.

R. H. Forestal & Co., jobbers in paper, at Fifth and Minor streets, Philadelphia, and who have been in business about fifteen years, have suspended payment. It is understood that the liabilities of the firm are about \$75,000, and it is hoped that the assets will be sufficient to cover them. The creditors of Mr. Forestal are thought to be principally in New England, where he purchased his stock, and a large amount is said to be due to Philadelphia firms. At a meeting of the creditors, held on Tuesday, it was agreed to receive sixty cents on the dollar, and to grant the firm an extension of time, the amount to be payable in 6, 12, 18, 24 and 30 months. Mr. Forestal states that

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

SEND FOR PRICE LISTS.

(WARRANTED.)

he expects his liabilities will be fully covered by the assets.

Dan A. Perrin, bookseller, &c., Providence, R. I., has sold out to Albert F. Davis.

Henry C. Megargee, wholesale paper-stock dealer, Philadelphia, Pa., has sold out.

Speigel Brothers, booksellers, &c., Greensburgh, Pa., have been closed out by the sheriff.

C. A. Dunn & Co., paper-box manufacturers, Chicago, Ill., were damaged by fire to the extent of \$500 on May 29, which is covered by insurance.

Somerville Brothers' book and stationery store on Main street, Detroit, Mich., was partially burned last Saturday night. The loss is \$11,000; insurance, \$8,000.

The mill of the Northwest Paper Company, at Rockton, Ill., was burned on Sunday. The loss is about \$50,000; insurance, \$27,000. The mill was recently rebuilt at a large expense and was in good working condition.

The sheriff levied, June 3, on stock and fixtures of store and the printing-office of Bancroft & Co., formerly Wood & Bancroft, Wilmington, Del., to satisfy a judgment of \$600. Other judgments and a chattel mortgage have been entered.

William Butler & Co., Philadelphia, have effected a compromise with their creditors at 50 cents on the dollar at six, nine and twelve months. They have resumed business, and will continue the manufacture of paper, running their mill full time.

The Miller Brothers Cutlery Company has brought out some new styles of jack-knives in three sizes. They are not clasp-knives, but are an improvement on the latter. By touching a spring the blade slips out of the handle, and when fully exposed is firmly locked. The advantage over the old style of clasp-knife is the ease with which it is opened. The firm has also brought out a new line of folding pocket spatulas for the use of druggists, doctors, artists, &c.; also a new pen styled the "No. 4 Stub Pen." The latter is especially adapted for lawyers' use.

Carter, Dinsmore & Co. are showing a fine photographic view of their new factory in Boston. The picture represents a large five-story building of a handsome style of architecture, with three arches in the front extending to the top story, presenting an ample plate-glass frontage. The factory is claimed to be the best equipped ink factory in the world; it is lighted throughout by electricity, and is provided with all of the latest appliances that years of experience have suggested.

John M. Tate, Edwin B. Maynard, Charles W. Cook and Benjamin Howe have been admitted to the firm of James D. Whitmore & Co., stationers, &c., New York.

Richards & Whitehead, publishers of the *Republican*, Los Angeles, Cal., have been succeeded by H. Z. Osborn.

C. Mulholland, publisher of the *Bulletin*, Greenville, Cal., has sold out.

M. P. Prout, printer, New York city, has suffered a loss from fire.

C. Munich, gilder and dealer in picture frames, Hartford, Conn., has assigned.

The Allen Spool and Printing Company Norwich, Conn., has been burned out. Insured.

Maurice Fenelon, bookseller, &c., St. Johns, N. B., has taken William Kitchen into partnership.

James E. Berry, manufacturer of show-cases, Chicago, Ill., has been damaged \$2,000 by fire. Insured.

M. D. Rose, dealer in picture frames, newspapers, &c., Meriden, Conn., has been burned out. Insured.

A. P. Maple, dealer in wall-paper, South Pueblo, Col., has been burned out. Loss, \$2,200; insured for \$1,500.

Bailey & Smart, printers, Grand Lake, Col., have dissolved partnership. John Smart continues the business.

Studebaker Brothers, publishers of *Recreation*, Los Angeles, Cal., have suspended the publication of that journal.

The firm of Maple & McGuire, dealers in wall-paper, South Pueblo, Col., has dissolved. The business is continued by A. P. Maple.

Berge & Flaherty, paper-stock dealers, Philadelphia, Pa., have dissolved partnership. Martin F. Flaherty continues the business.

Dealers who handle family bibles or photograph albums should send to the National Publishing Company, Philadelphia, for its catalogue and discounts. Now is the time for a large demand for these goods, and the Na-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

tional has an immense variety at remarkably low prices.

M. W. Isaacs & Co., publishers of the *News*, Portland, Ore., have dissolved partnership. The Portland News Company has succeeded them.

The United States District Court for Massachusetts has granted an injunction restraining parties from directly or indirectly making, using or vending any paper-holders or mechanism embracing or embodying the invention and improvements, or any substantial and material part thereto set forth and claimed in letters Patent 217,909, known as the Shannon patent for improvement in paper-holders. This injunction was granted in a suit brought by the owners of the Shannon patents against parties selling what is known as the "Best" file, for infringement of the Shannon patents. A similar injunction was granted against a file known as the "Eclipse," manufactured in Lawrence, Mass.

Liebenroth, Von Auw & Co. have added a large number of new things to their extensive line of albums, autograph-books, scrap-books and scrap-albums. They come in all sizes and all of the latest styles of binding—imitation leather, gold embossed, illuminated, black embossed, morocco, Persian calf, padded, plush, imitation of velvet and various other covers in numerous elegant designs. The stock is one of the finest in the city.

The New York Blank-Book Company has been making extensive alterations in its establishment, greatly increasing its facilities for doing business, and is now prepared to fill all orders. It manufactures a full line of blank-books, full-bound, half-bound, &c., and is prepared to sell as low as any other house.

Marcus Ward & Co., Limited, have just brought out their line of calendars for 1885. They show a noteworthy improvement over the very popular calendars which this firm has brought out in previous years. There has been an entire change in designs, while a higher degree of finish and artistic merit is shown. The line comprises the well-known "Day Unto Day," the "Shakesperian" and the "Every Day" calendars, and an excellent feature of them is the quotations, Scriptural, Shakesperian, &c., which are printed with each day's leaflet. In addition to these calendars, the firm has issued its "Season's" calendars, a

pocket calendar edition, in book form, with a fine lithograph cover and interior decorations, and containing a great deal of useful information for reference, such as the legal holidays, the church days, the eclipses, domestic and foreign postage, the names of the different Presidents of the United States, together with date of birth, inauguration, continuation in office, death, &c. There are also three designs in wall calendars, with fine lithograph decorations, the largest showing a beautiful landscape scene, comprising a view of the Killarney River, Ross Castle and cloud-capped mountains in the background. Another shows a floral design in brilliant colors, while another design presents a scene from the Shakesperian play, "Tempest," and gives much information useful for reference. There are also some pocket calendars folded in the form of a screen, and book shaped. There will probably be a great demand for artistic calendars next season, and dealers should be ready to supply it. The calendars of Marcus Ward & Co. are very attractive, and the firm says that it is prepared to compete with any other house as to prices.

George S. Canfield, publisher, Brainerd, Minn., has admitted A. J. Halstead to partnership.

R. A. & C. S. Cooke, of Cooke & Cobb, 146 Chambers street, sailed on the steamer *Aurania* on Wednesday for a trip through Europe, their object combining business and pleasure.

The Indiana, Bloomington and Western Railway has issued a reduced passenger ticket rate over its line for parties desirous of attending the meeting of the various Sunday School conventions, political convention at Chicago, Catholic Union at Baltimore, ministers of United Brethren Church reunion at Washington, and the American Association for the Advancement of Science at Philadelphia.

The Library of the Vatican possesses 3,559 Greek manuscripts. The imperial library of Vienna, the Laurentian of Florence, the Saint-Mark of Venice, and the different libraries of Oxford contain about a thousand each. The library of the British Museum has 716 volumes, and that of the Escorial 583. The Bibliothèque Nationale in Paris contains more than any of those mentioned.

STATEMENT.

—I MAKE AND SELL—

FLAT WIRE STAPLES

Of every conceivable size and kind to suit

"Heyl," "Office Pet," Brown's Single Blow Binder, McGill's Single Stroke Press and the Novelty Staple Driver and Clincher.

Some one is trying to "scare" people out of dealing in the staples I furnish for the Novelty Driver, by the statement that my goods are an IMITATION and their trade-mark is infringed.

No such statements ought to have credence for an instant by any body, for three reasons:

1st. Because my labels and packing are totally different from any others, and everybody has the right to make wire staples; no patents being in existence.

2d. No "trade-marks" exist on staples for the Novelty Staple Driver.

3d. The courts can promptly stop infringements of trade-marks, and an appeal to customers would be superfluous.

The conclusion to be arrived at is, some one is trying the intimidation business; because they have no power to do any thing worse.

And the fact is, my Staples are so far superior, as to scare some one "most tew deth," lest they may lose all their trade.

These staples for use in the Novelty Staple Driver can be had from THE DENNISON MFG. CO., Boston, New York, Philadelphia, Cincinnati, Chicago and St. Louis; also from HENRY BAINBRIDGE & CO., New York; LeCOUNT BR. S., San Francisco. Respectfully,

J. P. CRAWFORD,

304 Branch St., Philadelphia.

Successor to W. J. Brown, Jr.

CINCINNATI NEWS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, June 3, 1884.

News from all parts of the country comes in that the crops of grass and grain were never so promising. There is no end to the prospect for grass, and this is one of the greatest grazing regions in the nation. The winter did the fruits up, except apples. It is an off year for pears. Farmers are getting their corn in nicely. Everything that grows is full of promise. The only question is about what sort of a market there will be for the stuff when it is grown. Tobacco, always a great, and never a greater, staple of this region than now, will be planted much more generally than last year. There has been no croaking by the farmers this spring. Everything looks promising for abundant crops.

In the city there is no change in the commercial situation except that confidence has been strengthened greatly by the happy failure of crashes to follow numerously in the train of the events lately noted. Commercial men have ceased to look for much change in business until after the fall elections. The presidential campaign is always attended with dullness.

But this dullness, while it is bad enough, is nevertheless not of the dreadful sort—not of the kind consequent upon calamity to business, but rather of the kind which attends a halt in the procession of trade, a sort of stop for the purpose of reconnoitering. As stated in previous letters there are lines of business which are not at all disturbed by the stagnation that affects general business. Then collections are fairly good.

Manufacturers of business stationery are not overwhelmed with orders, but they manage to keep their presses all going and their operatives employed.

The races at Lotoma Springs this week are numerous attended and betting is lavish. A great deal of money changes hands on the runners. The attendance, too, is very large. Here in the eastern West matters do not turn out thus in times of financial distress.

John Holland reports the orders for gold pens quite up to the standard in steadiness and in volume.

In book sales this is between seasons, still there are frequent purchases for private libraries. In fact, it is one of the late features or developments of the trade, that here in the eastern West and northern South many men are forming fine private libraries.

Another bugbear—a strike in the rolling mills—has been escaped. The mills keep on producing iron (horseshoe iron included) at half the price of before the war, and they are making money.

Furniture has cheapened here wonderfully, and the tendency seems to be the general cheapening of manufactured products. Can it be—indeed, may it not be, that business is halting for the very purpose of adjustment to this new order of things that is coming out of the universal cheapening of manufacturing processes and manufactured products?

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, JUNE 5, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

PRESUMABLY the tariff issue is definitely settled, so far as legislation is concerned, until after the election; but if this is so, it is no reason why we should not at times give the subject some consideration. An intelligent American now resident in France, has been looking at the tariff from the French point of view, and he says that French manufacturers and exporters have shown much anxiety, and hope for the reduction of our customs duties, believing that whatever legislation may be adopted, it will be such as to favor the introduction of foreign merchandise. It is admitted by the person referred to, that European prosperity would ensue upon any material reduction of our tariff and that Europeans are ripe for a competition which would help to keep their manufacturers' and hands employed, if, even at the cost of the depression, or, it may be said, oppression, of American labor. The opportunity for this realization of hope has not yet come. It is wanting, and we trust will keep so.

COMPLAINT is made of wanton destruction of the rubber trees in Brazil, and as this means a large reduction, if continued, of our supplies of the raw material, it is a matter of concern that such havoc should be permitted. During the year 1883, our imports of crude rubber amounted to 21,646,000 pounds, valued at \$15,511,000, and of this quantity, within a fraction of one-half came from Brazil, the amount being 10,360,000 pounds, worth \$8,663,000. So it will readily be seen that the rubber import from Brazil is of great moment to this country, and whatever tends to diminish our supplies, if our requirements cannot be supplemented from other sources, is something which it behooves us to consider. Whether the promised danger is extreme, we have no means of judging, except in that it has seemed to be of sufficient consequence for our Consul-General at Rio to call attention to it.

IN Lockwood's Directory of the Paper Trade for 1884 we find a valuable compendium of information. This volume is an improvement on its predecessors, inasmuch as it makes separate classifications of paper and pulp mills, and contains also, in addition to the usual list of paper dealers and a thoroughly revised and enlarged list of printers and stationers, what is styled a "Buyers' Vade Mecum," or guide to first hands in paper, stationery, printing and paper-making supplies. As an indication of trade opinion on the Directory, we may quote the remark of a New Orleans correspondent, who says: "It is a book full of useful information, and indispensable to the trade. That portion referring to New Orleans is entirely correct." Much labor has been given to the

effort of making Lockwood's Directory the best authority, and its position in this regard cannot be disputed. The demand for it has been so great that the edition is nearly exhausted.

IF we are to gauge a people's intelligence and culture by the number of its newspapers and periodicals, which is, we believe, laid down as a fair rule for the measurement of intelligence, Russia rates very low in the scale, and we doubt if another nation, outside of any which occupies debatable ground between barbarism and civilization, can make a more discreditable showing in this regard than the Russian. We learn from some recent figures submitted by the United States Consul-General at St. Petersburg that the entire circulation of newspapers, magazines, periodicals, &c., in Russia amounts to only 2,500,000, or one copy to every forty inhabitants. The official returns show that there are 776 periodicals published in Russia. This is a very small number compared to the 2,076 of Great Britain and the 2,520 French, and still more contrasted when we take our own country into account, with its 11,196 periodical publications. But a rather peculiar fact is elicited by the inquiry into this subject, and it is that London, of all the great capitals, comes next to St. Petersburg in the number of its publications as compared with the publications of the entire country, the proportion being 26 per cent. of the whole to St. Petersburg's 25.4 per cent., while Paris is responsible for 51 per cent. of all French publications.

WE reproduce a review of the patent laws of the United States in their relation to American agriculture, arts and industries. Although it will be found that to some extent Mr. Whitney goes over ground previously covered in his articles on "Inventors and the Public," we are of opinion that there is no more useful or important duty than that of trying to effect a clearer understanding on a matter of public policy concerning which no little amount of ill-formed and prejudiced opinion has been created to the threatened detriment and injury of industrial progress in this country. If we would secure and retain commercial supremacy it must not, cannot be, at the expense of invention. We will be poorly off indeed if we are to trust to agriculture alone as the mainstay of commercial liberty and independence. The farmer has his best resource in the domestic consumption of his products, and if our arts and industries thrive, he shares not equally, but in a larger proportion in the gain. The cry of "monopoly" is carried to an extreme, and the term itself is diverted from its legitimate use by many who seek to create monopolies in their own interest. But

should a system of repression of inventive talent and mental, intellectual effort for the improvement of industrial resources be inaugurated, the country would soon experience the effect in the suspension of enterprises which would have no prospect of reward. The sober thought of the American people ought to consider this.

Roundabouts.

BY THE TRADE LOUNGER.

It is stated that a daily newspaper has just been started in Paris which will change its politics every morning. One day the political article will be written by a Bonapartist, another day by an Opportunist, then by a Legitimist and sometimes by an Intransigent. Each writer is to be at liberty to say exactly what he pleases. In like manner the literary part of the paper will be surrendered upon alternate days to representatives of opposite schools of thought. It is said that the journal is started with American capital.

* * * *

Isn't it quite possible that a well-known American journalist is at the head of this alleged undertaking? The idea is not novel, except in the selection of writers of opposing opinions. To all well-informed Americans it is needless to say that there are newspapers in this country which frequently express different views, and are consequently in a condition to always say, "I told you so," whenever anything special turns up. It is the one mode of claiming and demonstrating journalistic infallibility.

* * * *

Among late ideas is a music-case in leopard-skin lined with silk. Inasmuch as leopards do not grow on every bush and cannot be had even in the everglades of Florida, people generally will have to be content with an imitation.

* * * *

The will of the great Leipsic publisher and bookseller, Tauchnitz, provides for building up a big fortune on the very comfortable amount of property left behind him. His estate, exclusive of a valuable piece of landed property, is valued at over a million of dollars. The city of Leipsic, apart from some small bequests, is made his heir upon the condition that the principal must never be alienated or expended, and for two hundred years next ensuing his death 10 per cent. of the annual income must be added to the principal. It would seem that this would bring the estate up to a big quantity by A. D. 2084. Somebody else do the figuring.

* * * *

James D. Whitmore & Co. have admitted as partners John M. Tate, Edwin B. Maynard, Charles W. Cook and Benjamin Howe. The new members of the firm are all young men who have been attached to James D. Whitmore & Co. for a long time, and whose indefatigable labors have done much to contribute to its prosperity. They are worthy of their promotion and their energy, business talent and genial qualities will go far toward extending the trade of the firm in the future.

* * * *

Great distress is said to have been caused to the postal clerks charged with the duty of issuing postal notes, because of injury to the eyes from the mixed color of the notes. A new color, lilac, has therefore been adopted, and only one punching will be required. The color of the stamp on the two-cent envelope is also said to be changed, but as the "Lounge" doesn't buy his stationery from the government, he hasn't yet seen it.

* * * *

"Two quarts of ink and a clock for seventy-five cents," were the words dinned in people's ears by a peddler recently. What enterprising manufacturer can he be who is taking this method of booming the market? Perhaps our friends "J. B. D." or "S. S. S." can tell us.

* * * *

It is alleged that a prominent house in the trade kept open house last week, and that did the thing handsomely, too, greatly to the satisfaction of the boys, bringing forward all of the choice brands of wines, cigars, &c. Sorry I wasn't lounging around that day.

* * * *

A new monthly publication has just made its appearance. It is a geographical and industrial magazine and proposes to take different States or sections of the country in turn, and, with ample maps, showing counties, towns, cities, villages, lakes and streams, highways and railways, give a description of the part of country chosen, with full details as to its natural and industrial resources, &c. The idea is broad and if well sustained will be useful in our day and generation.

* * * *

Some reporter out in Connecticut, thinking to be smart, got a report in print that a bank had failed, not specifying any one bank, but it caused a run on the savings bank of the place (Norwalk), and created no little commotion. The bank was a sand bank which had run out. The editor of the paper which printed the so-called joke and who "passed the copy," felt called upon to reimburse the scared depositors who withdrew their money from the savings bank to the extent of the interest forfeited.

* * * *

I am very much pleased with the 1884 Directory of the Paper Trade. The lists of stationers and printers are very full, and seem to have been compiled with painstaking care. The separate classification of paper and pulp mills is also excellent. Lockwood's Directory ought to be in the hands of everybody in the trade. It is wonderful how paper manufacturing is growing despite dull times.

Answers to Correspondents.

W. L. A. asks: 1. Are paper kites manufactured for the retail trade? 2. Where are headquarters for American tissue papers?

Ans.—1. Yes; James Smith, 65 Java street, Greenpoint (Brooklyn), N. Y., makes them. 2. Your inquiry is broad; but we will take it for granted that you do not want tissue manillas. There are a number of manufacturers of tissue papers, and you ought to have Lockwood's Directory to tell you all about them. We will only name a few, viz.: Diamond Mills Paper Company, 44 Murray street, N. Y.;

Wm. C. Hodge, Rainbow, Conn.; Jersey City Paper Company, Jersey City, N. J.; Union Mills Paper Manufacturing Company, Lambertville, N. J.; F. H. Whittlesey, Windsor, Locks, Conn.

B. inquires for manufacturer of an oblong book with manilla leaves and press board cover, about 6 x 9 etc., known as "Student's Note-book."

Ans.—Acme Company, 49 John street, N. Y. C. wants to know who makes the new form of "Scholar's Companion" mentioned in THE STATIONER.

Ans.—The Roache Manufacturing Company, 113 Mulberry street, New York, advertising in another column.

D. & Co. want address of manufacturer of combination roll-top writing-desk illustrated in THE STATIONER May 29.

Ans.—Alles & Conant, whose advertisement will be found in this paper.

L. & L. inquire for address of manufacturer of Payson's indelible ink.

Ans.—J. H. Stoddard & Co., Northampton, Mass.

D. W. T. wants address of the dealer in beads referred to in THE STATIONER of January 17.

Ans.—Herman Schmalhausen, 28 Howard street.

The Word "Bookmaking."

The following correspondence and comment appears in the last number of *Art Age*:

Referring to our late conversation and the use of the word "book-maker," in its journalistic application, I would state that having examined some of our old files, I find that in *The Paper Trade Journal* (which paper was established in May, 1872), in March, 1873, I started a department called "Book-Makers' Department." We ran this department in the *Journal* for over one year, or until the time we started *THE AMERICAN STATIONER*, after which time we incorporated such articles as had appeared in the Book-Makers' Department in *THE STATIONER* without special classification. To give you an idea of the class of matter that we made use of at that time under this department, I would mention the following articles: "Book Binders' Tools;" "Dryer for Ink;" "First American Book on Book Binding, 1824;" "Color Printing in England;" "French Press Work;" "Ornamental Bindings;" "American against Foreign Bindings;" "An Elegant Catalogue from Francis Hart & Co.;" "Profits to the Various Persons Interested in Making a Book;" "Stereotyping the Rig-Veda;" "Making India Paper;" "Printing a Book in China;" "The Bibliomaniac's Paradise;" "Changes in Binding;" "Hussite Hymn Book at the Prague Library;" "Increasing Excellence of American Text Books;" "Ruskin's Ideas and Styles of Binding;" "Sonzono's of Milan Experiments in Publishing Good Books at Low Prices;" "Appleton's Bindery;" "How Inlaying is done by Book Worm;" "Book Making in China;" "Utilizing the Waste of Gold Leaf;" "Book Binding as a Fine Art;" "Sizes of Books;" "Art of Restoring Old Books from Manuscripts;" "Quality of Paper Used in Pater's 'The Renaissance.'" I do not claim to have grasped just the ideas that you are at present engaged in promoting in your journal, but I call attention to the above more in answering the doubt you expressed about anyone else ever having used the term "Book Maker" or "Book Making" in this connection. We are still printing special articles on subjects of a similar character in *THE AMERICAN STATIONER*, particularly; and this phase of the literature of the trade has always been of special interest to me.

HOWARD LOCKWOOD, N. Y. City.

[In the conversation referred to the claim was not made that "book-maker" or "book-making" was used first by the *Art Age*, but that "bookmaking" as a compound word had been brought into prominence by the *Art Age*, and that now it is a recognized word with a broadly comprehensive, concrete meaning. To claim that any word or phrase applicable to books or printing is entirely new would be absurd, as the nomenclature of printing has been studied and varied as much or more than that of any of the applied arts and sciences. Still it is a just claim that within the year that the *Art Age* has been in existence, the phrase "book-making arts" and the words "bookmaker" and "bookmaking" have appeared in the daily prints with a frequency unknown be-

fore, and that the word is in common use. Even in the *Art Age* its value and meaning has developed so that though in early numbers it appears as "book making" or "book-making," it now is printed only as "bookmaking." With reference to the articles mentioned it may be said that all, or nearly all of them, would be appropriate to the *Art Age* were they called forth as furthering the idea of art in books. As articles relating to books or bookmaking they could be continued indefinitely and would always be excellent reading. As such there is no special demand for them, unless apropos of some question exciting in-

terest at the time of their publication—a statement which may explain the idea of the *Art Age* and its claim to being unique as a publication, in that it regards books invariably from the art point of view, whereas all other journals that may treat incidentally of art in its application to bookmaking do not make art of paramount importance, but are concerned mainly with the buying and selling interest. The *Art Age*, in a word, advocates good productions on the theory that well made goods always find a sale, and that those who manufacture the best goods must have excellent materials to work with.—Ed.]

Obituary.

CHARLES D. MYERS.

Charles D. Myers, who accidentally shot himself on Tuesday of last week, died on the following Thursday. Mr. Myers came here from London in 1870, and entered the employ of B. & P. Lawrence, who were in the wholesale stationery business at No. 74 John street. In 1872 he and his brother, Claude D. Myers, began the manufacture of envelopes and fine stationery at No. 36 Platt street under the style of Myers Brothers, the office of the firm being at No. 37 John street. The next year the firm removed to No. 62 John street, and opened a general stationery and fancy goods business in connection with envelope making. His brother retired from the firm in 1879, and A. E. Simons was admitted to membership. The style of the firm was unchanged.

In the latter part of last February the firm failed, and Mr. Myers assumed the payment of the debts, and continued the business under the old style at the same place.

His remains were taken to Baltimore, Md., on Saturday evening, where the interment was made. He left a wife, and a child aged ten years.

WILLIAM MCCOY.

William McCoy, a well-known printer, died at his home, No. 300 West Twenty-eighth street, on Monday, June 2, aged sixty-six. He was a resident of New York for more than forty years, and was foreman of late years in the offices of several leading dailies, and in the printing office of the *New York Mercury*. He was also connected with the *Courier and Enquirer*, and other early publications. He was well known among theatrical men, having been for seven years treasurer of the Grand Opera House while Poole & Donnelly had charge of it. The deceased left a son, his wife and several children having died some years ago.

The funeral will take place this (Thursday) afternoon at one o'clock, and the interment will be in Holy Cross Cemetery.

J. B. GOLDSMITH.

J. B. Goldsmith, quite a well-known printer, died on Monday night last at his residence in Jersey City. He was forty years of age, and was for several years employed in the composing-room of the *Sun*. He was a soldier in the late civil war, and served with credit.

GEORGE W. TURNEY.

George W. Turney, one of the oldest printers in this city, died at his residence, No. 38 Grove street, on Wednesday, May 28. He had been in feeble health for several months, and had been confined to his bed during the last two weeks. His death, it is stated, was due to a general breaking down of his system, caused by old age. Mr. Turney has been a very active man through life, and his old printing-office, No. 77 Chatham street, is one of the down-town landmarks. He was a printer of law blanks and general business stationery. Some of the older New York lawyers have not used any other blanks than those printed by

Turney for upward of a score of years. The only surviving member of Mr. Turney's family is his daughter.

Mr. Mecklenberg, of the firm of Mecklenberg & Rosenthal, printers, Cincinnati, Ohio, is dead.

SPRINGFIELD CHAT.

[CORRESPONDENCE OF THE STATIONER.]

SPRINGFIELD, Mass., June 4, 1884.

The very sultry weather of to-day has tended to add to the prevailing quiet in trade in the retail departments of our city, which is always affected by extreme heat and extreme cold.

The bulletins about the newspaper offices are closely watched by all classes of citizens, hoping for something definite from the Chicago President manufactory, where the paper interest of Springfield is represented by that wide-awake and ever-efficient citizen, the Hon. L. J. Powers, who has not been in Chicago before for about twenty years. So closely has he attended to the extensive business of the Powers Paper Company, but he will no doubt take notice of the paper and notion trade of the great Chicago. Many here would like to see Chester A. Arthur again in the chair, and the business men generally lean that way, though whoever receives the Republican nomination will have the support of the Republicans.

The expectation is that we shall have a quiet trade here and throughout the valley until fall, in nearly every department of business, although many of the larger houses are feeling cheerful over the past and present trade.

P. P. Kellogg & Co., who have been successful in getting a portion of the contract for government envelopes, are hurrying things into shape for the business.

Z. C. Warren, of the Standard Pulp Company, has gone to manufacturing quite extensively "selanite," a new ware which he has decorated and finished very tastefully at his factory by artists employed there. The shapes are vases of every description, selling from \$1 to \$50, plaques, jardinières, &c., for which considerable sale has already been effected and much praise secured. They have made James D. Gill the agent of it for Springfield, and a full line of it is now upon exhibition in the store and windows of his establishment.

Judicious Advertising

Creates many a new business,
Enlarges many an old business,
Revives many a dull business,
Rescues many a lost business,
Saves many a failing business,
Preserves many a large business,
Secures success in any business.

The British Royal Geographical Society has awarded royal medals to A. R. Colquhoun for his journey from Canton to the Irawadi to Bhamo, in 1882, during which he executed surveys of the whole route, from Wu-chau (150 miles west of Canton) to Talifu, 1,300 miles of which had never before been surveyed; and to Dr. Julius Haast, in consideration of his sys-

tematic explorations of the southern island of New Zealand, in the course of which he ascertained the altitudes of 130 stations and collected material for a map on the scale of four miles to an inch, the manuscript of which he presented to the Royal Geographical Society; also for his numerous contributions to the knowledge of New Zealand, made in the society's publications, and elsewhere.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, June 4, 1884. }

THE MONEY MARKET.—The money market has ruled quiet and easy, with loanable funds in abundant supply. Call loans on Stock Exchange collateral have been available at 2@4 per cent., and some loans were made as low as 1½ per cent. Time loans have been made at 4½@5 per cent. Commercial paper firm but nominal at 5½@6½ per cent. discount. The stock market has undergone but slight fluctuations since our last issue. There was a slight upward flurry early in the week, but at the close the tendency was lower. Government bonds were ¼@½c. lower. Railroad bonds were irregular, closing active and weak. The market for foreign exchange has ruled firm and higher, the leading drawers having all advanced their rates for sterling to \$4.85 for long and \$4.87 demand.

THE PAPER MARKET.—The paper market retains a very steady appearance, without, however, showing any increase in business. As in nearly every department of trade at present caution is the rule with most buyers, the orders for the most part representing grades, sizes and quantities necessary to meet the legitimate wants of consumption. Efforts made on the part of dealers to induce larger orders to be given are met in most instances by a reluctance to anticipate the future, buyers preferring to be governed by their current necessities. Supplies of most grades continue quite full, although there is no great surplus seeking a market, as many of the large mills are not running to their full capacity. Some have their current production engaged on orders, while there are still others who embrace the opportunity to shut down to make needed repairs. There is no doubt but what low prices are the controlling motive of some manufacturers in lessening their production, and it would inure to the benefit of the whole trade if their example was followed more generally. The Eastern straw paper manufacturers met at Stanwix Hall, Albany, yesterday, and after discussing the matter, agreed to maintain the old schedule of prices. The subject of shutting down the mills for 60 days from June 15, was also discussed pretty freely. Sixty per cent. of the mills have agreed to the two months' suspension, and when the consent of 65 per cent. is obtained the mills will close down. This action is taken in view of the scarcity of straw, the old crop being nearly exhausted, and the new crop promising only two-thirds of an average. The price of straw at the mills has advanced from \$8 and \$10 per ton to \$18 and \$20.

THE STATIONERY MARKET.—A surprising improvement in trade was indicated this week. The volume of business showed an encouraging increase, which rather exceeded the expectations of dealers generally, although all were prepared for it, because it was looked for two months earlier. As a result, there was more talk of new goods for the fall trade, and manufacturers seemed to be imbued with a greater degree of enterprise and activity. The blank-book trade, although with many dealers still quiet, with others is very active. Out-of-town orders for early July delivery are coming in very rapidly, and there are no indications of a cessation during the balance of the season. The business is mostly from heavy dealers in remote sections; who order early. The toy men are also very busy in filling orders for summer games, Fourth of July goods, &c. In staple goods the reports are quite glowing, especially in respect to Western and Southern trade. To be sure, dealers are holding back somewhat on account of the crops, which have not yet matured, but are ordering in small lots, while jobbers are ordering more largely than usual. The trade in fancy goods is quiet as yet, but promises to open up well. In advertising specialties there is a steady and brisk business doing.

The Science of Heraldry.

"Heraldry is a very beautiful study," said James F. Weston, to whom a reporter of THE STATIONER applied for information on the subject, "and it is a thing that is little understood by the generality of people. Not a few call everything that they see respecting heraldry 'a crest,' knowing nothing of the divisions of a coat-of-arms. A coat-of-arms is composed of a crest (which is above a shield), a shield, sometimes having supporters, such as animals, birds or men at the sides, and also a ribbon and motto. A crest represents that figure worn on the top of helmets, and what is vulgarly called the little bar underneath is a wreath which represents a roll of linen, which ancient soldiers used to tie around this ornament before going into battle, for the protection of the head. The shield represents the field of battle, or, in other words, where certain deeds of valor were won, while all the various designs that are placed upon the shield are intended to set forth special achievements of the character named. For instance, my neighbor Calkins, of Maiden lane, inherits a coat-of-arms which is a plain shield on a pile, vulgarly called a spile. Piles have been granted to such as have been very useful in founding commonwealths and colonies.

"The bend and bend-sinister, those not acquainted with heraldry are also apt to have erroneous notions of. A little incident occurs to me which will give an illustration. A person blessed sufficiently with this world's goods to have a carriage, thought he, like some of his neighbors, must have a coat-of-arms. Accordingly while his carriage was being built he told the carriage-maker to put his coat-of-arms on it. The carriage-maker consulted some work on heraldry in which he found a name answering to that of his customer, and painted the heraldic emblem accompanying it on the car-

riage. While the owner was driving out one day, a wag, who understood the science of heraldry, asked him what he had that coat-of-arms on his carriage for. He replied: 'Oh, you know, I told the carriage-maker to put it on.' 'But,' said the wag, 'do you know what you are wearing there?' pointing to the sinister-bend. 'Do you know you have the sinister-bend?' 'Sinister-bend,' said the man in the carriage, 'what is that?' 'Why, don't you know it is a sign of bastardy?' 'Oh, I must have that taken off.' The bend is a broad bar running diagonally down from right to left and is a mark of honor; while the bend running in an opposite direction is a mark of illegitimacy.

"And so with every point in heraldry there is something significant and interesting. We sometimes see a little hand—a little red hand—in one corner of a coat-of-arms, and wonder why it is there. It was customary in ancient times to compel a man who killed another in a duel or otherwise, to have a bloody hand placed upon his coat-of-arms. Even to the present day in England, those who wear crests or coats-of-arms are required to pay a tax for doing so, and it has long been customary for people having no coat-of-arms to have their initials woven into all sorts of fanciful devices, to take the place of a crest or coat-of-arms. A jeweler came to me not long ago with a seal to be engraved, saying that his customer wanted a crest on it. Said I, 'What does he want—a pig, or a dog, or an elephant?' 'I don't know,' replied the jeweler; 'he wants a crest on it.' 'What is the man's name?' I asked. 'Don't know.' 'Well,' I said, 'suppose I put a rampant on it; would that suit him?' 'Oh, yes, I think that would do nicely,' replied the jeweler. Accordingly, the crest was engraved. The man paid his money and went on his way in blissful ignorance of the real significance of his coat-

of-arms. It is a common thing for people to look into a heraldic work, find a name corresponding to their own, and appropriate the crest or coat-of-arms, only perhaps to be ridiculed for their assumption and ignorance. At some future time I will tell the readers of THE STATIONER how to find out their coat-of-arms—if they have any."

The ordinary rubber cement which is so much used by fine shoemakers is made by dissolving a quantity of gutta-percha in chloroform or carbon bisulphide until the solution has the consistency of honey. Thin down the parts to be cemented, then spread a small quantity of the cement well over the parts to be joined. Warm the parts over a flame or fire for half a minute, bring the surface to be united together, and hammer well or clamp firmly. The cement dries in a few minutes.

Significant Book-Cover Designs.

One of the best examples of significance in a book-cover design among recently-published books is offered by "Old Love Letters." The cover is of gray cloth, the shape of the book being that of a folded letter; transverse lines of Indian red, starting from the four corners, meet in the centre, under a large gold die with a Cupid on it, which forms the seal of the letter. Two blue lines, imitating narrow ribbon tied in a bow with ends, are carried around the book.

"The Theatres of Paris" has a gold design composed of many objects either literally or figuratively connected with the stage, with the escutcheon of the city of Paris for the nucleus of the group. Musical instruments, an opera-glass, a fan and a laurel wreath are among the objects composing the design, which is better in idea than in composition of line.

A significant cover is that of "The Life of Martin Luther," in brown cloth with numerous black lines arranged in imitation of an ancient book. The idea is an excellent one and the tone and color are very harmonious, but the design would gain by greater simplicity—that is, the use of fewer and longer lines to produce the given effect. As it is, the design is too much broken up.

"Newport" has a very good cover in point of significance. A space of sky at the top, a space of sea at the bottom, are well suggested by wavy lines of different characters, and across the cover is a branch of some flowering bush or tree in gold, substantial in character, but not too heavy. The book is a dark chocolate color. A deep marine blue would have been more desirable. The title "Newport" is interlaced with the flowering branches in large letters.

Creators of the "Age of Steel" has a light fawn-brown cover with lines of a darker shade about it, in imitation of the bands or straps used on wheels in machinery. At the top is a group of tools, an anvil, pincers, mallet and other objects, so composed as to look like a large spider with many legs.

"Home Decoration" has a red cover with a design of fringe at top and bottom, a number of books in the act of falling from some shelves and several other absurd objects of a presumably decorative character. This cover is hopelessly bad.

"Schwatka's Search" has a black-and-gold picture on it, with a gold sun, some gold icebergs and icefields, and some extraordinary little black dogs drawing a sledge. This interesting work of art is finished off with a fringe of icicles.

"Icepack and Tundra" has a dark green cover, with a snow effect on it, a landscape and flecks of white, denoting snow. The large letters are designed to suggest icicles. This cover is rather above the average, both as to significance and artistic effect.

"Brazil, the Amazon and the Coast" has tall black palms on a tawny ground, with tufts of india-rubber plants and other tropical shrubs in the foreground, the whole forming a decorative landscape. It is sufficiently significant in character, but certainly not artistic.

Another "Life of Luther" has well-executed pictorial gold stamping on a black ground, but there is too much accessory of line and flourish. The figure groups are well composed.

"Sport with Rod and Gun" has a charming cover in two colors, light red and tawny yellow, so artistically combined as to suggest the coloring of a forest in autumn when seen from a distance. It has, moreover, a softness of tone which few American book covers possess. The design is elaborate and involved, but strictly significant throughout. Three decoy birds in a field, a flying bird, a fish, and many other objects connected with sport are worked up into a subtle and delicate design.

"Woman's Handiwork in Modern Homes" is light red in color, with a portière suspended from a bar for its leading design. Peacocks' feathers are freely employed as accessories. It is significant, but hideous.

A new book of travels has a rather effective cover in black, silver and red. It has a silver die of icebergs and water, with a red seal air-ing himself on a silver cake of floating ice. The idea of significance is well carried out, and the book is noticeable, at least, for an oddity which is not displeasing.

"Italian and Other Studies" has a simple and tasteful cover, a light blue in color, of exactly the peculiar shade of the Italian sky. An oblong gold die in outline reproduces a classical scene of Pompeian character.

"A Confederate Soldier in Egypt" has a large gold die, a portrait of General Loring, the author. This may be significant of the contents of the book, but is hardly in good taste.

"Chinese Gordon" has a scarlet cover with black lines and lettering, and a quarter of a circle in black in one corner which conveys no intelligible idea to the popular mind. The scarlet color symbolizes the military character of the book. A gold monster used as a die refers to the Chinese element of the work. On the whole this is a very good cover for a popular book of the kind.—*Art Age*.

A Promised Revolution.

The printing world is much disturbed by the discovery of a new process which enables any number of copies to be taken of the oldest book without setting a line of type. A compound has been discovered which may be spread upon a page without in the slightest way injuring the paper and which refuses to rest upon ink. It can be easily removed to a stone, and there become the matrix for stereotype, or can be used for printing from at once. You hand your best beloved Aldine to the inventor of this new process, and he will return it to you without a stain or a mark, uninjured and only cleaned, and he will give you along with it an exact facsimile, letter for letter and broken stop for broken stop, of the volume which he has had in his possession for only a few days. Mr. Quaritch, the second-hand bookseller, is said to be thirsting for the blood of this too-clever inventor; but practical printers are already moving to see whether they cannot save the cost of re-setting old editions, and, if certain difficulties can be got over, we shall see a change not only in the production of facsimiles of old books, but in

the reproduction of modern books. It will no longer be necessary to keep type standing. A proof will be as good as a stereotyped plate. No book will ever really be "out of print" so long as a copy of it remains. It will be nearly as cheap to reproduce a volume as to print an extra copy of a volume passing through the printing machine. Certainly we are progressing. Already water-color drawing can be so well lithographed as to deceive the very artists. The time is not far distant when we shall photograph colors. And now that a book may be reprinted from itself, we may reasonably hope to find a method whereby oil colors may be multiplied from their own canvases.—*The Week*.

THE FIRM OF COLLINS & BROTHER

(Publishers, Booksellers and Stationers), is dissolved by mutual consent, Robert B. Collins retiring. The business will be continued by CHARLES COLLINS, who will sign for the late firm in settlement of outstanding accounts.

Our Patent Laws, as Related to Agriculture, Arts and Industries.

By JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

Among the many questions of current public interests there are none of more intrinsic importance, or more forcibly urged upon thinkers, than the laws that relate to the grant of letters-patent for inventions. For myself, I believe them to have been the greatest of all agencies in producing the colossal results embraced in modern arts and applied science. But there are many earnest and honest men who, misunderstanding the nature and effects of patents for useful improvements, are opposed to the system, and whose antagonism has of late been made manifest in unmistakable terms; for example, in bills introduced in Congress during the present session, which, if passed, would nullify the beneficent jurisprudence of two hundred and fifty years.

PATENTS FOR INVENTIONS NOT MONOPOLIES.

It is frequently the case that men, otherwise well informed, speak of patents for inventions as if they were monopolies harmful to the people; whereas even a slight familiarity with the development of industries is sufficient to show that patents have benefited the producing classes by cheapening every article of common use; and multiplying the productive power of labor.

The opponents of patents assume at the outset that the patent laws have proved oppressive to industries. If this assumption were correct, there would remain but little to be said. But no arguments are adduced to sustain its correctness, no facts are brought forward to prove its truth; on the contrary, every principle of ethics and all the teachings of the history of industries for the past two centuries and a half go to show its futility. What is an oppressive monopoly, or, as the old British law-writers expressed it, an odious monopoly? It is the taking away from the public of something that the public before enjoyed, but from which it has been unjustly debarred. When the King of England granted to certain persons the exclusive privilege to trade in salt, that was an odious monopoly, because it was a right that had previously belonged to the people at large, and of which they had been arbitrarily deprived. When a powerful corporation, by crooked devices, obtains a large share of the public domain, that may be an odious monopoly, for the lands which had once belonged to the people are taken from them without due recompense. But when a person, instead of appropriating what was previously known or used, creates new property, then that newly-created property should, by common consent, belong to him. Now, the law expressly forbids the issue of a patent, except to some one who has actually and truly created a new and useful improvement in some art or manufacture. It simply protects the inventor for a limited time in the possession of what, but for him, would have had no existence. The principle is the same as that which protects all property, except that the inventor has

less protection than any other person who creates it. The farmer levels the forest or breaks the prairie sod, and this originates wealth, and all the profits of that wealth are "his, his heirs and assigns for ever." The inventor provides new and improved inventions whereby the farmer can hew down the woodland or invert the furrow with one-tenth the labor that it required before, and these inventions are wealth originated by the inventor; but the law protects him and his legal representatives in the profits of that wealth, for a period of, at most, seventeen years. It is impossible to trace in this a single element of an odious monopoly, for the inventor takes nothing from the public that it could have had without him. But by a vicious use of this term, mistaken leaders have succeeded in confusing the idea of patent laws with that of hurtful monopolies, and this, too, in the minds of a class that, more than any other, have been, as we shall see, directly benefited by the patent system. When such ideas are held by a portion of the community so intelligent, so energetic, and so powerful as the Western Granger, it is time that the ethics and practical effects of patent laws were brought sharp and clear into the daylight of vigorous discussion, in order that they may be judged upon their merits. If the law of patents has wronged any class of men; if it has retarded in any way any industry of our people; if it has prevented the full development of the resources of any portion of our country; if it places the poor at the mercy of the rich; if it robs the farmer to heap the coffers of the manufacturer; if it is contrary to any principle of right, or equity, or justice, then let the patent laws sink "deeper than ever plummet sounded." But if, as I believe and contend, every grade of society and all classes of men have been benefited by patent laws; if the progress of every industry has been accelerated by them; if our national resources have yielded a hundred or a thousand fold more than would have been possible without them; if they provide to-day the readiest means whereby a poor man may rise to affluence and position; if they add to the wealth of the agriculturist even more than to that of the manufacturer; if they proved to be based upon those eternal principles of justice and equity which form the foundation of all fair dealing, then let us exalt the patent laws as the great agency of industrial advancement. Let us correct their defects, when such appear, with careful and skillful hands, and then, more than ever before, make them an integral and permanent part of our national jurisprudence and public policy.

PATENT LAWS THE OUTGROWTH OF LIBERTY.

We must not forget that the patent laws are inwoven with the history of Anglo-Saxon freedom. They first took the form of positive enactments in the famous statute against harmful monopolies, by which English freemen struck down forever the arbitrary power of the British kings; and the most bitter enemies of patents in England to this day are the pseudo-aristocrats, of which Sir William Armstrong is the type. In this country the first patents were granted by the colonies to en-

courage the manufacture of iron, the building of grist mills, the success of steam navigation, and other useful enterprises needed by the people. And so deeply impressed with their utility were the founders of the republic that, fresh from the hot contest with kingly prerogative, they incorporated in the Constitution that proviso upon which our patent laws are based. A few years later, when France threw off the feudal tyranny of centuries, it adopted a patent system as among the first fruits of its liberty; and in these later days one of the foremost acts of reunited Italy was the establishment of a patent law protecting inventors by a single grant, in all the provinces, from the alps, on the borders of Lombardy, to the shoals of the Adriatic. A system that met with such favor

from statesmen so strongly imbued with the spirit of freedom can hardly be in itself oppressive. A system that has stood unchanged, save in the refinements of its practice, during more than two hundred and fifty years, and from the single country of Great Britain has been incorporated in the statute law of every civilized land, must have some merit in it—enough, at least, to render it worthy of the most careful study and examination before any attempt, direct or indirect, to impair or destroy it. Let us, then, proceed to consider the patent law—thoroughly and dispassionately—first as to its ethical justice and propriety, then as to its results as an element of national policy, and, finally, as to its effect upon the agricultural interests of the United States.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel, tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

BOOK-BINDERS' WIRE-STITCHING MACHINE

Of Largest Capacity and Range. Power and Hand Combined.

SPECIAL STEEL WIRE FOR THEIR USE.

Wire per thousand books costs but one-third that used by any other Stitcher.

Manufactured by CHARLES CARR, Granite St., South Boston, Mass., U. S. A.

Electric Pen.

A description has been given by Dr. J. Garel of a simple way to make an electric pen, to be used for multiple copying of letters or drawings, to the same effect as the somewhat costly Edison pen. A tracing of the drawing to be copied is taken on thin paper, which is then laid upon a piece of common gas carbon. The larger the carbon in proportion to the paper, the less shifting will be required; but a piece of reasonably convenient size may be easily found, and it should be ground to a fair surface. The plate of carbon thus prepared is to be connected with one of the screws of a small induction coil, such as that used for an electric bell. The style for following the design, says a contemporary, is nothing more than a lead pencil, rather hard and brought to a fine point. The other end of the lead of the pencil is connected by a wire with the other screw of the induction coil, which, in turn, is connected with a suitable battery. The wood of the pencil effectually insulates the current from the operator's hand. The arrangement being thus completed, all that is necessary is to follow the design, or to write the letter upon paper resting on the block of carbon, leaning lightly upon the pencil. As the graphite point proceeds, a continuous succession of small sparks flow between it and the carbon, and the intervening paper is accordingly perforated by an infinite number of small holes, burnt by the sparks. These holes are barely visible to the naked eye except by holding up the paper to the light; but they can be utilized for transferring the design or writing to paper, either by dusting on a powder or by passing an inked pad over the perforations when laid on the recipient.—*Electrician.*

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

Correspondence.

RICHMOND RANGES.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., June 7, 1884.

The general condition of trade since last report shows little change of serious import. There is a reasonable movement in the jobbing and retail lines, but the volume of business in the wholesale branch is exceptionally small. Of course, this state of affairs is no more unusual here than it is in cities of much larger proportions. This is the time for a dearth of trade as well as news.

The recent financial fiasco has not forced anything of a damaging character to the surface in this latitude which affects the paper and stationery trade, but it has made them all keep their weather eye open.

The failure of two of our leading business houses was enough to cause apprehension and make all departments of trade look for a stroke of lightning in almost any quarter, particularly when these concerns were looked upon as being built upon foundations of rock and not of sand. The spell is past, however, and a hopeful feeling for the future pervades all circles.

The paper, stationery and bookbinding interests of this city will be well represented at the New Orleans World's Cotton Exposition. In my next I will give your readers the names of the exhibitors of those interests.

SENTINEL.

ST. PAUL SITUATIONS.

[FROM OUR REGULAR CORRESPONDENT.]

ST. PAUL, June 6, 1884.

At the time of writing, a casual observer would judge that business in our city had been, for the time, suspended in favor of politics, and that the bulletin boards were the chief objects of interest and importance.

The nomination of Blaine for the presidency has just been announced, and very naturally the majority of our people are occupied with comparisons of opinion as well as expressions of congratulation or deprecation; also prophetic statements hopeful and dubious.

In point of fact, there is very little to be said upon the subject of trade. Were the assertions of merchants throughout the State, regarding

the condition of business in their respective localities, to be taken and transmitted without qualification, the Minnesota letter would be discouraging.

From the different points and parties interviewed comes the report of rather quiet trade, each tradesman looking at the situation from the most depressing standpoint, and failing to notice the cheering symptoms which are always to be found when sought.

Your correspondent inclines to a more encouraging view of matters, and observes with gladness the evidences of solidity and prosperity though comparative dullness may be at the moment apparent.

Our jobbers unite in saying that sales are not up to the standard of expectation or desire, but invariably conclude their communications with the remark: "We are doing something all the time, however." In some cases a marked improvement is manifest, one important wholesale concern testifying that their trade is in all respects satisfactory and their sales largely in advance of last year's.

Of course, instances of this kind are infrequent, but upon averaging the statements received and considering the outlook in the light of the best information obtainable, I feel that I can truthfully pronounce the condition of traffic in our section, if by no means of a "booming" nature, still characterized by soundness and stability.

We have been only slightly, if in any degree, affected by the monetary vicissitudes which recently threatened convulsion in the financial centre of our country. Indeed, it may be affirmed that the indifference with which the seeming crisis was regarded here attests, emphatically, the strength of our position. The wheat fields, upon which we are in a great measure dependent, present a most favorable aspect in all quarters. Indications are excellent for a large yield, and unless some mishap occurs the farmers will secure an abundant harvest. As to the compensation they may expect therefor, nobody can prophesy, but, all things being equal, a good wheat crop means a prosperous year in our portion of the country.

It seems reasonable to anticipate a good autumn trade when the cereals shall be harvested and the affairs relating to our national politics finally arranged.

With the St. Paul Book and Stationery Company, business is undeniably good. Its travelers are sending in satisfactory orders and the demands of its country customers are frequent and of fair dimensions. In its retail department an augmented trade is noticeable—a natural result of the extensive improvements recently made in that establishment, the public evincing by renewed patronage its appreciation of the beautiful store prepared for its convenience. The company has now the finest and most complete salesroom in the Northwest and a stock of goods commensurate therewith—a combination which produces, as might be expected, a gratifying growth in its fine retail trade. Of office stationery and supplies it is dispensing large quantities, as usual, and finds the demand exceedingly active. Averill, Russell & Carpenter report a good condition of things in their business. Country orders not so numerous or extensive as might be desired, but still generally satisfying in nature.

Bristol, Smith & McArthur express themselves thoroughly pleased with the results of their business. They are pushing their stationery lines more prominently than before and giving more attention to office supplies and commercial work of every description.

E. H. Milham pronounces trade quite active, and has no fault to find.

James Davenport says that he is selling something, although not rushed.

Sherwood Hough's establishment is greatly beautified by the plate-glass recently placed in the windows thereof. It is presumable that the improvements betoken good trade.

Among the Minneapolis merchants, trade matters are materially similar to ours. Business is declared good with the feeling evident that better things are to be realized in the near future.

The genial Hallenbeck, of J. Q. Preble & Co., accompanied by Hopkins, of Liebenroth, Von Auw & Co., "did" our city during the past week. Mr. Hallenbeck speaks very highly of his business and states that sales are overstepping those of last year.

It is an encouraging fact that the traveling gentlemen as a rule express entire satisfaction with their reception in this locality.

D. D. Merrill, Jr., of the St. Paul Book and Stationery Company, is at present in the East

upon a trip of combined business and pleasure. R. F.

WILMINGTON WISPS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., June 7, 1884.

"THE STATIONER looks well," said a prominent stationer and printer, referring to No. 21.

To my question, "What is your opinion of it as a trade medium?" he replied: "It is the best published, and invaluable to us. I would not care to do without it."

These remarks are only a sample of the frequent encomiums bestowed on your valuable journal. The new dress is another advance in its constant improvement.

The first intimation of the Wall Street "panic" caused some apprehension in business circles here, but failed to affect the banking interest or general trade to any considerable extent. As far as known, the orders for stationery and printing were none the less on that account.

The prevalence of fine weather has given a slight impetus to some branches of trade, and the outlook for a good month is encouraging.

The political pot is boiling here, and printers are kept busy filling orders for ballots, circulars, &c.

A brief visit among the trade developed a few items of interest.

The folks at Porter & Co.'s were engaged in the pleasant task of stock-taking. January is the usual period with most of the trade here for this delightful pastime, but Porter & Co. are an exception to this rule. Trade was not "booming" with them, yet staple goods are having a fair sale. They report a limited sale of books, principally those in cheap bindings.

Mr. Boughman, of Boughman & Co., does not find business as brisk as expected, but thought it had improved during the past ten days.

H. M. Butler, with E. S. R. Butler, reports no unusual activity with them, but thought that it was better than in the early part of May. He found no demand for new goods or novelties.

The James & Webb Company announce an improvement in its trade and is booking numerous orders in consequence. In the printing department it is taxed to the extent of its large facilities to supply the demand. Sales in the stationery department are equal to similar seasons of the year, and better than past month.

Ferris Brothers, printers and bookbinders, are busy filling orders in their line. This firm is now engaged in the delivery of the Wilmington City Directory for 1884-5, a publication of its own, and it is to be congratulated on the fine appearance of the work. Its general accuracy and typography commends it to public confidence. Year after year, Ferris Brothers have improved the directory by adding many new and important features, until last year we said of it, *ne plus ultra*. The issue of 1884, however, proves this to be a mistake, for the publishers have found "more beyond" in the valuable accessory of the "Block Directory," giving houses in their order by streets, and

showing the occupants of each. This new feature will prove invaluable to our business men, and will be duly appreciated.

The suspension, on June 3d, of William Bancroft & Co., formerly Wood & Bancroft, caused no surprise among the trade, as this firm's financial embarrassment was well-known on the street. The firm's liabilities are said to be from \$2,000 to \$3,000, with assets in excess of these figures. About one month ago, Bancroft & Co. revived the publication of the *Sunday Critic*, an enterprise unprofitable, and in a measure a supposed contributory to their suspension. An arrangement of matters was reached on the 6th, which enabled this firm to resume business.

As the business men of the country are about to initiate a demand for a reduction from two to one cent postage, some of the trade here suggest that the stationers should insert a line in the petition asking for the repeal of the act which converted our post-office into a printing-office. The margins on stock and labor are too close to desire such a powerful competitor as the government. Let this trade be diverted into the legitimate channels, and let it stay there.

The pleasant countenance of our friend Charles Wentzel, with J. G. Ditman & Co., Philadelphia, was seen among the trade today. Charlie's visits in this locality are as angel's, but he always finds a cordial welcome. Come again, Mr. W.

The trade have been inspecting already advance samples of Christmas and New Year cards.

This year, as with previous ones, the jobbers claim that the cards are the handsomest ever produced, and those who have enjoyed the treat of examination agree that these assertions are certainly not without a good substantial foundation.

The following-named trade visitors have recently called: G. G. Filter, from Jonas Langfeld, Philadelphia; "our Mr. Jones," of Thos. W. Price Company, Philadelphia; Thomas Davis, of the King Manufacturing Company, New Bedford, Mass.; Eugene Dietzgen, from Keuffel & Esser, New York; Geo. W. Carpenter, with M. F. Tobin, New York; R. W. Weissenborn, of American Lead Pencil Company, New York; C. M. Carrington, from Wilkinson Brothers, New York; A. J. McDade, with Boorum & Pease, New York; J. R. Hope, of Hope & Co., Philadelphia. TRACY.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, Pa., June 9, 1884.

The indications for a good and paying business this summer are not as flattering as they were in the early spring. About six weeks ago the stationers and book men began to feel a decided falling off in business, and when the bank troubles arose in your city matters assumed a more unhopeful aspect. Indeed, all kinds of retail business then became dull and quiet. Soon after, the Penn Bank, one of our most prominent banks, closed its doors. The effect was most demoralizing to all kinds of business. There are over twenty-

six hundred depositors who suffer by the Penn failure. Deposits amounted to \$1,600,000, and overdrafts to that much more. Assets very small—about \$50,000. The charter of the Penn Bank relieves the stockholders from all liabilities excepting the amount of their stock—the capital of the bank being \$250,000. The cause of the failure was too much speculation in oil by the bank officials. The depositors will endeavor to hold the directors responsible because of their either taking part with the president or because of negligence. Nothing has ever happened in the financial circles of this city which has had such a complete influence for bad as this bank failure.

The other banks are all solid, but are exceedingly chary about making loans.

One firm—D. Stewart & Sons, dealers in toys, notions, &c.—fell victims to the Penn failure and were closed up by confessions amounting to nearly \$40,000.

H. Watt & Co. say that they are doing a nice business, considering the season. They have a neat line of sketches, crayons and steel engravings, and deal in artist's materials. Their large circle of young acquaintances prove reliable customers.

W. W. Edgar says that the trade always looked for dull times during July and August, but this year it has struck them two months sooner. Edgar's periodical counters are well filled with good summer reading, and have all the leading dailies of the United States.

Davis & Co. have finally become thoroughly fixed up, and they think that their new place is a great improvement on the old. They, too, feel the general quietness of business.

H. Meyer says that business is entirely too quiet on Smithfield street. In short, every stationer and book merchant, as well as other business men, say that business is strangely quiet. I look for no improvement until after the national election in November.

Through the last part of May a large element of our population, the iron-workers, were greatly worried about the probable necessity of an iron strike; but on June 1 the manufacturers signed the "scale" for another year, and all is serene. The iron trade, though, is deplorably dull. G. W. H.

SPRINGFIELD SPRINKLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

SPRINGFIELD, Mass., June 10, 1884.

One of the pleasantest days of the season was yesterday, and Springfield was visited by Barnum, Bailey & Hutchinson's mammoth circus, which gave the most delightful ring performance ever witnessed here. The people from the country for miles around were in bright and early, and the merchants had an exceptionally good circus day's trade. While at the park and by the side of the "White Elephant," I was quite surprised to see a press reporter (short of, or keeping his cookies for himself) feed the elephant with an empty paper bag, which he devoured as rapidly as though it were a piece of gingerbread, and it occurred to me that some of the product of our paper mills might be consumed in this way.

E. P. Chapin, for quite a time connected

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 762.)

with the paper and pulp trade, is making a popular and very efficient postmaster.

Mr. Hyde and Mr. Powers have returned from the Chicago Convention, and will both support the nomination. Considerable is said in Springfield favorable and unfavorable, but in my humble opinion most of those who vote the Republican ticket, and many who have not in the past, will, before November, hurry for Blaine and Logan.

Daniel Slote & Co. have been represented here this week by Mr. Pond, specially pushing scrap albums; and Samuel Hano, of manifold book reputation, was here last week on his way from the Paper City.

Among the large orders taken about here recently for paper might be mentioned one of two hundred tons taken by the Chemical Paper Company, of Holyoke. This mill has a capacity of twenty-five tons daily, and is turning out a good grade of goods. D.

BOSTON BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS, }
250 Devonshire St., BOSTON, June 12, 1884. }

This is the season of the year when New England shows to the best possible advantage. All nature is in bloom, and the people, released from the close confinement of the factory and shop, hasten to enjoy the pleasures of the gala season.

Although trade generally is comparatively dull, the dullness is not a subject of complaint, but is rather anxiously awaited for, that a little recreation at mountain or seaside may recuperate the overtaxed muscles and the weary brain.

The custom of spending a few weeks or months amid sylvan retreats, or enjoying the invigorating influences of the seashore, freed from the cares of trade, is becoming each year even more general.

The cause of this is readily understood by one who would look below the surface, and, instead of laying the "summering mania" to the dictates of fashion, it will be found that the necessity of the times forces the custom upon the people.

We are living in a fast age. Steam is the unit of power and human muscle is forced to compete with it. Electricity is the standard for brains. For a while muscle can hold its place, and for a time brain is active, progressive and decisive. But like the engine and the battery, with which the power of man is competing, muscle and brain need repair. A change of scene and quiet rest is essential to recuperate the body and to refresh the mind. And so the few weeks intervening between the spring and fall trades is ever welcomed by industrial workers as a season of recreation, of sport and pleasure.

The spring trade being about over, only a small amount of business is doing. And, though very little activity is noticed, manufacturers and jobbers are planning for a good fall trade. In many lines of stationers' specialties, Boston enjoys an extensive share of the country's patronage, and our manufacturers are

fully alive to the varied wants of the trade. Within the next sixty days the Hub will be well represented on the road by travelers whose sample-cases will contain hundreds of novelties for the holiday trade. So, be on the watch for the "Boston drummer" who represents the most extensive and progressive house in America.

By way of a change of scene, I took a run out to Springfield, Mass., on last Saturday and spent the day in that progressive town, or rather, city. To note the one hundred and one manufacturing industries which are carried on here would require more space and time than is at my disposal, although my note-book is well-filled with interesting items.

I was not a little surprised to find located in Springfield such an establishment as "Gill's Art Store." New York or Boston has not an art store that can surpass it, and for variety of art goods in stock, I doubt if its superior can be found in this country. This statement may seem to partake of the characteristics of fiction, but it's a fact, I can assure you. It may be remembered by some that about two years ago James D. Gill, the proprietor, advertised and offered a \$500 painting to any one (whose travels would qualify them to judge) if they could point out and locate in any part of the country a more extensive and better equipped establishment devoted to the sale of art goods. Well, several art connoisseurs took a trip to Springfield to get that painting, but they were unable to comply with the conditions. They thought they had seen art stores, and so they had, but they did not expect to see the leading art store of the country in Springfield.

By kind invitation of Mr. Gill, the proprietor, I was permitted to look over the establishment. In the basement I found a stock of stationers' specialties, which in extent and variety was larger than that carried by most jobbers. On the first floor is displayed samples of every art novelty to be found in this country or Europe. In the spacious show windows is a display of pottery. Located on the floor above are numerous art rooms and galleries devoted to the exhibition of oil paintings, water colors, etchings, and other art works such as statuary, &c. Here I saw exhibited a collection of the celebrated Trouvelot Astronomical drawing, originally published by the Scribners. This artistic collection was secured by Mr. Gill and sold to the City Library of Springfield.

After looking over this establishment, I felt convinced that the people of Springfield and vicinity were an art-loving people, and that they had cause to be proud of Gill's art store.

A. L. D.

CINCINNATI CINCTURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, June 10, 1884.

More seasonable weather this week has brought with it cheerfulness, and while the situation is far from being a boom, it is just as far from being one of gloom. There isn't much doing in anything outside of the sale of agricultural implements, wood-working machinery, building materials, and building itself;

but all this is a great deal. General trade remains almost stagnant; but while the wheels of any department of business move, the stationer has an occupation. Paper is as much a necessity to give motion to trade as steam, which explains the fact that manufacturers of business stationery are having reasonably good orders for work.

Another shift of the scenes has been made in the journalistic world here in Cincinnati. The *News-Journal*, a Democratic paper which had run an existence of five hundred days, was sold at assignee's sale last Thursday to John R. McLean, of the Cincinnati *Enquirer*. On the morning of the same, Thursday, Mr. McLean issued the first number, a new two-cent paper, the Cincinnati *Sun*. On Sunday morning, Mr. McLean brought his two papers out in one, under the name Cincinnati *Sun-News-Journal*. He paid \$25,000 for the *News-Journal*, inclusive of its Associated Press franchise, its type and its lease, which has sixteen years to run. The paper, with a compound name will be freed of this top-heaviness in a few days, and will come out under the name of the Cincinnati *Sun*. It is to be independent in politics and full of dash and sensation. The *News-Journal*, in the five hundred days of its existence, ate up all of the nearly \$200,000 paid in by its one hundred and fifty stockholders, except the \$25,000 which it brought at public auction. This \$25,000 was half of the amount it paid for the Associated Press franchise. A multitude of stockholders have usually proved the death of a newspaper enterprise. Besides, there is only now and then a man able to run a great daily newspaper successfully.

C. F. Bradley reports fair orders for the times for mercantile stationery.

Russell, Morgan & Co. say that the sluggishness of trade is felt very perceptibly in their business, the manufacture of playing cards.

The Globe Files Company reports that the extending of its territory is so rapid as to increase the number of orders for its products, in spite of the sluggishness of general trade.

A. H. Pounsford & Co. and Robert Clarke & Co. find much sale of the whole tribe of holiday and birthday cards to persons who want them for designs for china painting and other sorts of decorative work.

Wilstach, Baldwin & Co. are finding remunerative work in contract jobs, besides the work of supplying new records that the burning of the court-house has brought to them, and over and above all these their trade in mercantile stationery is keeping their hands pretty full.

C. F. Woodrow's run of job printing, in the way of advertising pamphlets, holds up well considering the times.

Archery goods find a smaller sale here than for many years previous. Lawn tennis and croquet goods, which many of the Fourth street stationers keep, are having an increasing sale.

Wm. J. O'Neil, of the firm of J. R. Mills & Co., was given a complimentary vote for the position of librarian of the public library on last Saturday. The trustees re-elected the

present incumbent, C. W. Merrell, but their election is subject to confirmation by the Board of Education.

John Holland reports goods orders for his staple gold pens, to the manufacture of which he is devoting his undivided attention.

The art school of the Cincinnati Museum

gave its exhibition last week. It showed about six hundred examples from casts, still life, and life in black and white, and in water-colors and oil, to say nothing of numerous examples of wood-carving, and very much larger number than ever before of works in modeling and sculpture.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

NEW PATENTS.

No. 298,719. Paper-Bag Machine.—Oscar W. Allison, Rochester, N. Y., assignor to the Union Paper-Bag Machine Company, Philadelphia, Pa.

No. 298,733. Letter Box.—Abner S. Cook, Burlington, Ia.

No. 298,735. Ink-Reservoir for Paper-Ruling Machines.—Edward P. Donnell, Chicago, Ill.

No. 298,740. Muffler for Slates and Slate-Frames.—John D. Emack, Baldwin, N. Y.

An improved muffling device for slates or slate-frames, composed of a framework formed of spring metal, over which is stretched a fibrous or textile material.

No. 298,746. Figure, Map and Chart for Educational Purposes.—Mary E. Guirey, San Francisco, Cal.

A figure, map or chart showing divisional views of the whole or different inner parts of the human body in bas-relief.

No. 298,747. Key-Ring.—Edward P. Haff, New York, N. Y.

No. 298,767. Fountain Pen-Holder.—James Morton, New York, N. Y.

No. 298,781. Printing-Machine.—Walter Scott, Plainfield, N. J.

No. 298,812. Topographical Representation or Model.—Clarence L. Anderson, San Francisco, Cal.

In a representation or model, an open frame composed of separated parts or strips secured together, and each curved to a reduced facsimile of the contour of the surface of the ground at the elevation it represents, whereby the topography of the surface is illustrated, said frame being elevated above a datum or base plane, and suitable strips or pieces under said frame, between it and the datum-plane, arranged in relation to each other and to the contour of the surface-frame to properly represent the interior features of a subterranean work.

No. 298,830. Toy Savings Bank.—Charles M. Crandall, Montrose, Pa., assignor of two-thirds to Frederick W. Crandall and Benjamin L. Baldwin.

No. 298,834. Draftsman's Adjustable Curve Ruler.—Frank Winthrop Davenport, Providence, R. I.

In an adjustable rule, a strip of flexible and partially spring material—as sheet metal, vulcanized rubber, &c.—combined with a partially rigid piece—as lead, soft copper, &c.—so as to retain any shape to which it is bent.

No. 298,835. Game Counter.—Frank Dayton, Portland, Ore.

No. 298,853. Stencil or Perforating Pen.—John C. Hill, New Guatemala, Guatemala, Central America.

No. 298,870. Paper-Bag Rack.—William Mack, Indianapolis, Ind.

A quadrantal or fan shaped paper-bag rack, the base-board of which is rectangular, the back-board being wedge-shaped, the sides formed of quadricircular boards fastened at the top to the back-board and at the front to the base-board, the space thus inclosed being provided with shelves, forming tapering receptacles for paper bags.

No. 298,891. Noiseless Slate.—Joseph Ridge, Chicago Ill., assignor to Augustus Warner and John H. Beers, both of same place.

No. 298,901. Printing and Vignetting Frame.—Oliver Perry Scott, Quincy, Ill.

No. 298,921. Decorative Tile.—Savillion Van Campen, Jersey City, N. J.

A metal-faced tile composed of a sheet of metal and a sheet of felt or other coarse paper secured together by overlapping the edges of the metal on the paper with relief designs on its surface.

No. 298,976. Plaque-Holder.—David M. Ireland, Waterbury, Conn., assignor of one-half to Henry A. Matthews, same place.

A metal plaque constructed with a shank, extending from its back at an inclination to the plane of the surface of the plaque, combined with a holder consisting of a post arranged upon a suitable base, with a socket extending therefrom at substantially right angles, and so as to receive the shank of the plaque.

No. 298,991. Playing-Cards.—Edgar J. Levey, New York, N. Y.

A pack of playing-cards having in each suit a card containing eleven pips or spots and the head of a knave, a card containing twelve spots or pips and the head of a queen, and a card containing thirteen spots or pips and the head of a king, together with characters upon the upper left-hand margin of each of these cards, as follows: the first letter of the title of the court-card, a pip of the kind contained on the card, and a number corresponding with the number of pips on the card.

No. 298,992. *Game-Board.—Joseph M. Lewis, Trenton, N. J.

No. 299,002. Method of and Apparatus for Damping Lithographic Surfaces.—John W. Osborne, Washington, D. C., assignor to William H. Forbes, Boston, Mass.

The improvement in the art of damping surfaces prepared for printing in the lithographic manner, which consists in mixing the vapor of water, or air saturated with the vapor of water, with air which has been cooled; for the formation of a cloud of condensed and suspended water particles, and then depositing said particles of atomized water upon the surface to be damped.

No. 299,012. Mortised Wooden Block for Electrotpe or Stereotype Plates.—Frederick A. Ringler and Emil I. Alfeld, New York, N. Y.

1. An electro or stereotype plate having therein an opening of the size of the type to be used, in combination with a wooden block, a portion whereof is cut away and the space so made occupied by a metal collar having therein an opening corresponding with that in the plate, and forming therewith the mortise for the type. 2. A wooden block adapted to be used with electro or stereotype plates by having therein an opening, within the sides of the walls of which are grooves or recesses, and a metal collar cast in the opening, and retained in position by the metal projecting into the grooves or recesses, such collar having an opening therein corresponding to the type to be used, whereby the same is made to form a part of the mortise for the type when the plate is attached to the block. 3. A block for electrotpe or stereotype plates, made of wood, having therein an opening larger than an opening in the plate, and within which is secured a metal collar, reducing the size of the opening in the block to that of the one in the plate.

No. 299,019. Eyeletting Machine.—George O. Schneller, Ansonia, Conn.

No. 299,015. Toy.—William B. Sales, Oshkosh, Wis.

No. 299,046. Marking and Shading Pen.—Elbert E. Alderman, Portville, N. Y.

No. 299,094. Paper Folding Machine.—John H. Stone-metz, Erie, Pa.

In a paper folding machine, the combination, with a system of conveyor-tapes, of a roller having milled or corrugated disks or sections of a larger diameter than the tape bearing or supporting surfaces of said roller, whereby the milled sections of the roller project beyond the tapes and have a faster surface speed.

DESIGNS.

No. 15,004. Printing Type.—Henry Brehmer, New York, N. Y., assignor to David Wolfe Bruce, same place. Term of patent, 14 years.

No. 15,010. Note-Paper.—William A. Pike, Bridgeport, Conn., assignor to Bradley A. Hard and Samuel Parsons, New York, N. Y. Term of patent, 7 years.

No. 15,011. Capital Letters.—Charles Schaffer, New York, N. Y. Term of patent, 7 years.

"The words 'Tortoise Shell.'"

REISSUES.

No. 10,480. Trundling Toy Horse.—Elijah J. B. Whitaker, New York, N. Y., assignor to George W. Whitaker and William T. Whitaker, Baltimore, Md.

An Amateur Society.

A society called the Society of Amateur Photographers of New York has been formed in this city. Its membership is intended to embrace people of literary pursuits, editors, lawyers, scientists, clergymen, bankers, merchants, &c. Good rooms have been provided, with library, fine instruments, and laboratory specially arranged for photographic experimental purposes; the latest and best processes and improvements in the art will be exhibited and explained; adventures and experiences related, new pictures by members thrown upon the screen; exchange of pictures by mail arranged; reports of proceedings prepared for publication, &c. A local name has been adopted simply to fix the permanent headquarters of the society; but the membership is by no means intended to be local. Amateur photographers residing in any part of the country, both ladies and gentlemen, may become members. The secretary is C. W. Canfield and the president is F. C. Beach. The rooms of the society are at 1262 Broadway. The annual dues are \$10 and the initiation fee is \$5; life membership \$100. The society has started out under the most favorable auspices.

One of the lasting results of the Philadelphia Congress of Electricians and the Exhibition will be the "Memorial Library." Before the exhibition opens a collection will be made of works upon electricity in all languages, and this library will be preserved. To this end, requests have been sent to electricians in all parts of the world, as well as to libraries and publishers, requesting aid in this laudable purpose, which, if accomplished, will give Philadelphia the best collection of works upon electricity to be found in America.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

C. F. Trein, stationer, Clarendon, Ia., has sold out.

Keithley & Co., publishers, Talmage, Neb., have sold out.

John De Meza, paper manufacturer, Chittenango, N. Y., has assigned.

John F. Haas, bookseller, &c., St. Louis, Mo., is advertising to sell out.

Charles F. Roper & Co., printers, New York city, have dissolved partnership.

J. Fred. Waggoner & Co., publishers, Chicago, Ill., have been sold out by the sheriff.

Bell & Co., publishers of the *Mail*, Hagerstown, Md., have dissolved partnership.

Frederick Vogel, dealer in fancy wood boxes, New York city, has been damaged by fire.

William O. Bunn, publisher of the *Republican*, Homer, N. Y., has sold out to Stephens & Danes.

McGlashen & Edwards, publishers of the *Nugget*, Eagle, Idaho, have sold out to Parker & De Succa.

Carr & Shaw, publishers of the *Enterprise*, Ferndale, Cal., have dissolved partnership. E. B. Carr continues the business.

Scott & Bigelow, newsdealers, &c., Albuquerque, N. M., have dissolved partnership. Each continues business on his own account.

Execution has been issued against James M. Munyon, publisher of the *Labor World*, Philadelphia, Pa., to recover judgments amounting to \$1,118.

The liabilities of Speigel Brothers, booksellers, &c., Greensburg, Pa., who failed recently are \$25,000; assets estimated at \$20,000. Executions have been issued.

Mr. Cohen, brother-in-law of the late Chas. D. Myers, has taken out letters of administration on the estate of the latter. It is probable that the stationery business of Myers Brothers at No. 62 John street will be closed out. As yet Mr. Cohen is undecided whether he will continue the business or not.

The assignees' sale of the entire stock in trade of the well-known publishing house of E. Claxton & Co., Philadelphia, Pa., was begun in the auction salesroom of George A. Leavitt & Co., in Astor Place, on Monday. There were about thirty representatives of the trade present, a few of whom were from Boston and Philadelphia. The stock comprised a miscellaneous assortment of books carried by the firm, including its own publications (bound and in sheets); stereotype plates; copyrights; rights to publish, &c., &c. The sale is to continue daily until all of the stock is sold. The terms are: On purchases amounting to \$300 or more, four months' credit, and on all purchases less than \$300 cash without discounts. The prices realized were generally about one-quarter of the list prices. Among the works disposed of was "Treasures of the International Exposition," \$11.50, the publishers' price being \$60; "Raphael's Madonnas," valued at \$10, brought \$4.12; a copy of Longman's Testament brought \$5, one-half of the list price; Longfellow's poems, bound in cloth, scheduled at \$4, brought \$1.35; "Picturesque People" fetched \$2.25, the list price being \$10.

F. H. Loss, Jr., has added several novelties lately to his line of Swiss-carved and fancy goods. There are some very fancy articles in antique brass; also Swiss salad bowls, with porcelain interiors, which can be taken out for the purpose of cleansing. A fork and spoon, silver mounted, accompany the latter. Mr. Loss has also some very pretty things in Japanese brushes and trays in all sizes, and paper lamp-shades, with rose ornaments. The latter are very popular for pink parties.

The Silicate Book Slate Company has had a large number of inquiries lately in reference to its new specialty known as the "silicate silent slate." This weighs only two ounces, and measures 7 by 11 inches. Owing to its extreme lightness, it can be subjected to very rough usage without injury. There is also no rattle about it, and in this respect it is equal to the patent noiseless slates.

Among the visiting members of the trade in the city during the week was W. M. Osborn, of E. & W. M. Osborn & Co., Burlington, Ia. Mr. Osborn is looking around for goods and doesn't seem to be uncertain as to the good business prospects.

Louis Honimell, publisher of the *Red River Chronicle*, San Hilario, N. M., has discontinued the publication of that journal.

James Garstang, stationer, &c., St. Louis, Mo., is advertising to sell out.

E. O. Fiendel, bookseller and stationer, Annapolis, N. S., has sold out.

Barney & Van Beuren, printers, Omaha, Neb., have dissolved partnership.

J. E. Somerville, bookseller, &c., Manistee, Mich., has been burned out. Insured.

T. S. McCool, dealer in picture-frames, &c., San Francisco, Cal., has been attached.

Beakes & Gardner, publishers of the *Review*, Westerville, Ohio, have dissolved partnership.

George A. Dunnington, publisher of the *Sentinel*, Grafton, W. Va., has been burned out.

John Glenn, traveling representative of Marcus Ward & Co., returned from Europe by the steamship City of Rome on Sunday. He made a brief visit to London and Belfast on behalf of his firm.

Among the out-of-town tradesmen in the city during the past week were E. Niedecken, of the firm of H. Niedecken & Co., Milwaukee, Wis.; J. S. Fretwell, of Fretwell & Nichols, Savannah, Ga.

The Minneapolis Paper Mills, owned by Warner, Newman & Warner at Minneapolis, Minn., at the falls, was damaged to the amount of \$5,000 by fire on Saturday last, and the damage to stock is \$10,000.

Phil Hake's new line of Christmas goods is decidedly novel and elegant. The designs show an originality of conception and a degree of artistic finish that is really noteworthy. A single card of blue plush has a floral design of embroidery partially surrounding the figure of a pretty, rosy-cheeked maiden dressed in a fanciful garb trimmed with tinsel. A similar card is made of old-gold plush with a bordering of heavy old-gold fringe. A card having the shape of an open book rests on a base, and has two plate-glass mirrors in the centre. The trimmings are pink satin and silk fringe, the former being tastefully puffed around the border of the mirrors. Another design has the form of a vase filled with flowers. It is made of plush and satin of a pretty shade. A Christmas banner consists of crimson plush with embroidery in the centre. Another novelty has the form of a fancy swell body sleigh filled with flowers as a Christmas offering. The line includes cards decorated with antique brass mountings, consisting of figures and floral designs, hand-paintings on plush, embossed silk figures, and is, without a doubt, the most elegant collection of holiday goods that

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wave Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

Mr. Hake has ever brought out, which is saying a great deal.

William M. Chase is just completing the portrait of L. Prang, of Boston.

Frank Jones, paper manufacturer, Ballston Spa, N. Y., has called a meeting of his creditors.

T. Kittredge has bought out C. V. R. Pond & Son, publishers of the *Herald*, Quincy, Mich.

The Albuquerque Publishing Company, Albuquerque, N. M., has been leased to J. H. Gardner.

Charles McConnell, paper-stock dealers, Boston, has failed. He has been in business fifteen years, and carried a stock which he valued at \$30,000.

A. Caliga, of Boston, whose two pictures, "A German Schoolmaster" and the "Head of a Girl," in the exhibition of American artists, have attracted so much attention, is engaged upon a painting to be reproduced as a Christmas card.

Two of Walter Stetson's pictures recently exhibited in Boston, and which attracted so much attention from their originality of conception and vividness of coloring, were purchased by L. Prang, one of them being in oils, the other a water color. The former, "By a Pool," represents two female figures in a quiet, wooded retreat, and is remarkable for the tender treatment of foliage and sky and the artistic introduction of a bright focus of color in the foreground.

Amariah H. Bradner, of Dansville, N. Y., paper-stock dealer, has made an assignment to William Richardson, of Hornellsville, N. Y. He has preferred creditors for over \$40,000, including the Traders' Bank, of New York, \$6,484. This failure, it is claimed, was partly due to the failure of the Bank of Dansville, and was brought about in a measure by his becoming a bondsman for L. C. Woodruff, on his appeal to the Court of Appeals from a \$14,000 judgment in favor of Lott C. Clark, of New York. Mr. Woodruff not having succeeded on his appeal, the executors of the Clark estate began an action against his sureties and obtained an attachment from a New York judge directed to the sheriff of Livingston County, and the assignment followed. The liabilities are said to be large.

Among the leading features of the *American Journalist* for May are lengthy and interesting sketches of the *Philadelphia Record* and the *Galveston News*; also an article entitled, "The City Scribe as a Country Publisher," which treats, in a very readable manner, of the ambition of wage-journalists and of their vain endeavors as publishers on their own account, adding a word of caution about hasty ventures in country journalism. The editorial page is also full of sound opinions, while the newspaper chit-chat is as sprightly as ever.

Peter McNaught & Son, paper-stock dealers, Boston, have failed. Their business has not been remunerative of late, although a few weeks ago they claimed to be worth \$12,000.

Mrs. Odenheimer Fowler, of New York, is the author of two ideal heads with fancy coiffures, which are now in course of lithographic publication.

Lord & Thomas, Chicago, have a neat little pocket rule or measure for the measurement of advertising space. It is of metal, enameled and marked by inches, and nonpareil and agate measures.

David D. McNair, of the Woodruff Paper Company, Dansville, N. Y., a relative of A. H. Bradner, and a retired farmer, has made an assignment to Edward H. Pratt, of Rochester, N. Y. His liabilities are said to be large.

The *Illustrated News* Printing and Publishing Company filed a bill of incorporation at Albany, N. Y., on June 10. The object of the company is to publish an American edition of the *London News* and do a general publishing business. The capital is \$80,000.

The partnership under the firm-name of Althof, Bergmann & Co., importers and dealers in toys and fancy goods, 326 to 330 Broadway, N. Y., has been dissolved by the retirement of Chas. Althof and Gustav Cronmeyer. The business will be continued under the same firm-name by Louis Althof and William C. L. Rubsamens, the remaining partners.

Frank Jones, paper manufacturer, Ballston Spa, N. Y., made an assignment on Tuesday, and at a meeting of his creditors on the same day made a compromise, agreeing to pay 25 cents on the dollar in three, six, nine and twelve months. His liabilities are not thought

Absorbs Instantly.
Leaves no lint. Will outwear any other.

to be large. Among others are J. W. Lyon & Co., John H. Lyon & Co., and Train, Smith & Co.

L. C. Clark and Samuel Carson, San Francisco, Cal., have formed a copartnership, and will hereafter conduct the publishing and wholesale bookselling business under the style of Samuel Carson & Co. The new firm will assume all outstanding accounts and will continue to hold the agency for Eastern book-sellers and publishers.

Alonzo Bradner, of the Woodruff Paper Company, Dansville, N. Y., also engaged in the real estate business at that place, has made an assignment to Andrew J. Holden, of Livonia. He has preferred creditors to the amount of about \$30,000, including the Seventh Ward Bank of New York, \$1,000. His liabilities are said to aggregate nearly \$100,000. His failure, it is claimed, was brought about by the failure of the Bank of Dansville.

The envelopes for the Post-Office Department will be made by P. P. Kellogg & Co. and the National Papeterie Company after July 1, they having secured the contract for the same. The work will be done at Springfield, Mass. The number of envelopes to be furnished will amount to about fifty millions. This contract does not include the stamped envelopes, for which the Morgan Envelope Company and the Plimpton Manufacturing Company hold the contract.

Notwithstanding that the field of trade literature is pretty well crowded, an enterprising firm at Baltimore, Md., has ventured forth with a new monthly journal, called the *Southern Merchant and Journal of Trade*. Its typographical appearance and large selection of trade information is very much in its favor, and, besides, it shows a degree of prosperity that bespeaks for it a long life. As its name indicates, it is to be devoted to the interests of the Southern trade, and with such a mission before it, it has undoubtedly a wide and profitable field.

The Acme Stationery and Paper Company has lately added several specialties to its extensive line of writing tablets, &c. One is called the "Favorite" blotter tablet, which is made in commercial, letter, legal, foolscap and bill cap. The paper is of a fine grade and the tablets come in all sizes at a uniform price.

They are, moreover, neatly and substantially gotten up, with a handsomely printed cover. The company has also brought out a Student's note-book, which is made of fine white paper, perforated and well bound. It is also showing a line of memorandum pads made up with five different tints of unruled paper in each pad. The latter comes in nine different sizes. The "Inexhaustible Stamp" pad is the name of a brand of ink pads manufactured expressly for the Acme Stationery and Paper Company. It is of a superior quality, neatly put up, and is warranted to give satisfaction. Not content with stopping here, the Acme Company has changed the designs on its note, draft and receipt blanks, besides adding a number of new forms of blanks to its stock, comprising rent receipts, receipts for salary and remittance blanks for remitting money by mail.

The Astor Library has a manuscript Sarum Missal, "Missale ad usum Saru," of about the year 1440. It is on vellum, is splendidly illuminated with painted and golden initials and borders of arabesque and floral ornamentation, and is bound in full russia leather. It once belonged to St. Stephen's Chapel on the present Parliament Palace, and was probably presented, on the suppression of that deanery in the sixteenth century, to some other religious foundation.

A set of The American Catalogue, new or second-hand. State price and condition to

"A."

Care of The American Stationer.

The Travelers' Protective Association.

The Travelers' Protective Association of the United States will be in session at Detroit on Friday and Saturday of this week, to elect officers for the ensuing year and make such amendments to its constitution as are needed to meet the requirements of this rapidly increasing association.

Through the kindness of James Buckley, general passenger agent of the Erie Railroad, a special through rate was obtained, and it is stated that a very large delegation of New York's "Knights of the Road" left here on Wednesday evening, together with representatives from a large number of trade journals.

With the unprecedented increase in its membership during the past year and the objects it has in view, this association should receive the hearty co-operation of every merchant who sends a commercial traveler on the road.

The objects of the association are: 1. The elevation of the commercial and social standing of the merchant traveler. 2. The repeal of all license laws. 3. To obtain reduced rates, and greater amount of excess baggage. 4. To procure hotel accommodation commensurate with the prices paid.

From all accounts, the meeting at Detroit will not only be one of business, but will embrace the elements of a round of pleasure, as the merchants of Detroit have subscribed a fund and made arrangements to take the boys and their wives on an excursion, give them a banquet, ball, &c.

Postage on Transient Newspapers.

The following act has passed both houses of Congress, and will, it is expected, be signed by the President:

An Act fixing the rate of postage to be paid upon mail matter of the second-class when sent by persons other than the publisher or news agent.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the rate of postage on newspaper and periodical publications of the second-class, when sent by others than the publisher or news agent, shall be one cent for each four ounces or fractional part thereof, and shall be fully prepaid by postage stamps affixed to said matter.

A manuscript of great interest has been found in the library of Arezzo, Italy, containing several unknown writings of Saint Hilary of Poitiers; the treatise "De Mysteriis," which was believed to be lost, and a number of hymns. A journey in Palestine and in several other countries of the East is found added to the works of the great bishop. This latter document offers peculiar interest with regard to archaeology, ecclesiastical history and geography.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents

NEW YORK, THURSDAY, JUNE 12, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum. 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE Fourth of July occurs this year on Friday. Now, why wouldn't it be a good idea for the stationery and paper houses to close on Saturday as well as Friday and give their employees a chance for a little extra enjoyment. As trade goes, it will not hurt anyone and will be of real advantage to all, employers and employed alike.

IN response to our inquiry, James A. Whitney, the well-known lawyer and patent expert, submits an opinion as the right of the government to conclude an international copyright treaty. His communication will be found in another column. There has been so much said about negotiating a treaty between Great Britain and the United States for the protection of authors' rights that the idea has been acquired by many that the treaty-making authority has the power to consummate it. We think that Mr. Whitney's letter will dispose of this opinion, for it seems to us very clear that the gift of copyright is a matter of statutory authority alone. If this view is correct, action must be taken through Congress in both of its branches, subject, as usual, to Executive approval.

ANOTHER advance toward cheaper postage has been made. The bill reducing postage on newspapers and periodical publications of the second class, when sent by persons other than the publisher or news agent, has been passed. The rate is fixed at one cent for each four ounces or fractional part thereof. When it is considered that this, like every other step to cheaper postage, is likely to increase the use of the mails in other ways, it will be seen that the government, as well as the interests of the paper and stationery trades, is to be benefited. Every newspaper sent out through the mails is an incentive to thought, and thought leads to action. It may be safely predicted that the more we circulate newspapers the more likely people are to write letters. Here the postal revenues derive benefit and the stationer and paper maker realize a little more profit. Cheap postage encourages the use of the mails in every way, but it is sure to increase correspondence. We want more of it.

AT length the exactions of railways and telegraph companies have brought forth their long-anticipated results. A combination of manufacturers and merchants has been formed for the purpose of securing favorable freight and telegraph tariffs, and for the common protection against all distinctions which act as fetters on trade and prevent the largest commercial liberty within the limits of law and reason. The association which

has been formed for this purpose designs to defend the rights of trade, which have hitherto been at the mercy of venal legislators and rapacious corporations. Such an organization ought to command support throughout the country, and if all who are interested in its success cannot unite with it in its present constitution, arrangements ought to be made for auxiliary associations or sub-organizations. A mercantile brotherhood thus formed and established could accomplish a great deal of good and could compel attention and enforce its righteous demands. In union there is strength, and if the commercial community, like the laboring forces, or like the grangers, should effect a strong, compact union in opposition to the railway pools and telegraph autocracies, it would be immensely benefited.

Roundabouts.

BY THE TRADE LOUNGER.

People are beginning to wonder when they will be able to profit by the reciprocity treaty with Mexico. Congress proposes to adjourn on June 30. Isn't it going to do something before it gets away?

A Chicago man, according to a St. Louis paper, not having sufficient money to buy a ticket, conceived the scheme of being sent as express matter to Manhattan, Kan., and was successful. The story goes on to say that when he was rolled into the express office at the depot the box was so placed that he stood on his head. The clerk began checking up, using the box as a table. The boxed-up individual stood it as long as he could, and then made his presence known, greatly frightening the agent, who was going to shoot into the box. At length, however, he was released, and paid the express charges, \$9.25. A ticket would have cost \$17.54.

Some later decisions by the Treasury Department are of interest to the trade. There is a packing material, consisting of paper and cotton, pasted together with glue or some other similar substance, forming a fabric or material which is impervious to ordinary dampness, and having cotton as a component material of chief value, which is held to be dutiable at the rate of 35 per cent. ad valorem as a manufacture of cotton not otherwise provided for.

Electrotypes, being engraved copper plates for printing, are dutiable at the rate of 25 per cent. ad valorem by assimilation to the "steel plates engraved, stereotype plates and new types," provided for in paragraph 199 of the tariff.

One of the late specialties made from paper is a very artistic wall-bracket representing a shelf in imitation scroll-work, supported at either side by a parrot resting on the branch of a tree.

A man says that a "boom" has started in playing-cards because one of the paper mills in this State has just made forty-five tons of cardboard to be used by one house and more to follow. This is nothing. How many hundreds of tons are used yearly in the production of playing-cards. * * * *

There is quite an art in selecting picture-frames. Few people study what an effect a frame has in bringing out a picture. It may be thought the latter should rest on its merits, and so it does, but not to the extent which may generally be imagined. There is a degree of harmony between a good picture and its frame, if the latter has been selected with proper taste, that most buyers fail to get, and which, if not present, will absolutely spoil a good picture. * * * *

A dealer in picture-frames gives some points which may be of interest to readers of THE STATIONER. He says: "Gilt frames accord perfectly with black engravings and lithographs when the precaution is taken to have a certain extent of white paper around the subject. Bronze frames, which have but little yellow brilliancy, do not injure the effect of an oil picture which represents a scene lighted by artificial light, such as that of candles, torches, a conflagration, &c. The rule to be followed in assorting the frame of a picture is that its color, brightness and ornaments also shall neither injure the colors, nor the shadows, nor lights of the picture, nor the ornaments represented in it." Just keep this in mind. * * * *

An English newspaper man who has been going through an exhibition at South Kensington, had his mind led into what he calls "a new groove of thought." He saw some new garters, and the lady who exhibited them said: "If the drapers don't choose to sell them we shall canvass the stationers." * * * *

And then the new "groove" comes in. Why, he remarks, "shouldn't the stationers sell many of the useful and compact articles now sold by the drapers?" Well, there is no reason why they shouldn't. It is the best way to take down the drapers (otherwise dry and fancy goods dealers) and compel a separation of trade. If this isn't done it will be necessary to give up book-selling and stationery as distinct line of business. * * * *

This is going back to an old source of complaint. Seriously, don't we deteriorate by trying to do too much at once? Will the stationery trade proper, if merged with other lines of business, produce the diversities of fancy which have marked its progress?

Answers to Correspondents.

J. E. & Co. want address of manufacturer of the "Victor" staple driver.

Ans.—We understand that the article named is out of the market. W. J. Brown, Jr., 304 Branch street, Philadelphia, was the original manufacturer.

International Copyright.

140 NASSAU STREET,
NEW YORK, June 7, 1884.

To the Editor of the Stationer:

In reply to your inquiries as to the constitutional status of the various projects for an international copyright treaty, I would call your attention to the fact that copyright protection is essentially a matter of statutory law. In other words, copyrights differ materially from trade-marks in this—that the proprietary right of a trade-mark is recognized at common law, and will be protected without the aid of special statute in such behalf; that a copyright can only exist when some special law has been provided to create and enforce the right.

In this country all legislation on copyrights bottoms at last upon that provision of the Constitution which provides that Congress "shall have power," &c., to secure to authors and inventors for limited times the exclusive right to their inventions, discoveries, writings, &c. It is plain from this that Congress alone can create a copyright or protect it.

It is clear that the term "Congress" means the Upper and the Lower House together. It cannot by any reasonable interpretation of words be construed as meaning the President and the Senate. The treaty-making power under the Constitution is vested in the Executive and the Senate, and there is nowhere any authority under which this treaty-making power can proceed to enact a law or institute protection in a matter which is expressly confided to Congress, that is to say, to both Houses.

It appears to me clear, therefore, that there can be no such thing as an international copyright treaty, and that if such a treaty were entered into, that it would be a nullity; not only a source of annoyance to our own citizens, but a snare to the people of other countries. There can be no doubt that Congress has the right to grant copyrights to citizens of any country in precisely the same manner that it has the right to grant patents to citizens of any country. Personally, I believe that such a law should be enacted, although I am not prepared to say that it should be devoid of provisions which will adapt it not only to the protection of authors, but to the interests of the reading classes—which is much the same thing as saying of everybody—in this country.

JAMES A. WHITNEY.

The oldest printed book among the latest accessions to the Astor Library is a vellum copy of the "Durandi Rationale Divinorum Officiorum," printed by Fust & Schöffer in 1459, and recognized without dispute as the third book bearing the date of its imprint. It is a noble folio volume with two columns on a page, initial letters painted and elaborately ornamented, and is bound in old English blue morocco extra, with gilt edges. This copy was the earliest of the incunabula of the famous Sunderland collection, and it is scarcely possible that

its like will soon be found again in the book-marts of the world. The work itself is a curious attempt of thirteenth-century scholasticism to follow up the symbolism of the Roman Catholic rituals, and it may still be consulted with profit by students of ecclesiastical history.

Wide-awake stationers should not neglect to fully supply themselves with attractive campaign goods, and those who may want to do so in season to meet the first demand of consumers should send for price-lists, &c., to J. H. Bufford's Sons. The line of campaign portraits produced by this firm four years ago was very popular, and in completeness and excellence this season, it is safe to say that their portraits will be in demand in the forthcoming campaign. The line consists of portraits for framing, also for banners, transparencies, &c. They are suitable for residences, clubs and political organizations. They are printed on heavy plate paper, and can be had of any size.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 11, 1884.

THE MONEY MARKET.—The money market has ruled quiet and easy, but without feature of special interest. The tendency continues to be toward an increase in the volume of available funds and a return to what may be considered its normal condition. Commercial paper is dull, but discount rates are firm. The stock market has been rather tame and quiet since the week opened, with values generally showing an easier tendency, but the fluctuations have in no instance been wide or significant. Railroad bonds have ruled dull, and with but few exceptions, lower, showing an absence of any important demand for investment. State bonds neglected. Government bonds lower. Foreign exchange has ruled dull but steady.

THE PAPER MARKET.—Business in the paper trade is very little different from what it has been for a number of weeks past. Ordinarily we are accustomed to anticipate a period of comparative apathy from this time on until the exhausting heat of summer has spent its force, but many manufacturers of print papers look forward with some degree of encouragement to an exciting Presidential campaign, which is now about opening, as a feature which will considerably increase consumption and aid them in sustaining the market against any further decline. The market for wrapping paper is now experiencing some of the ill effects of overproduction, a prominent manufacturing concern having reduced its price on manillas $\frac{1}{4}$ c., which is likely to be followed by others, so that a No. 1 manilla can now be bought at the mills for $6\frac{1}{2}$ c. Straw wrappings are also weaker, recently quoted prices not being sustained.

THE STATIONERY MARKET.—There was less activity noticed in trade this week than during the week previous. There is said to have been a diminution in the number of orders by mail, but this was partly counterbalanced by a larger influx of out-of-town tradesmen. To sum the matter up, however, trade has been fully up to expectations for this season, while the outlook for the future is, perhaps, better than at a similar period in any previous year. A few dealers in holiday novelties have brought out their new goods this season rather earlier than usual, and have taken a few orders, but the majority are content to wait until after this month, when trade in this line is expected to begin. The movement in school stationery is quiet, but the outlook is promising. There is considerable activity in inks, particularly commercial inks. The domestic trade is not only brisk, but there is a fair export demand. Owing to the unsettled state of finances in Cuba, the export trade with that country, however, is somewhat depressed. The blank-book trade shows about the usual activity for this period of the year and prices are firm, and about the same condition prevails in the envelope trade.

Obituary.

HENRY C. WORK.

Henry C. Work, the noted song writer, died in Hartford on Sunday. He was born October 1, 1832, in Middletown, and was the son of Alanson Work, who, with Messrs. Burr and Thompson, was in 1841 condemned to twelve years' servitude in the Mississippi State Penitentiary for assisting fugitive slaves across the Mississippi River. At the beginning of the rebellion he was a poor printer. He wrote "Kingdom Coming;" "the great temperance song, "Father Come Home,;" "Grandfather's Clock" also "Marching Through Georgia," "Wake, Nicodemus,;" "Babylon is Fallen,;" and others which had very large sales. He was no longer the poor printer. He was a successful man. He traveled in Europe and explored this continent, and when he left Chicago in 1867 he was worth a small fortune. At that time he went to Vineland, N. J., bought (in company with his brother) two or three hundred acres of land in that unique rural city, built two houses, and for a time engaged heartily in the preliminary arrangements for establishing a great fruit farm. His possessions and his comforts were swept away, one by one. He never drank a drop of liquor in his life, and never used tobacco.

CHARLES FENNO HOFFMAN.

Charles Fenno Hoffman, the poet and novelist, died on Saturday at Harrisburg, Pa. He was the brother of Ogden Hoffman and a son of Judge Josiah C. Hoffman. He was born in this city in 1806, and began his education at the academy in Poughkeepsie, but, owing to a childish quarrel with his father, he ran away from school in 1817, and on reaching the wharf, in an attempt to board a boat, had his leg crushed, necessitating amputation. Returning home he entered Columbia College, which he left in the Junior year, and was admitted to the bar in his twenty-first year. He practised for three years, but though successful at the bar he was dissatisfied with the drudgery of practice, his bent being for literary work, and his spare time was largely devoted to writing articles for the periodicals and journals of the day. At the age of twenty-four he determined to abandon the law and enter upon literary pursuits. He was then for a time associated with Charles King in the *New York American*, at that time a journal of local influence. In 1833 Mr. Hoffman established the *Knickerbocker Magazine* and assumed the position of editor, but relinquished the post after the issue of the first few numbers, taking charge of the *American Monthly Magazine*, which had been established by Henry William Herbert. He retained the management of this for several years.

In 1835 Mr. Hoffman published a volume of sketches entitled "A Winter in the West," based upon his travels of nearly a year in the far West, which met great favor. His next effort was "Wild Scenes in the Forest and Prairie," which appeared in 1837. In 1840 he published his first work of fiction, "Greyslaer," a romance founded upon the trial of Beauchamp for the murder of Colonel Sharper, in Kentucky. This was received with great fa-

vor, and established his position among American authors. He published, in 1842, a collection of his poems, under the title of "The Vigil of Faith, and Other Poems," which appeared a second time in 1845, revised and enlarged, as "Love's Calendar." His greatest successes as a poet were in lyric compositions, his style closely resembling that of Tom Moore. Among his songs which achieved a wide popularity were: "'Tis Hard to Share her Smiles with Mary," "Sparkling and Bright" and "The Myrtle and Steel," which have not yet passed into oblivion. His other poetical efforts were gathered together and published in 1847, under the title of "The Echo; or, Borrowed Notes for Home Circulation." In 1846 he assumed the editorial charge of the *Literary World*, which position he retained until 1849, when he was seized with a mental disorder, which necessitated his giving up literary and all other work. A revised and corrected edition of his works was published in 1874, by his nephew, Mr. Edward Fenno Hoffman.

JAMES HARPER.

The death of James Harper, paper manufacturer, Westville, Conn., is announced.

This unexpected event will be deplored by all who knew Mr. Harper and recognized his sterling worth as a man, his activity and intelligence as a paper maker and inventor, and his honorable and kindly characteristics.

Mr. Harper was born in Scotland fifty-three years ago, and coming to this country after he had attained manhood he engaged in the business of paper making, settling finally at Westville in 1869. He was noted for his inventions in paper-making machinery and for his general intelligence on all subjects connected with the manufacture of paper, his contributions to the press, particularly to the *Paper Trade Journal*, showing that while he had worked he had thought, and that his calling was not with him merely the perfunctory pursuit of subsistence.

In disposition Mr. Harper was of a genial and kindly nature, courteous and cheerful under adverse fortune, a keen observer of nature and of men, of warm and enthusiastic temperament. He was a good paper maker and a good man.

He was taken ill on Tuesday of last week and died on Saturday. A wife and four children survive him. His funeral was on Tuesday last, from his late residence.

Decorative Use of Brass.

Brass, from its composition, can only be used in the interior of buildings, and should not be exposed to damp. Its natural pale yellow color is very agreeable, and is due to the presence of zinc. It is not highly malleable, but may be cast and treated like bronze, or by a process of annealing rolled into thin rods and sheets, and worked up in the same way as iron. It is difficult to give a decided preference to either method, though they are so totally opposed in principle and practice. The present tendency is in favor of wrought brass, welded, beaten, pierced, hammered and riveted as in iron, for this exhibits the individual

skill of the handicraftsman, and possesses a sentimental value that cast work, which can be produced *ad libitum*, cannot possess. The designs should be more severe and precise than if intended for forged iron, and more pierced and embossed work should be introduced. It should be sparingly used, and the redundancy of polished brass in some of the newest restaurants in London, though affecting to be of the quiet and unpretending style printed by Hogarth, is vulgar. The works in ormolu of Louis XV. and Louis XVI., which are of cast and chased brass gilded, are too beautiful to afford any scope for adverse criticism, but objects designed to be cast in brass should either be of great delicacy or of great simplicity. Though the arts working in at least what are called baser metals are not yet in the position their importance in the past and in the present entitles them to, the future is full of hope and we may trust that a time is at hand when men of exceptional power, though engaged in what have been regarded as the humblest industries in which art can enter, will be able to impress the seal of genius on their work, and hand their names down to posterity.—*The Builder*.

Earthquakes and Paint.

The connection between earthquakes and luminous paint would hardly be apparent to any one without explanation. It nevertheless exists, and the recent earthquakes in our own country have served to remind us of its existence. As a matter of fact large consignments of this paint are sent to those countries where

earthquakes are prevalent. The use to which it is put invests it with the utmost importance just for the few critical moments of the shock. In the Philippine Islands, where earthquakes are not uncommon; small metallic plates coated with luminous paint are so placed about the premises that at the first warning the inmates are quickly guided to the door, and thus to the street. In Manila it is laid on in patches about the bedrooms and staircases, serving as guides for the door-handles and the stairs, night-lights being considered especially dangerous as likely to set fire to the falling house, and thus to roast the inmates in their own homes. It follows that those who live in districts likely to be visited by earthquakes will do well to adopt this plan, and to burn no flame lights at night, especially in the case of gas, the pipes for which might be broken asunder, and the gas escape and take fire. The gas should be turned off at the main nightly, and luminous labels be so placed as to indicate the door-handles and other guides to the main point of egress, which would enable the residents to find their way out of their houses in the dark before the walls perchance buried them. It will be remembered that at Ischia there was just sufficient time between the first shock of the earthquake and the downfall of the Grand Hotel to permit those who acted promptly to save their lives.—*Iron, London*.

Imitation ground glass can be prepared by dissolving two tablespoonfuls of Epsom salts in a pint of lager beer and painting the glass with the mixture. After drying, the glass will appear as if frosted.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 3\frac{3}{4}$ retail at 50 cents each.
" $6\frac{1}{4} \times 3\frac{3}{4}$ " 1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order.

Samples forwarded on application, to be paid for if satisfactory.

Paris had an electrical exhibition in 1881, Munich in 1882, Vienna in 1883, and Philadelphia hopes to excel them all in her exhibition of 1884. The Vienna enterprise cost \$162,500, or \$12,500 more than the receipts from 886,323 visitors, and if Philadelphia can keep the expenses equally low, she ought to have a balance on the right side of the account, as the price of admission will hardly be as small as that charged in Vienna. The number of exhibitors in the latter city was 575, many of them foreigners.

The word "agnostic" first appeared in literature in 1870. It describes "one who holds that the existence of anything beyond or behind material phenomena is unknown and—so far as can be judged—unknowable, and especially that a first cause and an unseen world are subjects of which we know nothing." It was suggested by Mr. Huxley at a party of philosophers and others, one evening in 1869.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its never spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE. Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1862.

Our Patent Laws as Related to Agriculture, Arts and Industries.

BY JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

THE EQUITY OF GRANTING PATENTS FOR INVENTIONS.

The entire system of protecting new inventions by letters patent is declared by the courts to rest upon the same principles as a contract. The public, acting through its representative, the government, says to the inventor, "Give us new and useful improvements in the useful arts, and we will pay you for them; not in cash down—for we cannot tell the value of an invention until it has been long and thoroughly tried—but by giving you or your legal representative, for a certain specified time, an exclusive chance to make money out of it, provided your invention is really a good one." This, in simple English, is the sum and substance of the patent law. Acting on this promise, the inventor proceeds to devise some means of saving time or labor in some industrial pursuit, or of adding to the comforts or enjoyments of life, and, having done this, secures a patent for it. If the improvement is of such utility that the public wishes to use it, the inventor will have a market for it, and will make a profit until his patent expires and the public comes into full and entire possession; if, however, the invention is not truly an improvement, or if the inventor does not provide for its sale or introduction, the public will not buy, and the patentee will make nothing. This is the rule, with so few and trifling exceptions that they call for no serious consideration. Could any system be more plainly founded on substantial justice, both to the inventor who creates and sells and the public that buys and uses? Could any be better adapted for bringing into existence a constant supply of new and useful improvements without expense or risk of loss to the public? The inventor simply sells to the world what it never possessed before, and the public pays him for it by permitting him to make what he can from it, without let or hindrance, during a certain specified time. The world will not buy unless it can find its own profit in the buying, and thus the patentee cannot profit unless the world be the gainer also.

IF THE PATENTEE DOES NOT ACT IN GOOD FAITH WITH THE PUBLIC, HIS PATENT IS VOID.

But, I may hear it objected, a patentee may have a patent on what does not really belong to him. This does happen sometimes. But mark how the law steps in to confound the wrongdoer. If an invention has been made known in any printed publication, or has been in public use in this country before the date of its invention by the patentee; or if the inventor has allowed it to go into public use for more than two years before his application for a patent; or if he has otherwise abandoned it to the public; or if it appear that the alleged is not the actual inventor, then the patent, even if it has been secured by all the formalities of the Patent Office, will fall to the ground—it will not be worth the ink it is printed with.

But this is not all: if the patentee does not describe his improvement so that it can be made and put in use or operation from his specification and drawings alone; or if he does not clearly distinguish his improvement from what was previously known; or if he claims more than he has really invented; or if his invention does not operate successfully, his patent is so much waste paper.

But neither is this all: if the inventor, although he has made a broad invention, claims only a portion of it in his patent, the law holds him to his narrow claim, and he cannot go beyond it so long as his patent remains in that condition. So, in like manner, if he fails in any of the minute regulations prescribed in making his application, the law compels him to rectify the error before it will give him standing and protection. It is only the inventor that has brought a truly new and useful improvement to the full and complete knowledge of the public, and this according to the forms of law, who can hold the reward or remuneration of a patent. And the man who does this is as much entitled to his reward as is any man who by industry, talent or skill creates wealth which is added to the available resources of the world. I know that I am speaking at some length on elementary principles. But elementary principles are the all-important ones. If it is right and proper, in point of ethics and morality, that inventors should receive patents, it is the strongest of all evidence in favor of the law.

SPENCER AND MILL ON PATENTS.

Even at the risk of taking more space than I intended, I may be permitted to quote from eminent political economists on this branch of the subject in hand. Says Herbert Spencer in his "Social Statics:" "They fall into a serious error who suppose that the exclusive right assumed by a discoverer is something taken from the public. He who in any way increases the powers of production is seen by all, save an insane Luddite, to be a general benefactor, who *gives* rather than takes. The successful inventor makes a further conquest over nature. By him the laws of matter are rendered more subservient to the wants of mankind. He who economizes labor helps to emancipate men from the slavery to the needs of the body; harnesses a new power to the car of human happiness. He cannot, if he would, prevent society from participating largely in his good fortune. Before he can realize any benefit from his new process or apparatus, he must first confer a benefit on his fellow-men—must either offer them a better article at the price usually charged, or the same article at a less price. If he fails to do this, his invention is a dead letter; if he does it, he makes society a partner in the new mine of wealth he has opened. For all the exertion he has had in subjugating a previously unknown region of nature, he simply asks an extra proportion of the fruits. The rest of mankind unavoidably comes in for the main advantage; in a short time will have the whole. Meanwhile, they cannot, without injustice, disregard his claims."

And John Stuart Mill, in language equally energetic, enforces the same truth. He says:

"The condemnation of monopolies ought not to extend to the patents by which the originator of an improved process is allowed to enjoy for a limited period the exclusive privilege of using his own improvement. This is not making the commodity dear for his benefit, but merely postponing a part of the increased cheapness which the public owes to the inventor, in order to compensate and reward him for the service. That he ought to be both compensated and rewarded for it, will not be denied; and also that, if all were at once allowed to avail themselves of his ingenuity, without having shared the labors or expense which he had to incur in bringing his idea into practical shape, either such expenses and labors would be undergone by nobody except very opulent and very public-spirited persons, or the state must put a value on the service rendered by an inventor, and make him a pecuniary grant. This has been done in some instances, and may be done without inconvenience in cases of very conspicuous public benefit; but, in general, an exclusive privilege of temporary duration is preferable, because it leaves nothing to any one's discretion; because the reward conferred by it depends upon the invention being found useful, and the greater the usefulness the greater the reward; and because it is paid by the very persons to whom the service is rendered—the consumers of the commodity. So decisive, indeed, are those considerations, that if the system of patents were abandoned for that of the rewards by the state, the best shape which these could assume would be a small temporary tax, imposed for the inventor's benefit on all persons making use of the invention. To this, however, or to any other system which would vest in the state the power of deciding whether an inventor should derive any pecuniary advantage from the public benefit which he confers, the objections are evidently stronger and more fundamental than the strongest that can possibly be urged against patents. And I have seen with real alarm several recent attempts, in quarters carrying some authority, to impugn the principle of patents altogether—attempts which, if practically successful, would enthrone free stealing under the prostituted name of free trade, and make the men of brains still more than at present the needy retainers and dependents of the men of money-bags."

I may, without myself trenching upon the domain of politics, remind our Western friends that both Spencer and Mill are among the most ardent and aggressive advocates of free trade—an idea commonly believed to be dear to the Western farmer's heart.

(To be continued.)

Half an ounce of borax dissolved in a pint of water will clean gold or gold-plated articles rapidly and well, when they can be rinsed in pure water and rubbed with a soft linen rag. If slightly heated before rubbing, the polish is improved.

WANTED.—AN ACTIVE YOUNG MAN AS indoor Salesman in a wholesale fancy goods house; one who knows the trade preferred. Apply to HENRY LEVY & SON, 477 Broadway.

The Art of Hammering.

The art of hammering ornamental designs on metal has been practised many hundreds of years in almost all parts of the world by persons in every state of civilization, from the highest to the lowest degree, who have executed the work with more or less art, according to their intelligence and education. Almost every art collection will show proof of this. The work is agreeable and fascinating, and readily acquired. Anyone who can draw or trace a design can, with care and thought, aided by some little practice, produce creditable work. The materials generally used are brass, copper, zinc, silver or any malleable metal, and the punches and hammer necessary to bring out the design. These are to be found in any art or hardware store, and can be obtained at small cost. The labor required is light and pleasant, and far less tiresome than the ordinary fancy work done by ladies. It is specially adapted to women on account of the delicacy required in the details of the art.

For the learner it is advisable to use thin metal in the early stages of the work, on account of its being best adapted to teach the effect of hammering and the use of the tools, and generally to give useful knowledge to the worker. In the beginning, brass of about twenty-eight gauge is the best on which to learn the rudiments of the work. After some practice in making straight and curved lines has given the worker more confidence, thicker brass, say of twenty-four or twenty-five gauge, can be used; in fact, for all general purposes, this thickness is recommended. Of course, it must be understood that the skillful worker can produce designs on any thickness of metal. The thicker the metal the slower the progress of the work. In the outset, let the beginner first obtain a dry and level smooth board of pine or maple about an inch thick; on this firmly secure the metal by wooden buttons. These are easily made by taking a piece of any kind of wood three or four inches long, one inch wide, and half an inch thick, and boring a hole in the centre for a screw. The advantage of using these wooden buttons in preference to nailing down the metal to the board is the play that is given for the expansion of the metal that is caused by hammering; when the sheet of metal is nailed to the board, there is no allowance made for this, and the result is the buckling and bending of the sheet, causing annoyance, and very frequently spoiling a pattern of many hours' work. Care should be taken from the beginning to hammer evenly, and keep the work as smooth as possible. It may be as well to say that in fastening the brass to the board, pains should be taken to secure it just tight enough to keep it in place; if too tight, no chance will be given to expand. For ordinary work on sheet metal the design can be brought out in sufficient relief by hammering from the front, but in cases where it is desirable to bring out portions of the design in higher relief, it becomes necessary to work from the back. In this case a bed of cement must be made on the front of the design. The way to accomplish this is to

break the cement (ordinary jewelers' cement answers the purpose) into small pieces, put on the sheet, and warm until the cement is evenly distributed over the entire surface. After the work from the back is finished, the cement can be removed by cooling and tapping gently with a hammer.

The metal sheet being fastened to the board, the design can be drawn on the sheet in free-hand, or transferred by tracing from another drawing. At the beginning only very simple designs should be attempted, as anything elaborate will result in failure and disappointment. The only way to succeed in this, as in any other work, is to begin at the beginning and become familiar with the details of the art in its various stages. Practice and care will soon enable the worker to produce designs of value and merit. After the design has been put on the sheet you are ready for work. Begin by outlining the design with punches, making lines of this description —, or Great care should be taken to have these lines very even and regular. Uneven, jagged lines blotch and spoil the work, and are most difficult to correct. When the outlining has been done, proceed to punch the metal surrounding the pattern away from the design, if not desired in very high relief; if a bolder relief is desired, punch toward the design, commencing, say, one or two inches from it. Many professional workers bring out very high relief in this way, and for ordinary work seldom find it necessary to work from the back. The tools for producing various backgrounds are numerous, but for general work the set sold by art dealers will answer every purpose. If special tools are required, they can easily be made by any one possessing a small degree of mechanical skill with a hammer, file, and small rod of steel or iron. The steel bars can be found in any hardware store, and if steel cannot be obtained, iron, if tempered very hard, will give

good results; in fact, will answer precisely as well as long as the tools hold their shape and thin metals are used. Of course steel is to be desired on account of its ability to stand long and constant use on any thickness of metal.

In the later stages of the work, when more finished results, and consequently difficult designs are desired, it becomes necessary to anneal the metal. When brass is used, the metal is heated until red, and then allowed to cool very gradually. After the design has been worked up, the hammering will probably have caused the brass again to become hard. If this is not the case, the metal must again be heated and cooled quickly by plunging in cold water or oil. In hardening brass it is not necessary to bring it to so great a heat as in softening; but otherwise the process is similar. Bring the metal to a red heat and then cool quickly by a plunge in cold water. It is always preferable to have the finished piece of work tempered hard in order to preserve its original shape. A soft-tempered metal would by handling run the risk of being bent.

Professional workers employ a block of wood covered with two or three inches of pitch, on which the brass is fastened by warming the pitch; it then becomes soft enough to cause the metal to adhere. After the design is finished the pitch is again warmed, when the metal can easily be removed. Before placing the metal on the pitch in the first place it should receive a light coat of oil. But this article has reference more particularly to the early stages of the work, and the directions previously given will enable many to profitably employ themselves in doing useful work. There is no limit to the articles that can be produced; but for plaques, panels for doors and cabinets, faces for fireplaces, screens, sconces, candlesticks, broomholders, and a thousand and more other things that could be mentioned, this work is particularly adapted.—*Ex.*

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879,

and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

The International Trade-Mark Convention.

The representatives of Belgium, Brazil, France, Guatemala, Italy, Holland, Portugal, Salvador, Servia, Spain and Switzerland have exchanged ratifications of the convention of March, 1883, for the protection of trade-marks. England, Ecuador and Tunis have also signified their adherence to the convention.

A Lever Copying-Press.

A Newark (N. J.) man is the inventor of a new form of copying press, which operates on the lever principle. The pressure is obtained through the movement of a crank that is pivoted horizontally below the arch, and which communicates motion to two levers that connect with toggle joints. By this combination a very considerable force is obtained by comparatively slight exertion on the handle, while the rapidity with which the work is done greatly exceeds that of the ordinary hand-wheel. The platen of the press is adjustable to accommodate books of different thicknesses by means of a small hand-wheel at the top. By turning this the platen and the system of levers by which it is held suspended is either raised or lowered, as the case may be, according to requirements. The manufacturer claims that this machine is superior in several important parts. The arch is double, which gives it great strength, and the working parts are steel castings. The pressure is applied in two points on the plate, and is brought to bear in less than one-half the time consumed by a common screw-press. It is also asserted that one-half the exertion on the long crank produces more than double the power upon the book than that exerted with the ordinary screw-press. Another advantage is that the book can be removed instantly after the crank is moved down and returned. The manufacturer also states that the plates, base plate, arch or any other of the working parts, cannot be broken by any fair means in using, on account of the pressure being so conveniently distributed. Accordingly, he will replace free of charge any part broken by ordinary use.

John Jacob Astor has donated to the Astor Library ten rare works, of which the earliest in date is a beautiful manuscript, "Evangelistarium, sive Lectiones ex Evangelis pro dominicis et feriis per anni curriculum." It is upon vellum with headings in Roman or rustic capitals or in fine large uncial letters, and is superbly illuminated, whole pages being taken up by full-length figures of the Evangelists and of the Salvator Mundi, and by golden letters intricately interlaced on purple or white ground. So magnificent a specimen of the illuminating skill of the monks of the Carolingian epoch is seldom to be found outside of the greatest European libraries. This manuscript was probably executed about A. D. 870, and is supposed to have been ordered by Charles the Bald, whose fondness for sumptuously decorated work has been blessed by many a later and less royal collector.

The Science of Heraldry.

II.

The following interesting extract is taken from Clarke's "Introduction to Heraldry," an old work long since out of print. For convenience, old forms of spelling are avoided:

"The occasion of the rise of arms was undoubtedly that order which their use produces, the consequences of confusion being generally rule and order, as men's sufferings naturally teach them to avoid all inconveniences by which they have suffered. Thus entered national ensigns for the better regulation of arms; also all manner of personal distinction, and that the shield, helmet, back and breast plates, and surcoats worn over them have had ornamental figures engraved or painted upon them, likewise upon colors and standards in war for distinguishing chiefs, &c., thus pointing out their presence to those under their command and distinguishing them one from another, which without some such marks could not effectually be, their persons being obscured by the armors they wore.

"It is observable that the ancients, for the most part, made choice of lions, tigers, dragons, serpents, foxes, owls, &c., or such figures as might represent sagacity, cunning or stratagem, according to their various dispositions, thereby meaning to menace and terrify their enemies by setting forth their magnanimous and politic qualities; for as it is certain that every like adheres to its like, so even in cases of this nature mankind is naturally delighted with things or animals like themselves, or whose permanent dispositions or qualities accord with their own. And from these the leading qualities and intendments of these ancient assumptions have been frequently termed hieroglyphics. Fern says the first 'souveraigne' that ever gave 'coate of armes' to his soldiers was King Alexander the Great, who, after the manner of his ancestors, desirous to exalt by some special means of honor his stoutest captains and soldiers above the rest, to provoke them to encounter their enemies with manly courage, by the advice of Aristotle, he gives unto the most valiant of his armies certain signs or emblems to be painted upon their armors, banners and pennons as tokens of their services in his wars.

"Tournaments, justings, tiltings, &c., were honorable exercises formerly used by all persons of note that desired to gain a reputation in feats of arms, from the king to the private gentleman, and derived their name from *tourner*, a French word, meaning to run around, because to be expert in these military exercises much agility, both of man and horse, was requisite, they riding around a ring or turning often, as there was occasion. Their manner of assembling was thus: The time and place being appointed, challenges were sent abroad for such who desired to signalize themselves at the lists, and proper rewards were prepared for the victorious, which drew great crowds from all parts. It was the custom for those who went to these exercises to be in a complete military equipage, with arms on their shields, and surcoats and caparisons on their

horses, their esquires riding before, carrying their spears with their pennons-of-arms at them, as also the helmets to be worn in the exercises, adorned with wreaths of silk, being of the tinctures of their arms and their liveries, and thereon the crest.

"When tilting or tournaments were proclaimed they hung two shields upon a tree at the appointed place, and he that offered to fight on foot signified as much by touching the shield which hung by the right corner, while on the contrary, he who chose rather to exercise on horseback, touched that which hung by the left; for it was judged more honorable to fight on foot than on horseback.

"While they were preparing the lists destined for the tournaments, they exhibited through the cloisters of some neighboring monasteries the armorial shields of those who designed to enter the lists. It was the ancient custom to carry the coat-of-arms, helmets, &c., into the monastery before the tournaments began, and to offer up at the church, after the victory was gained, the arms and the horses with which they had fought; the former was done that they might be viewed by the lords, the ladies and the young gentlewomen to satisfy their curiosity; and a herald or pursuivant at arms named to the ladies the persons to whom each belonged, and if among these pretenders there was found anyone of whom a lady had cause to complain, either for speaking ill of her, or for any fault or injury, she touched the helmet or the shield of these arms to demand justice, and signifying that she recommended her cause to the judges of the tournaments. These, after having gained the necessary information, were to pronounce sentence, and if the crime had been judiciously proved, the punishment followed immediately.

"When a knight, &c., came near the barriers where the justings were to be held he blew a horn or trumpet, at which the heralds there attending came forth and registered his name, armorial bearings and other proofs of his nobility in their books, from whence came heraldry, or the art of blazon, which signifies a regular description of arms in their proper terms.

"The two contenders on horseback being let in at several barriers, mounted on the ablest horses, they, after performing the usual ceremonies, and paying their respects to the sovereigns or judges, as also to the ladies, took their several stations, and being thus in readiness when the trumpet sounded, both at the same time couched their lances, and spurring their horses, ran fiercely one against another in such a manner that the point of their spears, lighting upon each other's armor, gave a terrible shock, and generally flew into pieces.

"If neither party received any damage they usually ran three heats, which was accounted very honorable; but if a man was beaten off his horse, shaken in the saddle, let fall his lance, lost any piece of his armor or hurt his adversary's horse, all these were disgraces.

"These tournaments first began in Germany, in the tenth century, and became afterward a general practice in Europe."

Experience bought by suffering is instructive.

WARRANTED BEST QUALITY

No 20 MAIDEN LANE, N.Y. ESTABLISHED, 1848.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

No. 39 DEY STREET,
NEW YORK.**LAWRENCE BROTHERS,**
No. 57 Shoe Lane, & 48 Farringdon St., E. C.,
LONDON, ENG.**Dealers in Stationery.**

The retail stationery business of New York city engages the attention of a large number of people who either deal exclusively in stationery or sell it in connection with other articles, such as toys, confectionery, books, newspapers and periodicals, drugs, &c. According to a New York city directory the number of retail dealers in stationery proper, is about 500; add to this a small proportion of the 1,000 confectioners given, and we have a fair estimate of the number of dealers who stand between the manufacturer and consumer in the distribution of stationery to the masses. But it must be remembered that these figures do not include the large number of retail dry goods stores which also sell stationery to a greater or less extent. The avenues, both down and uptown, are filled with little stores which keep for sale a supply of articles of stationery most in demand, such as pens, ink, paper, &c., and if a store makes any pretensions at all as a mercantile establishment, blank-books, albums, and various specialties in stationery may be found upon its shelves. The small stores where stationery is sold in connection with other articles are noticeably numerous on Third, Fourth, Sixth, Seventh, Eighth, and indeed all of the avenues east and west of Fifth avenue. They especially cater for the trade of those who buy in infinitesimally small quantities. Many of them derive a large patronage from children who attend the public schools, and as fast as one disappears from want of support or other causes another takes its place.

The dealer who trades exclusively in stationery is found generally on the leading avenues, where there is a great amount of travel. He depends for his trade not on the consumption of stationery in his district alone, but on such transient and general patronage as he may be able to secure. His stock usually is most complete, and it may be worth all the way from \$3,000 to \$10,000. The wide-awake stationer, in addition to his store trade, is a manufacturer and printer on a small scale. Without this branch of business, the New York stationer, unless in an exceptionally good location, would not be able to do a profitable business, if, indeed, he would be able to make his ends meet. Thus, while the stationer's business has been encroached upon by the confectioner, cigar and dry goods dealers, he likewise encroaches on the trade of others. Many of the first-class stationery establishments in New York have well-equipped printing departments, capable of turning out anything from a plain business card to a handsome lithograph calendar or a bound book.

The successful stationer must be a man of many qualifications. He must have more than average intelligence, as well as a taste for his special branch of trade. He must understand his business and must be of sufficient enterprise to keep before his customers the newest goods, which he should have the tact to dispose of at a reasonable profit. But this is not all. He must have the ability to attract and retain trade, and in his manners and disposition incur the favor of those by whom he seeks to profit. More than one good business opportunity has been lost by churlishness and slovenliness.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

LOUISVILLE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., June 14, 1884.

This has been a week of commencements and conventions, and the streets have presented an animated appearance. A notable gathering indeed was the International Sunday-school Convention, which concluded a three days' session here yesterday. In numbers, in intelligence, and in influence, the meeting was memorable, and made a decided impression on the community. Aside from all this, the Sunday school people are generous buyers of paper and stationery, and are entitled to a good notice in THE AMERICAN STATIONER. Louisville would welcome the convention every session.

The general trade situation is seasonably quiet. The business of the first half of the year is practically over, and the object now is to sum up the operations of the past season, attend to collections and inventories, and clear the deck for fall trade. Wholesale and manufacturing departments report a very light volume of trade, and continue moving along in a restricted, conservative way. Retail trade is irregular, and not altogether satisfactory. Republicans anticipate a close and exciting campaign, and therefore think there will be no decided activity in business throughout the country until after the general elections. Democrats, on the other hand, say that they propose to make such sterling nominations as to decide the contest in advance, and predict that there will be no undue excitement, and they confidently count on a normal and healthy fall trade. We shall see what we shall see.

The crop outlook has been improved by copious showers the past week. A full acreage of tobacco has been successfully pitched in both dark and white burley districts. Corn is rather weak and small, on the average, for this stage of the season, but has sufficient time to strengthen. The wheat prospect continues good. The ground is again very wet, and a cessation of the rainy period is now desired.

Stationers report quiet times, and the general fancy goods and notions trades report

business flat, with the exception of a few retail specialties.

Publishers are preparing for the autumn movement, with expectations of a reasonable average demand.

Travelers came in with their samples thick and fast this week, many of them doubtless as delegates to the Sunday-school Convention and only incidentally to sell goods. Among the veterans in the army were: Henry Reed, of Geo. Routledge & Sons; Bangs Williams, of Lea & Shepard; E. C. Schoonmaker, of the Embossing Company, Albany, N. Y.; A. Heyman, of the Eagle Pencil Company; Samuel Eckstein, of Samuel Raynor & Co.; J. B. Crowell, of Lewis Pattberg & Brothers; Henry Birrill, of Ivison, Blakeman, Taylor & Co.; Loughead, of Dreka's, and Chamberlain, of Z. Crane, Jr., & Brother. On the whole, they represent that matters on the road are dull and listless.

The W. E. Riley Printing Company has been incorporated, with W. E. Riley president, Wade Sheltman vice-president, and Charles L. Niman secretary and treasurer. The general nature of the business proposed to be transacted by said corporation is the general mercantile, railroad and fancy ticket printing. The authorized capital stock is \$50,000.

Among the recent publications of John P. Morton & Co. are "Estelle—An Idyl of Old Virginia," by Prof. Marcus B. Almond, and "The Star of Empire," a drama, by Mrs. S. C. Mercer.

H. Brukk, for the past four years telegraph editor of the great German daily of the Ohio valley, the *Louisville Anzeiger*, has removed to Indianapolis, having taken a position on the *Telegram* there. Paul Wolff, formerly of the *New York Staats-Zeitung*, is now in editorial charge of the *Anzeiger*.

The *Labor Record*, to be the recognized mouthpiece of the workingmen of the city, is the latest journalistic venture. The little paper is a weekly, mechanically handsome, and under control of M. J. Burke, Chas. F. Price and Wm. M. Bohon. Another addition to the list is the *Educational Courant*, a monthly, published by Abner J. Smith.

Curry & Dearing have just removed to the more commodious quarters, 356 and 358 Fourth avenue, two doors from the northwest corner of Fourth and Jefferson. Mr. Curry states his

intention to complete the already extensive equipment of the house, so as to make it the model retail book and stationery establishment of this section, and those who know his thorough qualifications for the business say he will carry out his designs.

Beginning this week, according to a recent enactment of the Legislature, it is unlawful to sell or expose for sale in Kentucky the *Police News*, *Day's Doings*, *Illustrated Times*, and similar publications. The new law makes it a misdemeanor to sell or attempt to sell papers of the class mentioned, punishable by a fine of twenty dollars. Newsdealers will comply with the law and have cleared their stands of the tabooed sheets.

An interesting scene was presented at the park of the Southern Exposition two weeks ago. Twenty thousand children, pupils of the public schools, celebrated the closing of the school year in one grand union picnic. Fifteen thousand parents, guardians and citizens generally, came to look on or participate in the joyous festivities. Think of thirty-five thousand stationers' patrons in one enclosure! Trade will be quiet through the summer, of course, but this lively army of local consumers of stationery is alone sufficient to make a huge aggregate demand for supplies at the opening of the new session the first week in September. God bless the children!

The suggestion in this week's STATIONER that it would be a good idea for the stationery and paper houses, as the Fourth of July occurs this year on Friday, to close on the Saturday following as well as Friday, and thus give employees a chance for a little extra enjoyment is praiseworthy and timely, and should be adopted by all trades alike.

BOURBON.

BOSTON BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, June 18, 1884.

For a couple of weeks every available fence, bill board or show window, within the city limits and without, has been heralding the coming of "Barnum and his white elephant." Go where one would, and the announcement "Remember June 16, and the great street parade," was sure to meet the eye. And judging from the many thousands of meh,

women and children, who lined the sidewalks at an early hour of Monday morning, they did not fail to remember it either. And yet some people can't comprehend the value of advertising!

But Barnum knows the value of printers' ink, and his big tent has been filled with eager sight-seers at every performance.

During his stay of two weeks in Boston it is estimated that he will lessen the supply of available cash to the tune of \$90,000. Well, let him have it. It's the people's contribution to enterprise and printers' ink.

The "17th of June" followed the day after Barnum's advent upon the scene. This, of course, will bring to mind the story of "Bunker Hill." Though not a legal holiday, business is necessarily suspended for the want of somebody to do business with, as Boston generally empties itself into Charlestown on that occasion to participate in and to witness the festivities of the day.

At this season of the year trade moves slowly and no one objects to an occasional holiday. Still, business is not entirely suspended, some little trade is going on among the retail stationers and jobbers, while the manufacturers of novelties are preparing for the coming fall trade.

Though a little early in the season for Christmas novelties, Ward & Gay are beginning to display an extensive line of samples, and their sample-room will be soon ready for the trade's inspection. Holiday novelties are specialties with this house, and its increasing trade has made it necessary to enlarge its facilities, and to employ special artists for designing. This department of the firm's business is under the direct supervision of Mr. Gay, whose personal attention is given to every detail of the business.

In frosted cards, fringed and satin goods, the house is stocking up with a choice line which cannot fail to meet the demands of the most fastidious dealers. The line is even more varied than the house has before offered the trade, embracing many new and original designs, as well as the choice productions of the most celebrated art publishers of America and Europe. Special attention is given to low priced goods, as well as to high priced novelties, and in the cheaper lines are offered big bargains.

Among the original novelties which this house is presenting for the holiday season is a line of banners and bannerets. This line is entirely different from anything of the kind heretofore presented to the trade. Hand-carved mounts serve as frames for embossed and chromo cards, the whole being tastefully ornamented with tassels and fringes. Wood carvings are also mounted, and make very pretty bannerets.

Another line, original with this house, is metallized novelties. In appearance the designs resemble "bass-reliefs," and are in all colors common to metals—gold, silver, brass, bronze and copper. There are about twenty-five designs, and each of them is appropriately in keeping with the scenes incidental to the holiday season. These "bass-reliefs" are variously mounted, as banners, framed wall pic-

tures, and centre-table pieces. In this special line Ward & Gay are the exclusive jobbers. Travelers representing the house are now on the road, and the trade should anxiously await the opportunity to inspect this extensive line of original holiday novelties.

My attention has been lately called to a very ingenious device, designed especially for the use of bankers, accountants and business men generally, who have occasion to compute interest or discount. The device is called "Jenne's Patent Interest Indicator," and is designed upon an entirely new principle. The strongest point in its favor is that it instantly gives the interest or discount between any two dates with true mathematical accuracy, and at seven different rates. One is not compelled to master a series of new rules of multiplication in order to understand the principle of its calculation. It is perfectly simple, and though a child could operate the indicator, it required a man's genius to compute the interest tables and to so arrange the results as to be readily understood at a glance.

A prominent manufacturer of mathematical instruments, who carefully examined the interest indicator, endorses it very strongly, and says "it cannot err, and is too simple in its construction to ever get out of order." Though so simple that its principle of calculation is quickly understood (and in this is its great value), it is strictly accurate in its results, and must become very popular with bookkeepers, brokers, professional and business men generally.

Though this interest indicator is pronounced by experts the best device of the kind ever placed on the market, it is also the cheapest. The Jenne Manufacturing Company, of this city, is supplying the trade, and stationers will find the Jenne Patent Interest Indicator a very salable article.

The Heath Letter File and Index Company is having such a demand for its improved letter files that it is found necessary to further increase its extensive facilities for manufacture. New agents are being constantly added to company's list, and ere long every leading city will be covered. Among those now established are: Samuel Carson, San Francisco, Cal.; Lay Brothers, Paducah, Ky.; Bushnell & Bracket, Council Bluffs, Ia.; J. B. Frothingham, New York City; Henderson & Putnam, Jamestown, N. J.; John J. Lemon, St. Paul, Minn.; Chas. D. Whitehall, Minneapolis; J. M. Mason, Battleboro', N. C., and A. C. Farley, Philadelphia. These are all leading stationers and are doing good work for the Heath Letter File. Other agencies are being established as fast as stock can be manufactured to supply them. One feature about the Heath Letter File Company is that the company protects the trade, and when agencies are located the trade of that section belongs to the local agent, and all communications to the Boston office relative to business are quickly referred to the local agent. Such action is fully appreciated by those handling the Heath files, and it is because of this that leading stationers throughout the country are so anxious to handle the goods.

E. R. Ware is now traveling in Mexico in

the interest of the Heath Letter File Company, and judging from the orders sent the house, the Heath system of letter filing will soon become as popular in that section as it has in others.

A. L. D.

TORONTO ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, June 14, 1884.

In my last letter I said I might have a word for you from the East on my return. It was a wonderful relief after being shut in through a long, cold winter, and not a remarkably genial spring, to get outside and away from the bustle of the city, and feast one's eyes on the resplendent green woods and fields. I had thrust a couple of "Franklin Squares" in my bag to while away the time with, but it was a useless investment of forty cents or more, and I sat and gazed at the luxuriant herbage and the rapidly-changing pictures, fresh from the hands of creative spring-time, as we swept along. It was a real feast to me; so fascinating that I looked and thought of the days long since gone, when I romped about the old home, under the shade of broad-spreading trees, and listened to the birds giving voice to their melody. Could the very best "Franklin Square" novel afford such a feast? Nay, verily, my friends. And then I drop it, and turn back to the stern realities of the tug and fight of business. It is a wonderful thing, this business, when you look at its manifold sides and competition, and come to realize the push and dogged perseverance required in these days to make one's bread and butter. I don't know where we are going to land, but let us hope in some awfully pleasant place, where drummers and business men have never been heard of, nor never will be.

But about Montreal, I reached there all right, and had not been there long before I discovered that the world moved down there very much as it did with us up here, with this difference—I think our houses have a little more push, and for reasons that can be understood, not so much reason to grumble. Be this as it may, there are houses in Montreal, such as Buntin, Boyd & Co., Morton, Phillips & Bulmer, Macfarlane, Austin & Robertson, Canada Paper Company, J. B. Rolland & Fils, Robt. Miller & Son, and others, who have an assured business, and who go on about as usual, whether it rains or shines. As you have a correspondent in our Canadian metropolis who sometimes speaks, and it is to be regretted that he does not open his mouth oftener, I do not think it advisable for me to enlarge on Montreal affairs, and shall leave it for my friend to enlarge upon in due course.

I was exceedingly fortunate this time in striking holidays, two while in Montreal, and one in Ottawa. These are no doubt enjoyable to citizens, but an intolerable nuisance to any one in a hurry to get over the ground. Ottawa is improving very rapidly, but in our trade its harvest is while the legislative wisdom of the Dominion meet there to make our laws. However, Mr. Hope Davis and others told me that trade had been very good under all the circum-

(Continued on page 796.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 794.)

stances; in fact, better than it usually is at this time of the year.

A part of a day in the pretty town of Brockville did not result in anything much more than walking about and admiring the numerous fine places overlooking the St. Lawrence. Mr. McMullen, the oldest and best known man in the trade there, talks of going out of business altogether.

From that to the city of Kingston, or the Limestone City, was anything but enjoyable. In the first place, I was routed out at 1 o'clock A. M. to get the train, and the confounded thermometer had gone down with a jump. The wind came down from the north, and when I reached the above city at 4 A. M. I was nearly frozen, and I had to remain in this happy state until about seven, when somebody was struck with the inspiration to build a fire. If I had known who he was, I should have enfolded him in my arms with gratitude. I didn't, and so got straddle of the stove, and hung on until the increasing heat compelled me to loosen my hold and get farther away. This cold snap did a good deal of damage here as well as in many parts of the United States. Messrs. Nisbet, Henderson and others did not furnish me with a very glowing state of things here.

My last point in this trip was Belleville, a smartish town nearly at the head of the Bay of Quinte. Messrs. Overell, Harrison, &c., reported trade fairly good, and with this, sir, I make my bow for the present. C. H.

CINCINNATI NEWS.

[FROM OUR REGULAR CORRESPONDENT.]

* CINCINNATI, June 17, 1884.

Real summer weather set in to-day. Much censure has been uttered against the weather as responsible for the dullness of the times; but the times are less dull and the weather gets no praise for the improvement. It doesn't seem to hurt the feelings of the weather to get blame or fail to get praise. It seems totally indifferent to what people say about its caprices, its beneficence or malevolence, if one may take license to so speak of it. But from some cause there is a brightening up in all sorts of business—barely perceptible, to be sure, but nevertheless perceptible to all and an unmistakable brightening.

Stationers say that there is not much doing in sales over the counter, but that orders for shop work are good. It is to be remembered, however, that this is the dull season for sales over the counter. People are thinking of summer trips to Europe or to the mountains or the seaside, or in the country near home. Only necessities and those that are immediately pressing are purchased. Still, dealers look for further improvement in the times "after harvest." Within three weeks all the wheat in the Ohio Valley will have been cut, and within a month much of it will be in market, and then "after harvest" will begin.

J. R. Mills & Co. are suffering from a run upon them, which is trying their resources. Don't stop reading here till you get the whole

story, or you'll have it all wrong and nobody'll be to blame but yourself. That "run" on J. R. Mills & Co. is not from their creditors. There, now, are you disappointed? Looked for a sensation, did you? If it's a sensation you want you shall have a pleasant one, provided you are of the class that rejoices with those that rejoice. The run on J. R. Mills & Co. is making the firm happy. It is—hold your breath a moment—it is a simultaneous "run" upon them from hosts upon hosts of customers from all parts of the civilized globe with no hostile intent; on the contrary, they come with gold and silver, eager to exchange it for the reversible envelopes of the Cincinnati Paper Novelty Company, of which J. R. Mills & Co. are the greater part. They have orders for these wrappers from all points of the compass and from the most distant climes, always with the cash. Only a day or two ago a big order came in from Cremona, Italy, and scores of others from as distant places could be enumerated. The Novelty Paper Company's light is not hid under a bushel—it blazes on a mountain and the whole world sees it and rejoices.

A "drop-in-upon" the Globe Files Company's establishment will open the eyes of the most widely-traveled man. There are files and files, and styles and styles, and doubtless the end is not yet—and there is just where the "wonderful" in this business comes in. The new styles, the additions in the way of variety and improvement which have not yet been offered the market, but will be soon—these excite one's admiration and surprise. Orders are pouring in upon the company from new territory and from foreign countries for these files, and they promise to become very soon no inconsiderable article of export. Notwithstanding the dull times, the sales during May were larger than those of May last year. Not that the sales have kept up in last year's territory, but that the increase of sales from new acquisitions of territory has more than overbalanced the falling off owing to dull times in the old territory. The Globe Files Company, too, keeps its light burning upon a mountain top, instead of smoldering under a bushel.

John Holland never did hide his light under a bushel. He has habitually kept up a regular bonfire on the mountain peaks, and all men have been enlightened thereby, as the Atlantic seaboard, the Pacific coast, the shores of the Mexican Gulf, and the confines of civilization of the British possessions of the North, and all people within these wide bounds will bear testimony. All of the paper in the world, written upon in one day by John Holland's gold pens would, at the price of old paper, make any man a competency. As on the domain of the Queen of England, so on the domain of the Cincinnati gold pen, the sun never sets.

These three instances of notable success are worthy of mention because of the effort the several manufacturers have made to let the world know that they have something the world wants. They are worthy of mention, also, as examples of brilliant results from using THE AMERICAN STATIONER as a means of letting the whole world know what they have that the world wants.

Look out for Charles Stewart, of Charles Stewart & Co., to be happening in New York on a recreation trip soon.

Edwin Hoole recreates on the shores of Lake Michigan frequently, combining business with pleasure by halting at Chicago.

Louis Snider's Sons will probably be seen at the seaside resorts this summer.

A. Howard Winkle, of Van Antwerp, Bragg & Co., was yesterday elected a director of the May Musical Festival Association. He will probably be elected president of the board of directors and have the management of the May Festival of 1886.

Chatfield & Woods have spared a member of their firm for a trip to Europe, and it is not unlikely that other members will take their turn.

Trade visitors are flocking in. As honey draws flies, so the sweetness of a little present improvement in trade, and the prospect of an after harvest betterment, draws the ubiquitous (don't let the compositor make it "the iniquitous") traveling man. Here is a list of recent visitors: Mr. Closson, Plimpton Manufacturing Company, Hartford, Conn.; Mr. Chamberlin, Brane Brothers, Westfield, Mass.; Mr. Johnston, Dreka & Co., Philadelphia; B. A. Stone, Langfeld, Turner & Andrews, Philadelphia; James Watkins and George Freeman, Ames Pencil Company, New York; J. L. Jackson, T. Sinclair & Son, Philadelphia; J. F. Hitchcock, Whiting Paper Company, Holyoke, Mass.; Geo. F. Borden, Parsons Paper Company, Holyoke, Mass.; Mr. Dovell, Thaddeus Davids Company, New York; H. Birrell, Ivison, Blakeman, Taylor & Co., New York; W. L. Marks, Dixon Pencil Company, New York; Frank Johnson, Liebenroth, Von Auw & Co., New York; W. A. Hall, Worthington Paper Company, Holyoke, Mass.; Geo. A. Clark, Reilly & Mackin, Newark, N. J.; N. Frank, Chas. Zinn & Co., New York; A. L. Sproul, Gane Brothers & Co., New York; C. B. Walker, H. L. Judd & Co., New York; Jno. C. Hallenbeck, J. Q. Preble & Co., New York; Mr. Aikenhead, John Gibson, New York; F. W. Owens, Wescott Brothers, Seneca Falls, N. Y.

That immensity, G. H. Graves, has once more concluded to "not quit the road," and has notices out for "calling again." Oh, George, never say "quit" again! We won't believe ye. PRINCE WILLIAM.

Lawrence & Baxter are introducing in the American market something novel in the way of Christmas cards. They are a series of pen-and-ink sketches—comical, silhouette and esthetic—by the celebrated English artist, Alfred Gray. They come in sets, put up in fancy envelopes. The firm is also bringing out a large variety of colored photographs of English scenery. The collection embraces some 700 or 800 different views, landscapes, notable buildings, &c. The price is said to be a third lower than of other goods of this class and size which have come into this market, and yet, in point of artistic merit, the goods are claimed to be equal to anything that has ever been produced in this line.

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston

(GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

Whiting Paper Company,

HOLYOKE, MASS., U. S. A.,

The Largest Manufacturers of Fine Papers in the World.

THREE MILLS—TOTAL DAILY PRODUCT, 20 TONS.

All descriptions of LOFT-DRIED PAPERS in stock or made at short notice. Our great facilities enable us to make as good paper, and at as low a price for the quality as any mill in the country.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Charles W. Arrás, printer, Bath, Me., is dead.

H. H. Dickson, job printer, Atlanta, Ga., has assigned.

The Waco Publishing Company, Waco, Tex., has sold out.

The *Examiner* Publishing Company, Waco, Tex., has sold out.

R. P. Nevins, publisher of the *Times*, Pittsburgh, Pa., has sold out.

John Cuthbert, bookseller and stationer, St. Catharines, Ont., is dead.

T. S. McCool, dealer in picture-frames, San Francisco, Cal., has been attached.

J. D. Stinchcomb & Son, newsdealers, &c., Abilene, Tex., have made an assignment.

F. Paltridge, photographer and stationer, Galt, Ont., has sold out to W. Coulthard.

Guernsey Ketchum, newsdealer, &c., Danbury, Conn., has sold out to Theodore Raymond.

Thomas & Patek, publishers, St. Louis, Mo., have dissolved partnership. The firm is now W. L. Thomas.

An assignment has been made by John H. Mabbett, publisher of the *Meriden Press-Recorder*, Meriden, Conn.

The style of Tracy & Dietz (Charles A. Tracy), newspaper advertising agents, Philadelphia, Pa., has been changed to Charles A. Tracy & Co.

E. O. Randall & Co., wholesale and retail dealers in wall-paper, Columbus, Ohio, have admitted J. S. Batterson to their firm, without change of style.

Ostrander & Huke, manufacturers of printing machinery, Chicago, Ill., have dissolved partnership. The firm has been succeeded by Ostrander, Muller & Huke.

A fire occurred in the top story of the five-story building at No. 31 Rose street, this city, on Thursday night last. The building belongs to Street & Smith, publishers of the *New York Weekly*, who occupy the second, third and

fourth floors. The fifth floor of both 29 and 31 was occupied by E. W. Walcott, a chromo and label varnisher. The foreman of the latter was working a night gang of seven men. In drawing varnish from a tank it ignited from a lamp. The men escaped to the street. Before the fire was brought under control, Mr. Walcott's plant was damaged by fire about \$5,000, or half of its value, and considerable damage was done to the other portion by water. Street & Smith lose \$10,000 on stock and \$8,000 on the building. The first floor and basement were occupied by J. S. Ogilvie & Co., who had a large quantity of books on hand. Their loss is estimated at \$8,000.

The *Southern Industrial Record* is an old paper under a new name, its former title having been the *Railroad Record*. The paper under its new name is published at Atlanta, Ga., and New Orleans, La. It makes the forthcoming World's Exposition at New Orleans a special feature, besides publishing a complete record of railroad matters and Southern industrial progress. It is spiced with independent comment on current topics and publishes frequent illustrated biographical sketches. Each number has also a large amount of carefully selected humor and miscellany. The publisher is A. L. Harris, Atlanta, Ga.

The Esterbrook Steel Pen Company offers \$15 in prizes for the best epigram on the Esterbrook pen. The composition must not exceed forty words, nor allude to other makers. Competitors are required to enclose ten cents, for which they will receive an equivalent in pens. The party securing the first prize will receive five gross of pens; second prize, four gross; third prize, three gross; fourth prize, two gross; fifth prize, one gross. The award is to be made July 1.

The *Evening Chronicle*, Birmingham, Ala., says that George H. Rogers, stationer, printer, &c., formerly of Nashville, Tenn., but now of Birmingham, has been awarded the contract for all of the printing and stationery of the Georgia Pacific Railroad for one year. This amounts to about \$6,000. The paper named pays high compliment to the character of work turned out from Mr. Rogers' establishment.

John Gibson is working on his line of Christmas goods and expects to come out with a complete and varied line of hand-painted satin goods, hanging and easel cards, &c. It will be the largest line he has ever brought out and will embrace a large number of novelties especially elegant.

Edward S. Card & Co., stationers, Pueblo, Col., have assigned.

John Clements, stationer, &c., Red Bluff, Cal., has been burnt out.

R. Eagle, publisher of the *Times*, Visalia, Cal., has been succeeded by M. C. Butz.

Haenel & Young, dealers in wall paper, &c., Austin, Tex., have dissolved partnership.

The stock of T. J. Mann, stationer, Quebec, Quebec, has been damaged by water. Insured.

Rimmels, Onderdonk & Co., manufacturers of paper boxes, New York city, have dissolved partnership.

The *Sun* Publishing Company, Cincinnati, Ohio, has been incorporated with a capital stock of \$100,000.

Ford & Warburton, job printers, St. Joseph, Mo., have dissolved partnership. John T. Warburton succeeds to the business.

Edwards & Church, printers, stationers, &c., Austin, Tex., have dissolved partnership. B. F. Church retires from the business.

B. Baer & Co., wholesale paper stock dealers, Cleveland, Ohio, have dissolved partnership, Julius Schwarz having retired from the firm.

A. A. Jackson & Co., wholesale paper dealers, Pittsburg, Pa., have confessed judgment in the sum of \$9,000, for which execution has been issued.

White & Schermerhorn are doing a good business in their popular line of toilet papers, particularly the "Pickwick," "White Star" and "Brighton" varieties. They are goods which sell on their merits.

Armington, Emerson & Co., manufacturers of bronze ornaments, East Providence, R. I., have dissolved partnership. Charles F. Armington and James H. Armington continue the business as Armington & Co.

The Western Paper Company, San Francisco, Cal., has made an assignment. The liabilities are \$50,000, and assets about \$20,000. The company was not incorporated, the partners being W. W. Potter and M. P. Van De-veer, who began June 1, 1882.

The New York News Company is showing some fine steel portraits of James G. Blaine the Republican candidate for President. They are printed on fine stock and the likeness is true. The engravings are suitable for framing and every stationer should carry them. The New York News Company will be prepared to

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Reat Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 536 & 538 Pearl Street, New York.

furnish in a short time a full line of campaign goods.

Brody, Mace & Co., publishers *Enterprise*, Bangor, Me., have suspended.

James A. Gresham, stationer, &c., New Orleans, La., has sold out to James A. Pierce.

J. C. Newcomb, dealer in picture frames, Chicago, Ill., has been damaged by fire. Insured.

F. J. Hard, publisher, Denver, Col., has admitted George H. and Charles H. Parker to his firm, under the style of the Merchants' Publishing Company.

Rice, Miller & Co., manufacturers of paper collars, &c., Montreal, Que., have dissolved partnership. W. M. Rice has retired from the company, and the business is continued by the remaining partners under the old style.

The store of William Bancroft & Co., printers and dealers in fine stationery, Wilmington, Del., was closed by the sheriff on June 14, under a chattel mortgage and judgments, in all amounting to \$4,000. The firm has been encumbered for some time past, and the business had been in the hands of the sheriff for a week. A mysterious feature of the failure is the disappearance of the active member of the firm, William Bancroft, who disappeared, his whereabouts not being known. Mr. Bancroft left home for the ostensible purpose of going to Philadelphia, since when nothing has been heard of him. In the property seized by the sheriff is the printing material of the *Sunday Critic*.

L. Prang & Co. have completed their line of Christmas cards and are receiving many orders for September delivery. The line, which has been repeatedly mentioned in *THE STATIONER*, is executed in the finest style of lithographic art. Prang has also a very fine line of calendars. One is called the "Thackeray." It is a black calendar with familiar selections from the great novelist's works. A well executed portrait adorns the upper right-hand corner while the left-hand side shows a view of "Vanity Fair." The Tennyson calendar is of a similar character. A folding pocket calendar presents scenes typifying the four seasons and is quite a gem of art, the illustration being by Miss L. B. Humphrey who has attained considerable reputation for the general excellence of her drawings.

The five-story building at Nos. 52 and 54 Grove street, this city, caught fire on Saturday morning last. The third floor was occupied by the Hammond Type-Writer Company and the fifth floor by Mabie, Todd & Co.'s gold pen factory. Both of the firms named had their property damaged, chiefly by water, to the extent of about \$2,000 each.

In *Cassell's Family Magazine* for June may be found the customary variety of general reading, light, useful and amusing. The magazine, in text and illustration, deserves its success.

Mary C. Timson, wife of Levi Timson, paper-stock dealer, Boston, Mass., has filed a certificate to do business in her own name.

Wilson & Lamb, publishers, Montreal, Que., have made an assignment in trust.

The *El Mercurio* Publishing Company, Kansas City, Mo., has been incorporated, with an authorized capital stock of \$10,000.

A. Storrs & Bement, wholesale and retail paper dealers, &c., Boston, Mass., have been succeeded by the A. Storrs & Bement Company.

Rivett & Schardin, printers, Sacramento, Cal., have dissolved partnership. H. W. Rivett retires from the firm and E. R. Botsford is admitted to membership. The style of the firm is changed to Schardin & Botsford.

Members of the trade visiting Philadelphia should call on the National Publishing Company, No. 728 Cherry street, where they will find a handsome assortment of family Bibles and photograph albums. The new styles are attractive and the prices are thought to be exceedingly low.

Turner & Harrison, Philadelphia, have added a new stub pen—No. 43—to their excellent line of Russia Moheta pens. The pen is constructed to contain a large amount of ink, by means of a basin or bowl shape. This forms a fountain without the aid of the metallic cap, so objectionable in many fountain pens.

The *Magazine of Art*, for July (Cassell & Co., limited), has just been received. The frontispiece is an engraving of E. Blair Leighton's picture, "The Gladiator's Wife," and the tense expression of the face of the principal figure and the attitudes of spectators in the amphitheatre serve to give a good idea of what must be the strength of the original painting. An interesting article on "Raphael's Forna-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

rina," and another on the "Keramics of Fiji" are noticeable, as is also the paper on "Fontainebleau," with its charming illustrations.

The old-established business of Myers Brothers, 62 John street, is advertised in another column as for sale by R. W. Peach, attorney for Mrs. Myers. This is thought to be a good opportunity for someone to step into a business well established, where everything is quite ready for immediate possession, and work can proceed at once.

Cushing, Thomas & Co., printers, Chicago, Ill., have made an assignment to Thomas H. Travers. The business was started in 1866 as a copartnership, but in the fall of 1881 it was changed to a stock company, with an authorized capital of \$100,000, all paid in. Since then the firm has been making money, and was thought to be in a prosperous condition.

Keuffel & Esser are having a very large sale of the Helios, or blue process drawing paper, for which they are the sole proprietors. During the past six months the consumption of this article has increased tenfold. It is extensively used by all railroads and great numbers of engineers, machinists, architects, &c., and is an article which never fails to give satisfaction.

Thomas Manahan, 6 Reade street, has been appointed by McAlpine Brothers & Co., of Lee, Mass., sole selling agent, in the city of New York, for the product of their mill, which includes book, news and colored papers, the mill having a daily capacity of about four tons. McAlpine Brothers make a very highly machine-finished paper, and their product is said to be in demand.

Some \$25,000 worth of stock of the bankrupt firm of Lyman & Curtis has been sold, and about the same amount remains to be disposed of. No settlement with the creditors has yet been effected. "The estate," said George P. Sheldon, the assignee, to a reporter of THE STATIONER, "will not pay more than the preferred debts (about \$82,000), and it will be a tight squeeze to do that, and, inasmuch as neither of the members of the firm want to go on with the business, they have no particular object to make a settlement. The stock inventoried for \$52,000, which, together with some \$25,000 or \$30,000 open accounts and bills receivable, represents the actual assets of the firm, but there is no telling whether the stock will bring what it inventoried or not."

Among the houses in the paper and wholesale stationery trade, of this city, which have decided to close their places of business on July 4 and 5 are the following named: Conrow Brothers, Molleson Brothers, Butler & Mills, Henry Lindenmeyr, Melvin Hard's Sons, Hasting & Todd, Hand & Ellsworth, O'Connor, Kimball & Co., G. B. Hurd & Co., Butler & Johnson, H. C. Hulbert & Co., J. D. Whitmore & Co., Harris Brothers & Co., J. F. Anderson, Jr., & Co., Miller & Flinn, Hard & Parsons, B. & O. Myers, W. P. Dane, J. E. Linde, M. Plummer & Co., Jones & Skinner, Benedict & Highet, Henry Bainbridge & Co., Alex. Agar, D. Slote & Co., Bulkley, Dunton & Co., Horace Taylor, E. Kimpton, Thomas M. Bell, C. W. Barnes & Co., L. Dejonge & Co., Vernon Brothers & Co., F. W. Coffin, Doty & McFarlan, Perkins, Goodwin & Co., W. H. Parsons & Co., Wilkinson, Brothers & Co., Thomas Barrett, G. W. Millar & Co., Simpson & Wright, S. Trier & Son, C. B. Hewitt & Brothers, Scarborough & Morris, and Charles Hubbs.

James Cox, of New Haven, agent for A. & G. Taylor, dealers in pictures, New York city, was arrested on Tuesday last for embezzlement. It seems that a man by the name of William C. Tannér was sent to take charge of Taylor's property at Cox's office in New Haven and to succeed Cox. He took forcible possession and Cox had him arrested, but the complaint was not entertained. Cox is now charged with embezzling pictures valued at \$50 from the Taylors. He claims that the action is malicious, and was released on a bond of \$200. Cox collected money from patrons and did not, the complainants assert, make proper returns. A similar case against Cox came up in the Hartford City Court. The peculation in each case is small, but it amounts to many dollars in the aggregate.

W. E. Jackson is rapidly coming to the front with his line of pens, the excellence of which is recognized wherever they are introduced. Some of the leading numbers are No. 7, a business pen; No. 50, the "Adelphi," a ladies' pen; No. 40, the "Reliable," a falcon pen; No. 80, a fine pen for school purposes; and No. 90, a small falcon pen, especially adapted for fine, neat penmanship. Mr. Jackson is prepared to supply these pens in unlimited quantities, and his prices are way down.

McLennan & Boall, printers, San Francisco, Cal., have dissolved partnership.

J. G. Lewis & Co., dealers in wall paper, New Orleans, La., have dissolved partnership. J. G. Lewis succeeds to the business.

The Milton Bradley Company, Springfield, Mass., has just published handsome lithographed likenesses of Blaine and Logan.

Answers to Correspondents.

Subscriber says: We believe that there are three parties (Bridgman, Hasbrouck and Chamberlain) all claiming patents on tie envelopes and slide press-board and manilla boxes. Has the question of right ever been satisfactorily adjusted?

Ans.—We are told that there is no conflict between Bridgman and Hasbrouck. Some time ago the latter secured an injunction restraining Chamberlain from manufacturing an infringement of his tie envelope. The boxes are made under Wood's patent by Hasbrouck and it is claimed that Chamberlain is infringing.

R. S. W. inquires for the address of the manufacturer of Jacocks's rubber marking pen.

Ans.—It was made by Jacocks & Co., this city, but has been out of the market for some time. The patent is for sale.

C. wants name and address of manufacturer of Guyot's carmine ink.

Ans.—Pierre Guyot et Cie, Paris, France. We don't know of any other.

Present Limit of Visibility.

Although there is perhaps much to be desired in the improvement of microscopic objectives, we may still consider our present state quite an advanced one. Although the present theoretical limit of visibility is fixed at 146,528 lines to the inch, we need not be deterred from attempting to pass this point. The limit which was accepted some years ago as the true one, although considerably lower, was quietly ignored as the angular aperture in objectives increased.

It is only a few years ago that the majority of microscopists refused to believe that *A. pelucida*, which has about 100,000 lines to the inch, could be resolved, and now it is the work of beginners to do so. But supposing 146,528 lines to be the limit, it is evident that a one-eighth or one-tenth objective with a one-half inch eyepiece is of amply sufficient magnifying power to make the lines visible to the eye, and there is therefore no need of using more. It is a good rule to follow, under all circumstances, not to use a greater power than is necessary to comfortably do the required work.—*E. Bausch.*

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents

NEW YORK, THURSDAY, JUNE 19, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

SOMEWHAT unexpectedly Mr. Hewitt, in the House of Representatives, has submitted a report from his committee with a bill to make the treaty of commerce with Mexico effective. Very few days remain before Congress will adjourn, and the chances are that the bill will go over. If no prolonged debate or opposition is invoked, it may yet be passed before the adjournment. Is there no one so friendly to the treaty as to try and get the bill through?

PEOPLE complain of dull trade, and then, like refractory mules, squat on their haunches and don't try to pull a bit. If the load is heavy, it is still worth an exertion to get out of the mud. We once had an experience taking care of a wagon-train, and found some remarkable characteristics in mules. Many a team was stalled, many a wagon mired, and we came to the conclusion that there were mules—and mules. In one case, as distinct in memory as if we had seen it only yesterday, a team mired. Two or three members of it made up their minds that they wouldn't try, and sinking to their girths, resisted every effort of encouragement, whip-stock and fence-rails to get them out of their trouble. One little mule didn't need much persuading, but did his level best to pull out. He lifted up his voice, made an effort and reached *terra firma*, and when sure of his ground turned to gaze upon his associates, and again lifting his voice, laughed them to scorn. The application of this is, that if people think because trade is dull or because they are not selling all of the goods they hoped to, they must fold their hands and "wait until the clouds roll by," they are making a grand mistake. There is always a large amount of business doing, and they who seek it early and often will find it. Use your trade paper, change your "ad." as frequently as you can—if not in substance, change the form—make it striking and effective and put it so that the buyer's eye will meet it again and again and with a diversity which will be refreshing. Don't try to *make* business, but pick up what is going; there's a plenty of it. Then you can turn around and he-haw!

PERHAPS it has never occurred to some of our readers to study. And when we say study we do not mean intellectual discipline, nor inquiry into abstract science, nor the pursuit of general information. But we do refer to that acquisition of knowledge which pertains to business and the elimination of facts which will help to make the merchant understand his business and its needs, and increase his trade and profits. A man entering upon commercial life, above all things,

should acquire the habit of study, and not become slowly half-taught by experience. Many who have been in trade for years do not know the value of gauging their customers, of providing for popular demands or of selecting goods with discrimination. Some buyers enter the market and pick and choose to suit their own tastes or personal convenience. That which they expect to sell readily sometimes does not go off at all, and again something which might seem insignificant is readily taken up and meets with the highest favor. The smallest detail of a shop as well as the highest feature requires thought and judgment, and these make up the study which is needed for success. The careful display of goods, the artistic arrangement of stock and the surroundings of business are all things which ought to be carefully reviewed. The habits and characteristics of customers should be noted, and while no tastes must be neglected, deference should be given to the wants of the many. Fashion rules in most things, and so the dictates of fashion must be heeded; but at the same time it is to be remembered that simple tastes prevail to a large extent and they are to be met. In selling and buying, study your trade. If you fit yourself to it you will find that it will fit itself to you. Don't, however, get into a groove and keep within narrow limits which will prevent you from shunting off on to a new line. Be studious, practical and enterprising.

Roundabouts.

BY THE TRADE LOUNGER.

That idea of closing up on Saturday, July 5, seems to be taking very well among business men. It looks as if the paper trade would be pretty generally taking two days off, and many of the stationery trade seem to favor it. It might as well be general. Little or no business will be offering then.

* * * *

There is a man going around the country peddling chromos, and he has a cute way of getting gratis advertisements from the newspapers. For instance, he addresses a note to the paper or papers which he thinks will give him a benefit. This is generally in substance like the following, which has been cut from a Connecticut paper:

* * * *

"With a package of chromos under my arm I have just started on foot for Saratoga Springs, N. Y., from Adams' Express office in your city. I will be fifty-eight years old June 22. I have been twenty-three years traveling on foot through fourteen States. My health always being delicate I hit on this little business, and keep well and fat. Nobody need go insane. Follow me, all ye that have too much brain. I live at — street, Harlem, N. Y."

* * * *

For obvious reasons I have omitted the name and address. Some people would call

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

this man a tramp, but he isn't. He is a traveler for health and the chromo "biz." Some of your readers may not know that Harlem is the Twelfth ward of the city of New York. How he can live there and keep on footing it around the country is a question. He says that he keeps healthy and fat. Shouldn't wonder. Perhaps he keeps aphantatic also. * * * *

A Brooklyn printer advertises to print 1,000 bill-heads, hand-bills, or circulars, &c., for \$1. It is a mystery how such a job can be done at a living profit, and it is doubtful whether it could be done anywhere except in Brooklyn. * * * *

Competition in the stationery and printing trades has reached a limit scarcely realized by most people. Not only is there a fierce cutting of rates, but many printers resort to a very unscrupulous method to secure business. "It is cut, cut, cut all the time," said one in reference to the subject. "If I do a job for \$10 some one of these cutters will go to my customer and offer to do the same job for \$7. If I cut down to \$6 the same fellow will offer to do it for \$5. Such a state of things is very bad to contemplate. It demoralizes trade and unsettles values. But the cheek of these fellows is quite refreshing. Look here." The man brought out a circular addressed to the trade, the last paragraph of which is as follows: * * * *

"At the end of the sixty days above named we shall, if our offer is not accepted by you, feel ourselves at liberty, by your tacit consent, to seek to supply such consumers as are now obtaining their supply from you at similar rates. We prefer to supply them through you and let you share the profit; but if you do not desire it, we propose to realize our profit on our investment from them, as we have the only presses that will make and print a perfect tag at one impression." * * * *

An English firm has brought out a new style of automatic pencil. The propulsion of the pencil point is caused by pressing on a button. This pressure causes the lead to recede in the case or to project from it whether the point is held upward or downward. A pull-out pen is on the reverse end, and the combination also comes in the form of a charm for watch chains. * * * *

A process of engraving on marble has been devised in England. Instead of the costly process of engraving with tools a design reproduced from a cartoon, by this new process the artist draws with his own hand directly on the marble with acid, which eats away the surface, leaving furrows, which are afterward filled in with dark composition or color, to bring out the design. The effect in the examples exhibited is said to be good, and the artistic advantage of drawing directly upon the marble, without the interposition of a workman's tool between the hand of the artist and the final result, is in itself an important advantage over and above the saving in time and labor.

Obituary.

CHARLES A. RINGEL.

Charles A. Ringel, bookseller and stationer, Pittsburg, Pa., died on Tuesday after a brief illness. He was attacked with pneumonia on Friday last. His funeral takes place to-day, and will be attended by the members of the Pittsburg book and stationery trade in a body.

JOHN F. ANDERSON.

John F. Anderson, father of J. F. Anderson, Jr., and Frank W. Anderson, composing the firm of J. F. Anderson, Jr. & Co., and also the father of Mrs. C. V. Hard, widow of the late Bradley R. Hard, died at his late residence, 383 Grand avenue, Brooklyn, on Tuesday afternoon. Mr. Anderson had nearly reached the ripe age of 81 years. He had been a great sufferer from neuralgia for a number of years, but the immediate cause of his death was pneumonia, which he only recently contracted. He retired from active business nearly twenty-five years ago. During a residence of upward of thirty years in Brooklyn, he attracted to him a very wide circle of friends. He was always known as a quiet, unobtrusive home-loving citizen, and his characteristics were such as to win the respect and esteem of all with whom he mingled. His funeral takes place to-day at four o'clock from his late residence, and the interment will be in Greenwood.

CHARLES F. ROBBINS.

The *Alta California* of the 12th inst. announces the death of Charles F. Robbins, of the firm of Blake, Robbins & Co., paper dealers, stationers, &c., San Francisco, Cal., represented in New York by J. W. Towne, as resident partner.

Mr. Robbins, who was a pioneer citizen and prominent business man of San Francisco, died on June 11 at his residence in that city. This event was not unexpected, as he had been confined to his house for more than two months, suffering from a complication of heart disease and dropsy. A few weeks ago he suffered a severe domestic affliction in the death of his oldest son Frederick, nineteen years of age, of quick consumption. This, no doubt, hastened the fatal termination of his disorders. Mr. Robbins went to San Francisco in 1852 from his native place, Plymouth, Massachusetts, and with one of his partners, Mr. Moffitt, commenced his work as a practical printer, in the office of John O'Meara. After a few years he started in business for himself, and was soon recognized as a successful man. In 1868 he retired from the management of his printing and job office to enter the paper firm of Blake & Moffitt, which was subsequently changed to Blake, Robbins & Co., at present the leading house west of the Rocky Mountains. In early days he was an active member of the State Militia, and captain of Company F, First Infantry Regiment, under Colonel Wood. For the past ten years he had resided in Oakland, and was a prominent member of the Occidental Club of that city. He was also a prominent Odd Fellow and Ma-

son. At the time of his death Mr. Robbins was filling his first public position, that of State Prison Director, to which he was appointed by Governor Stoneman in 1883 for a term of ten years, being one of the two Republican members of the Board. Mr. Robbins leaves a wife and two sons to mourn their loss, also two sisters residing in Boston.

The Roache Manufacturing Company is very busy getting ready for the fall trade. The company anticipates a brisk business next month and speaks in very complimentary terms of THE STATIONER as an advertising medium.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, June 18, 1884. }

THE MONEY MARKET.—The financial situation continues to improve. The money market is working with greater ease. Call loans on stock security have been made at @3 per cent., and in some instances even as low as 1½. Very little transpires in time loans, but there has been rather more doing in commercial paper, which has ruled quiet but firm. We quote 6 per cent. discount for first-class names. The stock market has ruled quiet and steady, the advance established since our last issue have been maintained, although there has been very much less disposition to operate, and the feeling at the close appeared to be rather tame. Railroad bonds are higher, and governments have likewise advanced. Foreign exchange has ruled quiet and steady, with sterling rates unchanged, but Continental rates a shade easier.

THE PAPER MARKET.—Business among our city dealers is beginning to show indications of settling down to summer quietude, although this feeling of apathy is less pronounced in the paper trade than in some other lines. Most of the manufacturers appear to find fairly steady employment for their mills, and while they are probably carrying production to nearly their full capacity, the large supply entering the market does not appear to cause any weakening in prices, further than these referred to last week, embracing manilla and straw wrappings. In the line of fine writings, tub-sized hold their own remarkably well, all things considered. Although print papers do not partake of much activity, and afford only a small margin to the manufacturer, we can apply to them the same remark that we have to writings, and additionally that the prospect for an improvement is encouraging.

THE STATIONERY MARKET.—While trade remains quiet, the indications of a brisking up of business in staple goods in July seem to be more promising. Dealers show the same degree of conservatism as in the early part of the season, to be sure, but there are better indications of a void, which is only waiting for a propitious moment to be filled. In a few lines trade has lapped over, as it were, the period of dullness, which usually characterizes the month of June. Mail orders are regular and somewhat larger than at this period last year. Moreover, the erection of a large number of new buildings for business tenants, by increasing the number of consumers in the city, has improved local trade, and dealers who have been alert enough to catch this trade are reaping the reward of vigilance and industry. There seems to be a growing feeling among manufacturers against the practice of carrying goods on their hands until late in the season for the accommodation of tardy buyers as in years previous. The demand among manufacturers is for advance orders, and this, together with the inconvenience which buyers have been put to heretofore by not getting orders filled promptly will, it is believed, have the effect in starting up the late fall trade at least a month earlier than usual. The demand for Fourth of July goods continues and prices have a tendency to rise. There is said to be a scarcity of punk which has advanced from \$3 to \$10 per case since the opening of the season, and dealers show a disposition to hold on to it at that. The envelope, ink and other lines remain about the same as last reported.

WASHINGTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., June 17, 1834.

The financial circles of Washington have been slightly shaken up since my last to you, verifying to a certain extent, the predictions I made at that time relative to the effect the Wall Street troubles would produce in the business affairs of the Capital. Nothing has occurred in any way, that I have learned, to the great detriment of any business man in the community. 'Tis true, there have been wicked "goings on," but it has not been among the business men; it has been confined to the small bankers, brokers and wily speculators. The first man to show his heels to the confiding public was an individual of many characters, by name George H. Levis. This gentleman (Levis) was, in appearance, talk and method a thorough man of business. He opened a little office down near the General Post-Office, at the same time running a sort of branch establishment near the Treasury Department. His mission was to aid his fellow-creatures in finding the much-needed dollar as it lay hid under the smooth surface of petroleum; in short, he was a speculator in oil. He did a magnificent business and managed to yank in his net a large number of departmental clerks, male and female. The profits came fast in the beginning, but in the end there were none, and now Mr. Levis has gone to meet Charlie Ross and the confiding servants of Uncle Sam are wearing their winter clothes anxiously awaiting the day when the cute, kind-hearted Mr. Levis will come around and loan them a quarter to get a linen duster and a tough sandwich. Colonel Burnside, the popular but unfortunate disbursing officer of the Post-Office Department, who has just been released from prison on bail, was a patron of the distinguished oil manipulator, and 'tis said that Burnside pronounced the scheme which Levis was working "a gold mine" for those who had the nerve to go in and buy. Alas! for the duped disciples of Levis, the cold quartz in the shape of the curbstone around his office-door is the most valuable reminder of the "gold mine" which they worked!

Following upon the escape of Mr. Levis came the failure of the banking house of Middleton & Co. and that of J. H. Squiers, with an all-day run on the National Savings Bank. Concerning Middleton & Co. serious charges are made, and there is a fight going on between a former partner, Mr. Dichman, and the Middletons. Recent disclosures show that much has been swept away by this banking firm, it is supposed, by wild speculation. Funds given to make purchases, deposits of benevolent societies, good margins on stocks and, in fact, nearly everything of value which was handed over to the Middletons for safe keeping or wise investment has gone the way of all flesh, and will probably be seen no more in a way to be recognized by those who once called it their own.

Mrs. Hutchinson, the widow of H. M. Hutchinson, one of Washington's respected merchants, loses \$108,000 by the crookedness of

this firm, while an official of the government loses about \$61,000, with many others in the same fix for less amounts. The newspaper men were, in a large degree, customers of this evil institution, and at this time many are the curses long and loud which fill the air around certain correspondents' offices. Mr. Squiers, of the firm of J. H. Squiers & Co., says that he will "come out" all right, but in the meantime the creditors are taking steps to see that he goes *in* all right, if his predictions are not quickly confirmed by naked truth. The excitement caused by the run on the savings bank was short-lived, and the amusement lasted only a day, the officials of the bank taking advantage of the thirty days' notice allowed them by the laws. With the exception of these affairs, the business relations of this city have moved along smoothly and without special interest for the past month.

Summer skies bend over us and the days of sherry cobbles, soda water and the ever-delightful julep greet us on every hand. The red-hot days are close to us, and the merchants are well prepared for the long dull season which will probably stretch itself out into the withering dog days. During the week the Chicago Convention was on duty the tradesman and his customer, by mutual consent, adjourned over till Mr. Blaine was fixed, and now that this event is a thing of the past, there is a little more doing, though one can yet find plenty of spare time to discuss the availability of Mr. Cleveland, or sit down on an empty ink bottle and wonder if Sammy Tilden was really in earnest when he said he didn't want it.

One of the most prominent stationers on the avenue told me this morning that he was satisfied with his sales at this time, as they were much larger compared with the same period last year. He said much of the activity in the retail trade was due to the fact that this being a long session of Congress, there yet remained in the city a greater number of buyers than are usually on hand in early summer. Congress will probably adjourn some time in July, and then there will be a sudden exodus of statesmen and hangers-on searching for the sea-side and the mountain, leaving the can't-get-aways to fight out the tedious days with the pestiferous fly and the musical mosquito. Most of our stationers are busy just now getting in their estimates for school supplies for the public schools of the District. Last year the contract for this work was awarded to Ballantyne & Sons, of this city. There is not much money and very little glory in these awards for the hard-working stationer owing to the active competition and the sharp, close cutting in prices.

Proposals for furnishing stationery for the use of the United States Senate will be received at the office of the Secretary until the 16th of July, 1884.

D. L. Davis, formerly with Bailey, Banks & Biddle, but now with M. A. Reay, of New York, was along this route recently talking up fine stationery. James M. Brown, of the firm of Brown & Sanson, was also welcomed in these parts a short while ago. These gentlemen were quickly followed by R. F. Bloomer's representative with a lot of fine samples of indoor decorations, and A. S. McDade, for Boorum & Pease, blank-book manufacturers.

The Science of Heraldry.

III.

"The second grand occasion of the improvement of heraldry to its present perfection was the crusades, which were expeditions to the wars in the Holy Land against the infidels, begun in the year 1096. On which account they bore several new figures before unknown in arms, such as bezants, martlets, alerons, escallop shells, &c., besides great numbers of crosses, variously formed, which are to be seen in arms all Europe over.

"In process of time these tokens, which we call arms, became remunerations for services, and were bestowed by emperors, kings, princes, generals and chief commanders in the field upon martial men answerable to their worthy acts, the remembrance whereof could not be better preserved to posterity than by these kinds of honorable reward; and though at first they were taken up at any gentleman's pleasure, yet hath that liberty for many ages been denied, no one being, by the laws of gentility, allowed the bearing thereof, but those that are entitled to their descent, grant or purchase. The common people are denied the use of them by the laws of all well-governed nations.

"Tombs and monuments are no less comprised within the cognizance of the science of heraldry than other solemn functions. For as it is the part of heralds to range men in their due stations and to appoint them their proper coat-of-arms while living, so it belongs to them to regulate what ceremonies are to be observed at their funerals and memorials erected to them after death. The most ancient and even the most barbarous nations paid this honor to the deceased, as believing it an inducement to others to perform glorious actions and a respect indispensable to be paid to him who had been an example of virtue while surviving in the world.

"Nisbet says it was the custom of the Romans that were Nobles to have the statues of their ancestors made of brass, wood, marble, &c., and sometimes in wax, painted on the face to represent their likeness, and dressed according to their quality; if they had been consuls, with the *prætecta*, or long white robe edged with purple; if *Censors* their robes were purple; if they had triumphed, their habit had gold flowers; they were likewise adorned with the *fascæ*, or bundle of rods, their axes and other marks of their magistracy, and the spoils taken from the enemy. These statues were kept in their courts in a cabinet of wood; upon solemn days the cabinets were set open and the statues ornamented and set out to view in the court, just before the porch or gate, that the people might behold their merit and bravery; and when any of the family died they were not only so exposed, but they were also carried before the corpse at the funeral, as ensigns of nobility.

"Of all nations none exceeded the Romans in the magnificence of their monuments; all the great roads about their city were adorned with costly structures, for they did not then bury in their temples, reserving them only for the service of their gods; nor was it the custom

to bury in the churches for some centuries after the gospel had dispelled the darkness of idolatry. In process of time it was brought up to bury in churches, and then all families of note appointed the place of repose for them and their successors, and erected stately monuments, adorned with figures, coat-armor and epitaphs. That there might be some distinctive marks between the several persons so interred, the ancients established certain rules, which were then observed upon such occasions.

"Kings and princes, however they died, were represented on their tombs in their armor, with their escutcheons, crowns, crests, supporters, and all marks of royalty. Knights and gentlemen could not have their effigies after that manner unless they lost their lives in battle or died within their own lordships. Those who died in battle, on the victorious party, were represented with their swords naked, the points upward, on the right side, and their shield on the left, their helmets on their heads. Those who died prisoners were represented on their tombs without spurs, helmet or sword. Such as died in battle on the vanquished side were to be represented without their coat over their armor, their sword in the scabbard, their vizor lifted up, their hands joined on the breast, and their feet resting on a dead lion. The son of a general or governor of a stronghold, if he died when the place was besieged, though ever so young, was represented in complete armor, his head

resting on a helmet instead of a pillow. If a gentleman had served in armies during the most part of his life and in his old age became a religious man, he was represented on the lower part in complete armor, and above in the habit of the order he had professed. If a gentleman, or knight, who had been killed in a single combat had such a monument, he was to be in complete armor, with his battle-axe out of his arms lying by him, and left arm crossed upon his right. On the contrary, the victor was led in triumph to the church to give thanks to God, and when he died he was represented on his tomb armed at all points, his battle-axe in his arms, with his right arm across over the left.

"But if any person had been accused of treason, murder, a rape or being an incendiary, instead of being honorably interred, he was treated in the vilest manner, his arms broken and his body dragged on a hurdle and cast out to be devoured by the fowls of the air, or hung upon a gallows. Notwithstanding all these rules, by degrees everyone is come to erect what monument he pleases, and to place thereon any figures, and in what posture he likes best. This may suffice to show what was the practice when order was observed; many examples whereof are to be seen in churches, &c., at this day.

"Arms being placed upon the fronts and other parts of noble and ancient seats, show travelers to whom they formerly belonged and oftentimes whose they at present are; painted windows inform us also who were the founders and benefactors of ancient abbeys, churches and other religious houses; also colleges and

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

The Globe Files Company, always on the alert for goods calculated to meet a popular want, has brought out a new file box. It is called the "Telescope" file box on account of its peculiar construction. It is made of heavy tar-board and has a black cloth front with a neat, large and removable label holder; also a ring pull. It is formed of two parts, the one holding the papers, &c., sliding into the other making it absolutely dust proof. It is considered a great improvement over many styles of file boxes in the market.

WHITEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE. Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Scales for Printed Matter.

John H. Chataigne has devised a measuring instrument by which any sized page of printed matter may be measured and calculated at once and the memoranda retained for future reference, and also whereby any number of ems in one kind of type may be calculated in another. The device consists of a rule made of a single piece or of two or more parts secured together by a base piece. A groove is in the centre for receiving the spring portions of the two slides containing the abbreviated names of the different kinds of type, so that in measuring the number of ems the name of type measured is immediately under the eye. From a suitable distance upon each side of the groove the edges of the rule are beveled away and these beveled parts, as also the top flat parts, are divided longitudinally by a series of parallel lines so as to indicate the different kinds of type that are used. Each one of these spaces formed by the horizontal lines are divided by lines which indicate so many ems in each particular kind of type, while one of the horizontal lines, which run parallel with the groove upon the flat portion of the rule, preferably next to the groove, is divided off by inches so as to indicate the length of any printed matter or any other article or thing which is to be measured. The spring slides consist of flat plates, bent so as to conform to the shape of the top of the rule, each plate being bent at its centre so as to form a spring, which will catch in the groove and then provided with two projections or handles; or two separate plates may be used in lieu of either one, and connected together at their inner ends by means of a spring. With these two slides two separate and distinct measurements—the width and the length—may be taken. As these slides will remain in whatever position they are adjusted, the rule can be laid aside for the time being, and can be consulted at any time thereafter as a reference. As the measures for the different kinds of type are placed side by side, the number of ems in any one kind of type in a certain amount of printed matter can be calculated in each one of the other kinds of type at a glance.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill..

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel — tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.---NO. 26.

NEW YORK, JUNE 26, 1884.

WHOLE NO. 470.

Correspondence.

GERMAN BRIEFS.

[CORRESPONDENCE OF THE STATIONER.]

BERLIN, June 12, 1884.

It is some time since you heard from here, but there is very little of interest in our line to report to you.

Trade in leather goods and albums was very dull here until about the middle of May, when the American orders came in, and now the manufacturers are all very busy.

It is really astonishing what an influence the American market has on the old country. Everybody looks to America for support and for bread, and when our market shakes, all Europe shakes.

We are all very sorry that the United States Minister to this country, Mr. Sargent, is going to leave us. He is a very amiable and at the same time an energetic gentleman, and very much liked by the liberal portion of the German people. But he was not pliable enough for Bismarck, who prefers some learned professor like Bancroft, who made the treaty which subjects American citizens to military duty when they come back here, making a sad distinction between native-born and adopted citizens.

I see that death has had a rich harvest among some of your best men—men who cannot very well be spared.

First came Chrs. Bruno, the oldest musical instrument dealer in America, a man honest and true as gold. Then our good friend Henry Bainbridge, one of the best men I ever met; also Wm. C. Dunton, a true and straightforward, hardworking business man.

Our good friend the American Consul-General, Mr. Brewer, is with you now on a visit.

I see by the consular reports that Koch, Sons & Co. still take the lead in the export of albums, although there are more exporters in the market than ever. PAPERMAN.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, June 24, 1884.

On Saturday last we were treated to the hottest day of the season, the mercury reaching 97°. It was the hottest June day ex-

perienced in this section for years. To see pedestrians closely hugging the narrow strip of shade along the sidewalks was really amusing to one whose many summers were passed "way down South."

"It's an ill wind that blows nobody good," or rather a hot day when everybody gets left, and so the soda-water man

Rejoiced to see the blazing sun
Resplendent in the sky;
And all the while his cooling drinks
Refreshed the passer-by.

Although this week shows a milder temperature, it is still decidedly warm, and the narrow confines of workshop and counting-room are daily growing more uncomfortable. Clerks are beginning to divide up the summer months so that only a part of the working force will be absent at a time. And the "bosses" are also comparing the attractions of the many seaside and mountain resorts with a view of taking a little recreation during the warm months. In the meantime plans are being made for the business campaign of the coming fall, and from what I can learn a very good trade is expected.

Samuel Hano returned last week from a business tour and reports booking a goodly number of orders for manifold books. He is off again this week for a trip through New York State, where he will journey for a fortnight, making frequent calls upon the leading stationers there. On his return he will probably be "going a-fishing" for the summer somewhere in Maine. Even then he will take his sample-case with him, for he proposes to present the "Plumed Knight" with a set of manifold copying-books for his personal use in the White House.

During Mr. Hano's absence from the city, the business of the house is ably managed by J. W. Sanders, his efficient representative; and Mr. Sanders knows the value of copying-books, too.

The Davidson Rubber Company has enjoyed a very large trade during the past six months, although trade at present is rather quiet. The rubber bands made by this company, as well as its velvet erasive rubber, have become such staple goods and so extensively and favorably known to the trade, that it is hardly necessary to enlarge upon their merits. The trade has come to recognize the fact, that

what bears the name "Davidson Rubber Company" can be relied upon as standard goods. The large sales of rubber copying-press sheets during the past season as reported by the company is really remarkable. They are fast taking the place of oiled paper and other material so long in use for copying-press uses, and it is because they are so much superior to anything else employed for copying-press purposes. These rubber sheets will not become cracked or ragged, as is the case with the common press-pads, and they are consequently much more durable. I have seen some of these rubber sheets that have been in constant use for over two years, and they are still in use and likely to be for some time to come.

King & Merrill are preparing to introduce to the trade this fall some new specialties in the line of pencils and inks. Their "Nonpareil" pens have become so popular that their ink will bear the same trade-mark, and it is hardly supposed that the reputation of their pens will be lessened by a poor ink. The "Nonpareil" ink flows freely from the pen; it will not corrode, and is a good black. Their pencils bear the names "Harvard" and "Beacon." The "Harvard" is made especially for school use. The "Beacon" pencil is of superior quality, and will be found an excellent office pencil. It is provided with an extra long nickel protection, in which is inserted a rubber head.

Pulsifer, Jordan & Wison, wholesale dealers in paper and stationers' supplies, are displaying in their card-board department a new line of card-board of a very superior quality, which is especially manufactured for taking fine printing. This board can be had in white and in six different tints, and comes in five grades of thickness. Color-work, lithographing and wood-cuts show up to the best possible advantage on this card-board. Samples will be sent the trade upon application. This house is also showing something quite novel in the fan line. The fans are of card-board, upon the lower half of which are printed in colors familiar scenes from the base-ball game. The upper portion of the fan is a score-card. These fans are in sets of six, each one presenting different positions of the players. On a warm day patrons of base-ball would find these fans of a double use, and such party supply spectators with score-cards mis-

the score-fan a taking novelty at base-ball grounds.

W. W. Edwards, the resident New England agent of the Globe Files Company, of Cincinnati, is making his headquarters with Samuel Hobbs & Co., stationers, of this city, where a full line of letter files, cabinets and general goods is constantly in stock.

A petition was circulated yesterday among the leading stationers and paper dealers asking that the several members of the trade keep their respective stores closed from Thursday evening, July 3, until Monday morning, July 7, and I am pleased to state that the trade generally kindly agreed to the proposition. Among the signers are: Rice, Kendall & Co., Carter, Rice & Co., Pulsifer, Jordan & Wilson, John Carter & Co., and A. Stores & Bemnet Co., wholesale paper dealers; Samuel Hobbs & Co., Ward & Gay, Hooper, Lewis & Co., Knight, Adams & Co., Cotton & Gould, Cutter & Tower Company, Aaron R. Gay & Co., Henry A. Young & Co., Dennison Manufacturing Company, Winkley, Dresser & Co., M. R. Warren, J. L. Fairbanks & Co., J. Whittemore & Co., Geo. F. King & Merrill, N. Little & Co., Luther B. Lyman, Fred. W. Barry, Boston School Supply Company, Chas. H. Whiting, Doane & Greenough, Thomas Groom & Co., and Atwood & Sherburne. This list includes all of the leading jobbers and dealers in stationery.

An effort was made to interest the book dealers, but without success, though Estes & Lauriet and Little, Brown & Co. agreed to close if the others would. Of the others, Chas. A. Whiting generously consented to close with the stationers and paper dealers. The book trade may come in later. A. L. D.

CINCINNATI ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, June 24, 1884.

Whew! how hot! The mercury is in the nineties, and ascending every day as if in competition with the day preceding. Sunstrokes have begun in earnest, and if this weather doesn't let up we shall have them by the score before this letter gets into print. Among the first was a young fireman while fighting the fire at Chatfield & Woods' paper warehouse, No. 25 West Fourth street, on Sunday. By the way, let us tell about that fire. It was discovered at nine o'clock in the morning in the cellar after it was under good headway. The building is five stories high and 150 feet long. The cellar and all the floors, with the exception of the second, which is still held by J. Henly & Co., the millinery dealers, were filled with paper of various kinds, and thus the place was ripe for a big fire. The flames started in the cellar near the forward end of the store, and gradually crept through the stock for a distance of over thirty feet back. The joists were burned through, letting the ground floor, with all its weight of finely-finished paper,

rough into the abyss of flames below. It

stubborn work for the firemen, but they

ved to keep the loss confined to the front

the ground floor and the cellar. Some

other damage of a trifling character was due to water.

The stock destroyed by the flames was mainly composed of flat or ledger paper. John S. Woods said that both he and his partner were as yet at a loss as to the exact nature and extent of the damage done. A careful investigation will alone reveal the true state of the case. The loss is roughly estimated at \$30,000. It is fully provided for by insurance in thirty-five companies. It is supposed that a cigar stump fell through the street grating and started the fire.

This misfortune will make little or no delay to the firm in filling orders, thanks to its pluck and energy.

Business is generally slow and dull, but it has encouraging features. Its very conservatism is a preparation for better and healthier trade in the future.

J. R. Mills & Co. have a run of home custom for mercantile stationery that is not much affected by dull times. There seems to be no end of popularity to their reversible envelopes. They are used not only for mailing purposes, but for the filing of papers in the offices of attorneys and in all public offices.

W. B. Carpenter & Co. report sales of May and thus far of June, greater than those of the corresponding time last year; but they attribute this to a great demand for documents for the county offices to fill the place of those destroyed by the burning of the Court House during the riot. W. B. Carpenter is now president of the Globe Files Company, and he keeps the windows of his shop (the Carpenter shop), on Walnut street, full of specimens of the Globe files.

Hammocks, lawn tennis and croquet goods are among the articles on sale at several of the book and stationery establishments in the city.

An enormous dry-goods store, capitalized at two millions of dollars, and occupying a building which costs three-fourths of a million dollars, sells books, stationery of all kinds, furniture, household goods, queensware, hardware, boots and shoes, stoves, trunks, valises—in fact, about everything except bowie-knives, dirks, pistols and shotguns. Of course, dealers in specialties, stationers included, are friendly toward this house.

I must beg pardon of A. Howard Hinkle for writing his name so badly that THE STATIONER printed it A. Howard Winkle. I am not fully convinced that I did write it so awfully bad; but for the sake of peace I put the blame upon

PRINCE WILLIAM.

How Paper Pails are Made.

At a paper-ware factory in Syracuse, N. Y., intended to turn out 500 paper pails a day, the process of making is thus described in a local paper:

Rags and paper waste are steamed in vats for a few hours and then thrown into beating troughs partly filled with water. The "beating" is done by a revolving cylinder with fifty knives set at different angles. The knives reduce the rags to a dirty purple pulp, and change the newspaper wrappers to a soft mass. About four hundred pounds of material are

put under each beater. When paper and rags are each reduced to pulp, the opening of a trap lets it run into the stuff chest in the cellar. One part of rag pulp to three of paper is run into the chest. When pumped from the stuff chest into the trough of the winding machine, the future pail looks like thin water gruel. A hollow cylinder covered with brass wire splashes around in the trough, and the pulp clings fast to the wire. After the cylinder has performed a half revolution it comes in contact with another cylinder, covered with felt, that takes off the pulp. As the large cylinder goes down on the return trip, and just before dipping into the trough again, all little particles of pulp sticking to the wire are washed off by streams of water from a sieve. On the inside of the cylinder is a fan pump that discharges the waste liquid.

From the felt-covered cylinder the pulp is paid on to the forming cylinder, so-called. It is about the shape of the paper cone cap worn by bakers and cooks, but made of solid wood and covered with zinc, with the small end or bottom part of the pail toward the workman. The forming roll drops automatically when pulp of the required thickness is wound around it. From here the now promising pail is put in the pressing machine, which looks something like a silk hat block, in six sections, with perforated brass wire upper faces. The sections move from and to a common centre, and the frame is the exact size of the pail wanted. The workman drops his damp skeleton of a pail into the frame, touches a lever, and the sections move to their centre and squeeze the moisture out of the pail. The pail is still a little damp, and spends a few hours in the drying room at a temperature of about 150. The sections of the pressing machine mark the bands which are seen on the finished pail. After it is dry the pail is ironed, or calendered, as it is called. The pail is drawn, like a glove, over a steel forming roll, which is heated, and is ironed by another revolving calender, with steam thrown on the pail to keep it moist as if it were a shirt bosom. The pail, or rather its frame, is pared at each end, punched with four holes to fasten on the handle, and corrugated, or channeled, for the putting on of the iron hoops. A wooden plate large enough to spring the pail so that the bottom can be put in, is inserted, and the paper bottom held under a weight which drops and knocks the bottom where it belongs. The factory has a machine of its own invention for the bending of the hoop into shape.

After it has been cut to the proper length and width, the straight strip of iron is run over a semicircular edge of steel, on which it is held, and drops on the floor a round hoop with a fold in the middle to catch the top and bottom edge of the pail. After a waterproof composition is put on, the pail is baked in a kiln for about forty-eight hours at a temperature between 200 and 300 degrees. It is dried after its first coat of paint and sandpapered, and then takes two more coats of paint, with a drying between, and a coat of varnish, which is baked on, before—with its wooden handle and brass clamps—the pail is ready for the hand of the dairy-maid, hostler or cook.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

WIRE FRAME WATER-WELL.

The accompanying illustration shows a patent wire frame water-well. This consists of a porcelain vessel of the shape shown, set in a handsome plated wire frame, with a loop in which to hang the copying-brush, making a very clean and neat arrangement. The well and frame are well made and finely finished, and are ornamental as well as useful. They are also very strong, and there is nothing about them which can get out of order. Letters Patent No. 300,704 were granted on June 17, 1884, to Ezra W. Frost for this invention. Mr. Frost has assigned all of his interest therein to R. R. Watson, who will supply the trade.

NEW PATENTS.

No. 299,289. Photographic Camera.—Chas. W. Stiff, Foxborough, and Nathaniel C. Bousley, Salem, Mass.

No. 299,323. Envelope for Currency, Checks, &c.—Charles A. Ball, Delphos, Ohio.

No. 299,338. Index.—Thomas C. Brown, Norborne, Mo.

In an index, the combination, with a box having its front slotted and grooved longitudinally, of spring-rollers journaled in the said box, index-sheets secured to the said rollers and passing through the slots, and slats secured on the outer ends of the sheets.

No. 299,358. Envelope.—James F. Dodd, Delaware, Ohio, assignor to Otis F. Presbrey and Frank M. Green, both of Washington, D. C.

A combined letter-sheet and envelope, consisting of a rectangular body portion capable of being folded upon itself and having gum upon its outer side, a narrow perforated end flap adapted to be folded upon the back of the body, and side flaps adapted to be folded upon the perforated end flap and body of the sheet, whereby the envelope is securely sealed.

No. 299,389. Manufacture of Combs from Celluloid and other Plastic Materials.—John W. Hyatt, Newark, N. J., assignor to the Celluloid Manufacturing Company, New York, N. Y.

No. 299,390. Manufacture of Combs from Celluloid and other Plastic Material.—John W. Hyatt, Newark, N. J., assignor to the Celluloid Manufacturing Company, New York, N. Y.

No. 299,391. Easel.—David M. Ireland, Waterbury, Conn., assignor of one-half to Henry A. Matthews, same place.

No. 299,398. Letter-Opener.—Jacob Jones, Baltimore, Md.

A letter-opener consisting of a holder or support for the blade having a groove formed in it, and a straight blade occupying the groove, extending lengthwise thereof and having a cutter-prong projecting from its exposed edge.

No. 299,436. Toy Gun.—Lawrence Stockman, Philadelphia, Pa.

No. 299,438. Mold for Casting Slugs and Leads for Printers' Use.—George W. Surguy, Columbus, Ohio, assignor to Thomas N. Surguy, same place.

A mold for casting slugs or leads, comprising two plates lined with a non-conducting

substance, in combination with inner strips of wood or similar non-conducting material.

No. 299,442. Envelope-Opener. Charles S. Watson, Philadelphia, Pa., assignor to James R. Bissex, same place.

No. 299,457. Paper-Cutting Machine.—Samuel Brown, Philadelphia, Pa.

No. 299,461. Calcimeter.—Lucas Mavie Campi, Havana, Cuba.

No. 299,463. Cabinet for Holding and Adjusting Bill-Heads, &c.—Henry A. Clow, Des Moines, Ia.

A portable cabinet adapted to be placed on a desk, and for holding and adjusting bill-heads and other blanks, composed of a case, an endless carrier on rollers, provided with

paper-fastening devices, and a fixed tablet under the movable carrier.

No. 299,499. Detachable Reservoir for Pens.—George Washington Woolley, Washington, D. C.

An ink-holding attachment for pens, consisting of a reservoir and a shank, each provided with an air-opening near the upper end of the bulb of the reservoir.

No. 299,566. Composition and Mold for the Manufacture of Articles from Artificial Slate.—John Westley McKnight, Washington, D. C.

A composition for artificial slate, consisting of cement, oxide of iron, metallic red, drop-black, lamp-black, Venetian red, soluble glass, pulverized alum and solution of iron-rust and vinegar.

No. 299,579. Temporary Binder.—Herbert L. Pratt, Kalamazoo, Mich.

No. 299,602. Book-Case.—Caleb T. Ward, New York, N. Y.

No. 299,604. Toy.—Jesse G. Webb, Boston, Mass.

No. 299,608. Toy.—Artemus Wilhelm, Wilmington, Del.

A toy composed of a board provided with a number of holes extending entirely through the board, and of uniform size throughout their length, in combination with pins of a length exceeding the thickness of the board, and adapted to fit tightly in said holes.

No. 299,625.—Device for Laying Out Tennis-Grounds. Harry N. Covell, Glenbrook, Conn.

No. 299,703. Toy.—Charles August Volke, Kobe, Japan.

In a toy for throwing a circular projectile wheel or top, the combination, with the stock

or handle and guide for said projectile, of a carrier for imparting the necessary impulse to the projectile, and means for giving a rapid rotary motion to the projectile while in its guide and carrier.

No. 299,716. Blotting Pad.—Charles J. Bailey, Newton, Mass.

No. 299,729. Slate-Pencil Sharpener.—Isaac Brooke, Pottstown, Pa.

No. 299,730. Inkstand.—Isaac Brooke, Pottstown, Pa.

No. 299,751. Plaque and Panel.—Louis A. de Planque, Jersey City, N. J.

A plaque consisting of a piece of leather-board pressed into suitable shape, coated with a mixture of glue and whiting, and then provided with a coat of paint.

No. 299,753. Tag Holder.—William Dickie, Gillespie, Ill.

No. 299,754. Type-Writing Machine.—Darien W. Dodson, Town Line, Pa.

No. 299,777. Paper Box.—John F. Gooding, New Haven, Conn., assignor to Benton, Nichols & Co., same place.

A paper box made from two parts, the one part forming the four sides of the box, two opposite sides having flaps projecting therefrom, which, when turned down, will partially close the respective ends of the box, the second part consisting of a strip in width corresponding to the width of the sides of the box from which there are no projections, and in length corresponding to the length of the said two sides plus the two ends of the box and the tucking flap, the said second part bent and introduced into the box to bring the corresponding sides of the two parts together, one end portion of the second part covering the turned-in flaps of the first part, and forming the bottom, the other end portion of the second part forming the cover over the flaps turned in at that end, its flap fitted to be introduced between the two thicknesses of the opposite side.

No. 299,785. Type-Writing Machine.—George H. Herrington and David G. Millison, Wichita, Kan.

No. 299,796. Toy Gun.—Jos. L. Joyce, New Haven, Conn.

No. 299,803. Cutting Sheets of Zylonite and Other Plastic Compounds from a Cylindrical Block.—Emil Kipper, Adams, Mass.

No. 299,807. Pocket Match-Box.—Ezra B. Lake, Ocean City, N. J.

No. 299,812. Album-Satchel.—Louis Lazarus, Allegheny, Pa.

No. 299,814. Envelope Machine.—Daniel M. Lester, Norwich, Conn.

No. 299,819. Letter File.—George Mason, Catlettsburg, Ky.

No. 299,856. Chalk-Sharpener.—Theodore Schafer, Maroa, Ill.

No. 299,902. Pencil-Clasp.—Job Batchelor, Camden, N. Y., assignor of one-half to Augustus G. Wood, same place.

No. 299,908. Pocket-Book.—Henry A. Chapin, New York, assignor to Edwin H. Brown, Brooklyn, N. Y.

No. 299,913. Paper Back for Book-Covers.—James A. Crane, Westfield, Mass., assignor of one-half to Robert B. Crane, same place.

The art or process of manufacturing paper backs for book-covers, which consists in forming the backs in pairs from an endless or seamless tube composed of successive layers of paper over a shaped form or core by drying and shrinking the paper tube upon the form, cutting the dried and shrunk paper tube longitudinally across the middle, and finishing the backs.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,
Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,
THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Frank P. Flint, dealer in paper and paper bags, San Francisco, Cal., has sold out.

Hazelton & Widner, printers and publishers of the *News*, Hazelton, Kan., have sold out to J. L. Kendall.

The New Hampshire Chemical Pulp and Paper Company, Boston, Mass., and Bristol, N. H., has made an assignment.

Horace Holden, 62 William street, has taken the sole agency in the State and City of New York for the pneumatic copying press.

The pulp mill of the Lake George Pulp and Paper Company, Ticonderoga, N. Y., together with a lot of wood and pulp, were totally destroyed by fire on Saturday. Loss, \$10,000; partly insured.

Stanley's safety writing fluid, manufactured by Milton C. Johnson, New York, is said to be absolutely indelible and proof against fraud by alteration and erasure. It flows freely, and is said to be practical and satisfactory in its writing qualities.

The stock of James Cheever, paper-stock dealer, who occupied the whole of the four-story brick building, 479 and 481 Atlantic avenue, Boston, was damaged from \$25,000 to \$30,000 on Monday night by fire and water. Insurance, about \$10,000.

George H. Sanborn & Sons, 51 Beekman street, New York, manufacture an automatic knife-grinding machine which does first-class work. Another special machine, with improvements, made by this concern, is a cutting press for dies of irregular shape. This press is of great strength and power.

A fire occurred in the paper warehouse of Chatfield & Woods, No. 25 West Fourth street, Cincinnati, Ohio, on Sunday. It started in the cellar and burned the stock stored in the cellar and caused the first floor to give way and dump its contents into the cellar. The flames were prevented from extending further. The loss, almost wholly for stock, is \$40,000. Insured for \$100,000. It is not known how the fire originated.

William H. Dempsey, bookseller and stationer, Washington, D. C., was arrested on Friday last upon two warrants sworn out by Dr. William Van Reyden, Assistant Chief of the Naval Bureau of Medicine and Surgery, charging him with complicity in the alleged frauds practised by the previously-arrested clerks, Carrigan and Kirkwood, and with the rendering of false bills and accounts. The amount involved in the charges is nearly \$6,000, and a considerable part of it is said to have been obtained upon fraudulent bills for microscopes, ophthalmoscopes, galvanic batteries, and other scientific instruments and appliances, supposed to have been furnished for the Medical Department of the navy to be used on ships and stations. Mr. Dempsey gave bail in the sum of \$5,000 in the two cases for his appearance in court when wanted, his counsel, William J. Miller, becoming his surety. Mr. Dempsey says that the attempt to implicate him is a great surprise; that he is entirely innocent of the charges, and will be abundantly able to prove his innocence by his books and papers, which, he adds, are all in proper shape.

R. Hoe & Co. have caused a handsome engraving of representative London journalists to be prepared for distribution. The publishers are Root & Tinker. The group consists of John Walter, the *London Times*; H. Labouchere, *Truth*; Edmund Yates, the *World*; W. H. Mudford, the *Standard*; J. R. Robinson, the *Daily News*; J. L. Lathey, the *Illustrated London News*; F. C. Barnard, *Punch*; Frederick Greenwood, *St. James Gazette*; William L. Thomas, the *Graphic*; G. A. Sala, the *Daily Telegraph*; Edw. Lloyd, the *Daily Chronicle*. The engraving represents the front page in miniature of each of the journals named, with portraits of their different managers appearing on the page.

The self-inking rubber-stamp pads are rapidly taking the place of the old style of cotton pads, which are away behind the age. The former pads are being handled by stationers everywhere, and they generally prove very salable, especially in towns having a fair business population. H. N. Baumgarten manufactures six different varieties of these pads and allows 50 per cent. discount to stationers.

D. C. Pitchford, dealer in picture frames, Atlanta, Ga., is asking for an extension from his creditors.

George Newland, publisher, Buena Vista, Col., has sold out to W. R. Logan.

Nounan & McCusker, stationers and printers, San Francisco, Cal., have been attached.

Dempster & Harding, publishers of the *Star*, Marion, Ohio, have sold out to Rigour, McMahon & Blair.

A company has been incorporated as the *La Cronica* Publishing Company for publishing the *La Cronica* at Los Angeles, Cal.

A dissolution has taken place in the firm of F. Lauenstein & Co., publishers, Evansville, Ind. F. Lauenstein continues the business alone.

The paper mill of the Barrett Manufacturing Company at Bath, S. C., was partly destroyed by fire on Sunday. It is estimated that the loss will not exceed \$25,000. There is an insurance of \$40,000.

Wills & Semple, publishers of the *Camden Democrat*, Mount Holly, N. J., have dissolved partnership. William B. Wills continues the publication of the paper.

Allaire & Schultz report a falling off in the trade in tie envelopes, owing to the general depression in all branches of trade, and say that business is far below the average for this season.

Stephen E. Reynolds and Edward J. Merriam have associated as partners for doing business as manufacturers' agents and commission paper dealers, with offices at Room 43, Temple Court, New York city.

The National Publishing Company, Philadelphia, uses a clear, white paper in all of its bibles, even to the cheapest grades, and it asks the trade to compare the paper and letterpress in its cheap bibles with others published.

The game of base-ball between the employees of J. D. Whitmore & Co. and Geo. B. Hurd & Co., which took place on Saturday, June 21, resulted in a victory for the latter nine, with a score of 30 to 19. This makes both even in a series of games, and the next will be looked forward to with a great deal of interest, as deciding which house shall take the honors.

Alles & Conant have brought out a new line of ladies' furnished boxes, which are provided with all the necessary tools used by young ladies in making various articles of fancy work. The boxes are made up in two different styles of finish—plush and hard maple; also, three sizes. They are lined with satin and well made. The firm has also a new line of fancy plush comb cases, handkerchief, glove and jewel boxes. It is having a brisk trade in these

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Lin-n-Plated, Gilt Edge, Quadrille, Wave Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of UNIVERSAL BLOTTER TABLET, at lowest prices ever made.

SEND FOR PRICE LISTS.

(WARRANTED.)

goods, and is using all its factory facilities to keep up with the demand.

Hoyle Brothers, dealers in picture frames, Lawrence, Mass., are reported failed.

L. Levin & Son, stationers, &c., San Francisco, Cal., have dissolved partnership.

W. H. Saunders, dealer in wall-paper, &c., Winnipeg, Man., is closing up his business.

J. P. Herbert, picture dealer, Troy, N. Y., has resigned, giving preferences for about the full amount of his assets.

Jorhenson & Co., wood engravers, Evansville, Ind., have dissolved partnership. Henry Mesker and F. N. Hunton succeed to the business.

A dissolution has taken place in the firm of Russell & White, publishers, Forest Grove, Ore. White continues the business alone as E. L. E. White & Co.

Buckley & Allen, wholesale and retail stationers and booksellers, Halifax, N. S., have dissolved partnership. Thomas C. Allen continues the business.

Ellen V. O'Donnell, dealer in subscription books at 241 Broadway, New York, made an assignment to Edward A. O'Brien on Wednesday. She has been in business about a year.

S. S. Stafford has secured the contract for all of the inks used by the Brazilian Government during the present year. The first shipment amounted to \$583 worth, and the second shipment, on account of the contract, will amount to 50 per cent. more. Mr. Stafford also reports a fair domestic trade in his inks.

George M. Hayes, of Philadelphia, makes the appended announcement, which will be welcomed by the many friends whom he has made in his connection with the trade:

PHILADELPHIA, Pa., June 25, 1884.

In retiring from the management of the card business of T. Sinclair & Son, I desire to express my most sincere thanks to the trade for the very liberal business support and personal favors I have received at their hands for the past four years. I also wish to thank the trades journals, and press generally, for the many complimentary business and personal notices appearing in their columns from time to time. In my new venture from July 1 (under the firm name of Baker & Hayes, 125 and 127 North Fourth street, Philadelphia), I hope to merit and receive a continuance of these favors from my many friends in the trade.

GEO. M. HAYES.

The new firm will doubtless make itself felt in trade circles, and it will not be Mr. Hayes' fault if it does not take the front rank in the corps of lithographic publishers and printers.

Fire which broke out on Wednesday evening on the third floor of Atterbury Brothers' paper-stock warehouse, 253 and 255 Front street, New York, did \$10,000 damage to the stock and \$2,500 to the building, which is owned by the Lorillard estate. The loss is covered by insurance. Fireman Wallace was killed by falling from an upper story of the building.

McFarlane Brothers, manufacturers of frames, Rochester, N. Y., have dissolved partnership.

The assignee's sale of the property of Richard H. Forestal & Co., wholesale dealers in paper and envelopes, Philadelphia, Pa., is advertised for the 26th inst.

Lyman H. Wright, printer, Auburn, Me., is insolvent.

L. G. Joslyn & Co., paper-stock dealers, Worcester, Mass., have been attached.

John F. Ellsworth, paper manufacturer, Milan, Ill., has confessed judgment in the sum of \$507.

The liabilities of Brady, Mace & Co., publishers, Bangor, Me., are about \$700; assets, nominally the same.

The liabilities of Charles McConnell, paper-stock dealer, Boston, Mass., are said to be \$27,000. The assets are light.

R. H. Burnham & Co., booksellers, &c., Rockland, Me., have dissolved partnership. R. H. Burnham continues the business.

A judgment of \$5,375 has been found against C. B. Woodward, of the Printing and Book Manufacturing Company, St. Louis, Mo.

The Gazette Publishing Company, Louisville, Ky., has been incorporated with a capital stock of \$20,000, \$10,000 of which has been paid in.

Executions have been issued against the J. Fred. Waggoner Publishing Company, Chicago, Ill. (which was closed out on the 6th inst.), amounting to \$1,168. The executions were obtained on three judgment notes in the Superior Court. Besides the above amounts, it is said there are several other creditors with claims aggregating over \$2,000, among them Hanford & Sellers, printers, who attended to the type-setting work for *The Bookseller and Stationer*, *The Present Age*, *The Western Paper*

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

Trade and The Western Educational Journal, four weekly papers published by the company.

H. C. Applegate, dealer in wall-paper, Louisville, Ky., has sold out to Davis & Taylor.

Cooper & Hill, publishers of the *News*, Springfield, Mo., have dissolved partnership. The firm is now R. M. E. Cooper.

Leon Isaacs, of Leon Isaacs & Co., manufacturers of the glucinum pens, Philadelphia, has just come back from an extended trip in the East and reports a very good trade. His partner, M. Voorsangert is now on his way West to visit their customers.

Probably no one could be mentioned in the stationery, paper and printing trades in this city who has been more talked of lately than Clarence Levey. Anyone unacquainted with him or the nature of his business who should have visited his unpretentious office, which, up to May 1 last, was located in an upper loft of 114 Fulton street, would not have been favorably impressed with the idea that its occupant carried on operations of any magnitude, or that he was the well-known society man and sporting character that he is. It was shortly after the time of the exposure of the Tweed Ring frauds, when ex-Sheriff James O'Brien was such an important factor in political and municipal affairs, that Mr. Levey became much known among the paper, stationery and printing trades, although he had been more or less engaged in them for several years previously. About this time Mr. Levey numbered among his friends and acquaintances Mr. O'Brien and Edward W. Burke. The influence of these two gentlemen was brought to bear in favor of Mr. Levey, and the result has been that for upward of five years Mr. Levey has been the recipient of lucrative contracts to supply the municipal departments with printing and stationery, and during the whole of this period had furnished the greater portion of all of the supplies of stationery, printing and blanks of all kinds required by the purchasing department of the New York Central and Hudson River Railway companies. In addition to these corporations, other large consumers were numbered among his customers. This gave him a prestige in the trade and that made him the envy of many who had time and again put in estimates and bids and used efforts to wrest the business

from him. He was a large buyer of paper, and at times gave orders mounting up into thousands of dollars, and he had large accounts with printers and bookbinders who worked for him. To all appearances, Mr. Levey had been conducting a very prosperous business up to the month of April last, when it became known to some of his friends that for some reason or other he had lost one of his best customers, if not, in fact, the largest. He was at his office very little during the month of April, and the reason given for his absence was that he had received a severe injury to one of his legs from one of his horses. On May 1, John Love & Co., bookbinders, who occupied a portion of the loft at 114 Fulton street in conjunction with Mr. Levey, moved their business to 88 Fulton street, and Mr. Levey's desk and office fixtures were removed thereto also. During the following week several of his notes went to protest, and among the first was one in favor of Butler & Johnson for \$500. Several suits were brought at this time against Mr. Levey, and as he could not be found, Butler & Johnson secured an attachment against \$3,500 due him by the New York Central and Hudson River Railroad Company, and will probably recover this amount. The remainder of this fund has been enjoined by his brother, Augustus A. Levey, on a claim for \$2,985, which he avers he loaned his brother, and a receiver has been appointed to apply the fund toward the payment of his judgment. None of his creditors have heard anything from him since May 12, and the general impression is that he has gone to Europe. He owes, as far as can be learned, about \$15,000 to the following named parties: Butler & Johnson, Molleson Brothers, Clement & Stockwell, Merrimac Paper Company, Hand & Ellsworth, Miller & Flinn, Dickinson & Clark Paper Company, C. A. Mallory & Co., John Love & Co., bookbinders; O. Z. Blaber, and C. H. Jones & Co., printers. Mr. Levey is a son of Isaac Levey, of the Consolidated Card Company, and a brother of Frederick H. Levey, of F. H. Levey & Co., printing ink manufacturers. Several members of his family have been seen, and so has also his attorney, Ellis S. Yates, and they decline to give any information as to his whereabouts. Mr. Levey has been a familiar figure to the habitués of Long

Branch, and is the owner of a stock farm at Deal Beach, near by. Many of his friends in the paper and stationery trades have been recipients of his free-handed hospitality at his establishment at Deal Beach, and have ridden with him behind some of his blooded stock. He took part regularly every year in the fox-hunts, and was on hand at Jerome Park and Sheephead Bay very frequently, and was called a "jolly good fellow." It is told of Mr. Levey that a movement was set on foot a few months ago to found a home for infirm and indigent jockeys and that he agreed to subscribe \$10,000 toward it. His first connection with the stationery trade was about ten years ago, when he entered the store of B. & P. Lawrence, his chief duty while with this firm being to attend to its Custom House business. After he left B. & P. Lawrence, he became associated with Henry Meigs, Jr., in the stationery business at 42 Pine street, under the style of Levey & Meigs. Subsequently they bought out J. W. Sheridan at 26 Exchange place, where Levey & Meigs continued the business up to the dissolution of the firm about six years ago. At this time, he started on his own account at 59 Exchange place, but did not remain at this location very long before he removed to 184 William street. On May 1, 1881, he changed his location to 114 Fulton street, where his office has been located ever since up to about May 1 last.

Another Indorsement for "Climax."

The "Climax" blotting, now so popularly known, has received the following testimonial:

NEW YORK, May 28, 1884.

Richmond Paper Manufacturing Company, Richmond, Va.:

GENTLEMEN—Enclosed please find order for two tons "Climax" blotting. After selling your blotting for nearly six months, we can, with great pleasure, state that we are perfectly satisfied with same.

Since handling your blotting we have sold more than double of it than of any other manufacturers combined.

We have yet to receive our first complaint in regard to it, and, in spite of the immense advertisements of so-called "chemical tests," as to the superiority of other blotting, our customers state that the "Climax" is "good enough"—and our sales are steadily and rapidly increasing, which is by far the best and most satisfactory test. As in the past, we shall continue to do all in our power to place and keep the "Climax" where it belongs—in the front rank of blotting paper. Wishing you continued success, we remain, very respectfully,

TOWER MANUFACTURING COMPANY,
Per CLARKE.

Just now stationers, and others in kindred lines, who want to keep up with the demands of customers, are looking around for first-class campaign goods in the shape of badges, portraits, transparencies, &c. These dealers should remember that J. H. Bufford's Sons carry a complete line of these goods, and they claim superiority for their productions and challenge comparison as to prices. They have large and small size portraits printed on heavy plate paper suitable for framing, also for banners, transparencies, flags, &c., and the same size portraits printed on cloth, the latter being especially designed for decorating buildings, club rooms, and for sewing on flags and banners, and also for transparencies. They have also satin and cloth badges for clubs and organizations. A finer and more complete line of campaign goods cannot, it is said, be found in the market.

Another improvement has been added to the Kerner stylographic pen. The flexible tubing is now made of a combination which is absolutely non-corrosive from the action of ink, and in addition to that the air-hole at the bottom of the tube has been abandoned entirely, and in the place of it there has been substituted a slot in the needle plug which draws all of the ink from the air tube and keeps it always clear. Application is now pending for these improvements, and some of the claims have been allowed. The manner in which the flexible air tube is now put in gives a decided action throughout the entire ink channel, agitating the ink continually while the pen is in use and causing a perfect flow to the point. The Kerner Company is now making what it calls the commercial size of stylograph, which holds nearly double the quantity of ink that the regular size holds. The banks in the city are said to have very generally adopted the Kerner pen, and it is rapidly becoming a standard pen throughout the country. The many cheap imitations of the Kerner pen now on the market have soft points, while the points of the Kerner pen are alloyed expressly for the Kerner Company, and contain 20 per cent. iridium and are said to be absolutely non-corrosive.

ESTABLISHED 1830.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - - 10 Cents.

NEW YORK, THURSDAY, JUNE 25, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

VACATION days are upon us. We presume that the trade generally are not so poor that they cannot take a holiday. All will feel better for an outing and will be able to return to business with zest. Take a good rest!

AN international exhibition will open at Antwerp, Belgium, in May of next year, and all the world is invited thereto. Applications for space can be made up to September 1 of this year. If American manufacturers can find it convenient—as they ought—they should be represented at this exhibition.

UNTIL recently, most of the stationery imported into Mexico came from European sources, principally French. The United States Consul at Monterey has had his attention directed to the great increase in imports of this character from the United States, and he remarks that within twelve months these imports have made wonderful strides. Without undue assertion, THE STATIONER thinks that it can claim a share of the credit attaching to this growth of trade. When the reciprocity treaty was framed we pointed out that although no provision was made for putting paper and stationery on the free, list the increase of correspondence occasioned by the interchange of products, the development effected by new enterprises in which American skill and capital were combined, and the closer alliance of the two countries would be calculated to increase a demand for goods which this country can supply. We then warned our trade to be active and alert in seizing the opportunity, and they have doubtless been alive to its importance. We do not know of anything just now which gives us more cause for sincere congratulation than the fact we have cited—that we are largely increasing our exports of paper and stationery to Mexico.

THE world moves too slowly or too fast for the modern newspaper. This may seem to be a paradox, but it is true in one sense and equally true in another. To overcome either journalistic objection to mundane movement it has been necessary to bring out new types of machines to work off the sheets of the daily journal, and thus to provide means for reporting the news of the day up to the farthest attainable moment, and yet get the paper out in time for the early risers and the remote breakfast table. Printing presses have been improved upon and improved upon to keep up with the demand for rapid execution, and yet with all of the facility with which this has been done, the cry is for faster work. Our readers are probably generally posted as to the means by which the newspaper

of to-day is printed from a continuous sheet or roll of paper, but the difficulty has been to double the capacity of one press, and to those who understand what this means, it is a great deal. One of our London contemporaries presents us with the plan of a new double web rotary machine which will print on two distinct webs of paper and at the same time, using only one set of plates. This press is said to do satisfactory work, and if, as claimed, it accomplishes the purpose of doubling the present capacity of perfecting web-presses, it will soon be in demand. But we shall not believe that ingenuity and skill cannot go farther. One of our leading manufacturers of presses has suggested the electrical production of our morning journals. Let him first try to beat the latest feature in web printing-presses if he has not already done so.

Roundabouts.

BY THE TRADE LOUNGER.

Glancing over the columns of one of the journals which emanate from that classic but erratic town which dotes on beans and despises tea, I came across two verses of pleasant conceit which some of the readers of THE STATIONER may like to read. They are headed "May and June." Here they are:

* * * *

The growing grass with dew was wet;
Between her finger-tips
She held a half-blown violet
As dewy as her lips.
"Life's pulse is music, rustic maid!
Thy name, sweet one, I pray?"
And, with a roguish smile, she said:
"The poets call me May!"

* * * *

A deep-eyed sister, sweet sixteen,
Sat laughing in the shade
Mid grass of thicker, deeper green,
With daisies overlaid.
"Thy name?" I said. In the red hush
Of lengthening afternoon
She smiled, then answered with a blush—
"The poets call me June!"

* * * *

But June is growing old and her vestments bear the marks of time and wear. The "grass of thicker, deeper green," has lost its brilliancy, and the blush of June has been one fierce consuming glow. The poet cannot now recognize his ideal, and nature and humanity alike cry out for a more amiable, gentler month. Everybody whom I have met seems to believe that it is too warm for comfort, and there is no denying that the parched foliage and the thirsty fields need inspiring showers. Let us have rain!

* * * *

Turning aside from rhapsody, poetic considerations, and weather discussions, let us see if there is not something in trade worth remarking. Another important failure in Wall Street has again excited an uneasy feeling. Do you know, I think that the failures do not strike in the right place? We really want one notable smash-up to lift the incubus on business. Cyclones generally cut a swath, carrying destruction in their path, but purifying the

atmosphere for miles beyond the limits of their sweep. So, if a financial cyclone could only be induced to take the proper path, there would be regeneration for the multitude.

But in the stationery trade there are no indications of great trouble. There is always business for the stationer, and if it sometimes comes slow, and pressure is experienced, there seems to be a generally good feeling. Greater care has undoubtedly been taken in buying and selling, and risks are more carefully discounted than heretofore. It is best that it should be so. The trade admit it, even if they do grumble at times.

Some of the trade, though, complain that collections in many instances are hard to make—not because people can't pay, but because they will not. I cannot find that there is any difficulty in collecting from reliable dealers. The difficulty lies with buyers who didn't intend to pay when they ordered goods or who made a venture of buying without regard to the prospect of settling their accounts.

"It is very discouraging," said a large dealer, "for a man to calculate on making so much profit from a certain number of sales, and then have a few bad debts wipe it all out. In some cases I have known bills to be allowed to run for two or three years, and even then the parties have the cheek to ask for more goods. I am very much in favor of the plan of having a black list, and I would like to hear from the trade on this subject."

Now, this idea of a "black list" will scarcely do in the sense that the dealer suggests it. You must steer clear of everything that may lead to libel suits and litigation. But a list, without an objectionable name, could be prepared. Say that every merchant made up a list of his debtors who are unduly in arrears, or who have been called on and neglect or refuse to respond. A number of such lists combined could be made up into a record—a mere statement of fact—without comment, and then all who should be supplied with it could be left to exercise their own judgment as to filling orders from any of the parties thus recorded. This thing can be simply, effectively and safely done.

Perhaps the Stationers' Board of Trade has such a record! If it has, its members will know how to appreciate it.

But, speaking of the Board of Trade, reminds me that I have tried to interview a gentleman prominently connected with that institution. He has been away from the city, and I have called at his place of business three or four times since his return.

The chief purpose of the interview was to propound the query: "What went ye forth to C?"

One of these days he may tell me.

C. M. W., that very faithful and industrious agent in New York for the G. F. Co.

and the C. P. N. Co., has been called away. I am told that he has gone "over the Rhine," or, in other words, to Cincinnati, to consult with the two important concerns which he represents. The Eastern trade of these two firms has seemingly greatly increased during the past year, and it ought to, if energy and perseverance like W.'s ever count for anything.

"And I said in my haste, all men are liars." This quotation has been modified of late years, and become rather restricted in its application. Unless, indeed, all men are to be known as fishermen. But here's an exception even to this rule:

George W. Dillingham, of G. W. Carleton & Co., New York, while trout fishing at the outlet at Moosehead Lake, Me., last week, had the remarkable luck to strike four trout at one cast, whose united weight was ten pounds, and was so fortunate as to succeed in landing them all. There were with him at the time as witnesses of his wonderful feat P. O. Vickery, of Augusta, Me.; R. L. Keach, of Providence, R. I., and G. J. Geer, Jr., of New York city.

They will all swear to it!

A Philadelphia man has devised a new card game. The names of the States, with their electoral votes, and other cards (making fifty-two in all) represent the coming Republican and Democratic nominees, and these cards do the duty of right and left bowlers. Republican States printed in blue, Democratic in red. Color of card turned at end of deal makes the trump.

The trade in England have introduced what are called "lawn tennis invitation cards." These are cards with an appropriate emblem and inscription printed on plain ivory.

Apropos of the closing of business houses on July 4 and 5, an enterprising printer has got out a card which reads: "We go Fishing on Friday and Saturday, July 4 and 5." The suggestion is good. Let us all "go fishing!"

Answers to Correspondents.

B. B. Co. says: Some time ago you gave a description of a brush to apply lacquer evenly. Can you conveniently give us the number of THE STATIONER containing it?

Ans.—You will find what you want in THE STATIONER of August 23, 1883 (whole No. 426), page 294.

H. M. B. wants addresses of New York firms handling scrap pictures and chromo cards for the trade.

Ans.—Scrap pictures: I. H. Hamburger, 332 Broadway; S. Hildesheimer & Co., 23 Great Jones street; Hyman & Sons, Beekman street, near Nassau; Kaufmann & Strauss, 77 Duane street; Geo. J. Kraft, 48 Maiden lane. Chromo cards: J. H. Buffords' Sons, 293 Broadway; L. Prang & Co., 36 Bond street; J. E. Linde, 167 William street; M. J. Anderson, 117 Fulton street; John Gibson, 82 Beekman street.

The funeral of the late Nicholas Ussing,

who committed suicide on Thursday afternoon of last week, took place from the Brooklyn Morgue at two o'clock on Sunday afternoon. Several houses in the paper trade contributed, with the assistance of his brother, who came on from Cranford, N. J., to give him a very decent burial. His body was enclosed in a rosewood casket, on the cover of which rested a wreath of flowers, and representatives of several of the Beekman street paper houses were among those who filled the carriages and followed the body to the grave.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, June 25, 1884. }

THE MONEY MARKET.—The money market has developed a hardening tendency, but rates for call loans have taken a wide range, chiefly on account of the unsettled condition of affairs in Wall street, closing at 2 up to 8 per cent. for call loans on stock collateral, time loans have been quoted 5@6 per cent., and prime commercial paper 5½@6½ per cent. discount. The stock market has been in a constant ferment during the past three days, and prices generally have succumbed to one of the most persistent and determined bear attacks witnessed in a number of years. Government bonds are again lower. Railroad bonds have ruled active, but at generally easier prices. State bonds dull and neglected. The Foreign Exchange market has been very much unsettled, the leading drawers having marked down their posted rates and the present rate warranting the shipment of gold from the other side.

THE PAPER MARKET.—There has been nothing new in the paper trade during the past week, and almost every department of general merchandise appears to be characterized by a seasonable quietude. Although the present consumption of paper is very large, particularly of print papers, the demand for which augments with the progress of the Presidential campaign, the complaint of the unprofitableness of trade is still to be heard, both from the manufacturer and the dealer, but they seem to be accommodating themselves more generally and willingly to a period of narrow profits and close economy. There are at present no indications of a drought in any part of the country, yet the position may be entirely changed a month hence, unless there should be a plentiful rainfall to swell the drying streams. We hear that several of the principal New York and Philadelphia morning papers have recently renewed their contracts for paper for the ensuing six and twelve months, at prices within one-eighth of a cent of their former contract prices, the figures ranging between 5½@6c., according to quality. Among the number are the *Herald*, *Tribune*, *Times*, *Sun*, *World* and *Journal*.

THE STATIONERY MARKET.—Staple goods move slowly, and if this was not the duller period of the year, there would be great cause for uneasiness. As it is, dealers take a philosophical view of the situation, and the more enterprising try to make the best of things by doubling their efforts to increase the sales of goods. The trouble in Wall street a few weeks ago is having an effect on the stationery as well as other trades. It has caused banks to be more cautious in giving discounts, and as a result, many dealers whose paper has hitherto been carried by the banks have found themselves crippled at a time when they most need financial aid. Hence they are asking for longer time for the payment of bills, and this is causing a tightness all around. Added to this difficulty are a number of bad debts of long standing which there is no prospect of ever collecting. Dealers may therefore congratulate themselves that trade is no worse. In Fourth of July goods there is a steady movement. Prices are firm and show a tendency to rise. This is caused by many dealers, who sold at a sacrifice in the early part of the season, holding on to goods in the hope of forcing prices up. There is nothing doing in plush goods except in some varieties of a staple character, for which there is said to be a brisk demand. The season has opened up well in campaign goods, for which there is every prospect of being a good demand during the political contest.

Our Patent Laws as Related to Agriculture, Arts and Industries.

By JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

(Continued.)

AMERICAN JURISTS ON THE EQUITY OF PATENTS.

Let me venture further quotations, this time from American writers, which illustrate the same truths in different phrase. A recent text writer has formulated the same truth in other terms as follows: "A patent for a useful invention is not, under our law or the law of England, a grant of a monopoly in the sense of the old common law. It is the grant by the government to the author of a new and useful invention of the exclusive right for a term of years of practising that invention. The consideration for which this grant is made by the public is the benefit to society resulting from the invention, which benefit flows from the inventor to the public in two forms, firstly, by the immediate practice of the invention under the patent, and, secondly, by the practice of the invention, or the opportunity to practice it, which becomes the property of the public on the expiration of the patent. As the exercise of the invention is wholly within the control of him who made it, who may confine his secret entirely within his own breast, it is apparent that his consent to make it known and available to others, and finally to surrender it to the public, becomes a valuable consideration, for which, upon principles of natural justice, he is entitled to receive compensation in some form from the public to whom that consideration passes." And Chancellor Kent, the great commentator on constitutional law, speaks of patent cases as placed "peculiarly under the patronage and protection of Congress," and as "involving some of the dearest and most valuable rights which society acknowledges and the constitution itself meant to favor."

So much for the equity of patents to inventors and their legal representatives. The same reasoning that would destroy these rights would destroy the title-deeds of the farmer's homestead, or his right to the exclusive ownership of the profits of his corn-field. The right is founded in natural justice, and, therefore, properly administered, can be productive only of good results.

POLICY OR EXPEDIENCY OF PATENTS.

I believe that what is right as a principle is always right as a practice, and the inherent justice of patent laws is in itself evidence of their propriety as an element of national policy. But it is often plausibly reasoned that a principle may be undeniable in the abstract, and yet inexpedient in its practical application; and to meet any such averment that may be made concerning the matter in hand, let us proceed to judge the patent laws from the lower standpoint of expediency, pure and simple—does it pay the public to reward inventors by means of patents, and, if so, why?

The question may be answered *a priori* by reference to one of the commonest and simplest attributes of human nature—that no man will willingly sow that another may reap.

Every invention requires experiment to perfect it, outlay of time and money to prepare for its manufacture, business management to bring it properly into the market, and all before any returns can be received. The cost of all this is very great, and it is plain that no man in his right mind would incur it merely that others, as soon as he had overcome all difficulties, might appropriate his plans, profit by his experience, and, having been at no outlay themselves, undersell him in the market in the very improvement he had made. This is always the result when the inventor is kept from the protection of a patent. The inventor of the collodion process of photography by some means failed to secure a patent on his invention. It proved worth tens of thousands to the profession, and hundreds of thousands to the world. The inventor died in beggary, and was buried by charity. How many, with such examples before their eyes, would invent, or, inventing, perfect their improvements and give them to the world if there were no patent laws to assure them of the prospect of remuneration, of a means of escaping the fate of the unfortunate inventor I have just mentioned. To quote again from Herbert Spencer: "Just in so far as the benefits likely to accrue to the inventor are precarious will he be deterred from carrying out his plans. If," thinks he to himself, "others are to enjoy the fruits of these wearisome studies and these numberless experiments, why should I continue them?" These words of the savant are true; and if we can imagine the advantages that should accrue to the inventor not only made precarious, but absolutely destroyed, as they would be by any curtailment of the scope or spirit of the patent laws, inventors would cease to invent, and the wheels of progress would stand still. Switzerland has never had a patent law, and, notwithstanding her population of artisans, has not contributed one great invention to the world in two hundred years; and were it not for improvements appropriated from lands where patent laws exist, her manufactures would be as stereotyped as the manual methods she employs. Holland repealed her patent law, and to this day her ditches and canals are dredged by hand, when our dredging machinery would do it in one-hundredth of the time. Prussia has a patent law that, in its narrowness and injustice, is a disgrace to the brave German name; and her poor people, kept down to the old primitive modes of labor, harness their women with the oxen before the plow, and drive both together in the furrow. Such are some of the results when inventors cease to invent, as cease they do, and cease they will, when deprived of the protection of patent laws.

EDUCATIONAL EFFECTS OF PATENT LAWS.

We must not forget, moreover, in estimating the advantages of a wise system of encouragement to originators of good improvements, that the faculty of invention, like that of music, or speech, or writing, like the memory or the will, and every other attribute of the human mind, is one that grows strong and apt and clear by exercise. An inventor's first attempts are commonly crude and imperfect, but by constant exercise the inventive faculty

is developed until he is capable of making, almost by intuition, improvements that would require months and years of labor from men not trained to this special branch of intellectual work. Hence there are hundreds and thousands of men in this country who, led on by the promise held out by the granting of patents, have educated themselves to invention, just as thousands of others have been educated to law or medicine. Do away with patent laws, and this education of men to the special work of improving arts and industries

would cease, just as the education of men for the other profession I have mentioned would cease if lawyers and doctors were not paid for their services; just as modern agriculture would come to an end if the farmer should be taught that the law would refuse to protect his right to the product of his labor and skill; just as the literature of the age would dwindle down and become slavish and mean, if there were no copyright laws to protect authors in the sale of what they have written.

(To be continued.)

N. W. Walsh, manager of the New York Blank-Book Company, is traveling through the West in the interest of his firm, and he reports a good outlook for fall business in blank-books.

Grosvenor & Harger, Dubuque, Iowa, offer their entire stock of Horsman's archery at 60 per cent. discount—all in perfect condition and in good quantities.

The Silicate Book Slate Company is making arrangements to bring out a new line of black-boards for the fall trade. More will be said about these goods when they are put on the market. They will come in two sizes—2 by 3 feet and 18 by 24 inches.

Attention is invited to the advertisement in another column to the well-known house of Charles J. Cohen, Philadelphia. Mr. Cohen has recently returned from Europe, and gives assurance of a well-assorted stock of novelties in school stationery for the season now opening.

Milton H. Smith & Co., Rochester, N. Y., who make a specialty of illuminated society address cards, announce a reduction in the

prices of their goods. Their line comprises over two hundred designs, embracing all societies.

The largest printing establishment in the South, and one of the largest in the country, is that of Isaac Friedenwald, of Baltimore, Md.

Mr. Friedenwald started in business six years ago and has now over twenty printing and lithographing machines.

Moore & Warren, although well equipped with a large stock of paging, numbering, and perforating machines, have just completed an

extensive improvement by the addition of steam machinery. The application of steam machinery for this class of work is their own invention, for which they have applied for patents. They offer the trade special inducements on this class of work.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat.

Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

G. Gennert, by same, 4 cs.

The first English version of the entire Bible is that "faithfully and truly translated out of Douche and Latyn into Englysche," by Myles Coverdale. It is supposed to have been printed at Antwerp in 1535 by Jacob von Meteren, but no perfect copy of it is known to be in existence. Even in an imperfect condition the work is very rare, and seldom is a copy to be seen with so few defects as the one in the Astor Library. It comes from Lord Hampton's library, and is a stately folio volume, with two columns of black letter to the page, bound in old black morocco.

The famous Complutensian Polyglot, as the oldest polyglot edition ever printed of the Bible is called, will always remain a monument to an early patron of typography. It was Cardinal Ximenes, who first ordered and defrayed the expenses of printing an edition of the Scriptures, comprising Hebrew, Chaldaic, and Greek versions with three Latin translations. Fifty thousand ducats were expended upon the work which required no less than fifteen years for its successful completion, and it is related, that in order to superintend this great undertaking, Cardinal Ximenes made himself master of Hebrew, when he had passed the age of sixty. But 600 copies of this splendid work were printed, 1514, 1515, and 1517; the one added to the Astor Library is complete, and consists of six folio volumes, bound in purple morocco with gilt edges.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Obituary.

ANDREW L. PUDNEY.

Andrew L. Pudney died in Williamsburg, N. Y., on Friday of last week, seventy-seven years old. He was the head of the former publishing firm of Pudney & Russell, which published the "Prince of the House of David" books, written by the Rev. J. A. Ingraham, who, before he became a minister, wrote "Lafitte, the Pirate of the Gulf." The firm failed at the outbreak of the war.

GEORGE McDUGAL.

George McDougal, of the firm of Smith & McDougal, printers, of 82 Beekman street, New York, died on Sunday last. He was born in Mulberry street sixty years ago, and served his apprenticeship with W. E. Dean. Upon the death of Thomas B. Smith, Mr. McDougal became a partner of Mr. Smith's son twenty years ago. He supervised the publication of a great number of school books.

John Warford, publisher, Perry, Ia., is dead.

The S. Y. Beach Paper Company, Seymour, Mass., has brought an action to recover \$300 for goods against the Fountain Pen Company, of New York.

William Bishop Carr, a base-ball manufacturer, thirty-four years old, hanged himself on Wednesday morning in his cellar, at 107 North Portland avenue, Brooklyn. He had for some time been under the treatment of Dr. A. W. Shepard for alcoholic insomnia.

A REWARD OF \$100.

We are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated.

Paper Files.

The engravings herewith show two styles of paper files, made of the best quality of steel wire. Style No. 1 has a hook at the top, which prevents papers from coming off. This is of great importance when the file is

No. 1.

well filled with papers. It adjusts itself by merely pushing back the loop after putting on the paper. Its merits are thus apparent.

With style No. 2 any paper may be removed for reference without disturbing the others, by transferring to the upper arm, till the one de-

No. 2.

sired is reached, when it may be taken off by separating the arms. A paper once filed is secure, and can only be removed by disjoining the loop from the upper arm. The file adjusts itself by merely pushing back the loop after putting on the paper. It is made in three sizes from best quality heavy steel twisted wire, plated.

These goods are not absolutely new, but they are in large demand just now. R. R. Watson supplies the trade.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

- FIRST.—It handles buckled paper as well as flat, and runs the work through straight.
- SECOND.—It has the best system for rapid and perfect feed.
- THIRD.—It has the best system for gauges, and can be more quickly adjusted.
- FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.
- FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.
- SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.
- SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.
- EIGHTH.—Each machine has a scoring cutter attached.
- NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

An Ink-Maker's Downfall.

Samuel Lewis, better known as E. A. Folger, was arrested by a Boston detective on Friday of last week, at Baltimore, Md., on the charge of forgery. He had just been discharged from the Maryland Penitentiary, where he had served two years for a similar offense. The prisoner is forty years old. He was at one time a wealthy and prominent ink manufacturer of Brooklyn, N. Y. About six years ago his habits, which up to that time had been of the best, commenced to change, and he began to give less attention to his business. His customers from all parts of the country began to stop purchasing from him, owing to the inferior quality of the ink he was then manufacturing. His finances gradually dwindled down until he had nothing left. It was then he commenced his criminal career. He went to Worcester, Providence and other cities, and forged the names of some of his former customers to checks, which he passed. A little over two years ago he went to Boston and passed four forged checks, amounting to over \$200, on Goldthwaite & Co., carpet dealers, on Washington street; Whitten & Co., furniture dealers; the Boston Lead Company, and another large firm. On all the checks passed in Boston he forged the name of a stationer named C. Hammond, at the corner of Summer and Federal streets, who was also a customer of his. He then left the city and went to Baltimore, where after a few weeks he was arrested for forgery, with the result stated.

A superb specimen of early typography lately added to the Astor Library is the "Biblia Sacra Latina of 1462," the first edition of the Bible printed with a date. Like the "Durandus," this copy of the Bible comes from the Sunderland Library, and it is perfect in every respect. It is printed upon vellum in two folio volumes, with double columns, and forty-eight lines in each column. The size is 16 $\frac{3}{4}$ by 11 $\frac{3}{4}$ inches; the headings of the books, the numbers of the chapters, and the small capitals, are painted in red and blue, while the large initials are tastefully illuminated in red, white and blue. The colophon is in red ink with the devices of the double shield in red beneath, and it is this colophon with the date and the immortal names of Johann, Fust and Peter Schöffer, that gives this Bible a certain superiority over the thirty-six and forty-two line Bibles which came before it from the same first printing-press of the world. The copy is bound in old crimson morocco and has gilt edges.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size 4 $\frac{1}{2}$ x2 $\frac{3}{4}$ retail at 50 cents each.
6 $\frac{1}{4}$ x3 $\frac{3}{4}$ \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet. ERASE and REWRITE FOUR TIMES on same spot.

Each sheet is water-marked with name and date.
